Cub Product Portfolio

Automobile Sensors

Since 1979, Cub has been focused on developing and producing automotive sensors, including ignition sensors, position sensors, oil and position sensors, and Tire Pressure Monitoring Sensors, among others.

mmWave Radar

Starting from 2015, Cub enters into the mmWave Radar development and production, as a pioneer company in Asia area. Now having 4D image Radar, MRR, SRR, Turn Assist Radar, in-Cabin Radar and Kick-to-Open Radar.

Current Shunt Sensor

Since 2023, Cub has dedicated its efforts to developing the most precise current shunt sensor in the industry. Our focus is on applications in Electric Vehicle Battery Management Systems, EV charging stations, and the Energy Storage System (ESS) market.

Shunt Sensor Advantages

High-precision

CUB Shunt sensor Accuracy:

0.08%

Hall Effect Accuracy: <2% (hall base)

High precision and function enhanced current measurement device .Intelligent, digital shunt-based current, voltage and temperature sensors for battery management systems (BMS)

Insulation measurement

- Active insulation monitoring

Multiple measure function

- Up to 6 high voltage measurement channels

Shunt Sensor Application
