INDEPENDENT AUDITORS' REPORT

The Board of Directors and Stockholders
Yulon Nissan Motor Company, Ltd.

We have audited the accompanying balance sheets of Yulon Nissan Motor Company, Ltd. as of December 31, 2014 and 2013, and the related statements of comprehensive income, changes in equity and cash flows for the years ended December 31, 2014 and 2013. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred in the first paragraph present fairly, in all material respects, the financial position of Yulon Nissan Motor Company, Ltd. as of December 31, 2014 and 2013, and its financial performance and its cash flows for the years ended December 31, 2014 and 2013, in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

IFRIC 21 “Levies”	January 1, 2014

(Concluded)

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual periods beginning on or after their respective effective dates.

Note 2: The amendment to IFRS 2 applies to share-based payment transactions with grant date on or after July 1, 2014; the amendment to IFRS 3 applies to business combinations with acquisition date on or after July 1, 2014; the amendment to IFRS 13 is effective immediately; the remaining amendments are effective for annual periods beginning on or after July 1, 2014.

Note 3: Prospectively applicable to transactions occurring in annual periods beginning on or after January 1, 2016.

Note 4: The amendment to IFRS 5 is applied prospectively to changes in a method of disposal that occur in annual periods beginning on or after January 1, 2016; the remaining amendments are effective for annual periods beginning on or after January 1, 2016.

The initial application of the above New IFRSs, whenever applied, would not have any material impact on the Company’s accounting policies.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

The accompanying financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (the “Regulations”).

Basis of Preparation

The financial statements have been prepared on the historical cost basis except for financial instruments that are measured at fair values. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

When preparing its financial statements, the Company used equity method to account for its investment in subsidiaries. In order for the amounts of the net profit for the year, other comprehensive income for the year and total equity in the financial statements to be the same with the amounts attributable to the owner of the Company in its consolidated financial statements, adjustments arising from the differences in accounting treatment between basis and consolidated basis were made to investments accounted for by equity method, share of profit or loss of subsidiaries, share of other comprehensive income of subsidiaries, as appropriate, in the financial statements.

Classification of Current and Non-current Assets and Liabilities

Current assets include cash, cash equivalents, assets held for trading purposes and assets that are expected to be converted into cash or consumed within one year from the balance sheet date; assets other than current assets are non-current assets. Current liabilities include liabilities due to be settled within one year from the balance sheet date; liabilities other than current liabilities are non-current liabilities.

Foreign Currencies

The functional currency of Company and presentation currency of the financial statements are both New Taiwan dollars (NT\$). Functional currency is the currency of the primary economic environment in which the Company operates.

In preparing the financial statements, transactions in currencies other than the New Taiwan dollars are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Such exchange differences are recognized in profit or loss in the year in which they arise. Non-monetary items that are measured in terms of historical cost in foreign currencies are not retranslated.

The financial statements of foreign subsidiaries prepared in foreign currencies are translated into New Taiwan dollars at the following exchange rates: Assets and liabilities - year-end rates; profit and loss - average rates during the year; stockholders' equity - historical rates. The resulting differences are recorded as other comprehensive income.

Inventories

Inventories are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at weighted-average cost on the balance sheet date.

Investments Accounted for Using Equity Method

Investments in subsidiary is accounted for by the equity method. Subsidiary is the entities controlled by the Company.

Under the equity method, the investment is initially recognized at cost and the carrying amount is increased or decreased to recognize the Company's share of the profit or loss and other comprehensive income of the subsidiary after the date of acquisition. Besides, the Company also recognizes the Company's share of the change in other equity of the subsidiary.

Investments accounted for by the equity method are assessed for indicators of impairment at the end of each reporting period. When there is objective evidence that the investments accounted for by the equity method has been impaired, the impairment losses are recognized in profit or loss.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, less subsequent accumulated depreciation and subsequent accumulated impairment loss.

The Company depreciates molds and dies on the basis of estimated production volume. Other property, plant and equipment are depreciated by using straight-line method. The estimated production volume, useful lives, residual values and depreciation method are reviewed at the end of each year, with the effect of any changes in estimate accounted for on a prospective basis.

Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Computer Software

Computer software is stated at cost, less subsequent accumulated amortization and subsequent accumulated impairment loss. The Company amortization is recognized on a straight-line basis over 3 years. Estimated useful lives, residual values and amortization method are reviewed at the end of each year, with the effect of any changes in estimate accounted for on a prospective basis. The residual value of computer software shall be assumed to be zero unless the Company expects to dispose of the asset before the end of its economic life.

Impairment of Assets

When the carrying amount of property, plant and equipment and computer software exceeds its recoverable amount, the excess is recognized as an impairment loss. If an impairment loss subsequently reverses, the carrying amount of the asset is increased accordingly, but the increased carrying amount may not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior years.

Financial Instruments

Financial assets and liabilities shall be recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and liabilities are initially recognized at fair values. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

1) Measurement category

a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss does not incorporate any dividend or interest (included dividend or interest received in the investment year) earned on the financial asset. Method to determine the fair value please refer to Note 27.

b) Loans and receivables

Loans and receivables are non-derivative financial assets, with fixed or determinable payments that are not quoted in an active market. Loans and receivables are measured at amortized cost using the effective interest method, less any impairment, except for short-term receivables when the effect of discounting is immaterial.

2) Impairment of financial assets

Financial assets, other than those at fair value through profit or loss, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For financial assets carried at amortized cost, such as trade receivables and other receivables, assets are assessed for impairment on a collective basis even if they were assessed not to be impaired individually.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables and other receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable and other receivables are considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss except for uncollectible trade receivables and other receivables that are written off against the allowance account.

3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

b. Financial liabilities

1) Subsequent measurement

All the financial liabilities are measured at amortized costs using the effective interest method.

2) Derecognition of financial liabilities

The Company derecognizes a financial liability only when the obligation specified in the contract is discharged, cancelled, or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

Provision

a. Inventory purchase commitment

Where the Company has a commitment under which the unavoidable costs of meeting the obligations under the commitment exceed the economic benefits expected to be received from the commitment, the present obligations arising under such commitment (e.g. inventory purchase commitment) are recognized and measured as provisions.

b. Warranties

Provisions for the expected cost of warranty obligations are recognized at the date of sale of the relevant products, at the best estimate of the expenditure required to settle the Company's obligation by the management of the Company.

Revenue Recognition

Revenue is measured at the fair value of the consideration received or receivable.

a. Sale of goods

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed.

b. Rendering of services

Revenue from a contract to provide services is recognized by reference to the stage of completion of the contract.

c. Dividend and interest income

Dividend income from investments is recognized when the shareholder's right to receive payment has been established.

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

Retirement Benefit Costs

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the Projected Unit Credit Method. All actuarial gains and losses on the defined benefit obligation are recognized immediately in other comprehensive income. Past service cost is recognized immediately to the extent that the benefits are already vested, and otherwise is amortized on a straight-line basis over the average period until the benefits become vested.

The accrued pension liabilities recognized in the balance sheets represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, and as reduced by the fair value of plan assets.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

a. Current tax

Current taxable payable depends on current tax income. Taxable income is different from the net income before tax on the statement of comprehensive income for the reason that partial revenue and expenses are taxable or deductible items in other period, or not the taxable or deductible items according to related Income Tax Law. The Company's current tax liabilities are calculated by the legislated tax rate on balance sheet date.

According to the Income Tax Law, an additional tax at 10% of unappropriated earnings is provided for as income tax in the year the shareholders approve to retain the earnings as the status of appropriations of earnings is uncertain.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized.

c. Current and deferred tax for the year

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income, in which case, the current and deferred tax are also recognized in other comprehensive income.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions and other key sources of estimation uncertainty at the end of the reporting period.

a. Estimated impairment of trade receivables

When there is objective evidence of impairment loss, the Company takes into consideration the estimation of future cash flows. The amount of impairment loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate. Where the actual future cash flows are less than expected, a material impairment loss may arise. As of December 31, 2014 and 2013, the carrying amount of trade receivables was \$337,143 thousand and \$358,728 thousand, respectively.

b. Property, plant and equipment - molds and dies

The Company depreciates molds and dies using unit-of-output method. The Company examines the estimated production units of each model according to the market every 6 months and calculates the amount allocated for each mold and die, which is also the basis of depreciation of molds and dies.

c. Provisions for the expected cost of warranty

The Company calculates the provisions for the expected cost of warranty quarterly based on the numbers of units sold and the weighted average of actual warranty expense in the past. As of December 31, 2014 and 2013, the carrying amount of provisions for warranty was \$146,358 thousand and \$134,125 thousand, respectively.

d. Provisions for loss on inventory purchase commitment

The Company assesses provisions for loss on inventory purchase commitment of parts and vehicles to Yulon regularly. As of December 31, 2014 and 2013, the carrying amount of provisions for loss on inventory purchase commitment was \$111,978 thousand and \$109,812 thousand, respectively.

e. Recognition and measurement of defined benefit plans

The Company uses judgments and estimations in determining the actuarial assumptions for calculation of the present value of defined benefit obligation at the end of each reporting period. Actuarial assumptions comprise the discount rate and the expected return rate on plan assets. Changes in the assumptions may have a material impact on the amount of the expense and the liability.

6. CASH AND CASH EQUIVALENTS

	<u>December 31</u>	
	2014	2013
Cash on hand	\$ 20	\$ 20
Checking accounts and demand deposits	1,184,495	754,979

Others	<u>14,364</u>	<u>11,831</u>
	<u>\$ 39,606</u>	<u>\$ 22,658</u>

a. Notes receivable

For the notes receivable, there were no past due balances at the end of the reporting period and the Company did not recognize an allowance for impairment loss.

b. Trade receivables

For the trade receivables balances that were past due at the end of the reporting period, the Company did not recognize an allowance for impairment loss, because there was not a significant change in credit quality and the amounts were still considered recoverable. The Company did not hold any collateral or other credit enhancements for these balances.

The aging of receivables that were past due but not impaired was as follows:

	<u>December 31</u>	
	2014	2013
Less than 180 days	<u>\$ 22,720</u>	<u>\$ 13,833</u>

9. INVENTORIES

The provision for loss on inventory purchase commitment represents the present obligations of which the unavoidable costs meeting the obligations under the commitment exceed the economic benefits expected to be received from the commitment.

The provision for warranty claims represents the present value of management's best estimate of the future outflow of economic benefits that will be required under the Company's obligations for warranty under local sale of goods legislation. The estimate had been made on the basis of historical warranty trends.

19. RETIREMENT BENEFIT PLANS

a. Defined contribution plan

The Company adopted a pension plan under the Labor Pension Act (the "LPA"), which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

The total expense recognized in profit or loss for the years ended December 31, 2014 and 2013 was \$12,935 thousand and \$12,548 thousand, respectively, represents contributions payable to these plans by the Company at rates specified in the rules of the plans.

Employee benefit expenses in respect of defined contribution plan were included in the following line items:

	For the Year Ended December 31	
	2014	2013
Selling and marketing expenses	<u>\$ 4,136</u>	<u>\$ 4,018</u>
General and administrative expenses	<u>\$ 4,175</u>	<u>\$ 4,005</u>
Research and development expenses	<u>\$ 4,624</u>	<u>\$ 4,525</u>

b. Defined benefit plan

The Company adopted the defined benefit plan under the Labor Standards Law, under which pension benefits are calculated on the basis of the length of service and average monthly salaries of the six months before retirement. The Company contributes amounts equal to 2% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name.

The plan assets are invested in domestic (foreign) equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of Bureau of Labor Funds, Ministry of Labor or under the mandated management. However, in accordance with Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund the return generated by employees' pension contribution should not be below the interest rate for a 2-year time deposit with local banks.

The actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out by qualifying actuaries. The principal assumptions used for the purposes of the actuarial valuation were as follows:

	December 31	
	2014	2013
Discount rate	1.750%	1.750%
Expected return on plan assets	2.000%	2.000%
Expected rate of salary increase	2.500%	2.500%

The assessment of the overall expected rate of return was based on historical return trends and analysts' predictions of the market for the asset over the life of the related obligation, by reference to the aforementioned use of the plan assets and the impact of the related minimum return.

Amounts recognized in profit or loss in respect of these defined benefit plans were as follows:

	For the Year Ended December 31	
	2014	2013
Current service cost	\$ 5,641	\$ 6,112

The Company expects to make a contribution of \$6,674 thousand to the defined benefit plans during the annual period beginning after 2014.

20. EQUITY

a. Capital surplus

	December 31	
	2014	2013
Excess from spin-off	\$ 5,986,507	\$ 5,986,507
Generated from long-term investment	<u>142,898</u>	<u>142,898</u>
	<u>\$ 6,129,405</u>	<u>\$ 6,129,405</u>

The capital surplus arising from shares issued in excess of par (including excess from spin-off) may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus).

The capital surplus from long-term investment may not be used for any purpose.

b. Retained earnings and dividend policy

Under the Company's Articles of Incorporation, the legal reserve should be set aside at 10% of annual net income, less any accumulated deficit, and appropriate special reserve. The remainder of the income should be appropriated as follows:

- 1) 0.1% to 5% as bonus to employees.
- 2) The remainder and the undistributed retained earnings as dividends. The distribution is proposed by the board of directors and approved by the stockholders.

The Company operates in a mature and stable industry. In determining the ratio of cash dividends to stock dividends, the Company considers factors such as the impact of dividends on reported profitability, cash required for future operations, any potential changes in the industry, interest of the stockholders and the effect on the of Company's financial ratios. Thus, cash dividends should be at least 20% of total dividends to be distributed to the stockholders.

The appropriations of earnings for 2013 and 2012 had been approved in the shareholders' meetings on June 23, 2014 and June 14, 2013, respectively. The appropriations and dividends per share were as follows:

	<u>Appropriation of Earnings</u>		<u>Dividends Per Share (NT\$)</u>	
	<u>For the Year Ended</u>		<u>For the Year Ended</u>	
	<u>December 31</u>		<u>December 31</u>	
	<u>2013</u>	<u>2012</u>	<u>2013</u>	<u>2012</u>
Legal reserve	\$ 730,000	\$ 493,048		
Special reserve	(439,912)	439,912		
Cash dividend	5,841,000	3,990,000	\$ 19.47	\$ 13.3

Bonus to employees for 2013 and 2012 approved in the shareholders' meetings on June 23, 2014 and June 14, 2013, respectively, were as follows:

	<u>For the Year Ended December 31</u>	
	<u>2013</u>	<u>2012</u>
	<u>Cash Dividend</u>	<u>Cash Dividend</u>
Bonus to employees	\$ 31,500	\$ 30,251

There was no difference between the amounts of the bonus to employees in the shareholders' meetings in 2014 and 2013 and the amounts recognized in the financial statements for the years ended December 31, 2013 and 2012.

The appropriations of earnings for 2012 were proposed according to the Company's financial statements for the year ended December 31, 2012, which were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the Generally Accepted Accounting Standard in the Republic of China ("ROC GAAP").

The estimated amount of accrued employee bonus for the year ended December 31, 2014 was \$32,723 thousand. The bonuses to the Company's employees for the year ended December 31, 2014 were calculated at 0.56% of net income net of the 10% deduction for legal reserve.

The estimated amount of accrued employee bonus for the year ended December 31, 2013 was \$31,500 thousand. The bonuses to the Company's employees for the year ended December 31, 2013 were calculated at 0.43% of net income net of the 10% deduction for legal reserve.

After the end of the year, if the actual amounts subsequently resolved by the board of directors have significant difference from the proposed amounts, the adjustments to expenses are recorded in the year of recognition. At the date of stockholders' resolution, if the amount differs from the amount resolved by the board of directors, the differences are recorded in the year of stockholders' resolution as a change in accounting estimate. If a share bonus is resolved to be distributed to employees, the number of shares is determined by dividing the amount of the share bonus by the closing price (after considering the effect of cash and stock dividends) of the shares of the day immediately preceding the shareholders' meeting.

Under Rule No. 1010012865 issued by the FSC and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs", the Company should appropriate or reverse to a special reserve. Any special reserve appropriated may be reversed to the extent that the net debit balance reverses and thereafter distributed.

Except for non-ROC resident shareholders, all shareholders receiving the dividends are allowed a tax credit equal to their proportionate share of the income tax paid by the Company.

As of March 23, 2015, the date of the accompanying independent auditors' report, the appropriations and distribution of the 2014 earnings of the Company had not been approved by the board of directors and stockholders. Information on the bonus to employees, directors and supervisors proposed by the Company's board of directors is available on the Market Observation Post System website of the Taiwan Stock Exchange.

Appropriation of earnings to legal reserve shall be made until the legal reserve equals the Company's capital surplus. Legal reserve may be used to offset deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's capital surplus, the excess may be transferred to capital or distributed in cash.

Under the Income Tax Law, for distribution of earnings generated after January 1, 1998, the imputation credits allocated to ROC resident shareholders of the Company was calculated based on the creditable ratio as of the date of dividend distribution. The actual imputation credits allocated to shareholders of the Company was based on the balance of ICA as of the date of dividends distribution. Therefore, the expected creditable ratio for the 2014 earnings may differ from the actual creditable ratio to be used in allocating imputation credits to the shareholders.

f. Income tax assessment

The tax returns through 2012 have been assessed by the tax authorities.

23. EARNINGS PER SHARE

The earnings and weighted average number of ordinary shares outstanding in the computation of earnings per share from continuing operations were as follows:

Net Profit for the Year

	<u>For the Year Ended December 31</u>	
	<u>2014</u>	<u>2013</u>
Earnings used in the computation of basic and diluted earnings per share	<u>\$ 6,523,759</u>	<u>\$ 7,299,997</u>

Weighted-average Number of Ordinary Shares Outstanding (In Thousand Shares):

26. CAPITAL MANAGEMENT

The Company manages its capital to ensure that entities in the Company, will be able to continue as going concerns, while maximizing the return to stockholders through optimization of the debt and equity balance.

27. FINANCIAL INSTRUMENTS

a. Fair value of financial instruments

1) Fair value of financial instruments not carried at fair value

The management believes the carrying value of the financial assets and financial liabilities not carried at fair value is approximately equal to the fair value.

2) Fair value measurements recognized in the balance sheet

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable:

- a) Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- b) Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- c) Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

3) Valuation techniques and assumption applied for the purpose of measuring fair value

The fair value of fund beneficiary certificate traded on active market is the net asset value on balance sheet date. If there is no market price, the fair value is determined by the redemption value. The estimates and assumptions used by the Company were consistent with those that market participants would use in setting a price for the financial instrument.

b. Categories of financial instruments

	<u>December 31</u>

Note 1: The balances included loans and receivables measured at amortized cost, which comprise cash and cash equivalents, notes receivable, trade receivables, other receivables and other financial assets.

Note 2: The balances included financial liabilities measured at amortized cost, which comprise short-term loans, notes payable, trade payables, part of other payables, and long-term loans.

c. Financial risk management objectives and policies

The Company's major financial instruments include trade receivable, trade payables, and borrowings. The Company's Corporate Treasury function coordinates access to domestic and international financial markets, manages the financial risks relating to the operations of the Company through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk and interest rate risk), credit risk and liquidity risk.

1) Market risk

The Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

There had been no change to the Company's exposure to market risks or the manner in which these risks were managed and measured. Sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. Details of sensitivity analysis for foreign currency risk and for interest rate risk are set out in (a) and (b) below.

a) Foreign currency risk

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are set out in Note 30.

Sensitivity analysis

The Company is mainly exposed to the RMB, U.S. dollars and Japanese yen.

The following table details the Company's sensitivity to a 5% increase and decrease in the functional currency against the relevant foreign currencies. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency denominated monetary items, and adjusts their translation at the end of the reporting period for a 5% change in foreign currency rates. A positive number below indicates an increase in pre-tax profit associated with the functional currency strengthen 5% against the relevant currency. For a 5% weakening of the functional currency against the relevant currency, there would be an equal and opposite impact on pre-tax profit and the balances below would be negative.

	RMB Impact		U.S. Dollar Impact		Japan Yen Impact	
	For the Year Ended December 31		For the Year Ended December 31		For the Year Ended December 31	
	2014	2013	2014	2013	2014	2013
Gain (loss)	\$ (409,199)	\$ (165,708)	\$ (5,979)	\$ (3,450)	\$ (1,434)	\$ (749)

This was mainly attributable to the exposure outstanding on RMB, U.S. dollars, and Japanese Yen cash in bank, receivables and payables, which were not hedged at the end of the reporting period.

b) Interest rate risk

The carrying amount of the Company's financial assets and financial liabilities with exposure to interest rate at the end of the reporting period were as follows:

	<u>December 31</u>	
	<u>2014</u>	<u>2013</u>
Fair value interest rate risk		
Financial assets	\$ 8,030,577	\$ 3,336,817
Financial liabilities	500,000	3,630,000
Cash flows interest rate risk		
Financial assets	1,463,381	796,221
Financial liabilities	3,130,000	-

Sensitivity analysis

The sensitivity analyses below were determined based on the Company's exposure to interest rates for non-derivative instruments at the end of the reporting period. A 25 basis point increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 25 basis points higher/lower and all other variables were held constant, the Company's pre-tax profit for the year ended December 31, 2014 would decrease/increase by \$4,167 thousand, which was mainly attributable to the Company's exposure to interest rates on its demand deposits.

If interest rates had been 25 basis points higher/lower and all other variables were held constant, the Company's pre-tax profit for the year ended December 31, 2013 would decrease/increase by \$1,991 thousand, which was mainly attributable to the Company's exposure to interest rates on its demand deposits.

2) Credit risk

The Company's concentration of credit risk of 46% and 49% in total trade receivables as of December 31, 2014 and 2013, respectively, was related to the Company's largest customer within the vehicle department and the five largest customers within the parts department.

3) Liquidity risk

The Company manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Company's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Company relies on bank borrowings as a significant source of liquidity. As of December 31, 2014 and 2013, the available unutilized short-term borrowings facilities were \$2,070,000 thousand and \$370,000 thousand, respectively.

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables had been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Company can be required to pay.

d. Other transactions with related-parties

- 1) The Company sold to Taiwan Acceptance Corporation trade receivable which amounted to \$2,061,218 thousand and \$2,017,040 thousand for the years ended December 31, 2014 and 2013, respectively. Based on the related contract, the amount of receivable sold is limited to the amount of pledges from the original debtor to Taiwan Acceptance Corporation. The Company's interest expenses recognized on the trade receivable sold to Taiwan Acceptance Corporation were \$1,149 thousand and \$1,185 thousand for the years ended December 31, 2014 and 2013, respectively.
- 2) The Company bought other equipment for \$247 thousand and \$769 thousand from Singual Technology Co., Ltd. for the years ended December 31, 2014 and 2013. All of them were recorded under property, plant and equipment.
- 3) The Company had sold property, plant and equipment to related-party; the related party and amounts for the year ended December 31, 2014 are summarized as follows:

	Amount	Carrying Value	Gain on Disposal
Hua-Chuang Automobile Information Technical Center Co., Ltd.	\$ 4,629	\$ 3,468	\$ 1,161

- 4) The Company bought computer software for \$148 thousand from Singgual Technology Co., Ltd. for the year ended December 31, 2014. All of them were recorded under computer software.
- 5) The Company signed molds contracts with Diamond Leasing Service Co., Ltd.

The molds contracts are valid from the date of the contract to the end of production of the car model. The contract amount is \$790,155 thousand (excluding of tax) and the installment payments will be disbursed according to the progress under the contract schedule. The types of car parts have not been produced until the end of December 2014. The Company had already paid \$681,226 thousand (recognized as property, plant, and equipment). Besides, within the contract period, the Company should pay to Diamond Leasing Service Co., Ltd. before the end of January every year with the amount of \$2.6 for every ten thousand of the accumulated amounts paid for molds in prior year.

29. SIGNIFICANT CONTINGENCIES AND UNRECOGNIZED COMMITMENTS

In addition to those disclosed in other notes, significant commitments and contingencies of the Company as of December 31, 2014 were as follows:

- a. The Company is under a manufacturing contract with Yulon, effective November 1, 2003. This contract, for which the first expiry date was on October 31, 2008, is automatically extended annually unless either party issues a termination notice at least three months before expiry. The contract states that the Company authorizes Yulon to manufacture Nissan automobiles and parts, and the Company is responsible for the subsequent development of new automobile parts. The manufacturing volume of Yulon under the contract should correspond to the Company's sales projection for the year. In addition, the Company has authorized Yulon as the original equipment manufacturer ("OEM") of automobile parts and after-sales service. As of December 31, 2014, both parties did not receive a termination notice, so the contract automatically extended.

The Company is responsible for developing new car models, refining designs, and providing the sales projection to Yulon. Yulon is responsible for transforming the sales projections into manufacturing plans, making the related materials orders and purchases, providing product quality assurance, delivering cars, and shouldering warranty expenses due to any defects in products made by Yulon.

- b. The Company has a contract with Taiwan Acceptance Corporation for sale and purchase of vehicles. Besides, Taiwan Acceptance Corporation separately signed with dealers contracts for display of vehicles. If any dealer violates the display contract, resulting in the need for Taiwan Acceptance Corporation to recover the display vehicles, the Company must assist in the settlement or buy-back the vehicles at the original price. From the date of signing the sale and purchase contract to December 31, 2014, no buy-back of vehicles has occurred.
- c. Unrecognized commitments
