Independent Auditors' Review Report**

INDEPENDENT AUDITORS' REVIEW REPORT

The Board of Directors and Shareholders
Yageo Corporation

Introduction

We have reviewed the accompanying consolidated balance sheets of Yageo Corporation (the "Company") and its subsidiaries (collectively, the "Group") as of September 30, 2021 and 2020, the related consolidated statements of comprehensive income for the three months ended September 30, 2021 and 2020 and for the nine months ended September 30, 2021 and 2020, the consolidated statements of changes in equity and cash flows for the nine months ended September 30, 2021 and 2020, and the related notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the "consolidated financial statements"). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with Statement of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As disclosed in Note 13 to the consolidated financial statements, the financial statements of some non-significant subsidiaries included in the consolidated financial statements referred to in the first paragraph were not reviewed. As of September 30, 2021 and 2020, combined total assets of these non-significant subsidiaries were NT\$17,054,922 thousand and NT\$15,784,618 thousand, respectively, representing 8.25% and 8.60%, respectively, of the consolidated total assets, and combined total liabilities of these subsidiaries were NT\$2,406,556 thousand and NT\$1,544,204 thousand, respectively, representing 1.83% and 1.31%, respectively, of the consolidated total liabilities; for the three months ended September 30, 2021 and 2020, the amounts of combined comprehensive income of these subsidiaries were NT\$424,222 thousand and NT\$399,659 thousand, respectively, representing 6.90% and 16.22%, respectively, of the consolidated total comprehensive income; for the nine months ended September 30, 2021 and 2020, the amounts of combined comprehensive income of these subsidiaries were NT\$1,360,091 thousand and NT\$1,674,748 thousand, respectively, representing 10.18% and 25.47%, respectively, of the consolidated total comprehensive income. In addition, as disclosed in Notes 14 and 35 to the consolidated financial statements, some investments accounted for using the equity method in the consolidated financial statements were not reviewed. The aggregate carrying amounts of

these investments were NT\$1,120,278 thousand and NT\$995,779 thousand as of September 30, 2021 and 2020, respectively, and the share of profit of associates accounted for using the equity method was NT\$72,298 thousand and NT\$20,864 thousand for the three months ended September 30, 2021 and 2020, respectively; the share of profit of associates accounted for using the equity method was NT\$119,688 thousand and NT\$47,212 thousand for the nine months ended September 30, 2021 and 2020, respectively.

Qualified Conclusion

Based on our reviews, except for adjustments, if any, as might have been determined to be necessary had the financial statements of the non-significant subsidiaries and associates as described in the preceding paragraph been reviewed, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as of September 30, 2021 and 2020, its consolidated financial performance for the three months ended September 30, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the nine months ended September 30, 2021 and 2020 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Emphasis of Matter

As described in Note 16 to the accompanying consolidated financial statements, the Group received the valuation report in the second quarter of 2021, and the comparative figures of KEMET Corporation have been restated as if the initial accounting was completed at the acquisition date.

The engagement partners on the reviews resulting in this independent auditors’ review report are Yung-Hsiang Chao and Cheng-Tsai Tsai.

YAGEO CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2021 AND 2020 (In Thousands of New Taiwan Dollars Unless Stated Otherwise) (Reviewed, Not Audited)

1. GENERAL INFORMATION

Yageo Corporation (the “Company”) was incorporated in 1987 in the Republic of China (ROC). The Company’s shares are traded on the Taiwan Stock Exchange. The Company mainly manufactures and sells passive components.

In June 2020, the Company acquired 100% equity interest of KEMET Corporation in a cash settlement amounting to US\$1,636,052 thousand.

The consolidated financial statements of the Company and its subsidiaries, collectively referred to as the “Group”, are presented in the Company’s functional currency, the New Taiwan dollar.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Company’s board of directors on November 11, 2021.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, the “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC).

Except for the following, the initial application of the IFRSs endorsed and issued into effect by the FSC did not have material impact on the Group’s accounting policies:

- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 “Interest Rate Benchmark Reform - Phase 2”

The Group elected to apply the practical expedient provided in the amendments to deal with the changes in the basis for determining contractual cash flows of financial assets, financial liabilities or lease liabilities resulting from the interest rate benchmark reform. The changes are accounted for by updating the effective interest rate at the time the basis is changed, provided the changes are necessary as a direct consequence of the reform and the new basis is economically equivalent to the previous basis.

For the hedging relationships that are subject to the reform, the Group applies the following temporary exceptions:

- a) The changes to the hedging relationship that are needed to reflect the changes required by the reform are treated as a continuation of the existing hedging relationship.
- b) If an alternative benchmark rate that is reasonably expected to be separately identifiable within a period of 24 months, the Group designates the rate as a non-contractually specified risk component.

- c) After a cash flow hedging relationship is amended, the amount accumulated in the gain/(loss) on hedging instruments of cash flow hedge is deemed to be based on the alternative benchmark rate on which the hedged future cash flows are determined.
 - d) The Group allocates the hedged items of a group hedge that is subject to the reform to subgroups based on whether the hedged items have been changed to reference an alternative benchmark rate, and designates the hedged benchmark rate separately.
- b. The IFRSs endorsed by the FSC for application starting from 2022

New IFRSs	Effective Date Announced by IASB
“Annual Improvements to IFRS Standards 2018-2020”	January 1, 2022 (Note 1)
Amendments to IFRS 3 “Reference to the Conceptual Framework”	January 1, 2022 (Note 2)
Amendments to IAS 16 “Property, Plant and Equipment - Proceeds before Intended Use”	January 1, 2022 (Note 3)
Amendments to IAS 37 “Onerous Contracts - Cost of Fulfilling a Contract”	January 1, 2022 (Note 4)

Note 1: The amendments to IFRS 9 will be applied prospectively to modifications and exchanges of financial liabilities that occur on or after the annual reporting periods beginning on or after January 1, 2022. The amendments to IAS 41 “Agriculture” will be applied prospectively to the fair value measurements on or after the annual reporting periods beginning on or after January 1, 2022. The amendments to IFRS 1 “First-time Adoptions of IFRSs” will be applied retrospectively for annual reporting periods beginning on or after January 1, 2022.

Note 2: The amendments are applicable to business combinations for which the acquisition date is on or after the beginning of the annual reporting period beginning on or after January 1, 2022.

Note 3: The amendments are applicable to property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after January 1, 2021.

Note 4: The amendments are applicable to contracts for which the entity has not yet fulfilled all its obligations on January 1, 2022.

1) Annual Improvements to IFRS Standards 2018-2020

Several standards, including IFRS 9 “Financial Instruments”, were amended in the annual improvements. IFRS 9 requires the comparison of the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received, with that of the cash flows under the original financial liability when there is an exchange or modification of debt instruments. The new terms and the original terms are substantially different if the difference between those discounted present values is at least 10%. The amendments to IFRS 9 clarify that the only fees that should be included in the above assessment are those fees paid or received between the borrower and the lender.

2) Amendments to IFRS 3 “Reference to the Conceptual Framework”

The amendments replace the references to the Conceptual Framework of IFRS 3 and specify that the acquirer shall apply IFRIC 21 “Levies” to determine whether the event that gives rise to a liability for a levy has occurred at the acquisition date.

3) Amendments to IAS 16 “Property, Plant and Equipment: Proceeds before Intended Use”

The amendments prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. The cost of those items is measured in accordance with IAS 2 “Inventories”. Any proceeds from selling those items and the cost of those items are recognized in profit or loss in accordance with applicable standards.

The amendments are applicable only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after January 1, 2021. The Group shall restate its comparative information when it initially applies the aforementioned amendments.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group’s financial position and financial performance and will disclose the relevant impact when the assessment is completed.

c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture”	To be determined by IASB
IFRS 17 “Insurance Contracts”	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IAS 1 “Classification of Liabilities as Current or Non-current”	January 1, 2023
Amendments to IAS 1 “Disclosure of Accounting Policies”	January 1, 2023 (Note 2)
Amendments to IAS 8 “Definition of Accounting Estimates”	January 1, 2023 (Note 3)
Amendments to IAS 12 “Deferred Tax related to Assets and Liabilities arising from a Single Transaction”	January 1, 2023 (Note 4)

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: The amendments will be applied prospectively for annual reporting periods beginning on or after January 1, 2023.

Note 3: The amendments are applicable to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the annual reporting period beginning on or after January 1, 2023.

Note 4: Except for deferred taxes that will be recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments will be applied prospectively to transactions that occur on or after January 1, 2022.

1) Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”

The amendments stipulate that, when the Group sells or contributes assets that constitute a business (as defined in IFRS 3) to an associate or joint venture, the gain or loss resulting from the transaction is recognized in full. Also, when the Group loses control of a subsidiary that contains a business but retains significant influence or joint control, the gain or loss resulting from the transaction is recognized in full.

Conversely, when the Group sells or contributes assets that do not constitute a business to an associate or joint venture, the gain or loss resulting from the transaction is recognized only to the extent of the Group’s interest as an unrelated investor in the associate or joint venture, i.e., the Group’s share of the gain or loss is eliminated. Also, when the Group loses control of a subsidiary that does not contain a business but retains significant influence or joint control over an associate or a joint venture, the gain or loss resulting from the transaction is recognized only to the extent of the Group’s interest as an unrelated investor in the associate or joint venture, i.e., the Group’s share of the gain or loss is eliminated.

2) Amendments to IAS 1 “Classification of Liabilities as Current or Non-current”

The amendments clarify that for a liability to be classified as non-current, the Group shall assess whether it has the right at the end of the reporting period to defer settlement of the liability for at least twelve months after the reporting period. If such rights are in existence at the end of the reporting period, the liability is classified as non-current regardless of whether the Group will exercise that right. The amendments also clarify that, if the right to defer settlement is subject to compliance with specified conditions, the Group must comply with those conditions at the end of the reporting period even if the lender does not test compliance until a later date.

The amendments stipulate that, for the purpose of liability classification, the aforementioned settlement refers to a transfer of cash, other economic resources or the Group’s own equity instruments to the counterparty that results in the extinguishment of the liability. However, if the terms of a liability that could, at the option of the counterparty, result in its settlement by a transfer of the Group’s own equity instruments, and if such option is recognized separately as equity in accordance with IAS 32 “Financial Instruments: Presentation”, the aforementioned terms would not affect the classification of the liability.

3) Amendments to IAS 1 “Disclosure of Accounting Policies”

The amendments specify that the Group should refer to the definition of material to determine its material accounting policy information to be disclosed. Accounting policy information is material if it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments also clarify that:

- Accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed;
- The Group may consider the accounting policy information as material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial; and
- Not all accounting policy information relating to material transactions, other events or conditions is itself material.

The amendments also illustrate that accounting policy information is likely to be considered as material to the financial statements if that information relates to material transactions, other events or conditions and:

- a) The Group changed its accounting policy during the reporting period and this change resulted in a material change to the information in the financial statements;
- b) The Group chose the accounting policy from options permitted by the standards;
- c) The accounting policy was developed in accordance with IAS 8 “Accounting Policies, Changes in Accounting Estimates and Errors” in the absence of an IFRS that specifically applies;
- d) The accounting policy relates to an area for which the Group is required to make significant judgments or assumptions in applying an accounting policy, and the Group discloses those judgments or assumptions; or
- e) The accounting is complex and users of the financial statements would otherwise not understand those material transactions, other events or conditions.

4) Amendments to IAS 8 “Definition of Accounting Estimates”

The amendments define that accounting estimates are monetary amounts in financial statements that are subject to measurement uncertainty. In applying accounting policies, the Group may be required to measure items at monetary amounts that cannot be observed directly and must instead be estimated. In such a case, the Group uses measurement techniques and inputs to develop accounting estimates to achieve the objective. The effects on an accounting estimate of a change in a measurement technique or a change in an input are changes in accounting estimates unless they result from the correction of prior period errors.

5) Amendments to IAS 12 “Deferred Tax related to Assets and Liabilities arising from a Single Transaction”

The amendments clarify that the initial recognition exemption under IAS 12 does not apply to transactions in which equal taxable and deductible temporary differences arise on initial recognition. The Group will recognize a deferred tax asset (to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized) and a deferred tax liability for all deductible and taxable temporary differences associated with leases and decommissioning obligations on January 1, 2022, and recognize the cumulative effect of initial application in retained earnings at that date. The Group will apply the amendments prospectively to transactions other than leases and decommissioning obligations that occur on or after January 1, 2022.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group’s financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Statement of compliance

These interim consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 “Interim Financial Reporting” as endorsed and issued into effect by the FSC. Disclosure information included in these interim consolidated financial statements is less than the disclosure information required in a complete set of annual consolidated financial statements.

b. Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for an asset or liability.

c. Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e., its subsidiaries).

Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective dates of acquisitions up to the effective dates of disposals, as appropriate.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group’s ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the interests of the Group and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

See Note 13, Tables 8 and 9 for detailed information on subsidiaries (including percentages of ownership and main businesses).

d. Other significant accounting policies

Except for the following, refer to the consolidated financial statements for the year ended December 31, 2020.

1) Retirement benefits

Pension cost for an interim period is calculated on a year-to-date basis by using the actuarially determined pension cost rate at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant plan amendments, settlements, or other significant one-off events.

2) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The Group considers the economic implications of the COVID-19 when making its critical accounting estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Refer to the consolidated financial statements for the year ended December 31, 2020.

These investments in equity instruments are held for medium- to long-term strategic purposes and expected to profit through long-term investments. Accordingly, the management elected to designate these investments in equity instruments as at FVTOCI as they believe that recognizing short-term fluctuations in these investments' fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes.

From August to September 2021 and February to September 2020, part of the bonds were sold to manage credit concentration risk; the bonds were sold at fair value of \$700,772 thousand and \$823,284 thousand, respectively.

- b. The trading partners of the Group are financial institutions with good credit ratings, and the short-term financial products invested in are with bank guaranteed principal and interests. The credit risk has been assessed by investigating the final capital destination and its impacts on principal and interests. After assessing that the time deposits have low credit risk, no allowance for loss is recognized.

The Group entered into foreign exchange forward contracts and cross-currency swap contracts, which were used to partially hedge foreign exchange rate risks associated with certain highly probable forecast transactions and exchange rate fluctuations of foreign currency denominated assets and liabilities. The hedge ratio was adjusted in response to the changes in the financial market and capped at 100%.

On the basis of economic relationships, the Group expects that the value of foreign exchange forward contracts, cross-currency swap contracts and the value of hedged forecast transaction will change in opposite directions in response to movements in foreign exchange rates.

The main source of hedge ineffectiveness in these hedging relationships is the effect of the counterparty's own credit risk on the fair value of the foreign exchange forward contracts and cross-currency swap contracts. No other sources of ineffectiveness emerged from these hedging relationships. Refer to Note 22 for information about gain (loss) on hedging instruments and transferred to initial carrying amount of hedged items for the nine months ended September 30, 2021 and 2020.

The following table summarized the information relating to the hedges of foreign currency risk.

September 30, 2021

Hedging Instruments	Contract Amount (In Thousands of US\$)	Maturity
Foreign exchange forward contracts	US\$ 92,674	2021.10-2022.11
Cross-currency swap contracts	US\$ 445,041	2024.09

The rate of interest paid and rate of interest received under cross-currency swap contracts were 4.94% and 6.25%, respectively.

The amount of accumulated losses on hedging instruments in other equity was \$(238,340) thousand due to the Group's continuing hedges.

Trade Receivables

The average credit period of sales of goods was 30-90 days. No interest was charged on trade receivables. The Group adopted a policy of dealing with major customers that the Group could use other publicly available financial information or its own trading records to rate and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

In order to minimize credit risk, the management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the year to ensure that adequate allowance is made for possible irrecoverable amounts. In this regard, the management believes the Group's credit risk was significantly reduced.

The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECLs. The expected credit losses on trade receivables are estimated using a provision matrix by reference to the past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecasted direction of economic conditions at the reporting date. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery. For trade receivables that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The aging of trade receivables is as follows:

	September 30, 2021	December 31, 2020	September 30, 2020
Current term	\$ 18,123,700	\$ 12,938,436	\$ 11,762,812

The trademark and other intangible assets acquired through business combinations. Various studies including industrial characteristics, product life cycle studies and enterprise characteristics have been performed by management of the Group, which supported their opinion that there is no foreseeable limit to the period over which the trademarked products are expected to generate net cash flows. Therefore, the trademark and partial other intangible assets are considered to have an indefinite useful life. The trademark and partial other intangible assets will not be amortized until their useful life are determined to be finite. However, they will be tested for impairment annually whenever there are an indication that they may be impaired or not.

Other intangible assets are amortized on a straight-line basis over their estimated useful lives as follows:

Computer software	1-5 years
Patents and proprietary technology	10-18 years
Customer relationships	9.5-21 years

a. Overseas convertible bonds

On March 2, 2020, the Corporation's board of directors resolved to issue overseas unsecured convertible bonds for the fifth time. This proposal was approved and became effective under the letter issued by the FSC dated March 26, 2020 (Financial-Supervisory-Securities-Corporate Issue No.10903342431). The bonds with a duration of 5 years were listed on the Singapore Stock Exchange on May 26, 2020. This zero-coupon overseas convertible bonds have a face value of US\$180,000 thousand.

Bondholders may request the Company to convert the bonds into the Company's ordinary shares at any time within the period from the following day after three months from the issuance date to 10 days prior to maturity, or the date on which the bondholder exercises the right to buy back or until the fifth business day before the Company exercises the early redemption right. The conversion price (\$485 per share) at the time of issuance is determined by 30% premium to closing price of the Company's ordinary shares on the Taiwan Stock Exchange. Number of shares converted should be decided by face value of the bonds at a fixed exchange rate of US\$1:NT\$29.928, which is to be divided by the conversion price per share on the conversion date. The conversion price after the issuance of convertible bonds will be adjusted according to the anti-dilution clause of the Conversion Rules of the Company. As of September 30, 2021, the conversion price has been adjusted to \$460.33 per share.

The convertible bonds contain both liability and equity components. The equity component was presented in equity under the heading of capital surplus - equity component of convertible bonds. The effective interest rate of the liability component was 1.22% per annum on initial recognition.

	<u>\$ 22,049,616</u>	<u>\$ 23,099,157</u>	<u>\$ 24,297,077</u>

- 1) Such capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).

- 2) Such capital surplus arises from the effect of changes in ownership interests in subsidiaries resulted from equity transactions other than actual disposal or acquisition, or from changes in capital surplus of subsidiaries accounted for using the equity method.

c. Retained earnings and dividend policy

Under the Company's Articles of Incorporation (the "Articles"), when the Company has earnings for the year, the Company shall appropriate for remuneration of directors at 3% or less and for employees' bonus of at least 2% of the earnings. Then, the Company shall make payments for taxes and offset past years' deficit, if any. The remaining profit shall be distributed in the following order:

- 1) Legal reserve is appropriated at 10% of the remaining profit until the legal reserve equals the Company's paid-in capital.
- 2) Special reserve is appropriated or reversed in accordance with the laws and regulations.
- 3) Appropriations for dividends and bonuses, of at least 10% of the remaining profit after appropriations for legal reserve and special reserve, may be proposed by the Company's board of directors and approved at the shareholders' meeting. However, if the earnings distribution proposal is for the distribution of dividend and bonus in cash entirely or partially, it shall be resolved by the board of directors with the attendance of more-than-two-thirds of the directors and consent of the majority of attending directors; also it shall be reported in the shareholders' meeting.

The Company's dividend policy takes into account the Company's current and future competitiveness in the domestic and foreign markets, the investment environment and cash requirements. The policy authorizes the Company's board to propose an earnings distribution in the form of shares or in cash appropriately in accordance with the laws and regulations, with the board's proposal subject to approval at the shareholders' meeting. For the policies on distribution of the compensation of employees and remuneration of directors and supervisors set forth in the Articles, refer to e. compensation of employees and remuneration of directors in Note 23.

If the Company has no loss, the legal reserve and the Company's additional paid-in capital as stipulated in Paragraph 1, Article 241 of the Company Law can be distributed to the shareholders proportionally according to the resolution of the Board of Directors with the attendance of more than two-thirds of the directors and the consent of the majority of attending directors; also, it shall be reported in the shareholders meeting.

Appropriation of earnings to legal reserve shall be made until the legal reserve equals the Company's paid-in capital. Legal reserve may be used to offset deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The appropriations of earnings for 2020 and 2019 were as follows:

	2020	2019
Legal reserve	\$ 1,289,970	\$ 711,871
Special reserve	\$ 1,649,104	\$ 1,298,169
Cash dividends	\$ 3,967,351	\$ 6,409,381
Cash dividends per share (NT\$)	\$ 8.00	\$ 15.00

The above 2020 and 2019 appropriations for cash dividends were resolved by the Company's board of directors on April 22, 2021 and February 26, 2020, respectively; the other proposed appropriations for 2020 and 2019 were resolved by the shareholders in the shareholders' meetings on July 7, 2021 and June 5, 2020, respectively.

On April 22, 2021, the Company's board of directors resolved to issue cash dividends of \$991,838 thousand from capital surplus, at NT\$2 per share, and plus the above cash dividends at NT\$8 per share. The total cash dividends at NT\$10 per share was issued for 2020.

Basic earnings per share	<u>\$ 13.88</u>	<u>\$ 5.42</u>	<u>\$ 36.83</u>	<u>\$ 17.95</u>
Diluted earnings per share	<u>\$ 13.58</u>	<u>\$ 5.38</u>	<u>\$ 35.92</u>	<u>\$ 17.82</u>

The earnings and weighted average number of ordinary shares outstanding used in the computation of earnings per share were as follows:

Net Profit for the Year

	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	2021	2020	2021	2020
Earnings used in the computation of basic earnings per share	\$ 6,829,687	\$ 2,665,529	\$ 18,166,082	\$ 8,309,085
Effect of potentially dilutive ordinary shares				
Interest on convertible bonds (after tax)	12,536	-	37,492	-
Net gain on financial instrument at fair value through profit or loss	<u>4,848</u>	<u>-</u>	<u>1,616</u>	<u>-</u>
Earnings used in the computation of diluted earnings per share	<u>\$ 6,847,071</u>	<u>\$ 2,665,529</u>	<u>\$ 18,205,190</u>	<u>\$ 8,309,085</u>

The weighted average number of ordinary shares outstanding (in thousands of shares) is as follows:

	For the Three Months Ended September 30		For the Nine Months Ended September 30	
	2021	2020	2021	2020
Weighted average number of ordinary shares used in the computation of basic earnings per share	491,919	492,166	493,287	462,927
Effect of potentially dilutive ordinary shares:				
Convertible bonds	11,702	-	11,703	-

Compensation of employees	<u>530</u>	<u>1,489</u>	<u>1,903</u>	<u>1,489</u>
Weighted average number of ordinary shares used in the computation of diluted earnings per share	<u>504,151</u>	<u>495,515</u>	<u>506,893</u>	<u>466,283</u>

The Company may settle compensation or bonuses paid to employees in cash or shares; therefore, the Company assumes that the entire amount of the compensation or bonuses will be settled in shares, and the resulting potential shares are included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares was included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

27. BUSINESS COMBINATIONS

a. Subsidiaries acquired

Subsidiary	Principal Activity	Date of Acquisition	Proportion of Voting Equity Interests Acquired (%)	Consideration Transferred
KEMET Corporation	Manufacturing and selling electronic components	June 2020	100.00	<u>\$ 49,228,815</u>

In order to continue the expansion of the Group's activities in passive components and expand the scale of business and market visibility, the Company acquired KEMET Corporation in 2020. Due to the acquisition, the Group has benefited from the related synergies, entered into high-specification markets and strengthened its development in niche markets, such as automotive electronics and industrial specifications.

b. Consideration transferred

Consideration transferred	\$ 49,228,815
Less: Fair value of identifiable net assets acquired	<u>(31,194,434)</u>
Goodwill recognized on acquisitions	<u>\$ 18,034,381</u>

The goodwill recognized in the acquisitions of KEMET Corporation mainly represents the control premium included in the cost of the combinations. In addition, the consideration paid for the combinations effectively included amounts attributed to the benefits of expected synergies, revenue growth and future market development. These benefits are not recognized separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

e. Net cash outflow on the acquisition of subsidiaries

	KEMET Corporation
Consideration paid in cash	\$ 49,228,815
Less: Cash and cash equivalent balances acquired	<u>(8,037,126)</u>
	<u>\$ 41,191,689</u>

f. Impact of acquisitions on the results of the Group

The financial results of the acquires since the acquisition date, which are included in the consolidated statements of comprehensive income, were as follows:

	KEMET Corporation
Revenue	<u>\$ 11,698,190</u>
Profit	<u>\$ 1,323,777</u>

Had these business combinations been in effect at the beginning of the fiscal year, the Group's revenue would have been \$21,953,457 thousand and \$61,885,622 thousand for the three months ended September 30, 2020 and for the nine months ended September 30, 2020, respectively, and the profit would have been \$3,634,645 thousand and \$9,471,122 thousand for the three months ended September 30, 2020 and for the nine months ended September 30, 2020, respectively. This pro-forma information is for illustrative purposes only and is not necessarily an indication of the revenue and results of operations of the Group that actually would have been achieved had the acquisition been completed on January 1, 2020, nor is it intended to be a projection of future results.

28. EQUITY TRANSACTIONS WITH NON-CONTROLLING INTERESTS

On March 27, 2020, the Group subscribed for additional new share of Ko-E Holding (Cayman) at percentage different from its existing ownership percentage, reducing its continuing interest from 100% to 97.35%.

In the third quarter of 2021, the Group acquired and disposed of the shares of Ko-E Holding (Cayman), reducing its continuing interest from 97.35% to 97.00%.

	Ko-E Holding (Cayman)	
	For the Nine Months Ended	
	September 30	
	2021	2020
Consideration received	\$ 1,822	\$ 5,616
The proportionate share of the carrying amount of the net assets of the subsidiary transferred to non-controlling interests	<u>(4,107)</u>	<u>(17,215)</u>
Differences recognized from equity transactions	<u>\$ (2,285)</u>	<u>\$ (11,599)</u>
<u>Line items adjusted for equity transactions</u>		
Capital surplus	<u>\$ (2,285)</u>	<u>\$ (11,599)</u>

The above transactions were accounted for as equity transactions, since the Group did not cease to have control over the subsidiary.

29. CAPITAL MANAGEMENT

The goal, policies and procedures as well as the composition of the Group's capital management are the same as those stated in Note 29 to the Group's consolidated financial statements for the year ended December 31, 2020.

3) Valuation techniques and inputs used for Level 2 fair value measurement

<u>Financial Instruments</u>	<u>Valuation Techniques and Inputs</u>
Derivatives - foreign exchange forward contracts	Discounted cash flow. Future cash flows are estimated on the basis of observable forward exchange rates at the end of the reporting period and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.
Derivatives - cross-currency swap contracts	Use the evaluation information provided by the banks and evaluate using the discounted cash flow method, future cash flows are estimated on the basis of observable forward exchange rates and contract interest rates at the end of the reporting period, discounted at a rate that reflects the credit risk of various banks.
Derivatives - foreign exchange option contracts	The fair values of foreign exchange option contracts were determined using spot exchange rate on valuation date, exercise price of options, exchange rate volatility, contract period and quoted prices of risk-free interest rate with the same contract period.

4) Valuation techniques and inputs applied for Level 3 fair value measurement

The fair values of unlisted equity securities were determined using the income approach. In this approach, the discounted cash flow method was used to capture the present value of the expected future economic benefits to be derived from the ownership of these investees. An increase in long-term revenue growth rates or long-term pre-tax operating margin or a decrease in WACC or discount for the lack of marketability used in isolation would result in increases in fair value.

The foreign private funds held by the Group were valued using the asset-based approach and were based on the net asset value measured at fair value and the investment agreement.

The structured deposits were valued using the future cash flows.

2) The balances included financial liabilities at amortized cost, which comprise short-term borrowings, short-term bills payable, notes payable, trade payables (including related parties), other payables (including related parties), current portion of long-term borrowings, bonds payable, long-term borrowings and guarantee deposits received.

d. Financial risk management objectives and policies

The Group's major financial instruments include equity and debt investments, trade receivables, trade payables, and borrowings. The Group's Corporate Treasury function provides services to the business, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports that analyze exposures by degree and magnitude of risks. These risks include market risk (including foreign currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Group sought to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives was governed by the Group's policies approved by the board of directors, which provided written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits was reviewed by the internal auditors on a continuous basis. The Group did not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Group's impairment financial activities are reviewed by the board of directors in accordance with related standard and internal controls. In executing financial plan, the Group have to obey the related financial operating procedures regarding financial risk management and segregation of duties.

1) Market risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (a) below) and interest rates (see (b) below). The Group entered into foreign exchange forward contracts to manage its exposure to foreign currency risk.

There have been no changes to the Group's exposure to market risks or the manner in which these risks were managed and measured.

a) Foreign currency risk

The Group had foreign currency denominated sales and purchases, which exposed the Group to foreign currency risk. Exchange rate exposures were managed within approved policy parameters utilizing forward foreign exchange contracts.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities (including those eliminated on consolidation) and of the derivatives exposing to foreign currency risk at the end of the reporting period are set out in Note 34.

Sensitivity analysis

The Group assessed the foreign currency risk of its significant assets and liabilities as well as taking unexpired exchange forward contracts into consideration.

The Group was mainly exposed to the USD, EUR and JPY.

The following table details the Group's sensitivity to a 1% increase and decrease in New Taiwan dollars (the functional currency) against the relevant foreign currencies. 1% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency denominated monetary items and foreign exchange forward contracts designated as cash flow hedges, and adjusts their translation at the end of the year for a 1% change in foreign currency rates. A negative number below indicates an increase (a decrease) in pre-tax profit associated with New Taiwan dollars strengthening 1% against the relevant currency. For a 1% weakening of New Taiwan dollars against the relevant currency, there would be an equal and opposite impact on pre-tax profit and the balances below would be positive.

	USD Impact		EUR Impact		JPY Impact	
	For the Nine Months Ended September 30		For the Nine Months Ended September 30		For the Nine Months Ended September 30	
	2021	2020	2021	2020	2021	2020
Profit or loss	\$ (248,858)	\$ (308,113)	\$ (22,031)	\$ (10,650)	\$ 9,861	\$ 15,976

The analysis of profit or loss of the table was mainly attributable to the exposure to outstanding USD, EUR and JPY which were not hedged, at the end of the reporting period.

The Group's sensitivity to foreign currency exchange decreased during the current period mainly due to the addition of the USD-denominated net liabilities.

b) Interest rate risk

The Group was exposed to interest rate risk because entities in the Group borrowed funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix of fixed and floating rate.

The carrying amount of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	September 30, 2021	December 31, 2020	September 30, 2020
Fair value interest rate risk			
Financial assets	\$ 22,880,849	\$ 23,419,185	\$ 25,179,961
Financial liabilities	88,419,081	79,485,027	81,824,411
Cash flow interest rate risk			
Financial assets	29,534,143	18,615,016	17,823,897

The Group's fixed-term time deposits, bank borrowings, short-term bills and bonds payable are exposed to fair value interest rate risk; however, this expected risk is insignificant.

Sensitivity analysis

The sensitivity analysis below was determined based on the Group's exposure to interest rates for both derivative and non-derivative instruments at the end of the year. For floating rate liabilities, the analysis was prepared assuming the amount of each liability outstanding at the end of the year was outstanding for the whole year. A 1% increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 1% higher and all other variables were held constant, the Group's variable-rate financial assets for the nine months ended September 30, 2021 and 2020 would have resulted in cash inflows by \$221,506 thousand and \$133,679 thousand, respectively.

The Group's sensitivity to interest rates increased during the current period mainly due to the increased in variable-rate financial assets from the current period.

c) Other price risk

The Group was exposed to equity price risk through its investments in equity securities.

Sensitivity analysis

The sensitivity analysis below was determined based on the exposure to equity price risks at the end of the period.

If equity prices had been 1% lower, the pre-tax profit for the nine months ended September 30, 2021 and 2020 would have decreased by \$8,420 thousand and \$2,324 thousand, respectively, as a result of the changes in fair value of financial assets at FVTPL.

The Group's sensitivity to investments in equity securities has increased during the current period mainly due to the increase in financial assets at FVTPL.

2) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. As at the end of the year, the Group's maximum exposure to credit risk, which would cause a financial loss to the Group due to failure of counterparties to discharge an obligation and financial guarantees provided by the Group, could be equal to the total of the following:

- a) The carrying amount of the respective recognized financial assets as stated in the consolidated balance sheets; and
- b) The amount of contingent liabilities in relation to financial guarantee issued by the Group.

The Group adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

In order to minimize credit risk, management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at the end of the reporting period to ensure that adequate allowances are made for irrecoverable amounts. In this regard, management believes the Group's credit risk was significantly reduced.

The credit risk on liquid funds and derivatives was limited because the counterparties are banks with high credit ratings assigned by international credit-rating agencies.

Ongoing credit evaluation is performed on the financial condition of trade receivables.

The Group did transactions with a large number of unrelated customers and, thus, no concentration of credit risk was observed.

3) Liquidity risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank borrowings as a significant source of liquidity. As of September 30, 2021, December 31, 2020 and September 30, 2020, the Group had available unutilized short-term bank loan facilities of \$42,474,600 thousand, \$21,390,460 thousand and \$11,143,285 thousand, respectively.

a) Liquidity and interest rate risk tables for non-derivative financial liabilities

b) Liquidity and interest rate risk tables for derivative financial liabilities

The following table detailed the Group's liquidity analysis for its derivative financial instruments. The table was based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the period.

f. Lease arrangements - Group is lessor

The Group leases out office and plant to its associates, Kaimei Electronic Corp., Teapo Electronics (Dongguan) Co., Ltd. and Dongguan Zhiguo Electronics Co., Ltd., under operating leases with lease terms of one year. The lease arrangement would be automatically extended for one year if the arrangement is not terminated in writing by at least one party not later than three months prior to the expiration date. As of September 30, 2021, December 31, 2020 and September 30, 2020, the gross lease payments to be received were \$14,852 thousand, \$8,097 thousand and \$14,801 thousand, respectively.

Lease income is as follows:

33. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED COMMITMENTS

In addition to those disclosed in other notes, significant commitments and unrecognized commitments of the Group as of September 30, 2021, December 31, 2020 and September 30, 2020 were as follows:

a. Significant unrecognized commitments

1) Unrecognized commitments were as follows:

	September 30, 2021	December 31, 2020	September 30, 2020
Acquisition of property, plant and equipment	<u>\$ 3,536,947</u>	<u>\$ 2,141,203</u>	<u>\$ 2,399,061</u>

- 2) On September 7, 2021, the extraordinary shareholders' meeting of the Company resolved the acquisition of 100% of the interest of Chilisin Electronics Corp. in a share exchange, and it is estimated that the exchange ratio is 0.2002 ordinary shares of the Company for 1 ordinary share of Chilisin Electronics Corp.

b. Contingencies

Contingent liabilities

- 1) Refer to Table 2 about the endorsements/guarantees and between the company and subsidiaries.
- 2) In December 2015, the Taiwan Fair Trade Commission (TFTC) notified TOKIN Corporation (TOKIN) of its decision to impose an administrative fine on TOKIN for violation of the Taiwan Fair Trade Act as it affected the function of the tantalum capacitor market. TOKIN filed its appeal against the TFTC's decision with the Taipei High Administrative Court in January 2016 and obtained a favorable judgment. TFTC appealed to the Taiwan Administrative Supreme Court. In December 2019, the Taiwan Administrative Supreme Court directed the TFTC to recalculate the fine. The case is currently under trial. The Group has recognized related liabilities and believes the compensatory damages would not significantly affect its financial condition and business operations.
- 3) In August 2013, Continental GA, a German company, filed a lawsuit against KEMET Electronics GmbH, subsidiary of the Group, for damages in a German court due to abnormal capacitor issues. The Group was opposed to the claims made by Continental GA. In May 2020, as encouraged by the judge, the Group and Continental GA began conducting settlement discussions. The settlement is still in progress. The Group has recognized related liabilities and believes the compensatory damages would not significantly affect its financial condition and business operations.

34. SIGNIFICANT ASSETS AND LIABILITIES DENOMINATED IN FOREIGN CURRENCIES

The Group's significant financial assets and liabilities denominated in foreign currencies aggregated by the foreign currencies other than functional currencies of the entities in the Group and the related exchange rates between foreign currencies and respective functional currencies are as follows:

CTBC Bank as Custodian for Dominant Investment Holdings Ltd.	34,991,943	7.05

Note 1: The information of major shareholders presented in this table is provided by the Taiwan Depository & Clearing Corporation based on the number of ordinary shares and preference shares held by shareholders with ownership of 5% or greater, that have been issued without physical registration (including treasury shares) by the Company as of the last business day for the current quarter. The share capital in the consolidated financial statements may differ from the actual number of shares that have been issued without physical registration because of different preparation basis.

Note 2: If a shareholder delivers the shareholdings to the trust, the above information will be disclosed by the individual trustee who opened the trust account. For shareholders who declare insider shareholdings with ownership greater than 10% in accordance with the Security and Exchange Act, the shareholdings include shares held by shareholders and those delivered to the trust over which shareholders have rights to determine the use of trust property. For information relating to insider shareholding declaration, refer to Market Observation Post System.
