**Consolidated Financial Statements for the
Years Ended December 31, 2021 and 2020 and
Independent Auditors' Report**

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
HTC Corporation

Opinion

We have audited the accompanying consolidated financial statements of HTC Corporation and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 2021 and 2020, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of HTC Corporation and its subsidiaries as of December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended, in conformity with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of HTC Corporation and its subsidiaries in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2021. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The descriptions of the key audit matters of the consolidated financial statements for the year ended December 31, 2021 are as follows:

Revenue Recognition

HTC Corporation and its subsidiaries sell virtual reality products to some customers. Because the sales growth rate of such customers is relatively high and the impact on the overall financial statements is significant, the recognition of such income is a key audit matter.

We performed the following audit procedures in respect of the above key audit matter:

1. Evaluate the design and implementation of the internal control system for such customers over order modifications and shipment operations, and perform effectiveness tests.
2. Sampling and testing the orders, shipping documents, invoices and payment records from the details of such revenue to confirm the occurrence and correctness of its revenue recognition.
3. Check whether there are any significant or abnormal subsequent sales returns after the period.

Other Matters

We have also audited the parent company only financial statements of HTC Corporation as of and for the years ended December 31, 2021 and 2020 on which we have issued an unmodified opinion.

Responsibilities of Management and those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and IFRS, IAS, IFRIC, and SIC endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing HTC Corporation and its subsidiaries' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate HTC Corporation and its subsidiaries or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing HTC Corporation and its subsidiaries' financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of HTC Corporation and its subsidiaries' internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on HTC Corporation and its subsidiaries' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause HTC Corporation and its subsidiaries to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within HTC Corporation and its subsidiaries to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2021 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Chi-Ming Hsu and Kenny Hong.

HTC CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2021 AND 2020 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. ORGANIZATION AND OPERATIONS

HTC Corporation (HTC) was incorporated on May 15, 1997 under the Company Law of the Republic of China. HTC and its subsidiaries (collectively referred to as the “Group” or the “Company”) are engaged in designing, manufacturing, assembling, processing, and selling smart mobile and virtual reality devices and after-sales service.

In March 2002, HTC had its stock listed on the Taiwan Stock Exchange. On November 19, 2003, HTC listed some of its shares of stock on the Luxembourg Stock Exchange in the form of global depository receipts.

The functional currency of HTC is New Taiwan dollars. The consolidated financial statements are presented in New Taiwan dollars since HTC is the ultimate parent of the Group.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by HTC’s board of directors and authorized for issue on March 7, 2022.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

- a. Initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations of IFRS (IFRIC), and Interpretations of IAS (SIC) (collectively, the “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the amendments to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC did not have any material impact on the Company’s accounting policies.

- b. The IFRSs endorsed by the FSC for application starting from 2022

New IFRSs	Effective Date Announced by IASB
“Annual Improvements to IFRS Standards 2018-2020”	January 1, 2022 (Note 1)
Amendments to IFRS 3 “Reference to the Conceptual Framework”	January 1, 2022 (Note 2)
Amendments to IAS 16 “Property, Plant and Equipment - Proceeds before Intended Use”	January 1, 2022 (Note 3)
Amendments to IAS 37 “Onerous Contracts - Cost of Fulfilling a Contract”	January 1, 2022 (Note 4)

Note 1: The amendments to IFRS 9 will be applied prospectively to modifications and exchanges of financial liabilities that occur on or after the annual reporting periods beginning on or after January 1, 2022. The amendments to IAS 41 “Agriculture” will be applied prospectively to the fair value measurements on or after the annual reporting periods beginning on or after January 1, 2022. The amendments to IFRS 1 “First-time Adoptions of IFRSs” will be applied retrospectively for annual reporting periods beginning on or after January 1, 2022.

Note 2: The amendments are applicable to business combinations for which the acquisition date is on or after the beginning of the annual reporting period beginning on or after January 1, 2022.

Note 3: The amendments are applicable to property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after January 1, 2021.

Note 4: The amendments are applicable to contracts for which the entity has not yet fulfilled all its obligations on January 1, 2022.

As of the date the consolidated financial statements were authorized for issue, the Company assessed that the application of the above standards and interpretations did not have any material impact on the Company’s accounting policies.

c. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture”	To be determined by IASB
IFRS 17 “Insurance Contracts”	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 “Initial Application of IFRS 9 and IFRS 17 - Comparative Information”	January 1, 2023
Amendments to IAS 1 “Classification of Liabilities as Current or Non-current”	January 1, 2023
Amendments to IAS 1 “Disclosure of Accounting Policies”	January 1, 2023 (Note 2)
Amendments to IAS 8 “Definition of Accounting Estimates”	January 1, 2023 (Note 3)
Amendments to IAS 12 “Deferred Tax related to Assets and Liabilities arising from a Single Transaction”	January 1, 2023 (Note 4)

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: The amendments will be applied prospectively for annual reporting periods beginning on or after January 1, 2023.

Note 3: The amendments are applicable to changes in accounting estimates and changes in accounting policies that occur on or after the beginning of the annual reporting period beginning on or after January 1, 2023.

Note 4: Except for deferred taxes that will be recognized on January 1, 2022 for temporary differences associated with leases and decommissioning obligations, the amendments will be applied prospectively to transactions that occur on or after January 1, 2022.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of other standards and interpretations will have on the Group's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

These consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IFRSs as endorsed and issued into effect by the FSC.

Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value and net defined benefit assets which are measured at the fair value of plan assets less the present value of the defined benefit obligation.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- a. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- b. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- c. Level 3 inputs are unobservable inputs for the asset or liability.

Classification of Current and Non-current Assets and Liabilities

Current assets include:

- a. Assets held primarily for the purpose of trading;
- b. Assets expected to be realized within twelve months after the reporting period; and
- c. Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

Current liabilities are:

- a. Liabilities held primarily for the purpose of trading;
- b. Liabilities due to be settled within twelve months after the reporting period, even if an agreement to refinance, or to reschedule payments, on a long-term basis is completed after the reporting period and before the consolidated financial statements are authorized for issue; and
- c. Liabilities for which the Company does not have an unconditional right to defer settlement for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

The aforementioned assets and liabilities that are not classified as current are classified as non-current.

Basis of Consolidation

The consolidated financial statements incorporate the financial statements of HTC and the entities controlled by HTC (i.e., its subsidiaries). Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective date of acquisition up to the effective date of disposal, as appropriate. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company. All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

See Note 13 for the detailed information on subsidiaries (including the percentage of ownership and main businesses).

Business Combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as they are incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree, the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets.

Foreign Currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (i.e., foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise except for:

- a. Exchange differences on transactions entered into in order to hedge certain foreign currency risks; and
- b. Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur in the foreseeable future (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investments.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations are translated into the New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (attributed to the owners of the Company and non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e., a disposal of the Company's entire interest in a foreign operation, or a disposal involving the loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

Goodwill and fair value adjustments on identifiable assets and liabilities acquired arising from the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rates of exchange prevailing at the end of each reporting period. Exchange differences are recognized in other comprehensive income.

Inventories

Inventories consist of raw materials, finished goods, work-in-process and semi-finished products are stated at the lower of cost or net realizable value. Inventory write-downs are made by item, except where it may be appropriate to group similar or related items. Net realizable value is the estimated selling price of inventories less all estimated costs of completion and costs necessary to make the sale. Inventories are recorded at the weighted-average cost on the balance sheet date.

Investments in Associates

An associate is an entity over which the Company has significant influence and that is not a subsidiary.

The Company uses the equity method to account for its investments in associates.

Under the equity method, investments in an associate are initially recognized in the consolidated balance sheet at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the associate. The Company also recognizes the changes in the equity of associates attributable to the Company.

When the Company subscribes for additional new shares of the associate at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Company's proportionate interest in the associate. The Company records such a difference as an adjustment to investments accounted for by the equity method, with a corresponding amount charged or credited to capital surplus - changes in capital surplus from investments in associates. If the Company's ownership interest is reduced due to the additional subscription of the new shares of associate, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate is reclassified to profit or loss on the same basis as would be required had the investee directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments accounted for by the equity method is insufficient, the shortage is debited to retained earnings.

When the Company's share of losses of an associate equals or exceeds its interest in that associate (which includes any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Company's net investment in the associate), the Company discontinues recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Company has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate.

Any excess of the cost of acquisition over the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Company's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The entire carrying amount of an investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

When a group entity transacts with its associate, profits and losses resulting from the transactions with the associate are recognized in the Company's consolidated financial statements only to the extent of interests in the associate that are not related to the Company.

Property, Plant and Equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment loss.

Property, plant and equipment in the course of construction are carried at cost, less any recognized impairment loss. Cost includes professional fees and borrowing costs eligible for capitalization. Such properties are depreciated and classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

Depreciation on property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

Investment Properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss. Depreciation is recognized using the straight-line method.

For a transfer from the property, plant and equipment classification to investment properties, the deemed cost of the property for subsequent accounting is its carrying amount.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

Goodwill

Goodwill arising from the acquisition of a business is carried at cost as established at the date of acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Company's cash-generating units or groups of cash-generating units (referred to as "cash-generating units") that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired, by comparing its carrying amount, including the attributable goodwill, with its recoverable amount. However, if the goodwill allocated to a cash-generating unit was acquired in a business combination during the current annual period, that unit shall be tested for impairment before the end of the current annual period. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss is recognized directly in profit or loss. An impairment loss recognized for goodwill is not reversed in subsequent periods.

If goodwill has been allocated to a cash-generating unit and the entity disposes of an operation within that unit, the goodwill associated with the operation which is disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal, and is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained.

Intangible Assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

Impairment of Tangible and Intangible Assets Other Than Goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets, excluding goodwill, to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Corporate assets are allocated to the individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units on a reasonable and consistent basis of allocation.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

Before the Company recognizes an impairment loss from assets related to contract costs, any impairment loss on inventories, property, plant and equipment and intangible assets related to the contract applicable under IFRS 15 shall be recognized in accordance with applicable standards. Then, impairment loss from the assets related to the contract costs is recognized to the extent that the carrying amount of the assets exceeds the remaining amount of consideration that the Company expects to receive in exchange for related goods or services less the costs which relate directly to providing those goods or services and which have not been recognized as expenses. The assets related to the contract costs are then included in the carrying amount of the cash-generating unit to which they belong for the purpose of evaluating impairment of that cash-generating unit.

When an impairment loss is subsequently reversed, the carrying amount of the corresponding asset, cash-generating unit or assets related to contract costs is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized for the asset, cash-generating unit or assets related to contract costs in prior years. A reversal of an impairment loss is recognized in profit or loss.

Financial Instruments

Financial assets and financial liabilities are recognized when a group entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

a. Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

1) Measurement category

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost, and investments in equity instruments at FVTOCI.

a) Financial assets at FVTPL

Financial assets are classified as at FVTPL when the financial asset is mandatorily classified as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, and any dividends or interest earned on such financial assets are recognized in other income; any remeasurement gains or losses on such financial assets are recognized in other gains or losses. Fair value is determined in the manner described in Note 31.

b) Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i. The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, trade receivables at amortized cost, other current financial assets and other receivables and refundable deposits, are measured at amortized cost, which equals to their gross carrying amount determined by the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for:

- i. Purchased or originated credit-impaired financial asset, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such financial asset; and
- ii. Financial assets that are not credit impaired on purchase or origination but have subsequently become credit impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

Cash equivalents include time deposits with original maturities within 3 months from the date of acquisition, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash equivalents are held for the purpose of meeting short-term cash commitments.

c) Investments in equity instruments at FVTOCI

On initial recognition, the Company may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is in contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

2) Impairment of financial assets

The Company recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including trade receivables), investments in debt instruments that are measured at FVTOCI and lease receivables.

The Company always recognizes lifetime Expected Credit Losses (ECLs) for trade receivables and operating lease receivables. For all other financial instruments, the Company recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECL.

Expected credit losses reflect the weighted average of credit losses with the respective risks of a default occurring as the weights. Lifetime ECLs represents the expected credit losses that will result from all possible default events over the expected life of the financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For internal credit risk management purposes, the Company determines that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Company):

- a) Internal or external information show that the debtor is unlikely to pay its creditors.
- b) When a financial asset is more than 90 days past due unless the Company has reasonable and corroborative information to support a more lagged default criterion.

The Company recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amounts through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and the carrying amount of the financial asset is not reduced.

3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. On derecognition of an investment in a debt instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss which had been recognized in other comprehensive income is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss, and the cumulative gain or loss which had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

b. Equity instruments

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments issued by a group entity are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Company's own equity instruments is recognized in and deducted directly from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

c. Financial liabilities

1) Subsequent measurement

Except the following situation, all financial liabilities are measured at amortized cost using the effective interest method:

- Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or is designated as at FVTPL.

Financial liabilities held for trading are stated at fair value, with any gains or losses on such financial liabilities are recognized in other gains or losses and any gain or loss arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest or dividends paid on such financial liability. Fair value is determined in the manner described in Note 31.

2) Derecognition of financial liabilities

The difference between the carrying amount of the financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

d. Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts and interest rate swaps.

Derivatives are initially recognized at fair value at the date on which the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedged relationship. When the fair value of a derivative financial instrument is positive, the derivative is recognized as a financial asset; when the fair value of a derivative financial instrument is negative, the derivative is recognized as a financial liability.

Derivatives embedded in hybrid contracts that contain financial asset hosts that is within the scope of IFRS 9 are not separated; instead, the classification is determined in accordance with the entire hybrid contract. Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of IFRS 9 (e.g. financial liabilities) are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

Provisions

Provisions are measured at the best estimate of the discounted cash flows of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

a. Warranty provisions

The Company provides warranty service for one year to two years. The warranty liability is estimated on the basis of evaluation of the products under warranty, past warranty experience, and pertinent factors.

b. Onerous contracts

Onerous contracts are those in which the Company's unavoidable costs of meeting the contractual obligations exceed the economic benefits expected to be received from the contract. The present obligations arising under onerous contracts are recognized and measured as provisions.

Revenue Recognition

The Company identifies the contract with the customers, allocates the transaction price to the performance obligations, and recognizes revenue when performance obligations are satisfied.

a. Revenue from the sale of goods

Revenue from the sale of goods comes from sales of electronic equipment. Sales of electronic equipment are recognized as revenue when the goods are delivered to the customer's specific location because it is the time when the customer has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility for sales to future customers, and bears the risks of obsolescence. Trade receivables are recognized concurrently. Electronic equipment products sold online are recognized as revenue when the products arrive at the location designated by the customer.

b. Revenue from the rendering of services

Revenue from the rendering of services comes from product design, online subscription content service, device examinations, and extended warranty services.

c. Licensing revenue

The Company does not promise to undertake activities that will change the functionality of software in software licensing transaction. Furthermore, such software remains functional without the updates and the technical support. Therefore, the upfront royalty is recognized as revenue when the patents subsequent usage occurs.

Leases

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease.

a. The Company as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases. The current lease contract of the Company are all operating leases.

Lease payments (less any lease incentives payable) from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases.

When a lease includes both land and building elements, the Company assesses the classification of each element separately as a finance or an operating lease based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Company. The lease payments are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of a contract. If the allocation of the lease payments can be made reliably, each element is accounted for separately in accordance with its lease classification. When the lease payments cannot be allocated reliably between the land and building elements, the entire lease is generally classified as a finance lease unless it is clear that both elements are operating leases; in which case, the entire lease is classified as an operating lease.

b. The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments, in-substance fixed payments, variable lease payments which depend on an index or a rate. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Company remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. For a lease modification that is not accounted for as a separate lease, the Group accounts for the remeasurement of the lease liability by (a) decreasing the carrying amount of the right-of-use asset of lease modifications that decreased the scope of the lease, and recognizing in profit or loss any gain or loss on the partial or full termination of the lease; (b) making a corresponding adjustment to the right-of-use asset of all other lease modifications. Lease liabilities are presented on a separate line in the consolidated balance sheets.

Variable lease payments that do not depend on an index or a rate are recognized as expenses in the periods in which they are incurred.

Borrowing Costs

Borrowing costs directly attributable to an acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Other than those stated above, all other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Employee Benefits

Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as expenses when employees have rendered services entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost and net interest on the net defined benefit liability (asset) are recognized as employee benefits expense in the period they occur. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liability (asset) represents the actual deficit (surplus) in the Company's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

Other long-term employee benefits

Other long-term employee benefits are accounted for in the same way as the accounting required for defined benefit plans except that remeasurement is recognized in profit or loss.

Termination benefits

A liability for a termination benefit is recognized at the earlier of when the Company can no longer withdraw the offer of the termination benefit and when the Company recognizes any related restructuring costs.

Share-based Payment Arrangements

Share-based payment transactions of the Company

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in capital surplus - employee share options. The fair value determined at the grant date of the equity-settled share-based payments is recognized as an expense in full at the grant date when the share options granted vest immediately.

Restricted shares for employees are recognized as other equity - unearned employee's bonus on the date of grant, with a corresponding increase in capital surplus - restricted shares for employees. If restricted shares for employees are granted for consideration and should be returned, they are recognized as payables.

At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the capital surplus - employee share options and capital surplus - restricted shares for employees.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

a. Current tax

Income tax payable (recoverable) is based on taxable profit (loss) for the year determined according to the applicable tax laws of each tax jurisdiction.

According to the Income Tax Law, an additional tax on unappropriated earnings is provided for as income tax in the year the shareholders approve to retain the earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

b. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, unused loss carry forward and unused tax credits for purchases of machinery, equipment and technology, research and development expenditures, and personnel training expenditures to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

c. Current and deferred tax

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Accrued Marketing Expenses

The Company accrues marketing expenses on the basis of agreements and any known factors that would significantly affect the accruals. In addition, depending on the nature of relevant events, the accrued marketing expenses are accounted for as an increase in marketing expenses or as a decrease in revenues.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The Company considers the economic implications of the COVID-19 when making its critical accounting estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period or in the period of the revisions and future periods if the revisions affect both current and future periods.

Key Sources of Estimation Uncertainty

a. Impairment of investments in associates

When there are signs of impairment loss suggesting certain investments under the associates might be impaired causing the book amount to be unable to be recovered, the Company will immediately evaluate the impairment of such investments. The management of the Company will assess the impairment based on the financial situation of the associates, and considers the relevant market and industry overview.

Net impairment loss recognized on investments in associates were NT\$325,173 thousand and NT\$0 thousand for the years ended December 31, 2021 and 2020, respectively.

b. Valuation of inventories

Inventories are measured at the lower of cost or net realizable value. Judgment and estimation are applied in the determination of net realizable value at the end of the reporting period.

Inventories are usually written down to net realizable value item by item if those inventories are damaged, have become wholly or partially obsolete, or if their selling prices have declined.

This inventory evaluation is based on the current market conditions and historical sales experience of similar products. Changes in product demand and market conditions within a specific period in the future may significantly affect the results of these estimates.

As of December 31, 2021 and 2020, the carrying amounts of inventories were NT\$1,649,574 thousand and NT\$1,527,103 thousand, respectively.

c. Realization of deferred tax assets

Deferred tax assets should be recognized only to the extent that the entity has sufficient taxable temporary differences or there is other convincing evidence that sufficient taxable profit will be available. Management applies judgment and accounting estimates to evaluate the realization of deferred tax assets. Management takes expected sales growth, profit rate, duration of exemption, tax credits, tax planning and etc. into account when making accounting judgement and estimates. Any changes in the global economy, industry environment and regulations may result in material adjustments to deferred tax assets.

As of December 31, 2021 and 2020, the carrying amounts of deferred tax assets were NT\$3,183,462 thousand and NT\$3,328,452 thousand, respectively.

a. Trade receivables at amortized cost

The average credit period of the sales of goods was 30-75 days. No interest was charged on trade receivables for the first 75 days from the date of the invoice. Thereafter, interest was charged at 1%-18% per annum on the outstanding balance. The Company adopted a policy of dealing with entities that are rated the equivalent of investment grade or higher and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. Credit rating information is obtained from independent rating agencies where available or, if not available, the Company uses other publicly available financial information or its own trading records to rate its major customers. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved annually.

In order to minimize credit risk, management has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up actions are taken to recover overdue receivables. In addition, the Company reviews the recoverable amount of each individual trade receivable at the end of the reporting period to ensure that adequate allowance is made for possible irrecoverable amounts. In this regard, management considers the Company's credit risk to have significantly reduced.

The Company uses the expected credit loss during the duration to recognize the allowance for losses of accounts receivable. The expected credit loss during the duration is mainly based on the customer's past default record, current financial situation and industrial economic situation.

The Company writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty without realistic prospect of recovery. For trade receivables that have been written off, the Company continues to engage in enforcement activities to recover the receivables due. Where recoveries are made, these amounts are recognized in profit or loss.

The following table details the loss allowance of trade receivables.

December 31, 2021

In June 2020, the Company entered into a 5-year syndicated loan with a group of financial institutions arranged by CTBC Bank. The credit line was divided into part A, B, and C which amounted to NT\$5 billion, NT\$2 billion, and NT\$2 billion, respectively; and the total line of credit amounted to NT\$9 billion. The Company is required to maintain certain financial covenants including debt ratio, equity, and net cash during the tenor of the loan. The computations of financial ratios mentioned above are done based on the audited consolidated financial statements or quarterly reviewed consolidated financial statements. As of December 31, 2021, the Company has met the financial ratios mentioned above.

The Company borrowed at a fixed interest rate of 1.70% p.a. on December 31, 2021.

The Company pledged land and buildings as collateral for the long-term borrowings (refer to Note 34).

The Company provides warranty service to its customers. The warranty period varies by product and is generally one year to two years. The warranties are estimated on the basis of evaluation of the products under warranty, historical warranty-trends, and pertinent factors.

Onerous contracts are those in which the Company's unavoidable costs of meeting the contractual obligations exceed the economic benefits expected to be received from the contract. The present obligations arising under onerous contracts are recognized and measured as provisions.

23. RETIREMENT BENEFIT PLANS

Defined Contribution Plans

The pension plan under the Labor Pension Act (the "LPA") is a defined contribution plan. Based on the LPA, HTC makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

The Company has defined benefit plans for all qualified employees of HTC. In addition, the employees of the Company's subsidiary are members of a state-managed retirement benefit plan operated by local government. The subsidiaries are required to contribute amounts calculated at a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Company with respect to the retirement benefit plan is to make the specified contributions to the fund.

The total expenses recognized in the consolidated statement of comprehensive income were NT\$145,043 thousand and NT\$160,600 thousand, representing the contributions made and to be made to these plans by the Company at the rates specified in the plans for the years ended December 31, 2021 and 2020, respectively. As of December 31, 2021 and 2020, the amounts of contributions payable were NT\$25,018 thousand and NT\$29,799 thousand, respectively. These and the amounts were paid subsequent to the end of the reporting period.

Defined Benefit Plans

The defined benefit plan adopted by HTC in accordance with the Labor Standards Law is operated by the government of the ROC. Pension benefits are calculated based on the years of services and the average monthly salaries of the six months before retirement. HTC contributes amounts equal to 2% of total monthly salaries and wages to a pension fund administered by the pension fund monitoring committee. Pension contributions are deposited in the Bank of Taiwan in the committee's name. Before the end of each year, HTC assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, HTC is required to fund the difference in one appropriation that should be made before the end of March of the following year. The pension fund is managed by the Bureau of Labor Funds, Ministry of Labor ("the Bureau"); HTC has no right to influence the investment policy and strategy. HTC had applied a suspension of pension contribution to the pension fund from May 2021 to April 2022 and May 2020 to April 2021, and had been approved by the competent authority in May 2021 and May 2020, respectively.

The amounts included in the consolidated balance sheets in respect of the obligation of HTC under the defined benefit plans were as follows:

Through the defined benefit plans under the Labor Standards Law, the Company is exposed to the following risks:

- Investment risk: The plan assets are invested in domestic or foreign equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets should not be below the interest rate for a 2-year time deposit with local banks.
- Interest risk: A decrease in the government or corporate bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plan's debt investments.
- Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows:

	December 31	
	2021	2020
Discount rates	0.500%	0.500%
Expected rates of salary increase	4.000%	4.000%

If a probable and reasonable change occurs in each significant actuarial assumptions while all other assumptions remain constant, the present value of the defined benefit obligation would (increase) decrease as follows:

	December 31	
	2021	2020
Discount rates		
0.25% increase	<u>\$ 9,712</u>	<u>\$ 10,787</u>
0.25% decrease	<u>\$ (10,129)</u>	<u>\$ (11,280)</u>

0.25% increase	<u>\$ (9,642)</u>	<u>\$ (10,743)</u>
0.25% decrease	<u>\$ 9,303</u>	<u>\$ 10,339</u>

The sensitivity analysis presented above may not be representative of the actual change in the present value of the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

24. EQUITY

Share Capital

a. Ordinary shares

Shares issued	<u>\$ 8,245,050</u>	<u>\$ 8,186,444</u>

In 2020, the Company retired 165 thousand restricted shares for employees. As a result, the amount of the Company's issued and outstanding ordinary shares as of December 31, 2020 decreased to NT\$8,186,444 thousand, divided into 818,644 thousand ordinary shares at a par value of NT\$10. Every ordinary share carries one vote per share and the rights to dividends.

In 2021, the Company executed 5,861 thousand shares for employee share options, totaling NT\$58,606 thousand. As a result, the amount of the Company's issued and outstanding ordinary shares as of December 31, 2021 increased to NT\$8,245,050 thousand, divided into 824,505 thousand ordinary shares at a par value of NT\$10. Every ordinary share carries one vote per share and the rights to dividends.

A total of 80,000 thousand shares of the Company's ordinary shares authorized were reserved for the issuance of employee share options.

b. Global depositary receipts

In November 2003, the Company issued 14,400 thousand ordinary shares, corresponding to 3,600 thousand units of Global Depositary Receipts ("GDRs"). For this GDR issuance, the Company's shareholders, including Via Technologies Inc., also issued 12,878.4 thousand ordinary shares, corresponding to 3,219.6 thousand GDR units. Thus, the entire offering consisted of 6,819.6 thousand GDR units, corresponding to 27,278.4 thousand ordinary shares. Taking into account the effect of share dividends, the GDRs increased to 8,782.1 thousand units (36,060.5 thousand shares). The holders of these GDRs requested the Company to redeem the GDRs to acquire the Company's ordinary shares. As of December 31, 2021, there were 8,630.3 thousand units of GDRs redeemed, representing 34,521 thousand ordinary shares, and the outstanding GDRs represented 1,539.5 thousand ordinary shares or 0.18% of the Company's outstanding ordinary shares.

Capital Surplus

	December 31	
	2021	2020
<u>May be used to offset a deficit, distributed as cash dividends, or transferred to share capital</u>		
Arising from issuance of ordinary shares	\$ 14,966,699	\$ 14,728,086

Arising from employee share options	<u>295,334</u>	<u>326,601</u>
	<u>\$ 16,005,339</u>	<u>\$ 15,761,158</u>

The capital surplus arising from shares issued in excess of par (including share premium from the issuance of ordinary shares, treasury share transactions and consolidation excess) and donations may be used to offset a deficit. In addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and once a year).

For details of capital surplus - employee share options and employee restricted shares, refer to Note 30.

Retained Earnings and Dividend Policy

Under HTC's Articles of Incorporation, HTC should make appropriations from its net income in the following order:

- a. To pay taxes.
- b. To cover accumulated losses, if any.
- c. To appropriate 10% as legal reserve unless the total legal reserve accumulated has already reached the amount of HTC's authorized capital.
- d. To recognize or reverse special reserve return earnings.
- e. The board of directors shall propose allocation ratios for any remainder profit after withholding the amounts under subparagraphs 1 to 4 above plus any unappropriated retained earnings of previous years based on the dividend policy set forth in the Article and propose such allocation ratio at the shareholders' meeting.

As part of a high-technology industry, the Company takes into consideration its operating environment, industry developments and long-term interests of shareholders when determining share or cash dividends to be paid. Other factors such as whether it can maintain operating efficiency and meet its capital expenditure budget and financial goals are also key considerations. The Company's dividend policy stipulates that at least 50% of total dividends may be distributed as cash dividends.

Appropriation of earnings to a legal reserve shall be made until the legal reserve equals the Company's capital. Legal reserve may be used to offset its deficit. If the Company has no accumulated deficit and the legal reserve has exceeded 25% of its issued and outstanding ordinary shares, the excess may be transferred to ordinary shares or distributed in cash.

The accumulated deficits off-set for 2020 and 2019 were approved in the shareholders' meeting on July 20, 2021 and June 19, 2020. The accumulated deficits off-set and dividends per share were as follows:

	Accumulated Deficits Off-set		Dividends Per Share (NT\$)	
	For 2020	For 2019	For 2020	For 2019
Legal reserve used to offset accumulated losses	\$ 3,390,478	\$ 3,169,627	\$ -	\$ -

The accumulated deficits off-set for 2021, which was proposed by the Company's board of directors on March 7, 2022, was as follows:

	For the Year Ended December 31, 2021
Legal reserve used to offset accumulated deficits	<u>\$ 3,226,493</u>

The accumulated deficits off-set for 2021 will be resolved by the shareholders in their meeting to be held on June 17, 2022.

Information on the appropriation of earnings proposed by the Company's board of directors and approved by the Company's shareholders is available on the Market Observation Post System website of the Taiwan Stock Exchange.

Other Equity Items

a. Exchange differences on translation of foreign operations

Exchange differences relating to the translation of the results and net assets of the Company's foreign operations from their functional currencies to the Company's presentation currency (New Taiwan dollars) were recognized directly in other comprehensive income and accumulated in the foreign currency translation reserve. Exchange differences previously accumulated in the foreign currency translation reserve were reclassified to profit or loss on the disposal of the foreign operation.

b. Unrealized gains or losses on financial assets at FVTOCI

Unrealized gains or losses on financial assets at FVTOCI represents the cumulative gains and losses arising from the revaluation of financial assets at FVTOCI that have been recognized in other comprehensive income. The cumulative unrealized gains or losses will not be reclassified to profit or loss on disposal of the equity investments.

30. SHARE-BASED PAYMENT ARRANGEMENTS

Employee Share Option Plan of the Company

Qualified employees of HTC were granted 15,000 thousand options in November 2013. Each option entitles the holder to subscribe for one ordinary share of the Company. The options granted are valid for 7 years and exercisable at certain percentages after the second anniversary from the grant date.

Qualified employees of HTC were granted 19,000 thousand options in October 2014. Each option entitles the holder to subscribe for one ordinary share of the Company. The options granted are valid for 10 years and exercisable at certain percentages after the second anniversary from the grant date.

Qualified employees of HTC were granted 1,000 thousand options in August 2015. Each option entitles the holder to subscribe for one ordinary share of the Company. The options granted are valid for 10 years and exercisable at certain percentages after the second anniversary from the grant date.

Qualified employees of HTC were granted 20 thousand options in May 2019. Each option entitles the holder to subscribe for one thousand ordinary shares of the Company. The options granted are valid for 10 years and exercisable at certain percentages after the second anniversary from the grant date.

Qualified employees of HTC were granted 10,000 thousand options in November 2019. Each option entitles the holder to subscribe for one ordinary share of the Company. The options granted are valid for 10 years and exercisable at certain percentages after the second anniversary from the grant date.

The exercise price equals to the closing price of the Company's ordinary shares on the grant date. For any subsequent changes in ordinary shares, the exercise price is adjusted accordingly.

Information on employee share options are as follows:

	For the Year Ended December 31			
	2021		2020	
	Number of Shares (In Thousands)	Weighted- average Exercise Price (NT\$)	Number of Shares (In Thousands)	Weighted- average Exercise Price (NT\$)

Risk-free interest rate	0.6125%-0.6348%	0.6082%-0.6224%	1.3965%	1.7021%	1.63%

Expected volatility was based on the historical share price volatility over the past 1-7 year. The Company assumed that employees would exercise their options after the vesting date when the share price was 1.63 times the exercise price.

Employee Restricted Shares

In the shareholders' meetings on June 19, 2014 and June 2, 2015, the shareholders approved a restricted share plan for employees amounting to NT\$50,000 thousand and NT\$75,000 thousand, consisting of 5,000 thousand and 7,500 thousand shares, respectively. In 2014 and 2015, the Company's Board of Directors passed a resolution to issue 5,000 thousand and 7,500 thousand shares, respectively.

The restrictions on the rights of the employees who acquired the restricted shares but have not met the vesting conditions are as follows:

- The employees cannot sell, pledge, transfer, donate or in any other way dispose of these shares.
- The employees holding these shares are entitled to receive dividends in cash or shares.
- The employees holding these shares have no voting rights.

If an employee fails to meet the vesting conditions, the Company will recall or buy back and cancel the restricted shares. For the year ended December 31, 2020, the Company retired 165 thousand restricted shares for employees totaling NT\$1,642 thousand. There are no outstanding employee restricted shares as of December 31, 2021.

Compensation Cost of Share-based Payment Arrangements

Compensation cost of share-based payment arrangement recognized was NT\$94,736 thousand and NT\$164,750 thousand for the years ended December 31, 2021 and 2020, respectively.

31. CAPITAL RISK MANAGEMENT

The Company manages its capital to ensure its ability to continue as a going concern while maximizing the returns to shareholders. The Company periodically reviews its capital structure by taking into consideration macroeconomic conditions, prevailing interest rate, and adequacy of cash flows generated from operations; as the situation would allow, the Company pays dividends, issues new shares, repurchases shares, borrows loans, and pays loans.

The Company is subject to capital structure requirements for the bank syndicated loan, refer to Note 19.

32. FINANCIAL INSTRUMENTS

Fair Value of Financial Instruments That Are Not Measured at Fair Value

Financial instruments not measured at fair value held by the Company include financial assets measured at amortized cost. Management has determined that the carrying amounts of financial assets not measured at fair value approximate their fair values or their fair values cannot be measured reliably.

- c. Valuation techniques and inputs applied to Level 2 financial instruments at fair value

Financial Instruments	Valuation Techniques and Inputs
Derivatives - foreign currency contracts	Discounted cash flow: Future cash flows are estimated based on observable forward exchange rates at the end of the reporting period and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.

- d. Valuation techniques and inputs applied to Level 3 financial instruments at fair value

Fair value measurements categorized within Level 3 of the fair value hierarchy are investments in equity instruments. The lack of quoted prices in an active market places these financial assets in the Level 3 category, in which fair values are based on valuation provided by market participants or quoted prices of the counter party. Quantitative information has not been disclosed since the relationship between significant unobservable inputs and fair value cannot be fully controlled.

- e. Valuation process for Level 3 financial instruments at fair value

The investment department will assess the reliability, independence, and consistency of the information sources to confirm whether the valuation is representative of the exercise price. Adjustments are made to ensure the rationality of the valuation presented.

- f. Sensitivity analysis of Level 3 fair value measurements under replacement assumptions

A sensitivity analysis of replacement assumptions for the valuation of Level 3 financial instruments at fair value is not required since the valuation model used by the Company is reasonable and not internally constructed.

Financial Risk Management Objectives and Policies

The Company's major financial instruments include equity and debt investments, trade receivables, other receivables, borrowings, trade payables and other payables. The Company's Corporate Treasury function provides services to the business and coordinates access to domestic and international financial markets. It also monitors and manages the financial risks relating to the operations of the Company through internal risk reports which analyze the exposures by degree and magnitude of risks. These risks include market risk, credit risk and liquidity risk.

The Company sought to minimize the effects of these risks by using derivative financial instruments and non-derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Company's policies, which are approved by the board of directors. The policies provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies is reviewed by the internal auditors on a continuous basis. The Company has not entered into or traded financial instruments, including derivative financial instruments, for speculative purposes.

The Corporate Treasury function reports quarterly to the Company's audit committee and board of directors in order to monitor risks and implement policies to mitigate risk exposures.

a. Market risk

The activities of the Company exposed it to the financial risks of fluctuations in foreign currency exchange rates. The Company has entered into a variety of derivative financial instruments to manage its exposure to foreign currency risk.

There was no change to the Company's exposure to market risks or the manner in which these risks were managed and measured.

1) Foreign currency risk

The Company undertook transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arose. Exchange rate exposures are managed within approved policy parameters utilizing forward foreign exchange contracts.

The carrying amounts of the Company's foreign currency denominated monetary assets, monetary liabilities, and derivatives which are exposed to foreign currency risk at the end of the reporting period are set out in Note 37.

Sensitivity analysis

The Company was mainly exposed to currency fluctuations of the United States dollar (USD), Euro (EUR), Renminbi (RMB) and Japanese yen (JPY).

The following table details the Company's sensitivity to a 1% increase and decrease in the New Taiwan dollar ("NTD", the functional currency) against relevant foreign currencies. The sensitivity analysis only includes outstanding foreign currency denominated monetary items and foreign currency forward contracts designated as cash flow hedges. A positive number indicates an increase in pre-tax profit/loss or equity associated with the NTD strengthens 1% against the relevant currency. For a 1% weakening of the NTD against the relevant currency, there would be an equal and opposite impact on pre-tax profit/loss or equity, and the balances below would be negative.

	Pre-tax Profit or Loss	Equity
<u>For the year ended December 31, 2021</u>		
USD	\$ 127,034	\$ (81,967)
EUR	(1,285)	(6,355)
RMB	(3,167)	(63,337)
JPY	(1,523)	(2,953)
<u>For the year ended December 31, 2020</u>		
USD	71,485	(171,300)
EUR	(210)	(8,911)
RMB	(1,039)	(71,772)
JPY	2,455	(5,154)

2) Interest rate risk

The carrying amounts of the Company's financial assets and financial liabilities with exposure to interest rates at the end of reporting period were as follows:

	December 31	
	2021	2020
Fair value interest rate risk		
Financial assets	\$ 13,336,607	\$ 11,288,630
Financial liabilities	4,791,895	1,050,054
Cash flow interest rate risk		
Financial assets	16,449	17,118
Financial liabilities	-	-

Sensitivity analysis

The sensitivity analysis below was determined based on the Company's exposure to interest rates for non-derivative instruments at the end of the reporting period. For floating rate assets and liabilities, the analysis was prepared assuming the amount of each asset and liability outstanding at the end of the period was outstanding for the whole year. A sensitivity rate of 0.1% increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 0.1% higher/lower and all other variables were held constant, the Company's pre-tax profit/loss for the years ended December 31, 2021 and 2020 would have increased/decreased by a cash outflow of NT\$16 thousand and a cash inflow of NT\$17 thousand, respectively.

3) Other price risk

The Company was exposed to equity price risk through its investments in convertible bonds, warrants, domestic listed shares and emerging market shares, domestic unlisted shares, overseas listed shares and overseas unlisted shares.

If equity prices had been 1% higher/lower, pre-tax profit for the years ended December 31, 2021 and 2020 would have increased/decreased by NT\$3,348 thousand and NT\$3,369 thousand, respectively, as a result of the changes in fair value of financial assets at FVTPL, and the pre-tax other comprehensive income for the years ended December 31, 2021 and 2020 would have increased/decreased by NT\$27,700 thousand and NT\$16,291 thousand, respectively, as a result of the changes in fair value of financial assets at FVTOCI.

b. Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Company. As at the end of the reporting period, the Company's maximum exposure to credit risk which will cause a financial loss to the Company due to failure of counterparty to discharge an obligation and financial guarantees provided by the Company could arise from the carrying amount of the respective recognized financial assets as stated in the consolidated balance sheets. The Company does not issue any financial guarantee involving credit risk.

The Company basically adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults.

The credit risk information of trade receivables is disclosed in the Note 10.

c. Liquidity risk

The Company manages liquidity risk to ensure that the Company possesses sufficient financial flexibility by maintaining adequate reserves of cash and cash equivalents and reserving financing facilities, and also monitors liquidity risk of shortage of funds by the maturity date of financial instruments and financial assets.

1) Liquidity risk tables for non-derivative financial liabilities

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables had been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Company can be required to pay.
