Independent Auditors' Report**

DECLARATION OF CONSOLIDATION OF FINANCIAL STATEMENTS OF AFFILIATES

The companies required to be included in the consolidated financial statements of affiliates in accordance with the “Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises” for the year ended December 31, 2025 are all the same as the companies required to be included in the consolidated financial statements of parent and subsidiary companies as of and for the year ended December 31, 2025 as provided in International Financial Reporting Standard No. 10 “Consolidated Financial Statements”. Relevant information that should be disclosed in the consolidated financial statements of affiliates has all been disclosed in the consolidated financial statements of parent and subsidiary companies as of and for the year ended December 31, 2025. Hence, we did not prepare a separate set of consolidated financial statements of affiliates for the year ended December 31, 2025.

Very truly yours,

LUCKY CEMENT CO.

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Lucky Cement Co.

Opinion

We have audited the accompanying consolidated financial statements of Lucky Cement Co. and its subsidiaries (collectively referred to as the “Group”), which comprise the consolidated balance sheets as of December 31, 2025 and 2024, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including material accounting policy information (collectively referred to as the “consolidated financial statements”).

In our opinion, based on our audits and the report of other auditors (please refer to Other Matter - Reference to the Audits of Other Auditors), the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2025 and 2024, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and enforced by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion based on our audits and the report of the other auditors.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2025. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matter identified during our audit of the consolidated financial statements for the year ended December 31, 2025 is as follows:

Occurrence of Sales Revenue from Key Customers

The Group's sales revenue mainly comes from sales of cement, stone materials, and other cement products. The sales revenue from key customers, new major customers or major customers with higher sales revenue increased in 2025, which amounted to NT\$966,681 thousand. Therefore, we deemed this sales revenue a key audit matter.

Refer to Note 4(1) to the consolidated financial statements for accounting policies on revenue recognition and Note 26(a) for the disclosures related to operating revenue.

The key audit matter procedures we performed were as follows:

1. We obtained an understanding of the internal control procedures over the sales revenue and assessed the design and effectiveness of the implementation of internal controls.
2. We obtained the summary of sales to the key customers for the year, tested the completeness of the summary, selected samples from the summary, examined supporting documents, confirm the collection of payment and verified the occurrence of sales.

Other Matter

We have also audited the parent company only financial statements of Lucky Cement Co. as of and for the years ended December 31, 2025 and 2024, on which we have issued an unmodified opinion.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRS, IAS, IFRIC, and SIC endorsed and enforced by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2025 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Chao-Mei Chen and Chiang-Hsun Chen.

LUCKY CEMENT CO. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2025 AND 2024

(Amounts in Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

Lucky Cement Co. (the “Company”) was established in 1974; its main business is production and sale of Portland cement. The Company listed its shares on the Taiwan Stock Exchange in June 1990.

The consolidated financial statements of the Company and its subsidiaries (collectively, the “Group”) are presented in Company’s functional currency, the New Taiwan dollar.

2. APPROVAL OF CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Company’s board of directors on March 16, 2026.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the “IFRS Accounting Standards”) endorsed and ENFORCED by the Financial Supervisory Commission (FSC)

The initial application of the amendments to the IFRS Accounting Standards endorsed and enforced by the FSC did not have material impact on the Group’s accounting policies.

- b. The IFRS Accounting Standards endorsed by the FSC for application starting from 2026

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB
Amendments to IFRS 9 and IFRS 7 “Amendments to the Classification and Measurement of Financial Instruments”	January 1, 2026
Amendments to IFRS 9 and IFRS 7 “Contracts Referencing Nature-dependent Electricity”	January 1, 2026
Annual Improvements to IFRS Accounting Standards - Volume 11	January 1, 2026
IFRS 17 “Insurance Contracts” (including the 2020 and 2021 amendments to IFRS 17)	January 1, 2023

As of the date the consolidated financial statements were authorized for issue, the Group had assessed that the application of other standards and interpretations will not have a material impact on the Group’s financial position and financial performance.

- c. The IFRS Accounting Standards in issue but not yet endorsed and issued into effect by the FSC

New, Amended and Revised Standards and Interpretations	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”	To be determined by IASB
IFRS 18 “Presentation and Disclosure in Financial Statements”	January 1, 2027 (Note 2)
IFRS 19 “Subsidiaries without Public Accountability: Disclosures” (including the 2025 amendments to IFRS 19)	January 1, 2027
Amendments to IAS 21 “Translation to a Hyperinflationary Presentation Currency”	January 1, 2027

Note 1: Unless stated otherwise, the above IFRS Accounting Standards are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: On September 25, 2025, the FSC announced that IFRS 18 will take effect starting from January 1, 2028. Domestic entities could elect to apply IFRS 18 for an earlier period after the endorsement of IFRS 18 by the FSC.

IFRS 18 “Presentation and Disclosure in Financial Statements” and consequential amendments

IFRS 18 will supersede IAS 1 “Presentation of Financial Statements”. The main changes comprise:

- To classify items of income and expenses presented in the statement of profit or loss shall be classified into the operating, investing, financing, income taxes and discontinued operations categories, the Group shall assess whether it has specified main business activities of investing in particular types of assets and providing financing to customers.
- The statement of profit or loss shall present totals and subtotals for operating profit or loss, profit or loss before financing and income taxes and profit or loss.
- Provides guidance to enhance the requirements of aggregation and disaggregation: The Group shall identify the assets, liabilities, equity, income, expenses and cash flows that arise from individual transactions or other events and shall classify and aggregate them into groups based on shared characteristics, so as to result in the presentation in the primary financial statements of line items that have at least one similar characteristic. The Group shall disaggregate items with dissimilar characteristics in the primary financial statements and in the notes. The Group labels items as “other” only if it cannot find a more informative label.
- Disclosures on Management-defined Performance Measures (MPMs): When in public communications outside financial statements and communicating to users of financial statements management’s view of an aspect of the financial performance of the Group as a whole, the Group shall disclose related information about its MPMs in a single note to the financial statements, including the description of such measures, calculations, reconciliations to the subtotal or total specified by IFRS Accounting Standards and the income tax and non-controlling interests effects of related reconciliation items.

In addition, the following consequential amendments have been made to IAS 7 “Statement of Cash Flows”:

- The Group shall use operating profit or loss as the starting point when presenting cash flows from operating activities under the indirect method.

- Interest and dividends received by the Group shall be classified as investing activities, while interest and dividends paid shall be classified as financing activities. However, if, after assessment, the Group has a specific main operating activity, it shall determine how to classify dividends received, interest received and interest paid in the statement of cash flows by referring to how it classifies dividend income, interest income and interest expense in the statement of profit or loss. The total of each of these cash flows shall be classified in a single category in the statement of cash flows.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the other impacts of the above amended standards and interpretations on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

a. Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRS Accounting Standards as endorsed and issued into effect by the FSC.

b. Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value, and net defined benefit liabilities (assets) which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for an asset or liability.

c. Classification of current and non-current assets and liabilities

Current assets include:

- 1) Assets held primarily for the purpose of trading;
- 2) Assets expected to be realized within 12 months after the reporting period; and
- 3) Cash unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Current liabilities include:

- 1) Liabilities held primarily for the purpose of trading;
- 2) Liabilities due to be settled within 12 months after the reporting period, even if an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the consolidated financial statements are authorized for issue; and

- 3) Liabilities for which the Group does not have the substantial right at the end of the reporting period to defer settlement for at least 12 months after the reporting period

Assets and liabilities that are not classified as current are classified as non-current.

The Group is engaged in the construction business, which has an operating cycle of over 1 year. The normal operating cycle applies when considering the classification of the Group's construction-related assets and liabilities.

d. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e., its subsidiaries). Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of comprehensive income from the effective dates of acquisitions up to the effective dates of disposals, as appropriate. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those of the Group. All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When the Group loses control of a subsidiary, a gain or loss is recognized in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and any investment retained in the former subsidiary at its fair value at the date when control is lost and (ii) the assets (including any goodwill) and liabilities and any non-controlling interests of the former subsidiary at their carrying amounts at the date when control is lost. The Group accounts for all amounts recognized in other comprehensive income in relation to that subsidiary on the same basis as would be required had the Group directly disposed of the related assets or liabilities.

Refer Note 12, Note 39 and Table 6 for detailed information on subsidiaries (including percentages of ownership and main businesses).

e. Foreign currencies

Transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the year in which they arise.

Non-monetary items denominated in foreign currencies that are measured at fair value are retranslated at the rates prevailing at the date when the fair value is determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary item denominated in a foreign currency and measured at historical cost is stated at the reporting currency as originally translated from the foreign currency.

For the purpose of presenting consolidated financial statements, the financial statements of the Company's foreign operations that are prepared using functional currencies which are different from the currency of the Company are translated into the presentation currency, the New Taiwan dollar, as follows: Assets and liabilities are translated at the exchange rates prevailing at the end of the reporting period; and income and expense items are translated at the average exchange rates for the period. The resulting currency translation differences are recognized in other comprehensive income (attributed to the owners of the Company and non-controlling interests as appropriate).

f. Inventories

Inventories consist of raw materials, supplies and spare parts, finished goods, work-in-process, merchandise and real estate under development and real estate to be developed and are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. The net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at the weighted-average cost on the balance sheet date. The construction cost of property inventories is calculated according to the proportion of an area to the total area of a building floor; the principle is to match construction cost with property sales revenue; operating costs are recognized at the end of the reporting period.

Land for development is classified as real estate to be developed while being prepared for construction, and classified as real estate under development when it is actively being developed and has obtained a construction permit.

g. Property, plant and equipment

Property, plant and equipment are initially measured at cost and subsequently measured at cost less accumulated depreciation and accumulated impairment loss.

Except for freehold land which is not depreciated, the depreciation of property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each reporting period, with the effects of any changes in the estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

h. Investment properties

Investment properties are properties held to earn rental and/or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss.

Depreciation is recognized using the straight-line method.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

i. Impairment of property, plant and equipment, investment properties and right-of-use asset

At the end of each reporting period, the Group reviews the carrying amounts of its property, plant and equipment, investment properties and right-of-use asset to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the individual cash-generating units on a reasonable and consistent basis of allocation.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the corresponding asset, cash-generating unit or assets related to contract costs is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized on the asset, cash-generating unit or assets related to contract costs in prior years. A reversal of an impairment loss is recognized in profit or loss.

j. Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

a) Measurement category

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost and investments in equity instruments at FVTOCI.

i. Financial asset at FVTPL

Financial assets are classified as at FVTPL when such financial assets are mandatorily classified as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any dividend or interest earned on the financial asset. Fair value is determined in the manner described in Note 32 Instruments.

ii. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash, financial assets at amortized cost, Notes receivable, trade receivables and other receivables, etc. are measured at amortized cost, which equals to gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

- i) Purchased or originated credit-impaired financial asset, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset; and
- ii) Financial asset that is not credit impaired on purchase or origination but has subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

iii. Investments in equity instruments at FVTOCI

On initial recognition, the Group may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, it will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

b) Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including trade receivables), investments in debt instruments that are measured at FVTOCI.

The Group always recognizes lifetime expected credit losses (ECLs) for trade receivables. For all other financial instruments, the Group recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For internal credit risk management purposes, the Group considers the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Group):

- i. Internal or external information shows that the debtor is unlikely to pay its creditors.
- ii. Financial asset is more than 181 days past due unless the Group has reasonable and corroborative information to support a more lagged default criterion.

The Group recognizes impairment loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

c) Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss, and the cumulative gain or loss which had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

2) Financial liabilities

a) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method.

b) Derecognition of financial liabilities

The difference between the carrying amount of a financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

k. Provisions

Provisions are measured at the best estimate of the discounted cash flows of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Carbon fee provision

In accordance with the Regulations Governing the Collection of Carbon Fees and related regulations of the ROC, the carbon fee provision is recognized and measured on the basis of the best estimate of the expenditure required to settle the obligation for the current year.

l. Revenue recognition

The Group identifies the contract with the customers, allocates the transaction price to the performance obligations, and recognizes revenue when performance obligations are satisfied.

Revenue from sale of products

Revenue from sale of products comes from sales of cement, stone materials and other cement products. Sales of cement, stone materials and other cement products are recognized as revenue when the products are shipped because it is the time when the customer has full discretion over the manner of distribution and price to sell the products, has the primary responsibility for sales to future customers and bears the risks of obsolescence. Trade receivables are recognized concurrently. The advance receipts before the delivery of goods are recognized as contract liabilities and reclassified to revenue after the goods are transferred to the customers.

m. Leases

At the inception of a contract, the Group assesses whether the contract is, or contains, a lease.

1) The Group as lessor

Lease payments from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases.

2) The Group as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for by applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the lessee's incremental borrowing rate will be used.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the consolidated balance sheets.

n. Borrowing costs

Borrowing costs directly attributable to an acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Other than those stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

o. Employee benefits

1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as expense when employees have rendered service entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost and past service cost) and net interest on the net defined benefit liabilities (assets) are recognized as employee benefits expense in the period in which they occur or when the plan amendment or curtailment occurs. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which it occurs. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liabilities (assets) represent the actual deficit (surplus) in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

p. Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

Income tax payable (recoverable) is based on taxable profit (loss) for the year determined according to the applicable tax laws of each tax jurisdiction.

According to the Income Tax Act in the ROC, an additional tax on unappropriated earnings is provided for in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences and unused loss carryforwards to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are recognized only to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and such temporary differences are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets are realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3) Current tax and deferred tax for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

5. MATERIAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, management is required to make judgments, estimations and assumptions on the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

When developing material accounting estimates, the Group considers the possible impact of climate change and related government policies and regulations on the cash flow projection, growth rates, discount rates, profitabilities and other relevant material estimates. The estimates and underlying assumptions are reviewed on an ongoing basis.

Key Sources of Estimation Uncertainty

Write-down of inventories (including real estate under development)

The net realizable value of inventories is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. The estimation of net realizable value is based on current market conditions and historical experience in the sale of product of a similar nature. Changes in market conditions may have a material impact on the estimation of the net realizable value.

6. CASH

	2025	2024
<u>Current</u>		
Domestic investments - ordinary shares	<u>\$ 98,365</u>	<u>\$ 98,511</u>
<u>Non-current</u>		
Domestic investments - ordinary shares	<u>\$ 11,459</u>	<u>\$ 10,372</u>

The aforementioned information for investments, please refer to Note 39 and Table 3 “Significant Marketable Securities Held”.

For other relevant information on financial assets measured at FVTOCI, please refer to Note 25(e) and Note 32.

These investments in equity instruments are held for strategic purposes. Accordingly, the management elected to designate these investments in equity instruments as at FVTOCI as they believe that recognizing fluctuations in these investments' fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes.

For the years ended December 31 2024, the Group disposed of partial common stock at fair value of \$117,854 thousand, and related other equity - unrealized valuation gain or loss on financial assets at fair value through other comprehensive loss of \$14,780 thousand was transferred to retained earnings.

For the years ended December 31, 2025 and 2024, the Group the dividend income of \$3,163 thousand and \$2,219 thousand.

9. FINANCIAL ASSETS AT AMORTIZED COST

	December 31

a. Notes receivable

The average credit period of sales of products was 60-150 days. No interest is charged on notes receivable. In order to minimize credit risk, the management of the Group has delegated a team for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the year to ensure that adequate allowance is made for possible irrecoverable amounts.

Notes receivable of the Group are not overdue as of the balance sheet date, the Group assesses that no allowance for loss on notes receivable is required as of December 31, 2025 and 2024.

Please refer to Note 34 for information relating to notes receivable pledged as security.

b. Trade receivables

The average credit period of sales of products is 60-150 days. No interest is charged on trade receivables. In order to minimize credit risk, the management of the Group has delegated a team for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate allowance is made for possible irrecoverable amounts.

The Group measure the loss allowance for trade receivables at an amount equal to lifetime ECLs. The expected credit losses on trade receivables are estimated using a provision matrix prepared by reference to the past default experience of the customer, the customer's current financial position, as well as the GDP forecasts and industry outlook. The Group's provision matrixes are prepared by reference to if the customer were in severe financial difficulty. The Group recorded a 100% of loss allowance when there is evidence indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery; If the customer were not in severe financial difficulty, as the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of trade receivables and overdue receivables based on the Group's provision matrix.

c. Other receivables

Other receivables mainly include proceeds from sales of securities and guarantee deposits. The Group adopted a policy of only dealing with high credit rating entities and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. Credit rating information is obtained from its own historical trading records to rate its customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored.

The Group considers the current financial condition of debtors to determine the expected credit losses for debt instrument investments. As December 31, 2025 and 2024, the expected credit loss rate of other receivables was both 0% consistently.

22. PROVISIONS

	December 31	
	2025	2024
<u>Current</u>		
Carbon fees	<u>\$ 11,058</u>	<u>\$ -</u>

Starting from 2025, the Group recognizes the carbon fee provision in accordance with the Regulations Governing the Collection of Carbon Fees and related regulations of the ROC. On January 26, 2026, the Group obtained approval for the self-determined reduction plan from the competent authority and assessed that it is probable to obtain approval from the competent authority for the recognition as an industry with a high carbon leakage risk. The Group has met the designated target of the current year and expects to submit the implementation progress report of the self-determined reduction plan for the current year before April 30, 2026; therefore, the carbon fee provision was calculated based on the preferential rate and the emission adjustment coefficient applicable to the industry with high carbon leakage risk.

23. RETIREMENT BENEFIT PLANS

a. Defined contribution plans

The Group adopted the pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, the entities make monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

b. Defined benefit plans

The defined benefit plans adopted by the Company and Luckicon Ready-mixed Co. in accordance with the Labor Standards Act is operated by the government of the ROC. Pension benefits are calculated on the basis of the length of service and average monthly salaries of the 6 months before retirement. The Company and Luckicon Ready-mixed Co. contribute amounts equal to 2% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name. Before the end of each year, the Group assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, the Group is required to fund the difference in one appropriation that should be made before the end of March of the next year. The pension fund is managed by the Bureau of Labor Funds, Ministry of Labor (the "Bureau"); the Group has no right to influence the investment policy and strategy.

The amount of the Group's defined benefit plan is included in the balance sheets as follows:

	December 31	
	2025	2024
Present value of funded defined benefit obligation	\$ 136,593	\$ 137,142
Fair value of plan assets	<u>(144,553)</u>	<u>(146,189)</u>

An analysis by function of the amounts recognized in profit or loss in respect of the defined benefit plan is as follows:

	For the Year Ended December 31	
	2025	2024
Operating costs	\$ 115	\$ 400
Selling and marketing expenses	38	91
General and administrative expenses	<u>26</u>	<u>157</u>
	<u><u>\$ 179</u></u>	<u><u>\$ 648</u></u>

Through the defined benefit plans under the Labor Standards Act, the Group is exposed to the following risks:

- 1) Investment risk: The plan assets are invested in domestic and foreign equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets shall not be below the interest rate for a 2-year time deposit with local banks.
- 2) Interest risk: A decrease in the government bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plans' assets investments.
- 3) Salary risk: The present value of the defined benefit obligation is calculated using the future salaries of plan participants. As such, an increase in the salaries of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations are as follows:

	December 31	
	2025	2024
Discount rate	1.250%-1.375%	1.500%
Expected rate of salary increase	1.25%-1.50%	1.25%-1.50%

If possible reasonable changes in each of the significant actuarial assumptions will occur and all other assumptions will remain constant, the present value of the defined benefit obligation will increase (decrease) as follows:

	December 31	
	2025	2024
Discount rate		
0.25% increase	<u>\$ (1,558)</u>	<u>\$ (1,835)</u>
0.25% decrease	<u>\$ 1,591</u>	<u>\$ 1,876</u>
Expected rate of salary increase		
0.25% increase	<u>\$ 1,559</u>	<u>\$ 1,842</u>
0.25% decrease	<u>\$ (1,535)</u>	<u>\$ (1,811)</u>

The above sensitivity analysis may not be representative of the actual changes in the present value of the defined benefit obligation as it is unlikely that changes in assumptions will occur in isolation of one another as some of the assumptions may be correlated.

	December 31	
	2025	2024
Expected contributions to the plans for the next year	<u>\$ 1,074</u>	<u>\$ 1,143</u>
Average duration of the defined benefit obligation	4.7-7.8 years	5.3-8.2 years

24. MATURITY ANALYSIS OF ASSETS AND LIABILITIES

The current/non-current classification of the Group's assets and liabilities relating to the construction and development business was based on its operating cycle. <u>May be used to offset a deficit, distributed as cash dividends or transferred to share capital*</u>		
The difference between the consideration received or paid and the carrying amount of the subsidiaries' net assets during actual acquisition	\$ 14	\$ 10
<u>May be used only to offset a deficit</u>		
Changes in percentage of ownership interests in subsidiaries	<u>8</u>	<u>8</u>
	<u>\$ 22</u>	<u>\$ 18</u>

- * Such capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).

c. Retained earnings and dividend policy

The Company's Articles of incorporation ("Articles"), which stipulates that the Company shall consider distribution of earnings or appropriation of earnings to a reserve at the end of the first half of the fiscal year or at the end of the fiscal year. The business report and financial statements should be submitted to the audit committee for review, and to the board of directors for resolution.

Under the dividends policy as set forth in the Articles, where the Company made a profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as legal reserve 10% of the remaining profit, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with any undistributed retained earnings shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonuses to shareholders. However, these stipulations shall not apply when the legal reserve amount has reached the authorized capital. The Company should also follow Article 240 of the Company Act in the case of distribution of earnings in the form of shares; in the case of distribution of earnings in cash, the board of directors is authorized to resolve the distribution of cash dividends; the resolution should be adopted by a majority vote in the meeting of the board of directors attended by two-thirds of all the directors, and then reported to the shareholders' meeting.

According to the Articles, the Company should distribute earnings or appropriate earnings to a reserve based on the financial statements audited or reviewed by an independent accountant.

The Articles stipulate that in the allocation of annual earnings, the Group shall first appropriate 10% of earnings to legal reserve and then appropriate to special reserve amount to cover deduction items in the equity, payment of business tax and to make up for past annual loss. From the remaining amount after the above allocation plus 40%-80% of unappropriated earnings in the previous year, no distribution will be made if the amount is less than NT\$0.1 per share but will be retained in the unappropriated earnings. The board of directors shall propose distribution of dividends and the shareholders in their meeting shall approve the proposal. Refer to Note 27 (h), employee benefits, for the revised policy on the compensation of employees and remuneration of directors.

The appropriation and distribution of earnings and capital surplus as cash dividend or share dividend shall be subject to the real profit and fund situation in the current year, with consideration of fund for investment and possible dilution of earnings per share. The allocation for share dividend shall be limited to 20% of the issued shares. In case there is deduction item in equity, the deduction item shall be first offset with earnings or capital surplus before making the appropriation and allocation. When equity deduction item is reversed, the reversed amount shall be allocated to capital surplus. The allocation of capital surplus shall be accounted in the current year and passed in the general meeting of shareholders in the next year.

When a special reserve is appropriated for cumulative net debit balance reserves from prior period, the special reserve is only appropriated from the prior unappropriated earnings.

Appropriation of earnings to the legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset deficits. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

On November 13, 2025 and November 12, 2024 the Company's board of directors adopted the results of operations for the first half of 2025 and 2024 and decided not to distribute dividends.

The appropriations of earnings for 2024 and 2023 were as follows:

	Appropriation of Earnings	
	For the Year Ended December 31	
	2024	2023

Cash dividends	\$ 303,554	\$ 404,738
Cash dividends per share (NT\$)	\$ 0.75	\$ 1.00

The above appropriations for cash dividends had been resolved by the Company's board of directors on May 9, 2025 and March 15, 2024, respectively; the appropriations of earnings had been resolved by the shareholders in their meetings on June 27, 2025 and June 18, 2024, respectively.

The appropriation of earnings and dividend per share for 2025 that were approved in the board of directors' meeting on March 16, 2026 were as follows:

	For the Year Ended December 31, 2025
Legal reserve	\$ 87,707
Special reserve	\$ 3,489
Cash dividends	\$ 404,738

h. Compensation of employees and remuneration of directors

The Company shall appropriate 3% and not less than 5% of the profit before tax and before deduction of compensation of employees and remuneration of directors in the current year. In accordance with the amendments to the Securities and Exchange Act in August 2024, the shareholders of the Company resolved the amendments to the Company's Articles at their 2025 regular meeting. The amendments explicitly stipulate the allocation of not less than 33% of the compensation of employees as compensation distributions for non-executive employees.

The compensation of employees (including non-executive employees) and the remuneration of directors for the years ended December 31, 2025 and 2024, which were approved by the Company's board of directors on March 16, 2026 and March 17, 2025, respectively, are as follows::

d. Income tax assessments

The income tax returns through 2023 of the Company, Luckicon Ready-mixed Co., Dasheng Enterprise, Luckyship Marine Co. and Fuyu Development Co., have been assessed by the tax authorities and there is no significant difference between the reported amounts and the assessed amounts.

29. EARNINGS PER SHARE

The earnings and the weighted-average number of ordinary shares outstanding used in the computation of earnings per share were as follows:

Net Profit

	<u>For the Year Ended December 31</u>	
	2025	2024
Net profit for the year	<u>\$ 880,657</u>	<u>\$ 493,938</u>

Earnings Per Share

	<u>(In Thousands of Shares)</u>	
	<u>For the Year Ended December 31</u>	
	2025	2024
Weighted average number of ordinary shares used in the computation of basic earnings per share	404,738	404,738

Compensation of employees	<u>2,561</u>	<u>1,533</u>
Weighted average number of ordinary shares used in the computation of diluted earnings per share	<u>407,299</u>	<u>406,271</u>

The Company may settle the compensation of employees in cash or shares; therefore, the Company assumes that the entire amount of the compensation will be settled in shares, and the resulting potential shares are included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

30. CASH FLOW INFORMATION

31. CAPITAL MANAGEMENT

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximizing the return to stakeholders through the optimization of the debt and equity balance. The overall strategy of the Group remains consistent.

The capital structure of the Group consists of net debt (borrowings offset by cash) and equity of the Group (comprising issued capital, reserves, retained earnings, other equity).

Key management personnel of the Group review the capital structure on regular basis. As part of this review, the key management personnel consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the key management personnel, in order to balance the overall capital structure, the Group may adjust the amount of dividends paid to shareholders, the number of new shares issued or repurchased, and/or the amount of public finance-debt or existing debt redeemed.

32. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments not measured at fair value

There is no significant difference between the carrying amount and fair value of the financial assets and financial liabilities which are not measured at fair value.

b. Fair value of financial instruments measured at fair value on a recurring basis

1) Fair value hierarchy

December 31, 2025

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL				
Mutual funds	\$ 12,225	\$ -	\$ -	\$ 12,225

Unlisted shares	-	-	11,459	11,459
	\$ 98,365	\$ -	\$ 11,459	\$ 109,824

December 31, 2024

	Level 1	Level 2	Level 3	Total
Financial assets at FVTPL				
Mutual funds	\$ 10,944	\$ -	\$ -	\$ 10,944
Financial assets at FVTOCI				
Investments in equity instruments				
Listed shares and emerging market shares	\$ 98,511	\$ -	\$ -	\$ 98,511
Unlisted shares	-	-	10,372	10,372
	\$ 98,511	\$ -	\$ 10,372	\$ 108,883

There were no transfers between Levels 1 and 2 in the current and prior years.

2) Reconciliation of Level 3 fair value measurements of financial instruments

For the year ended December 31, 2025

	Financial Assets at FVTOCI - Equity Instruments	
	For the Year Ended December 31	
	2025	2024
Balance on January 1	\$ 10,372	\$ 10,590
Recognized in other comprehensive income (included in unrealized valuation loss on financial assets at FVTOCI)	(3,343)	(218)
Additions	<u>4,430</u>	<u>-</u>
Balance on December 31	<u>\$ 11,459</u>	<u>\$ 10,372</u>

3) Valuation techniques and inputs applied for Level 3 fair value measurement

The asset approach and comparable listed companies approach were used to calculate the fair values of investments in domestic unlisted equity instruments.

The comparable listed companies approach takes into account the transaction prices of shares of listed companies in an active market, the value multiplier implicit in the price, and the liquidity discount when evaluating the fair value of the target company.

c. Categories of financial instruments

	December 31	
	2025	2024
<u>Financial assets</u>		
FVTPL		
Mandatorily classified as at FVTPL	\$ 12,225	\$ 10,944

Financial assets at FVTOCI		
Equity instruments	109,824	108,883
<u>Financial liabilities</u>		
Amortized cost (2)	3,149,392	4,094,185

1) The balances include financial assets at amortized cost, which comprise cash, financial assets at amortized cost, notes receivable, trade receivables, other receivables and refundable deposits.

2) The balances include financial liabilities at amortized cost, which comprise short-term borrowings, short-term bills payable, notes payable, accounts payable, other payables (excluding salaries, bonuses and taxes), long-term borrowings (including current portion) and guarantee deposits received.

d. Financial risk management objectives and policies

The Group's major financial instruments include equity investments, trade receivables, trade payables, borrowings and lease liabilities. The Group's corporate treasury function provides services to the business, coordinates access to domestic and international financial markets, and monitors and manages the financial risks relating to the operations of the Group through internal risk reports that analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk, interest rate risk), credit risk and liquidity risk.

1) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (a) below) and interest rates (see (b) below).

The exposure to market risk of the financial instruments of the Group and the management and measurement of the exposure have not changed.

a) Foreign currency risk

The carrying amounts of the Group's foreign currency denominated monetary assets (including those eliminated on consolidation) at the end of the year are set out in Note 38.

Sensitivity analysis

The Group is mainly exposed to the USD and JPY.

The following table shows the sensitivity analysis of the Group when the exchange rate of the New Taiwan dollar to the relevant foreign currency increases and decreases by 5%. The 5% sensitivity rate is used for reporting currency risk to key management personnel of the Group; the management believes it is the reasonably acceptable range of fluctuation of foreign currency rate. The positive (negative) amounts on the table below indicate an increase (decrease) in pre-tax income and equity amount when the New Taiwan dollar weakens (strengthens) by 5% relative to the relevant currency.

	Impact on Profit or Loss	
	For the Year Ended December 31	
	2025	2024
USD	\$ (76)	\$ (79)
JPY	(103)	(107)

The above analysis included cash in banks and financial assets at amortized cost denominated in USD and JPY which are outstanding at the end of the reporting period.

b) Interest rate risk

The carrying amounts of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the year were as follows:

	December 31	
	2025	2024
Cash flow interest rate risk		
Financial assets	\$ 440,076	\$ 538,185
Financial liabilities	2,575,092	3,372,951

Sensitivity analysis

The following sensitivity analysis shows the effect of a 25 basis points change in interest rates of non-derivative instruments at the balance sheet date. A 25-basis-point sensitivity is used in internal reports to key management personnel; it represents the reasonably possible change in interest rates acceptable to the management.

Had interest rates increased/decreased by 25 basis points, the profit before tax in 2025 and 2024 would have decreased/increased by \$5,338 thousand and \$6,889 thousand, respectively, with all other variables held constant; the non-derivative instruments include floating rate loan, demand deposit, time deposit and restricted asset.

2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. At the end of the year, the Group's maximum exposure to credit risk, which would cause a financial loss to the Group due to the failure of the counterparty to discharge its obligation could be equal to the total assets shown on the balance sheets.

The policy of the Group is to only trade with counterparties with high reputation, and to require sufficient guarantee to reduce the financial loss from default. The Group transacts with a large number of unrelated customers and thus, credit risk is not highly concentrated.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as a significant source of liquidity. The Group had available unutilized short-term bank loan facilities set out in (b) below.

a) Liquidity and interest rate risk tables for non-derivative financial liabilities

The following table details the Group's remaining contractual maturities for its non-derivative financial liabilities with agreed upon repayment periods. The table has been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group is required to pay.
