I 、 Letter to Shareholders :

(1) Reports for Business status in 2020 and Business Plan in 2021

Dear Shareholders:

I would like to extend my heartfelt gratitude for all shareholders out of your busy schedule to attend the Company's 2021 Shareholders Meeting, as well as the long-term supports and encouragement to the Company.

In retrospect 2020, the global economy growth staggered considerably due to the Covid-19 epidemic and affected somewhat the domestic demand, thus slowing the growth speed of home appliance market. Despite the overall economic suffering, Kolin's brand sales still registered growth in 2020, compared to the preceding year. This attributed to the upgrade of the Company's management efficiency and teamwork efforts in many significant indexes, for instance, a huge improvement in ratio of returned goods.

Meanwhile, major orders for automotive electronics resumed following the gradual unlock of overseas manufacturing bases, most of which were locked down by Covid-19 influences. Accordingly, the Company's brand sales, automotive electronics, and activated real estates (granted an incentive for floor area ratio up to 399% by the Industrial Bureau of the Ministry of Economic Affairs) have enjoyed fair progresses, and expect to enjoy better performances in the year of 2021.

The IoT (Internet of Things) has become a significant trend in the technological field in recent years. Through the convenience of voice-activated human-machine interaction, smart home appliances and intelligent family products are the important development items nowadays. In an attempt to further sharpen the competitive edge, Action Electronics has invested multiple resources aiming at the upgrade of its home appliance products, including the use of APPs for remote control functions. The Company also introduces a smart coffee machine, the first of its kind in Taiwan's home appliance industry, so as to offer more convenient life with its consumers. In the future, the Company will continue adjusting its structure and creating more applications in both AI and IoT. This expects to help the Company keep a stable growth under the changing environments and to serve as feedbacks for the support of shareholders. The management results of 2020, and prospects of 2021 are reported, as follows:

1.1.2020 Group Business Report

1. Operating income and expenditure and the implementation results of business plan:

The consolidated net operating income for the group was NT\$1,280,877,000 in 2020, decreased from NT\$1,340,594,000 in 2019. The consolidated operating net profit was NT\$44,061,000, and net profit after tax was NT\$43,498,000.

	Net Profit to Sales	3.40%	3.60%	
	EPS(NT\$)	0.17	0.20	

1.2. 2021 Business Plan

1. Strategic guidelines and business strategies:

- (1) Profitability: improve and create. Evaluate nine index of operating performance on a monthly basis to achieve the target of return on capital and the four-satisfying missions.
- (2) Structure adjustment: emphasis on “professional, simple, and profitable” and build up core competitiveness. Integrate group resources and provide priority to those with SMART strategy.
- (3) Activation of assets: the integration of existing tangible (intangible) assets, Cooperative development, creating value, and sharing benefits.
- (4) Stock price rationalization: starting from the fundamentals, make the stock price at least reach

the net value per share, and benefit the interests of shareholders.

2. Products and business: The main business of the Company and its subsidiaries are the sales, maintenance, installation and service of electrical home appliances, warehousing, logistic services, manufacturing, processing, and trading of automotive electronic products. It is divided into three major operating divisions:
 - (1) Automotive electronics manufacturing division: R&D, manufacturing, and sales of automotive audio-visual entertainment products (such as vehicle integrated central control dashboard, vehicle central control multimedia dashboard system)
 - (2) Brand management and service division: use the brand motto of "discover and enjoy the beauty of Taiwan" as the main axis and extend to enhance brand marketing ability, develop innovative, differentiated, and cost-competitive products. Increase AI smart home appliances , such as voice-controlled home appliances. Deeply cultivate channel operations to increase revenue and gross profit. The main products include large and small household appliances such as TVs, air conditioners, refrigerators, washing machines and household appliances, cooking appliances, medical cosmetology appliances, drainages, etc. In the same time, to improve customers' satisfaction on after-sale services and logistics distribution in order to provide consumers with a better experience in terms of quality and service.
 - (3) Asset activation business division: The Action Group owns many plant assets providing international storage equipment and high quality environment at home and abroad, which can create considerable revenue and profits for the group every year. In response to the large-scale return of Taiwanese businessmen and the renewal of the industrial zone toward three dimension by the government's, the Action Group plans to build two new factory and office buildings on the old site of the headquarters to support future revenue momentum. The Group will also actively dispose non-core assets in order to support the development of the Group's core business.

1.3.Future development strategy

1. Brand management: Continuously provide customers with trustworthy and affordable products and services. Apply smart technology to make products more useful and services more immediate to make our life better. Let consumers feel the beauty of Taiwan through products, logistics and after-sales service (Kolin). In terms of products, in response to the advent of the era of smart home appliances, the Group has formed R&D team for smart homes solution to create a smart home appliance ecological chain through the communication of hardware and on the cloud. In the future, home appliances products will fully enter the smart era to make human life more convenient and comfortable. For home appliances, Smart is undoubtedly the trend.
2. Automotive electronics:With the popularization of campervans and yachts, the Group has set up strategic alliances with major foreign manufacturers to provide the best manufacturing and development support. The Company's production bases in China and Southeast Asia can avoid the tariffs impact caused by the Sino-US trade war and establish short supply chain to provide the needs of customers in the China and Europe and America.
3. Asset activation: In terms of the activation of assets, The Group established a subsidiary, Action Asia Development. Committed to the industry upgrade, the Group planned to convert old head quarter to become an industrial park with the theme "New Type of Industry 4.0". The industry zone gathers R&D, makers, artificial intelligence (AI), Internet of Things (IOT), big data (Big Data) and integrates functions of R&D, exhibition and sales, and passenger flow. In addition, the Group

will dispose of idle assets or non-core assets to increase disposal income and expand core competitiveness.

4. Looking into the future, the Group will continue to focus on the integration of the resources of the three divisions, strengthen the operational ability and uplift brand competitiveness. In the operation and management, the Group will emphasize on recruiting and training of new talents, create the Group's corporate culture and value continuously, and implement sustainable business operations

1.4. The influence of external competition, regulatory environment and overall business environment

1. For the rapid changes in the external environment, despite the impact of the Sino-US trade war and Covid-19 epidemic, the Company still adheres to the business strategy of “professional, simple, and profitable”, concentrates on the core business development, strives to flatten the organization to quickly respond the market change and close to market demand. The Company will use "specialized" and "simplified" to concentrate resources in a favorable market, create values, and pursue profits.
2. Regulatory environment: In view of the continuous development of the Sino-US trade war, the demand for investment from returned Taiwanese business has increased dramatically. In line with government’s industrial policy of renewal industrial zone toward three-dimensional development, the Company sets up the Action Intelligent and Tech Park, which will become a demonstration for the transformation and landmark of the Zhongli Industrial Zone.
3. Overall business environment:
 - (1) Inheritance, reform and innovation go hand-in-hand: Inherit the excellent corporate culture and work spirit of the Action, the most important thing for reform is to have good products, good talents, and inject new elements and vitality. Enterprises must be alerted to avoid boil frogs in warm water effect.
 - (2) Home appliance industry under the brand Kolin, automotive electronics, and activated assets have become the three major operating focuses for the Company. For the home appliance, we continue to provide consumers with a simple, easy-to-use products and happy life. For automotive electronics, the Company has built up extensive OEM experience with major international factories and already set up a production base in Malaysia. Moreover, the Company's products have niche of a long product cycle. Under the Sino-US trade war, it has become a competitive advantage.
 - (3) For the asset activation, the Company has established modern warehousing services in Shanghai. In Shenzhen, the Company owned land located in the Greater Bay Area where the airport located. For the Zhongli area where headquarters located, it will be developed into the Action Intelligent Tech Park.

Action Electronics Co.,Ltd

Chairman : Peng, Ting Yu

Note: Please tick the corresponding boxes that apply to the directors or supervisors during the two years prior to being elected or during the term of office.

1. Not an employee of the company or any of its affiliates.
2. Not a director or supervisor of the company or any of its affiliates. Not apply to independent directors appointed in accordance with the Act or the laws and regulations of the local country by, and concurrently serving as such at, a public company and its parent or subsidiary or a subsidiary of the same parent.
3. Not a natural-person shareholder who holds shares, together with those held by the person's spouse, minor children, or held by the person under others' names, in an aggregate of one percent or more of the total number of issued shares of the company or ranking in the top 10 in holdings.
4. Not a spouse, relative within the second degree of kinship, or lineal relative within the third degree of kinship, of a managerial officer under subparagraph 1 or any of the persons in the preceding two subparagraphs.
5. Not a director, supervisor, or employee of a corporate shareholder that directly holds five percent or more of the total number of issued shares of the company, or that ranks among the top five in shareholdings, or that designates its representative to serve as a director or supervisor of the company under Article 27, paragraph 1 or 2 of the Company Act. Not apply to independent directors appointed in accordance with the Act or the laws and regulations of the local country by, and concurrently serving as such at, a public company and its parent or subsidiary or a

subsidiary of the same parent.

6. If a majority of the company's director seats or voting shares and those of any other company are controlled by the same person: not a director, supervisor, or employee of that other company. Not apply to independent directors appointed in accordance with the Act or the laws and regulations of the local country by, and concurrently serving as such at, a public company and its parent or subsidiary or a subsidiary of the same parent.
7. If the chairperson, general manager, or person holding an equivalent position of the company and a person in any of those positions at another company or institution are the same person or are spouses: **not** a director (or governor), supervisor, or employee of that other company or institution. Not apply to independent directors appointed in accordance with the Act or the laws and regulations of the local country by, and concurrently serving as such at, a public company and its parent or subsidiary or a subsidiary of the same parent.
8. Not a director, supervisor, officer, or shareholder holding five percent or more of the shares, of a specified company or institution that has a financial or business relationship with the company. Not apply to independent directors appointed in accordance with the Act or the laws and regulations of the local country by, and concurrently serving as such at, a public company and its parent or subsidiary or a subsidiary of the same parent, if the specified company or institution holds 20 percent or more and no more than 50 percent of the total number of issued shares of the public company.
9. Not a professional individual who, or an owner, partner, director, supervisor, or officer of a sole proprietorship, partnership, company, or institution that, provides auditing services to the company or any affiliate of the company, or that provides commercial, legal, financial, accounting or related services to the company or any affiliate of the company for which the provider in the past 2 years has received cumulative compensation exceeding NT\$500,000, or a spouse thereof; provided, this restriction does not apply to a member of the remuneration committee, public tender offer review committee, or special committee for merger/consolidation and acquisition, who exercises powers pursuant to the Act or to the Business Mergers and Acquisitions Act or related laws or regulations.
10. Not having a marital relationship, or a relative within the second degree of kinship to any other director of the Company.
11. Not been a person of any conditions defined in Article 30 of the Company Law.
12. Not a governmental, juridical person or its representative as defined in Article 27 of the Company Law.

Total	11person(includeing 1 judicial person)	11person(includeing 1 judicial person)	11person(includeing 1 judicial person)	11person(includeing 1 judicial person)

Note1 : The names of directors should be listed separately (institutional shareholders should list the names of institutional shareholders and their representatives separately), and directors and independent directors should be listed separately, and the remuneration amounts to directors should be disclosed in a summary.If the director is also serving as General manager or VP, please fill in this form and the following table (3-1), or the following table (3-2-1) and (3-2-2).

Note2 : Refers to the salaries, duty allowances, severance pay, various bonus and incentives paid to the Director in the most recent year.

Note3 : Refer to the remuneration amount approved by BOD in the most recent years

Note4 : Refers to the amount of business execution fee for directors including travel expense, special disbursement, allowance, accommodation, company car and other physical items in the most recent years. Where housing, cars, other means of transportation, or expenditures exclusively for individuals are offered, the nature and costs of the offered assets, the actual rent or fair market rent, fuel expenses, and other benefits shall be disclosed. In addition, where a driver is provided, please provide an explanation in the notes on the compensation paid to the driver by the Company, but not calculating as remuneration.

Note5: Refers to the amount of employee compensation for managerial officers who are serving as directors (including CEO、VP or other Managerial officers and employee), including salary, various bonuses, incentives, travel expenses, special disbursements, allowances, accommodation, company car, other physical items, other compensations, etc., in the most recent year. Where housing, cars, other means of transportation, or expenditures exclusively for individuals are offered, the nature and costs of the offered assets, the actual rent or fair market rent, fuel expenses, and other benefits shall be disclosed. In addition, where a driver is provided, please provide an explanation in the notes on the compensation paid to the driver by the Company, but not calculating as remuneration. The salaries recognized in accordance with IFRS 2 "Share-based Payment," including the share subscription warrants issued to employees, new restricted stock award shares issued to employees, and employee stock at cash capital increase, shall also be calculated as remuneration.

Note6 : Refers to the amount of employee compensation (including stock and cash) approved by the Board of Directors for managerial officers who

are serving as directors in the most recent year. If the amount of employee compensation cannot be estimated this year, the proposed amount should be calculated based on the actual amount and ratio distributed last year. In addition, the table 1-3 should be completed.

Note7 : The total remuneration paid by all companies in the consolidated statements (including the Company) to directors must be disclosed.

Note8 : The total remuneration paid by the Company to General Manager and VP must disclose their name

Note9 : The total remuneration paid by all companies in the consolidated statements (including the Company) to General Manager and VP must disclose their name.

Note10 : The net income after-tax refers to the net income after-tax in the standalone financial statements for the most recent year.

Note11 : a.Specify the amount of remuneration received by director from ventures other than subsidiaries or from the parent company in this field (Please fill in "None" if none).

b.The remuneration amount received by directors from ventures other than subsidiaries or the Company, the amount shall be included in I column and change its name of Column into The parent Company and all its ventures.

c.The remuneration means pay, compensation (including compensation of employees, directors and supervisors) and business expenses received by managerial officers who are serving as a director, supervisor or manager of ventures other than subsidiaries or of the parent company.

* The remuneration disclosed in the table is different from income as defined in the Income Tax Act. This table is therefore provided for disclosure only and is not used for taxation purposes.

(2) The remuneration to Supervisor: None because The Company has established Audit Committee instead of supervisor.

(IX) Matters that should be disclosed in the implementation of the internal control system:

1. Statement of Internal Control

Action Electronics Co., Ltd.
Declaration of Internal Control System

Date: March 29, 2021

Based on the results of self-check on the internal control system of the company in 2020, we hereby declare as follows:

- I. The company is sure that the establishment, implementation and maintenance of the internal control system is the responsibility for board of directors of the company and managers, and the company has established this system. Its purpose is to achieve the objectives of operation effectiveness and efficiency (including profit, performance and asset safety, etc.), reporting reliability, timeliness, transparency, compliance with relevant laws and regulations, and provide reasonability to ensure.
- II. The internal control system has its inherent limitations. No matter how perfect the design is, an effective internal control system can only provide a reasonable guarantee for the achievement of the above three objectives; moreover, due to changes in the environment and circumstances, the effectiveness of the internal control system may change accordingly. However, the company's internal control system has a self-monitoring mechanism. Once the defect is identified, the company will take corrective action.
- III. The company judges whether the design and implementation of the internal control system are effective in accordance with the judgment items of the effectiveness of the internal control system stipulated in the "Handling Guidelines for the Establishment of an Internal Control System by Public Offering Companies" (hereinafter referred to as the "Handling Guidelines"). The judgment items of the internal control system adopted in the "processing criteria" are based on the process of management control, which divides the internal control system into five components: 1. control environment, 2. risk assessment, 3. control operations, 4. Information and communication, and 5. Supervision. Each component includes several items. For the aforementioned items, please refer to the "Handling Guidelines".
- IV. The company has adopted the above-mentioned internal control system judgment items to check the effectiveness of the design and implementation of the internal control system.
- V. Based on the inspection results of the preceding paragraph, the company believes that the company's internal control system (including supervision and management for subsidiaries) as of December 31, 2020, includes understanding the effectiveness of operations and the extent to which the efficiency targets are achieved. The design and implementation of the internal control system that reporting is reliable, timely, transparent and complied with relevant laws and regulations are effective, which can reasonably ensure the achievement of the above objectives.
- VI. This statement will become the main content of the company's annual report and public prospectus, and will be published. If there are false or concealed content in the above disclosure, it will involve legal liabilities under Article 20, Article 32, Article 171, and Article 174 of the Securities Exchange Law.
- VII. This statement was approved by the company's board of directors on March 29, 2021. Among the 11 directors present, 0 of them held objections, and all of them agreed with the content of this statement and made this statement.

Action Electronics Co., Ltd

Chairman : Peng, Ting Yu

General manager : Hsu, Wen-Tang

2. If an accountant is entrusted to review the internal control system, the accountant's review report shall be disclosed: none.

(X) In the most recent year and as of the publication date of the annual report, the company and its internal personnel have been punished in accordance with the law, the company has imposed penalties on its internal personnel for violating the provisions of the internal control system, and if the results of the penalties may have a significant impact on the rights and interests of shareholders and the price of securities, the content of the punishment, main deficiencies and improvements shall be listed: none.

If surplus or capital reserve is used to increase capital, the market price and cash dividend information should be disclosed retrospectively adjusted according to the number of shares issued.

Note 1: List the highest and lowest market prices of common stocks in each year, and calculate the average market prices for each year based on the transaction value and volume of each year.

Note 2: Please fill in the list based on the number of issued shares at the end of the year and the distribution based on the resolution of the shareholders meeting in the following year.

Note 3:EPS calculation was based on retroactive adjustment for capitalization of unappropriated earnings, additional paid-in capital and employees' compensation - stock.

Note 4: If the equity securities issuance conditions stipulate that the dividends that have not been paid in the current year are accumulated to the year when there is a surplus, the dividends accumulated as of the current year shall be disclosed.

Note 5 : $\text{Price / Earnings Ratio} = \text{Average Market Price} / \text{Earnings per Share}$

Note 6 : $\text{Price / Dividend Ratio} = \text{Average Market Price} / \text{Cash Dividends per Share}$

Note 7 : $\text{Cash Dividend Yield Rate} = \text{Cash Dividends per Share} / \text{Average Market Price}$

Note 8 : The net value per share and the earnings per share should be filled in with the information verified (reviewed) by an accountant as of the printing date of the annual report in the most recent quarter; the remaining fields should be filled in with the data of the current year as of the printing date of the annual report

Note 9 : The Board was held on 3/29/2021 to propose to distribute cash dividends of NT\$0.1 per share for 2020

(6) Dividend Policy and Implementation Status

1. Dividend Policy

Based on the company's operational needs and the consideration of maximizing shareholders' equity, the Company's dividend policy will be based on the company's future capital expenditure and capital needs. The proportion of cash dividends will be not less than 30% of the total dividends.

2. Proposed Distribution of Dividend: The Board has adopted a Proposal for Distribution of 2020 Profits on 3/29/2021. Please refer to the 2020 PROFIT DISTRIBUTION TABLE below.

Action Electronics Co., Ltd PROFIT DISTRIBUTION TABLE Year 2020

Unit : NT\$ thousand

Items	Amount	
	Sub-Total	G-Total
Beginning retained earnings		\$ 26,082,438
Add: net profit after tax	\$ 46,096,145	
Other comprehensive gains and losses (Determine the actuarial profit and loss of the benefit plan)	(2,394,065)	
Earnings available for distribution		43,702,080
Less: 10% legal reserve		(4,370,208)
Special reserves		(35,135,473)
Total Amount for Distribution		30,278,837
Distributable items:		
Dividend to shareholders-Cash (NT\$0.1 per share)		(27,715,750)
Unappropriated retained earnings		\$ 2,563,087

1. The Company proposed to distribute Cash dividends of NT\$0.1 Per share for 2020 which amounted to NT\$ 27,715,750 in total
2. After approval of the Annual Shareholders' Meeting, it is proposed that Chairman will be authorized to resolve the ex-dividend date and handle distribution affairs for cash dividend
3. Cash dividends paid to each individual shareholder will be rounded down to the nearest dollar. Fractional shares with a value less than one dollar are recognized as the Company's other income.
4. If the company repurchase stocks of the Company or convert or retire treasury stocks that give impacts on the outstanding shares number to make distribution rate /per stock change, the Company authorizes the chairman to adjust the distribution yield of shareholders according to the resolution for distribution amount and of actual outstanding share number in shareholders' meeting.

Chairman : Peng, Ting-Yu General manager : Hsu, Wen-Tang Accounting Officer : Lei, Shih-Yun

- (7) Impacts of free share assignment intended through the current shareholders meeting on the Company's operational performance and earnings per share: Not Applicable.

(8) Remuneration of employees and directors:

1. The amount or scope of the remuneration of employees, directors and supervisors stated in the company's regulations of organization: according to the company's articles of association:
If the company makes a profit in the current year (the so-called profit refers to the pre-tax benefit deducting the benefit before the remuneration distribution to employees and directors), no less than 5% should be allocated for employees' remuneration and no more than 4% for directors' remuneration; independent directors do not participate in the reward distribution, but when the company still has accumulated losses, the remuneration amount shall be reserved in advance. Employee remuneration can be made in stocks or cash, and its payment objects may include employees of affiliated companies who meet the conditions set by the board of directors.
The allocation of employee remuneration and directors' remuneration shall be made by the board of directors based on a resolution approved by more than two-thirds of the directors present and more than half of the present directors.
2. The calculation basis of the estimated amount of remuneration for employees, directors and supervisors in the current period, the calculation basis of the number of shares of employee remuneration distributed by stocks, and the accounting handle when the actual distribution amount is different from the estimated amount:
If there is any change in the amount after the publication of the annual financial statement, it shall be handled according to the change in accounting estimates and adjusted in the next year.
3. Remuneration distribution approved by the board of directors:
 - (1) Remuneration for employees, directors and supervisors is distributed in cash or stocks. If there is a discrepancy between the estimated annual and the recognized amount of expense, the discrepancy, reason and handling situation should be disclosed:
On March 29, 2021, the board of directors approved NT\$2,591,526 for employee remuneration and NT\$2,073,221 for directors to be paid in cash. Differences between the actual and estimated figures will be included in the next year's profit and loss. The relevant information approved by the board of directors will be disclosed in the Market Observation Post Station (MOPS) for reference.
 - (2) The amount of employee remuneration is distributed by stocks and its proportion to the total amount of the individual or individual financial report after-tax net profit and total amount of employee remuneration for the current period. (The company does not distribute stock dividends)
4. The actual distribution of the remuneration of employees, directors and supervisors in the previous year (including the number of shares distributed, amount and stock price), and the difference between the actual distribution and the recognized remuneration of employees, directors and supervisors, the numbers of the difference, the reasons, and the processing situation should be stated.:

In the previous year, the bonus for employees was NT\$3,017,821 and the bonus for directors was NT\$2,414,257. The actual amount paid was consistent with the resolution of the board of directors.

(9) Whether the company buys back the company's stock: None

4.2、 Corporate Bonds:None.

4.3、 Preferred Shares:1.Status of preferred shares:None ; 2.Preferred shares with warrant : None

4.4、 Issuance of global depository receipts : None.

4.5、 Employee Stock Option Certificate, Restricted Employee Shares

1 Issurance of employee stock option: None

2. Employee Stock Options Granted to Management Team and to Top 10 Employees with over NT\$30 million: None.

4.6、 Status of new share issuance in connection with Merges and acquisitions : None.

4.7、 Status of capital utilization plan:None

IV.. Operation Overview

5.1. Business content:

(I) Business scope:

1. Main business content: sales, maintenance, installation and service of various household appliances for the main business items of the company and its subsidiaries. Manufacturing, processing and trading of automotive audio-visual electronic products; warehousing and logistics services and asset development, etc.

2. Operating proportion: (Group)

Unit: NT\$ thousand; %

Product Item	2020 Group Consolidated Amount	
	Net revenue	Revenue proportion (%)
Sales revenue of automotive electronics manufacturing business system	\$ 413,522	32
Sales revenue of brand management and service business system	728,110	57
Sales revenue of warehousing and logistics business system	139,245	11
Total	\$ 1,280,877	100

3. The current products:

Action Group is divided into three major business systems based on operations.

- (1) Automotive electronics manufacturing business system: With Malaysia's Markin plant of ACTION INDUSTRIES(M)SDN.BHD. and Shenzhen plant of Action Asia Co., Ltd. as the center of operation, R&D, manufacturing and sales of automotive electronic audio-visual entertainment systems and portable multimedia products.
- (2) Brand management and service business system: With Taiwan Kolin brand management and Realise Tech Services Co.,Ltd. as the core, brand management continues to "discover with heart and enjoy the beauty of Taiwan" as the main axis, enhance brand marketing, migrate innovation and differentiation and develop competitive products with high CP value, and intensively cultivate channel operations to increase revenue and profits.
- (3) Asset activation business system (including warehousing and logistics system): Action Group owns many plant assets in Taiwan and abroad. For example, the SHANGHAI ACTION TECH CO., LTD has transformed to provide international warehousing equipment and high-quality environment for migration of International brand customers, ACTION TECHNOLOGY (Jian, Jiangxi) CO.,LTD has also leased its factories, etc., which can create stable cash flow and profits for the group every year. In addition, in response to the large-scale return of Taiwanese businessmen and followed the renewal of three-dimensional industrial zone development plan of the government, the former headquarters of Action Group has been planned to build two new factory and office buildings, and is committed to promoting industrial upgrading. The headquarters of Taoyuan Zhongli is planned as a "New Type of Industry 4.0" industrial park in the northern Taiwan region that integrates R&D, Maker, Artificial Intelligence (AI), Internet of Things (IOT), Big Data, and aggregates R&D, exhibition and sales, and passenger flow.

4. New products (services) planned to be developed:

Build a R&D team to develop AI smart home appliances, such as smart coffee machines, smart lights, smart curtains, smart TVs, smart air conditioners, smart audio and other smart home appliances.

(II) Industry overview:

1. Current status and development of the industry

(1) In recent years, the Internet of Things has become the most important trend in technological development. Through the convenience of voice-controlled human-computer interaction, smart home appliances and smart homes are even more important development projects. In order to enhance the competitive advantage, the company has invested a lot of resources to "upgrade" home appliances. Users can easily remote control them through APPs such as mobile phones and tablets. Currently, the company has also launched the first smart voice-controlled coffee machine in the home appliance industry, aiming to provide consumer a more convenient life. In the future, the company's team will continue to adjust its structure and develop AI intelligence and IOT applications, so that the company can still grow steadily and positively in the face of a changing external environment to feedback the support from shareholders.

(2) The company's automotive audio-visual products are mainly used in the refitting market such as RV campers and yachts. According to industry research reports, the market for electronic recreational vehicles is estimated to exceed US\$69 billion in 2027. According to preliminary statistics, the market size in 2020 will be approximately US\$57.5 billion. Among them, the US market will be worth US\$16.9 billion in 2020, and the Chinese market will also grow rapidly. It is estimated that the market will reach US\$12.3 billion in 2027. As income increases in Europe, the United States, Japan and China, consumers will pay more attention to outdoor recreation and entertainment. This market is expected to grow.

2. The relevance of the industry's upstream, midstream and downstream

(1) Important raw materials and related suppliers in the electronics manufacturing industry

A. The main raw materials of consumer electronics products are panel driver ICs, small and medium-sized panels, printed circuit boards, backlight modules, etc.

B. The company mainly cooperates with the bundle sale of Internet + mobile multimedia player equipment. It belongs to the midstream of the industry. Its upstream is related components and materials. In response to market demand, the downstream sales targets are mostly customers, channels or importers.

(2) Industrial structure and supply and demand of branded goods and channel services

A. In the consumer electronics industry, the upstream is related to components and materials, the midstream is the manufacturer, and the downstream is the distributor or importer.

B. In 3C product channels, upstream are manufacturers of home appliance products, film and audio products, information products, and communication products, and downstream are direct sales stores such as wholesale selling products to consumers.

C. Home appliance repair service such as Realise Tech Service Co., Ltd. by offering professional service and brand service bears responsibilities of customer satisfaction after-sales service, and improves the comprehensive synergy of brand + channel + service.

3. Various development trends and competitive situations of products

- (1) In pace with the advancement of science and technology, the significance of home appliances has changed from "need" to "convenience", and the standards of energy saving and environmental protection continue to upgrade and consumers need different home appliances. Therefore, the development of Taiwan home appliances is an inevitable trend in digitalization; not only this but also personalization, youthful, economical, convenient to use, catch up with the popular, those are what consumers care about. The most important thing for the Kolin brand to return to the market is to put aside the baggage of traditional home appliances in the past and move towards consumers and the new generation.
- (2) The main content of the business: research and development and sales of electrochemical products, digital electronic products, small household appliances, information and various communication products.
- (3) Product competition situation: Competing manufacturers of home appliances include Datong, Sampo, TECO, Chi Mei, Sanyo, etc.

(III) Technology and R&D Overview:

Electronic manufacturing business system:

1. Research and development expenditures in the last two years

Unit: NT\$ Thousand

Year	2020	2019	As of the publication date of the annual report, the R&D expenditure in the first quarter of 2021 was NT\$2,464,000.
Amount	31,584	29,341	

2. Successfully developed products or technologies

- (1) The main product of Malaysia's Markin plant of ACTION INDUSTRIES(M)SDN.BHD. is Mobile Video (DVD/USB/HDMI/AV/GAME), and it is constantly developing new models, such as Android OS/10.1 inch back-to-back infotainment Products, ODM81011/10.1 inch in-vehicle ceiling-mounted entertainment multimedia player, 8-inch headrest & 10.1-inch ceiling-mounted Android OS in-vehicle infotainment products, OHM60902 (P6-20) 9-inch ceiling-mounted car entertainment products, multimedia player and so on.
- (2) Shenzhen plant of Action Asia Co., Ltd. and ACTION INTELLIGENT (SHENZHEN) VO., LTD. cooperate to develop AI smart home appliances. Smart home appliances take the lead to set up advanced central control systems to integrate smart switches, smart lights, smart curtains, smart TVs, smart air conditioners, smart audio, etc., recently has completed development of smart speakers, smart coffee machines, smart TVs, air conditioners, etc. will be launched into the market one after another.
- (3) Kolin Brand of Action Group assembles, tests and adjusts various refrigerators by itself in response to market demand, controls the manufacturing process, and ensures product delivery and quality.
- (4) SHANGHAI ACTION TECH CO., LTD., positioned as warehousing industry, has established an international logistics environment to serve the logistics of major companies in mainland China.

(IV) Long-term and short-term business development plans:

Action Electronics Co., Ltd. has been established for more than 40 years, and has been selling to the worldwide by ODM and OEM. It started to operate the Kolin brand 6 years ago, changing its thinking not only to establish the brand of Kolin, but also to transfer business successfully. In the future, the Group will continue to transform towards the activation of land assets.

Short-term business development plan:

- (1) Automotive Electronics manufacturing business system: Based on the Macinese plant in Malaysia, to promote the development of automotive electronics, marketing strategies to develop automotive multimedia products, multi-point marketing with the same model, exclusive management, and integration of automotive entertainment products into automotive platform products as In-car Platform products.
- (2) Shenzhen plant of Action Asia Co., Ltd. established the R&D team of ACTION INTELLIGENT (SHENZHEN) VO., LTD. to facilitate the development of the group and strengthen the development of automotive and smart home appliances.
- (3) Channel service business system: Kolin brand of Taiwan Action Group and Realise Tech Service Co., Ltd. are the main roleplayer to promote popularity of Kolin brand through diversified operation of brand management, boost flexible channel sales, actively develop niche products and markets, and find out the niche channels.
- (4) Activate assets, gradually activate land assets in Zhongli, Shenzhen, Shanghai, Jiangxi... and other places to inject more fresh water into enterprises. SHANGHAI ACTION TECH CO., LTD., positioned as a warehousing and logistics center, has grown steadily; the land development of Taiwan headquarters, and the establishment of "ACTION ASIA DEVELOPMENT CO., LTD." the company's positioning, functions, organizational structure and operation plan have been set up and a "New Type of Industry 4.0" industrial park integrating R&D, exhibition and sales will be completed within 3-5 years.

Long-term business development plan

Looking forward to the future, in order to continue to make profits, Action Group hopes to combine good planning, good products and brand services, so that the company can continue to seek innovation and change.

5.2. Market and production and sales overview:

(I) Market analysis:

1. The sales (provide) area of the company's main products (services)

Sales (Service) Region

Year Sales Area		2020		2019	
		Net Revenue	Percentage	Net Revenue	Percentage
Export	Asia	133,687	10.44	114,170	9.17
	America	347,995	27.17	355,012	26.29
	Others	64,091	5.00	64,727	4.79
Domestic		735,104	57.39	806,685	59.75
Total		1,280,877	100.00	1,340,594	100.00

- (1) The proportion of sales area of the automotive electronics manufacturing business system,

the America occupies 84% and others are 16% in 2020.

- (2) The products of the channel service business system are mainly for domestic sale. In terms of channels, including traditional dealer's channel 34%, wholesales 33%, and Others 33%.

2. Market share and future supply and demand conditions and growth, competitive niches and development prospects favorable and unfavorable factors and countermeasures.

Automotive Electronics manufacturing industry:

- (1) Operational policy: streamline operation, multi-point marketing with the same model, resource integration, achieve better results, restart research, production, and sales, give full play to the spirit of teamwork, and ensure the achievement of annual goals.
- (2) Marketing allocation:
- Action Asia Shenzhen Factory: Steady innovation of existing product lines, involvement of voice intelligent products; maintenance of existing customers, development of customers in China and other new markets.
- Markin Plant: Strengthen the development of the ASEAN vehicle manufacture market, expand the mobile video business in Southeast Asia, India, the Middle East and Africa, and strengthen service on major customer, as well as the control of delivery and quality of finished products.
- (3) Advantages and disadvantages of business niche and development prospects and countermeasures
- A. Favorable factors: OEM/EMS business of Action Asia Shenzhen Factory and Markin Plant, and has won the award of high quality level and best production partner in the industry, and the factory is located in Southeast Asia, which has a geographical competitive advantage toward on RCEP and the Sino-US trade war.
- B. Unfavorable factors: The price and availability of raw materials are affected by the pandemic of COVID-19, and the delivery period is relatively lengthened.
- C. Countermeasures: establishing long-term cooperative relations with customers and suppliers and have advanced preparations for materials and components.

Brand management and service Industry:

- (1) Management policy:
- A. Expand the brand value of the Kolin brand, strengthen online sales channel operations, and combine the advantages of after-sales service and logistics to provide consumers with the best overall service.
- B. Short-term business development plan:
- Product quality and differentiation: strengthen product appearance, more refined functions, and promote brand value. Home appliances are not just home appliances, but also an important part of the home living environment.
- Strengthen service: promote the company's brand image through quick service and friendly service.
- (2) Marketing allocation:
- A. The sales areas of the products are mainly domestic sales. In addition to the Kolin brand, there is also the German high-end brand AXION to meet the needs of different

consumer levels

- B. Proportion of channels: domestic sales of traditional dealer channels occupied for 34%, wholesales are 11 %, e-commerce is 22 % and project is 33 %.
- C. The future situation of supply and demand and growth of the market
 - *LCD TVs continue to move towards large-size 4K smart development.
 - *Environmental protection and energy saving are the main demands of consumers.
 - *Health, health preservation, easy operation, time saving, and personalization are still the development direction of small household appliances.

(3) Advantages and disadvantages of business niche and development prospects and countermeasures

A. Favorable factors:

- ① The Kolin brand has a certain popularity
- ② Have an excellent after-sales service team and logistics cooperation partners

B. Countermeasures:

- ① Pay attention to and grasp the needs of consumers, combine with external cooperative manufacturers, and rapid innovation and development.
- ② Focus on innovation, and constantly try new methods in product immigration, sales mode, and marketing operation willingness.
- ③ As the Internet widespread, and the ways on selling products are diversified. It is possible to approach consumers who has different needs in a more delicate manner.

Warehousing and logistics business system:

Focus on development of SHANGHAI ACTION TECH CO., LTD.

1. Main business items: warehousing and logistics services.
2. Business strategy: Establish a linkage mechanism with customers in the park and improve the park property management standards.
3. Long-term and short-term business development plan:
 - (1) Maintain a good relationship with customers in the park and improve the park property management standards.
 - (2) Stabilize customers in the park and maintain the utilization rate over 95%.
4. Market overview and analysis

Based on business establishment and development prospects, logistics and warehousing services of SHANGHAI ACTION TECH CO., LTD. have won praises and strong support from local governments, and the customer utilization rate has been stable, maintaining more than 90%.

(II) Important use and production process of main products

1. Important uses of main commodities:

Product	Usage
Home appliance	For family or personal use
Video and audio-visual products	For family or personal use
Communication goods	for household or personal use
Information products	for household or personal use

In information/home appliances products, mobile communications have already become one device for humans, and computer products are essential for study and work.

Home appliances are inseparable from every household's life. These products combined with the Internet of Things will be continued to develop more that is closely related to all consumers' life.

2. Production process: The company's business activities are mainly sales of information home appliances, so there is no important production process.

(III) Supply status of main raw materials:

The key components of the company's products are purchased through direct negotiations with the original manufacturer to ensure normal supply and maintain price advantages. The supply of various raw materials is also maintained by two or more suppliers to avoid control of the source of goods, and maintain the flexibility of bargaining. So far, the company and the suppliers have been able to maintain good interaction.

(IV) The names of customers who have accounted for more than 10% of the total purchases (sales) in any of the most recent two years, as well as the purchases (sales) amount and proportion, and explain the reasons for the increase or decrease:

(1) Major suppliers refer to those commanding 10%-plus share of annual order volume.

(2) Major Clients in the Last Two Calendar Years

Unit : NT\$ thousand

No	Customer	2020			2019			As % of 2020 total Net revenue

	Master's	4.20%	4.60%	4.6%
	Bachelor's	37.8%	42.3%	46.6%
	High school	59.5%	53.0%	48.8%

5.4、 Expenditure on Environmental protection

1. In the most recent year and as of the publication date of the annual report, the company's process of improving environmental pollution. If there is a pollution dispute, the process of handling:

Except for general and business waste, the company has no other pollution sources such as sewage and waste. The company currently entrusts qualified garbage disposal subcontractor to deal with general business waste, and the disposal situation is good.

The company is located in the Zhongli Industrial Zone, and the sewage discharged by the

company is handled in the sewage treatment plant of the management center in the industrial zone.

2. In the most recent year and as of the publication date of the annual report, the total losses (including compensation) and the total amount of disposal suffered from environmental pollution, shall be disclosed the future countermeasures and possible expenditures: none.
3. The current pollution situation and its improvement influence on the company's earnings, competitive position and capital expenditure: none.
4. The most recent year and as of the publication date of the annual report, estimated major capital expenditures on environmental protection: none.

5.5. Labor-Management Relations

(I) Current important labor-management agreements and implementation status

1. Various welfare measures for employees:

Both the company and employees can deeply realize the importance of a harmony labor-management relationship, and stress on the communication of opinions between above and below. The company's policies and various important measures can also enable employees to fully understand, so that can obtain employees' support and cooperation.

Welfare measures:

- (1) Vacation: The seniority leave (special leave) is stipulated in the Labour Standards Law.
- (2) Education and training of employees.
- (3) Education awards and grants: education awards for employees and their children.
- (4) Cash Gifts: cash rewards (vouchers) or gifts for three festivals, weddings, funerals and festive event.
- (5) Employee Insurance: labor insurance, national health insurance, employee group medical insurance and accident insurance.
- (6) Bonuses: rewards for outstanding employees, year-end bonuses, rewards for senior employees, and employee bonuses.
- (7) Grant application; hospitalization condolences.

2. Retirement system:

The company's retirement system is formulated in accordance with the Labor Standards Law and Labor Pension Regulations. The company allocates 6% based on the monthly salary to a special account of retirement pension each month. In addition, for employees who choose the old retirement system, there is also the Labor Retirement Fund Supervision Committee responsible for the custody and utilization of the retirement fund. According to the monthly retirement actuarial evaluation report and the actuarial estimation, the company determines the welfare expenses and allocates the retirement fund based on the monthly salary of the employees and deposits it into a special account in the Trust Department of the Bank of Taiwan, as a source of pension payment. All employees of our company who have served the company for 15 years or 50 years old, or who have served for more than 10 years and reached 60 years of age, or who have served for more than 20 years, those can apply for self-retirement after approved by the company. The calculation method of pension payment shall be handled in accordance with the provisions of the Labor Standards Law. In addition, the labor pension shall be withdrawn in accordance with the "Labor Pension Regulations" and deposited into a special account of labor pension.

3. Other important consultation status:

- (1) The company is applicable to the Labor Standards Law, and all operations are conducted based on the Labor Standards Law.
- (2) The company has set up an Employee Welfare Committee. Through the Employee

Welfare Committee, the company allows employees to understand the company's operating conditions. Employees also express their opinions through the welfare committee, so that they can mutually and fully understand and communicate with each other.

(II)、 Losses incurred due to labor disputes in the most recent year and as of the publication date of the annual report: None.

5.6、 Important Contracts: None.

VI. Financial Information

6.1. Five-Year Financial Summary

(1) Condensed Balance Sheet and Comprehensive Income statement for the Past Five Years

1. Condensed Balance Sheet – Consolidated

Unit: NT\$ thousand

Item	year	Financial Summary for The Last Five Years					The Financial data was gathered until 3/31/2021

	Average collection period		83.14	75.10	73.29	70.60	53.20	42.89	3
	Inventory turnover (times)		3.88	4.27	3.21	2.47	2.46	3.25	
	Accounts payable turnover (times)		9.19	12.54	13.83	10.28	8.91	9.86	
	Average days in sales		94.07	85.48	113.71	147.77	148.37	112.31	
	Property, plant and equipment turnover (times)		4.76	5.92	4.97	4.86	5.59	9.03	
	Total assets turnover (times)		0.68	0.58	0.39	0.35	0.34	0.43	
Profitability	Return on total assets (%)		15.7	1.27	4.21	1.58	1.39	2.08	
	Return on stockholders' equity (%)		30.54	1.22	5.76	1.83	1.65	2.66	
	Pre-tax income to paid-in capital (%)		(18.83)	(7.44)	0.8	0.27	1.59	0.32	4
	Profit ratio (%)		27.44	2.52	5.93	2.26	2.67	2.72	
	Earnings per share (NT\$)		2.77	0.12	0.53	0.20	.017	0.06	
Cash flow	Cash flow ratio (%)		(43.79)	20.95	1.87	29.28	23.26	14.33	5
	Cash flow adequacy ratio (%)		64.3	41.84	60.93	19.99	3.72	(155.71)	5
	Cash reinvestment ratio (%)		0	10.51	0.70	12.94	11.29	12.26	5
Leverage	Operating leverage		1	1	1	1	1	1	
	Financial leverage		0.93	0.87	51.25	(0.94)	1.31	1.33	

Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%)

1. The increase in the ratio of long-term funds to real estate, plant and equipment is due to the reversal of long-term equity investment income and deferred income tax liabilities, which increases the ratio.
2. Interest protection multiples: The interest protection multiples have increased due to the 202009 year repayment of borrowing interest costs
3. Accounts receivable turnover rate and turnover days: the collection of overseas accounts receivable in 109 increased the turnover rate and therefore the turnover days decreased.
4. The ratio of operating profit to paid-in capital: due to the decrease in operating expenses.
5. The decrease in cash flow ratio was mainly due to the year-on-year decrease in revenue in 2020 years.

B. Financial Analysis –Parent Company

Item		Financial Analysis for the Past Five Years					Remark
		2016	2017	2018	2019	2020

	Cash reinvestment ratio (%)	0	3.43	0	5.1	10.81	2
Leverage	Operating leverage	1.00	1.00	1.00	1.00	1.00	
	Financial leverage	0.49	0.85	0.73	0.76	0.61	
<p>Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%)</p> <ol style="list-style-type: none"> The increase in the ratio of long-term funds to real estate, plant and equipment is due to the return of long-term equity investment income and deferred income tax liabilities. Increase the ratio. . The decrease in cash flow ratio was mainly due to the year-on-year decrease in revenue for 2020 years. 							

Note : The calculation formulas of financial analysis are listed as follows:

1.Capital structure

(1)Debt ratio = total liabilities / total assets

(2)Long-term funds to property, plant and equipment = (total equity + bonds payable +long-term loans) / net worth of property, plant and equipment

2. Liquidity

(1) Current ratio = current assets / current liabilities

(2) Quick ratio = (current assets – inventory – prepaid expenses – non-current assets held for sale – other current assets) / current liabilities

(3)Times interest earned = income before interest and tax / interest expenses

3.Operating performance

(1)Average receivables (including accounts receivable and notes receivable arising from business operations) turnover = net sales / average receivables (including accounts receivable and notes receivable arising from business operations) for each period

(2)Days sales outstanding = 365 / average receivables turnover

(3)Average inventory turnover = cost of sales / average inventory

(4)Average payables (including accounts payable and notes payable arising from business operations) turnover = cost of sale / average payables (including accounts payable and notes payable arising from business operations) for each period

(5)Average inventory turnover days = 365 / average inventory turnover

(6)Property, plant and equipment turnover = net sales / average net worth of property, plant and equipment

(7)Total assets turnover = net sales / average total assets

4.Profitability

(1)Return on assets = [net income + interest expenses (1- tax rate)] / average total assets

(2)Return on stockholders' equity attributable to the parent company = net income attributable to stockholders of the parent / average total equity attributable to the parent company

(3)Net profit margin = net income / net sales

(4)Earnings per share = (net income attributable to stockholders of the parent – preferred shares dividends) / weighted average number of outstanding shares(Note4)

5.Cash flow

(1)Cash flow ratio = net cash provided by operating activities / current liabilities

(2)Cash flow adequacy ratio = five-year sum of net cash provided by operating activities / five-year sum of capital expenditures, inventory increase and cash dividend

(3)Cash flow reinvestment ratio = (net cash provided by operating activities – cash dividend) / (gross property, plant and equipment + long-term investments + other non-current assets + working capital (Note5)

6.Leverage

(1) Operating leverage = (net operating revenue – variable operating costs and expenses) / operating income(Note3)

(2)Financial leverage = operating income / (operating income – interest expenses)

6.3 Audit Committee's Report for the Most Recent Year

Audit Committee's Review Report

The Board of Directors has prepared and submitted to us the Company's 2020 Business Report, Financial Statements, and proposal for earnings distribution. Financial Statements were audited by Baker Tilly, Clock&Co and they issued an audited report accordingly. We, as the Audit Committee of the Company, have reviewed the Business Report, Financial Statements, and proposal for earnings distribution and do not find any discrepancies. According to Article 14-4 of the Securities and Exchange Act and Article 219 of the Company Act, we hereby submit this report

Action Electronics Co.,Ltd

2021 Annual Shareholders' Meeting

Audit Committee

Independent Director: Tang, Peng Chin

Independent Director: Min, Kuei Ling

Independent Director: Yen, Tzong Ming

Date: March 29,2021

6.4 Consolidated Financial Statements audited by CPA

6.5. Parent Company Only Financial Statements audited by CPA: Please refer to appendix B

6.6The Company should disclose the financial impact to the Company if the Company and its affiliated companies have incurred any financial or cash flow difficulties in 2020 and as of the date of this Annual Report: None

VII. Review of Financial Conditions, Financial Performance, and Risk Management

7.1 Analysis of Financial Status

Unit: NT\$ thousand

Items \ Year	2020	2019	Difference		
			Amount	%	Remark
Current Assets	1,403,482	1,317,063	86,419	7

Current Assets	2,614,224	2,643,236	(29,012)	(1)	

(I) Explanation on the difference analysis: the main reasons and impacts of that the increase or decrease changes more than 20% in the previous and current stages and the amount of change reaches NT\$10 million:

Description:

1. Real estate, plant and equipment, part of the land of the headquarter were reclassified as investment assets, and subsidiary ACTION TECHNOLOGY (JIAN) CO., LTD. was reclassified as pending on sale, as a result, less than the previous period.
2. The increase in capital reserve is due to the changes in the ownership of subsidiaries.

(II) Future response plan:

The company continues to focus on the improvement of operating performance and the stable growth of profits, optimizing the company's financial structure and reducing the financial burden.

7.2 Analysis of Financial Performance

Unit: NT\$ thousands

Items	Year		Difference		
	2020	2019	Amount	%	Remark
Operating s Sales	1,280,877	1,340,594	(59,717)	(4)	
Gross Profit	300,336	320,352	(20,016)	(6)	
Operating Expenses	256,275	312,759	(56,484)	(1)	
Income from operations	44,061	7,593	36,468	480	1
Non-operating income and expenses	29,920	54,990	(25,070)	(46)	2
Income Before Tax	73,981	62,583	11,398	18	
Tax	(37,194)	(15,915)	(21,279)	134	3
Loss of closed business units	6,711	1,902	4,809	253	
Net income (Loss)	43,498	48,570	(5,072)	(10)	

(II) The main reasons for the changes in each subject are as follows:

1. Market changes: the consumer electronic products continue to transform into information visual-audio products, entertainment and communication products have been affected in a certain level. In view of this, the company has transformed its operations into the technology service industry and entered into channels, services, brands and other businesses. The products emphasize smart home appliances and mainly dealing with TV, refrigerators, washing machines, air conditioners and small household appliances. In 2020, due to the impact of the COVID-19 and other unfavorable factors, the global economic growth slowed down and domestic purchase was shrinking. Therefore, Taiwan Kolin's market consumption this year was not as expected; and the overseas Action Intelligent Electronic manufacturing system was mainly sold to the market of the United States, due to the US-China trade war and other unfavorable factors, which results in the simultaneous reduction on revenue of overseas in-vehicle electronics.

Operating profit: Due to the decline in group revenue in 2020, the operating gross profit decreased, and the operating profit decreased relatively.

2. Non-operating Income and expenses operation: The difference between the two periods resulted from overseas net foreign currency exchange losses in 2020, impairment loss of intangible asset of overseas subsidiary ATZ Electronics Co., Ltd and other losses; as a result, the non-business profit and loss decreased in 2020, compared with 2019.
3. Net profit (loss) before tax: The increase in 109 years compared with 108 years is due to overseas subsidiaries SHANGHAI ACTION TECHNOLOGY CO.,LTD and ACTION ASIA (SHENZHEN) CO., LTD Due to the company's distribution of dividends, withholding 10% of corporate income tax.
4. Benefits of discontinued units: Because the mainland reinvestment company ACTION TECHNOLOGY(JIAN) Co., Ltd. has no business, the board of directors resolved to transfer its equity, so it was converted to a suspended unit in the 109 financial report. In 109, the factory had rental income Generate health benefits.

7.3. Analysis of changes in cash flow

(I) Cash flow this year

Unit: NT\$ Thousand

Cash balance at beginning	Annual net cash flow from operating activities	Annual net cash outflow into investment and financing activities	Cash remaining amount	Remedial measures for expected cash shortage	
				Investment plan	Financial plan
75,696	204,737	(223,190)	57,243	Not applicable	Not applicable

Analysis of cash flow changes:

Operating activities: . In addition, cash increased due to the repatriation of profits from subsidiaries and the decrease in inventories.

Investment activities: cash outflow with NT\$168,006K, mainly due to investment in domestic subsidiaries.

Financing activities: cash outflow of NT\$55,184K, which is the issuance of cash dividends and repayment of bank loans.

(II) Analysis of changes in cash flow this year

Unit: NT\$ Thousand

Item \ Year	2020	2019	Difference	
			Amount	Description
Operating activities	204,737	31,459	173,278	mainly due to the repatriation of profits from oversea subsidiaries in 2020.
Investment activities	(168,006)	72,546	(240,552)	In 2019, handled the capital reduction of subsidiaries and returned the share funds. In 2020, handled the capital increase of domestic subsidiaries by cash and invested financial assets measured at cost.
Financing activities	(55,184)	(268,858)	213,674	payment of cash dividends and repayment of bank loans.
Net cash flow	(18,453)	(164,853)	146,400	

(III) Analysis of cash liquidity in the coming year

Unit: NT\$ Thousand

Cash balance at beginning	Annual net cash flow from operating activities	Estimated annual net cash inflow from investment and financing activities	Cash remaining amount	Remedial measures for expected cash shortage	
				Investment plan	Financial plan
57,243	14,760	23,636	95,639	Not applicable	Not applicable

Analysis of cash flow changes:

Operating activities: It is expected that the activities related to the operating side will generate a net cash inflow of NT\$ 14,760K.

Investment and financing activities: The estimated cash inflow is NT\$23,636K, mainly due to the disposal of financial assets measured at fair value, the issuance of cash dividends and the repayment of bank loans.

7.4. The impact resulted from major capital expenditures on financial operations in the most recent year: No major capital expenditures in the most recent year

7.5. The reinvestment policy in the most recent year and the main reasons for profit or loss and its improvement plan and investment plan for the next year

(I) This year adopted the equity-method on share of profits and losses of subsidiary and affiliated company was NT\$67,247K, compared with the benefit of 2019 with NT\$97,159K, and the profit decreased by NT\$29,912K. This was due to the impact of COVID-19 in 2020, the global economic growth has slowed down and domestic purchase has shrunk, so pre-tax profits this year have fallen compared with last year.

(II) In the future, profit improvement projects will continue to be carried out, and organizational transformation and resource integration will be carried out to enhance overall operating efficiency and industrial competitiveness.

(III) Estimated investment situation in the coming year:

The construction plan of Zhongli plant has begun, and the future construction plan to build the **"Action Intelligent Tech Park"** will drive industrial upgrading and support the future revenue.

7.6. Analysis and assesment of risk management items in the most recent year and as of the date of publication of the annual report:

(I) The impact of recent annual interest rate, exchange rate changes, and inflation on the company's profit and loss and future countermeasures:

1. The impact of interest rate changes: The borrowed money of the company is a debt with a fixed interest rate. Since changes in market interest rates will not affect future cash flows, there is no cash flow risk due to changes in interest rates, but fair value interest rate risks are borne. For debts with floating interest rates, changes in market interest rates will cause the effective interest rates of debt financial products to change accordingly, which will cause future cash flows to fluctuate. Part of the risk is offset by cash held at floating interest rates and cash equivalents.

2. The impact of exchange rate changes: the main procurement and sales of the company and its consolidated subsidiaries are denominated in US dollars, and the fair value will change with fluctuations in market exchange rates. However, the company and its subsidiaries hold foreign currency assets and liabilities and the period of receipt and payment can be made to offset each other's market risks.

(II) In recent years, high-risk, high-leverage investments, capital loans to others, endorsements and derivatives trading policies, main reasons for gains or losses, and future response measures:

1. The company does not engage in high-risk, high-leverage investment activities.

2. Fund loan to others and endorsement guarantee: mainly due to the operating needs of the company and its affiliated companies, all are handled in accordance with the "Fund Loan to Others Operation Procedure" and "Endorsement Guarantee Operation Procedure".

3. Derivative products that the company has not signed in 2020.

4. Response measures: The financial risk management policies of the company and its subsidiaries are affected by the characteristics of the electronics and home appliance industries. The financial risks which the consolidated company faced include changes in operating fund, credit risk and financial product investment. In order to achieve the best risk position, the company plans to adopt different strategies for different risks:

(1) Hedging strategy for changes in operating fund: The company has appropriate short-term bank loan quotas, and grasps the timing of cash inflows and outflows to maintain proper liquidity on capital allocation.

(2) Credit risk: The company has a strict credit evaluation policy, only transacting with counterparties with good credit status, and timely use of debt preservation measures to reduce credit risk.

(3) Financial product investment: Among the equity financial products invested by the company, financial assets belonged to fair value changes are classified as gains and losses, which can activate market, and easily sold out in the market at a price close to fair value. Significant Liquidity Risk is not expected to happen.

(4) Risk control: The financial department regularly evaluates the transaction and profit and loss situation at any time, and reports to the board of directors when abnormalities are found.

(III) Future R&D plans and estimated R&D expenses:

1. Future R&D plan:

ACTION ASIA (SHENZHEN) CO., LTD. completes the construction of ACTION INTELLIGENT(SHENZHEN)VO.,LTD., which focuses on the development of smart home appliances. In addition, also merged Chongqing ATZ Electronics Co., Ltd. and collaborate with its production and sales departments to mainly develop new energy in-vehicle electronic products. The in-vehicle electronic products will apply with AI intelligence and the Internet to develop new high value-added products in the future.

2. Estimated R&D expenses:

Currently, R&D personnel are distributed in various subsidiaries and are listed in the R&D expenses of each subsidiary, so the headquarter does not incur any R&D expenses.

(IV) The impact of major domestic and foreign policy and legal changes in the most recent year on the company's financial business and corresponding measures: None.

(V) The impact of recent technological changes on the company's financial business and corresponding measures:

The consumer electronics market continues to launch new products, resulting in an accelerated replacement cycle, making technology products popularized and low-priced; coupled with the low-price competition between mainland and Hong Kong companies, the profitability of each other has been compressed, so the company needs to precisely grasp the pulse of the industry and market demand, and have a keen market forecast for the terminal sales of the product line. At the same time, it is necessary to review and grasp the risk of price drop of inventory and its crowding effect on liquidity of fund to respond to technological changes bring about business impact at any time. Currently, the company has

a stable financial structure and sufficient cash flow. In the future, in addition to striving for excellence in the existing product market, expanding market share, and continue to immigrate new business divisions for market allocation and launch new products with high added value and competitiveness.

(VI) The impact of changes in corporate image in recent years on corporate crisis management and corresponding measures:

The company abides by laws and regulations regarding corporate image, and so far there is no situation that could affect corporate image.

(VII) Expected benefits, possible risks and countermeasures of mergers: None.

(VIII) Expected benefits, possible risks and countermeasures of expanding the plant: None.

(IX) Risk faced by concentrated material input or sales channel and its countermeasures:

Material Input: The procurement of key components of the company's products is through direct negotiations with the original manufacturer to ensure normal supply and maintain price advantages. The supply of various raw materials also shall be maintained two or more suppliers to avoid goods resources controlled by others and maintain the flexibility of bargaining. So far, the company and the suppliers mutually keep maintaining good interaction.

Sales: The company's marketing allocation:

The company has transformed from manufacturer to a new field in the face of changes in the environment. The transformation has been successfully completed and started to make profits. Now it is divided into three business groups:

(1) Electronic manufacturing business system: Malaysia's Markin plant of ACTION INDUSTRIES(M)SDN.BHD. and Shenzhen plant of Action Asia Co., Ltd. develop multimedia products for automobiles, multi-point marketing with the same model, exclusive management, and transformed as simple In-car Platform products.

(2) Branding business system: Taiwan Action Electronics Co., Ltd. and Realise Tech Service Co., Ltd. are the main roleplayer to promote popularity of Kolin brand through diversified operation of brand management, boost flexible channel sales (distribution: 36%, wholesales: 15%, special sales: 20%, project: 29 %), actively develop niche markets.

(3) Warehousing and real estate business system: Among SHANGHAI ACTION TECH CO., LTD., ACTION ASIA (SHENZHEN) CO., LTD. and ACTION TECHNOLOGY (JIAN) CO., LTD., SHANGHAI ACTION TECH CO., LTD., mainly played a role as a warehousing and logistics center, has grown steadily; the land development of Taiwan headquarters, and Shenzhen Plant and Ji'an Plant have activated their assets, and innovative value creates profits for the group.◦

(X) Directors, supervisors, or major shareholders holding more than 10% of the shares, the impact, risks and corresponding measures of the company's massive transfer or replacement of equity: None.

(XI) The impact, risks and countermeasures of the change in operating rights on the company:
None.

(XII) For litigation or non-litigation events, the company and its directors, supervisors, general managers, substantive persons in charge, major shareholders holding more than 10% of the shares, and affiliated companies have been verdict confirmed or at the period before judgement of major litigation, non-litigation or administrative litigation, the outcome of which may have a significant impact on shareholder rights or securities prices, the facts in dispute, the amount of the subject matter, the start date of the litigation, the main parties involved and the date as of publication date of the annual report shall be disclosed. The handling situation: None.

(XIII) Other important risks and corresponding measures: None.

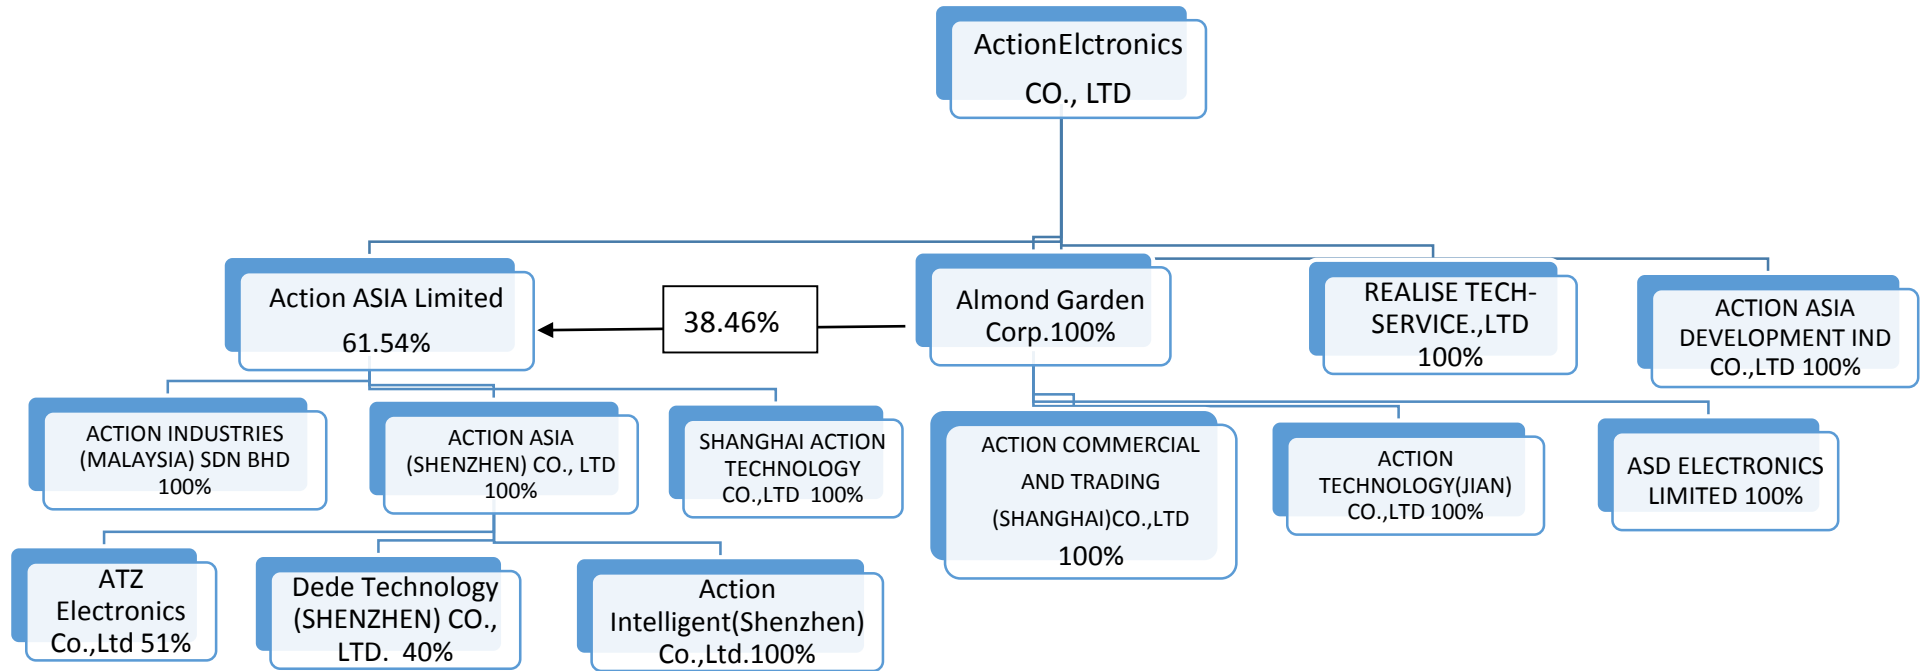

7.7. Other important matters: None.

Action Electronics CO., LTD. & Its Subsidiaries
Consolidated Financial Statements and Independent
Auditor's Report for the Years Ended December 31st,
2020 and 2019

Address: No. 198, Zhongyuan Road, Zhongli District, Taoyuan City

Phone: (03) 451-5494

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

Consolidated Financial Statements of Affiliated Enterprises

The entities that are required to be included in the Consolidated Financial Statements of Action Electronics Co., Ltd. as of and for the year ended December 31st, 2020, under the Criteria Governing Preparations of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises are the same as those included in the Consolidated Financial Statements prepared in conformity with the International Financial Reporting Standard 10, "Consolidated Financial Statements." In addition, the information required to be disclosed in the Consolidated Financial Statements is included in the Consolidated Financial Statements. Consequently, Action Electronics Co., Ltd. and subsidiaries do not prepare a separate set of Consolidated Financial Statements.

Company Name: Action Electronics Co., Ltd.

Chairman: Peng Ting-Yu

Date: March 29th, 2021

Action Electronics Co., Ltd.

Audit Opinion

We have audited the accompanying Consolidated Financial Statement of Action Electronics company limited and its subsidiaries (the "Company"), which comprise the consolidated balance sheets as of December 31st, 2020 and 2019, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes of the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31st, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards(IFRS), International Accounting Standards(IAS), IFRIC Interpretations (IFRIC), and SIC interpretations(SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certificated Public Accountants and auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountant of Republic of China and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of

most significance in our audit of the consolidated financial statements for the year ended December 31st, 2020. These matters were addressed in the context of our audit of the consolidated financial statement as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters for the Company's consolidated financial statements for the year ended December 31st, 2020 are stated as follows:

Asset depreciation assessment

For the accounting policy of asset depreciation, please refer to notes 4(8) and 4(13) of the consolidated financial statements; for the uncertainty of accounting estimates and assumptions of asset depreciation, please refer to note 5 of the consolidated financial statement; please refer to the consolidated financial statement for the description of asset depreciation accounting items. The statement notes 6(10), 6(11), and 6(14)

Using equity method on investment, real estate, plant and equipment, and the investment on real estate represents the amount of relevant assets expected to be recovered by the management under the conditions of sustainable operation in each future period. The management is at each balance sheet date. It should be assessed whether there are any signs that the referred assets may have been depreciated. If there are any signs of depreciation, the recoverable amount of the asset needs to be estimated. If the recoverable amount of an individual asset cannot be estimated, the management should estimate the recoverable amount of the cash-generating unit to which the asset belongs. Since the calculation of the recoverable amount involves many assumptions and estimates, the process is inherently highly uncertain, and the asset depreciation assessment is named as one of the key audit items this year.

We have performed main auditing procedures as follows:

1. To understand the relevant policies and processing procedures of the company and its subsidiaries for depreciation evaluation, and assess the cash-generating units recognized by the management that can be reduced and the signs of internal and external depreciations.
2. To consider whether all assets that require annual depreciation testing have been fully incorporated into the management evaluation process.
3. To assess the applicability of the evaluation methods which are used by the

management to measure the recoverable amount.

4. For the recoverable amount definite by the independent evaluation report issued by the third party appointed by the company and its subsidiaries, review the reasonableness of relevant assumptions and evaluate the qualification and independence of the appraiser to confirm the fair value.
5. To assess the uncertainty issues and related assumptions involved in the process of evaluating loss of depreciation, and consider whether the relevant disclosures of the company and its subsidiaries are sufficiently presented.

Recognition of income

For accounting policies on revenue recognition, please refer to note 4(16) of the consolidated financial report; for description of accounting items, please refer to note 6(29) of the consolidated financial statements.

The income of the company and its subsidiaries is mainly recognized based on the rewards of transferring product risks, which affect the company's annual profit and loss directly. The company and its subsidiaries shall recognize the rewards on transferring of commodity risks in order to recognize income based on their trading conditions. Therefore, the revenue recognition period and recognized amount are named as those of key audit items.

Below listed main auditing procedures performed by us:

1. To understand and test the company and its subsidiaries' internal control relating to the recognition of sales revenue of
2. To understand the income types and trading conditions of the company and its subsidiaries to assess whether the accounting policies at the time of income recognition are appropriate.
3. By sampling method, test the sales transactions of the company and its subsidiaries before and after the balance sheet date to understand the period of income attribution and whether significant sales returns and discounts have occurred through the process.

Other matters

Among enlisted consolidated financial statements of the company regarding the financial statements of the subsidiary ACTION INDUSTRIES(M) SDN. BHD. was

audited by other CPA. Therefore, among the opinions provided by us regarding the amount mentioned in the financial statements of its subsidiaries are in accordance with other auditors' opinion. The total assets of the subsidiary as of December 31st, 2020 was NT\$290,518,000 dollars accounting for 8% of the total consolidated assets; the operating income from January 1 to December 31st, 2020 was NT\$180,163,000 dollars, accounting for 14% of the consolidated operating income.

The company has prepared individual financial reports for the 2020 and 2019, and the audit report with unqualified opinions and other matters issued by the accountant is recorded for reference.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statement in accordance with the regulations governing the preparation of financial statements by securities issuers and the IFRS, IAS, IFRIC, and SIC endorsed and issued into effect by the financial supervisory commission of the republic of china, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance (including members of the audit committee) are responsible for overseeing the company's financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these consolidated financial statements.

As part of an audit in accordance with the auditing standards generally accepted in the republic of china, we exercise professional judgment and maintain professional skepticism throughout the audit. We are also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosure made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. Obtain sufficient appropriated audit evidence regarding the financial information of the entities or business activities within the company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charge with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charge with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationship and other matters that may reasonably be thought to bear on our independence, and whether applicable, related safeguards.

From the matters communicated with those charged with governance, we determined those matters that were of most significance in the audit of the consolidated financial statement for the year ended December 31st, 2020 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Action Electronics Co., Ltd. & its Subsidiaries

Notes to the Consolidated Financial Report

For the years ended December 31, 2020 and 2019

(Expressed in Thousands of New Taiwan Dollars, except as otherwise indicated)

1. Company History

Action Electronics Co., Ltd. (hereinafter referred to as the company) was established on July 21st, 1976 and was converted from an over-the-counter trading center to a listed company in August, 2002. The company and its subsidiaries (hereinafter referred to as the "consolidated company") are mainly engaged in the business of sales, maintenance and installation services of various household appliances; the manufacturing, processing and trading of audio-visual electronic products; warehousing services, etc.

This Consolidated Financial Report is expressed in NTD, the company's functional currency.

2. The date and procedures for approving the financial report

This Consolidated Financial Report was approved by the board of directors on March 29th, 2021.

3. Application of newly issued and revised standards and interpretations:

(1) The impact of adopting the newly issued and revised International Financial Reporting Standards approved by the Financial Supervisory Commission (hereinafter referred to as the "FSC")

The following table sets forth the standards and interpretations of the new issuances, amendments and amendments to the International Financial Reporting Standards applicable to 2020 recognized by the FSC

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Amendments to IFRS 1 and IAS 8 "Disclosure of Materiality Definition"	January 1, 2020
Amendments to IFRS 3 "Definition of a Business"	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS 7 "Interest Rate Benchmark Reform"	January 1, 2020
Amendments to IFRS 16 "Covid-19-Related Rent Concessions"	June 1, 2020 (Note)

The consolidated company has assessed that the above standards and interpretations have no significant impact on the financial status and financial performance of the consolidated

company.

(2) The impact of the newly issued and revised International Financial Reporting Standards that have not yet been adopted by the FSC

The following table summarizes the newly issued, revised, and revised standards and interpretations of the International Financial Reporting Standards approved by the FSC in 2021

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Amendments to IFRS 4 “Extension of the Temporary Exemption from Applying IFRS 9”	January 1, 2021
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 “Interest Rate Benchmark Reform - Phase 2”	January 1, 2021

The consolidated company has assessed that the above standards and interpretations have no significant impact on the financial status and financial performance of the consolidated company.

(3) The impact of the International Financial Reporting Standards that have been issued by the International Accounting Standards Board but have not yet been approved by the FSC

The following table sets forth the new issuance, amendment and revision standards and interpretations that have been issued by the International Accounting Standards Board but have not yet been included in the International Financial Reporting Standards recognized by the FSC:

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Amendments to IFRS 3 “Reference to the Conceptual Framework”	January 1, 2022
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between an Investor and its Associate or Joint Venture”	To be determined by IASB
IFRS 17 “Insurance Contracts”	January 1, 2023
Amendments to IFRS 17 “Insurance Contracts”	January 1, 2023
Amendments to IAS 1 “Classification of Liabilities as Current or Non-current”	January 1, 2023
Amendments to IAS 1 “Disclosure of Accounting Policies”	January 1, 2023
Amendments to IAS 8 “Definition of Accounting Estimates”	January 1, 2023

<u>New, Revised or Amended Standards and Interpretations</u>	<u>Effective Date Issued by IASB</u>
Amendments to IAS 16 "Property, Plant and Equipment - Proceeds before Intended Use"	January 1, 2022
Amendments to IAS 37 "Onerous Contracts—Cost of Fulfilling a Contract"	January 1, 2022
Annual Improvements to IFRS Standards 2018–2020	January 1, 2022

The consolidated company has assessed that the above standards and interpretations have no significant impact on the financial status and financial performance of the consolidated company.

4. Summary of Major Accounting Policies

A summary of the important accounting policies of the consolidated company is as follows:

(1) Compliance Statement

This consolidated Financial Report is prepared in accordance with the financial reporting standards for securities issuers and the International Financial Reporting Standards, International Accounting Standards, Interpretations, and Interpretation Announcements (hereinafter referred to as IFRSs) approved by the Financial Supervisory Commission.

(2) Preparation Basis

Except for the financial instruments measured at fair value and the current value of the defined benefit obligations minus the net defined benefit liabilities recognized at the fair value of the planned assets, this Consolidated Financial Report is prepared on the historical cost basis.

The preparation of financial reports that comply with IFRSs requires the use of some important accounting estimates. In the process of applying the accounting policies of the amalgamating company, management also requires the use of its judgment, involving highly judged or complicated items, or involving major assumptions and estimates of the consolidated financial report. For items, please refer to Note 5 for instructions.

(3) Consolidation Basis

1. Principles for Preparing Consolidated Financial Reports

This Consolidated Financial Report includes the financial reports of the company and the entities (subsidiaries) controlled by the company.

The consolidated income statement has included the operating profit and loss of the

acquired or sanctioned subsidiary company in the current period from the date of acquisition or until the date of disposal.

The financial reports of the subsidiaries have been adjusted to make their accounting policies consistent with the accounting policies of the consolidated company.

When preparing the Consolidated Financial Report, all transactions, account balances, income and expenses between each entity have been eliminated.

The total consolidated profit and loss of the subsidiary is attributable to the owners and non-controlling interests of the company, even if the non-controlling interests become the loss balance.

When the consolidated company's changes in the ownership and equity of the subsidiary do not result in the loss of control, it is treated as an equity transaction. The carrying amount of the consolidated company and non-controlling interests has been adjusted to reflect changes in its relative equity in the subsidiary. The difference between the adjustment amount of non-controlling interests and the fair value of the consideration paid or received is directly recognized as equity and attributable to the owners of the company.

When the consolidated company loses control of the subsidiary, the disposition profit and loss is the difference between the following two: (1) The fair value of the consideration received and the remaining investment in the former subsidiary are counted on the basis of the fair value on the date of loss of control, and (2) The assets (including goodwill), liabilities, and non-controlling interests of the former subsidiary are counted together at the book value on the day when the control is lost. The accounting treatment of the consolidated company for all the amounts recognized in other comprehensive profits and losses related to the subsidiary is the same as the basis for the consolidated company to directly dispose of related assets or liabilities.

2. Subsidiaries included in the Consolidated Financial Report

(1) ACTION INDUSTRIES(M) SDN. BHD. will be included in this consolidated report on December 31st, 2020 as a financial report verified by other accountants.

(2) On March 29th, 2021, the board of directors decided to dispose of 100% equity of ACTION TECHNOLOGY (JIAN) CO., LTD. held by ALMOND GARDEN CORP., its subsidiary company. This Consolidated Financial Report has listed the relevant assets and liabilities of ACTION TECHNOLOGY (JIAN) CO., LTD. as of December 31st, 2020 in the disposal group held for sale. At the same time, the business activities of the current year are classified as the profit and loss of discontinued units in the consolidated comprehensive income statement., And in accordance with International Financial Standards No. 5 Communique, the 2019 consolidated comprehensive income statement was re-compiled.

3. Subsidiaries not listed in the consolidated financial report: no such situation.

4. Different adjustments and treatment methods of subsidiary accounting period: no such situation.

5. Major restrictions: No such situation.

6. Subsidiaries with non-controlling interests that are material to the consolidated company: no such situation.

(4) Standards for distinguishing between current and non-current assets and liabilities

1. Assets that meet one of the following conditions are classified as current assets; assets that do not belong to current assets are classified as non-current assets:
 - (1) The asset is expected to be realized in the normal business cycle or intended to be sold or consumed.
 - (2) Holders mainly for trading purposes.
 - (3) Expected to be realized within twelve months after the balance sheet date.
 - (4) Cash or cash equivalents, except for those restricted in exchange or used to settle liabilities at least twelve months after the balance sheet date.
2. Liabilities that meet one of the following conditions are classified as current liabilities; those that do not belong to current liabilities are classified as non-current liabilities:
 - (1) Those expected to be settled during the normal business cycle.
 - (2) Holders mainly for trading purposes.
 - (3) Expected to be settled within twelve months after the balance sheet date.
 - (4) The settlement period cannot be unconditionally deferred to at least twelve months after the balance sheet date. The terms of the liability, which may be settled by the issuance of equity instruments based on the choice of the counterparty, do not affect its classification.

(5) Foreign Currency

When each entity prepares financial reports, those who trade in currencies other than the individual's functional currency (foreign currency) are converted into functional currency records based on the exchange rate on the transaction day.

Monetary items in foreign currencies are translated at the closing exchange rate on each balance sheet date. The exchange difference arising from the delivery of monetary items or the conversion of monetary items is recognized in the profit and loss in the current period.

Foreign currency non-monetary items measured by fair value are converted at the exchange rate on the day when the fair value is determined, and the resulting conversion difference is listed in the current profit and loss. However, if the fair value change is recognized in other comprehensive gains and losses, the resulting conversion difference is listed in other comprehensive profit and loss.

Non-monetary items in foreign currencies measured by historical cost are converted at the exchange rate on the transaction date and will not be converted again.

When preparing the consolidated financial report, the assets, and liabilities of foreign operating organizations (including subsidiaries and affiliates in countries where they operate or in currencies different from those of the company) are converted into NTD at the exchange rate on each balance sheet date. The income and expense items are converted at the average exchange rate of the current period, and the resulting conversion differences are listed in other comprehensive income and losses and are accumulated in the foreign operating institution's financial statements under equity.

If the consolidated company disposes of all the equity of the foreign operating organization, or disposes of part of the equity of the foreign operating organization's subsidiary but loses control, or the retained equity after the disposal of the foreign operating organization's affiliated company is a financial asset and shall be handled in accordance with the accounting policy of financial instruments, all accumulated exchange differences attributable to the owner of the company and related to the foreign operating organization will be reclassified to profit and loss.

If the partial disposal of a subsidiary of a foreign operating organization does not result in the loss of control, the accumulated exchange difference is re-attributed to the subsidiary's non-controlling interests in proportion and is not recognized as profit or loss. In the event that a significant influence remains after the disposal of the affiliated company of the foreign operating organization, the accumulated exchange difference will be reclassified to profit and loss based on the disposal ratio.

(6) Inventory

Inventory is evaluated based on the lower of cost and net realizable value. Inventory is calculated based on the weighted average method. Net realizable value refers to the balance of the estimated selling price minus the estimated costs and sales expenses that need to be invested in completion of the project.

(7) Disposal Group Held For Sale

The book value of the disposal group is classified as held for sale when it is expected to be mainly recovered through sale transactions rather than continued use. The subgroups that meet this classification must be available for immediate sale in their current state, and their sale must be highly probable. When the appropriate level of management commits to the plan to sell the asset, and the sale transaction is expected to be completed within one year

from the classification date, the sale will be considered highly probable.

If the control of the subsidiary will be lost at the time of sale, regardless of whether non-controlling interests are retained in the former subsidiary after the sale, all assets and liabilities of the subsidiary are classified as pending for sale.

The disposal group classified as pending is measured by the lower of the book value and the fair value less the cost of sale, and the depreciation of such assets is stopped.

(8) Investment in Related Enterprises

Affiliated companies refer to companies that have significant influence on the consolidated company but are not subsidiaries.

The consolidated company adopts the equity method for investment in affiliated companies. Under the equity method, investment in affiliated companies is initially recognized at cost, and the future book amount obtained is increased or decreased with the share of the affiliated company's profits and losses and other comprehensive profits and losses and profit distribution enjoyed by the consolidated company. In addition, changes in the equity of affiliated companies are recognized based on the shareholding ratio.

The amount of the acquisition cost exceeding the share of the net fair value of the identifiable assets and liabilities of the affiliated company enjoyed by the consolidated company on the date of acquisition is classified as goodwill, which is included in the book value of the investment and cannot be amortized; the consolidated company on the date of acquisition with the amount by which the share of the net fair value of the identifiable assets and liabilities of the affiliated company exceeds the acquisition cost is listed as the current profit and loss.

When a related company issues new shares, if the consolidated company does not subscribe according to the shareholding ratio, which causes the shareholding ratio to change, and consequently the net equity value of the investment increases or decreases, the increase or decrease is adjusted to the capital reserve-the equity method is adopted to recognize the association changes in the net value of the company's equity and investments using the equity method. However, if the shareholding ratio is not subscribed or obtained, which results in a decrease in the ownership and interest of the affiliated company, the amount recognized in the other comprehensive profit and loss related to the affiliated company shall be reclassified according to the reduction ratio, the basis of its accounting treatment is the

same as the basis that related companies must follow if they directly dispose of related assets or liabilities; if the adjustment in the preceding paragraph should be debited to the capital reserve, and the balance of the capital reserve generated by the equity method of investment is insufficient, the difference is debited to the retained surplus.

When the consolidated company's share of losses to the affiliated company equals or exceeds its equity in the affiliated company (including the book value of the investment in the affiliated company under the equity method and other long-term interests that are essentially part of the consolidated company's net investment in the affiliated company), stop recognizing further losses. The consolidated company only recognizes additional losses and liabilities within the scope of incurred statutory obligations, deduced obligations, or payments made on behalf of related companies.

When assessing impairment, the consolidated company regards the overall book value of the investment (including goodwill) as a single asset, compares the recoverable amount with the book amount, and conducts an impairment test. The recognized impairment loss is not allocated to the component of the investment book value of any assets, including goodwill. Any reversal of the impairment loss shall be recognized within the scope of the subsequent increase in the recoverable amount of the investment.

The consolidated company ceases to use the equity method on the day when its investment ceases to be an affiliated company, and its retained equity in the original affiliated company is measured at fair value, the difference between the fair value and disposal price and the book value of the investment on the day when the equity method ceases to be used is included in the current profit and loss. In addition, for all amounts recognized in other comprehensive profits and losses related to the related company, the basis of accounting treatment is the same as the basis that the related company must follow if it directly disposes of the related assets or liabilities.

The profits and losses arising from the upstream, downstream, and side-current transactions between the consolidated company and the affiliated company are recognized in the consolidated financial report only to the extent that it has nothing to do with the consolidated company's equity in the affiliated company.

(9) Property, Plant, and Equipment

Property, plant, and equipment are recognized at cost, and subsequently measured at the

cost minus accumulated depreciation and accumulated impairment losses.

Property, plant and equipment under construction are recognized at the cost minus accumulated impairment losses. Cost includes professional service fees and borrowing costs that meet the capitalization conditions.

When these assets are completed and reach the expected state of use, they are classified into the appropriate categories of property, plant and equipment, and depreciation begins.

Except for self-owned land, which is not depreciated, the rest of the property, plant and equipment are depreciated on a straight-line basis within the service life of each significant part. The consolidated company shall review the estimated service life, residual value and depreciation method at least at the end of each year and postpone the effect of changes in applicable accounting estimates.

When property, plant and equipment are delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(10) Investment Property

Investment property refers to property held for the purpose of earning rent or capital appreciation or both (including property and right-of-use assets that meet the definition of investment property and are in the process of establishing a license). Investment property also includes land held for future use that has not yet been determined.

Self-owned investment property is initially measured at cost (including transaction costs), and subsequently measured at the amount of cost minus accumulated depreciation and accumulated impairment losses.

The investment property acquired by the lease is initially measured at cost (including the original measured amount of the lease liability and the lease payment paid before the lease start date), and subsequently measured at the amount after the cost minus the accumulated depreciation and accumulated impairment losses, and adjust the remeasurement of lease liabilities.

All investment property is depreciated on a straight-line basis.

Investment property under construction is recognized at the cost minus the accumulated impairment loss. Cost includes professional service fees and borrowing costs that meet the capitalization conditions. These assets begin to be depreciated when they reach the expected state of use.

Investment property is transferred to real estate, plant and equipment based on the book value on the day when it was transferred for self-use.

The property of property, plant and equipment is transferred to investment property based on the book value at the end of self-use.

When investment real estate is delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(11) Intangible Assets

1. Obtained Separately

Intangible assets with limited useful life acquired separately are initially measured at cost, and subsequently measured at the amount of cost minus accumulated amortization and accumulated impairment losses. Intangible assets are amortized on a straight-line basis during the useful life. The consolidated company shall review the estimated useful life, residual value and amortization method at least at the end of each year and postpone the impact of changes in applicable accounting estimates.

2. Obtained from a Business Combination

The intangible assets obtained in a business combination are recognized at the fair value on the acquisition date and recognized separately from goodwill. The subsequent measurement method is the same as the intangible assets obtained separately.

3. In addition to the column:

When intangible assets are delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(12) Goodwill

The goodwill obtained in a business combination is based on the amount of goodwill recognized on the acquisition date as the cost, and subsequently measured by the cost minus the accumulated impairment loss.

To impairment testing, goodwill is allocated to each cash-generating unit or group of cash-generating units (referred to as "cash-generating units") that the amalgamating company expects to benefit from the synergy of the merger.

The cash-generating unit of amortized goodwill is tested annually (and when there are indications that the unit may be impaired) by comparing the book value of the unit containing goodwill and its recoverable amount, to conduct an impairment test of the unit. If

the goodwill allocated to the cash-generating unit is obtained from a business combination in the current year, the unit shall be tested for impairment before the end of the current year. If the recoverable amount of the cash-generating unit of amortized goodwill is lower than its book value, the impairment loss is to reduce the book amount of the cash-generating unit's amortized goodwill first, and then reduce the proportion of the book value of the other assets in the unit by each carrying amount of the asset. Any impairment loss is directly recognized as the current loss. The loss of goodwill impairment shall not be reversed in the subsequent period.

When disposing of a certain operation in the allocated goodwill cash-generating unit, the amount of goodwill related to the dispositioned operation is included in the book amount of the operation to determine the disposition profit and loss.

(13) Impairment of Non-Financial Assets

The consolidated company assesses on each balance sheet date whether there are any signs that property, plant and equipment, right-of-use assets, and intangible assets may have been impaired. If there are any signs of impairment, estimate the recoverable amount of the asset. If the recoverable amount of an individual asset cannot be estimated, the consolidated company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount is the higher of the fair value less the cost of sale and its use value. If the recoverable amount of an individual asset or cash-generating unit is lower than its book value, the book value of the asset or cash-generating unit is reduced to its recoverable amount, and the impairment loss is recognized in profit and loss.

When the impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is adjusted to the revised recoverable amount, but the increased carrying amount does not exceed the asset or cash-generating unit if the impairment is not recognized in the previous year for the book amount determined at the time of the loss (minus amortization or depreciation). The reversal of the impairment loss is recognized in the profit and loss.

(14) Financial Instruments

Financial assets and financial liabilities are recognized on the consolidated balance sheet when the consolidated company becomes a party to the contractual terms of the

instrument.

In the initial recognition of financial assets and financial liabilities, if financial assets or financial liabilities are not measured at fair value through profit or loss, they are measured at fair value plus transaction costs directly attributable to the acquisition or issuance of financial assets or financial liabilities. Transaction costs directly attributable to the acquisition or issuance of financial assets or financial liabilities measured at fair value through profit and loss are immediately recognized as profit and loss.

1. Financial Assets

Conventional transactions of financial assets are recognized and delisted by accounting on the transaction date.

(1) Type of Measurement

The types of financial assets held by the consolidated company are financial assets measured at fair value through profit and loss, financial assets measured at amortized cost, and equity instrument investment measured at fair value through other comprehensive gains and losses.

A. Financial assets measured at fair value through profit and loss:

Financial assets measured at fair value through profit or loss include financial assets that are compulsorily measured at fair value through profit or loss. Mandatory financial assets measured at fair value through profit or loss include equity instrument investments that are not designated to be measured at fair value through other comprehensive profits and losses, and debt instrument investments that are not classified as measured at amortized cost or measured at fair value through other comprehensive profits and losses. Financial assets measured at fair value through profit and loss are measured at fair value, and the benefits or losses resulting from re-measurement are recognized in profit and loss.

B. Financial assets measured at amortized cost:

If the financial assets invested by the consolidated company meet the following two conditions, they are classified as financial assets measured at amortized cost:

- (a) It is held under a certain business model whose purpose is to hold financial assets to collect contractual cash flows; and

(b) The terms of the contract generate cash flows on a specific date, and these cash flows are all interest on the payment of the principal and the amount of principal in circulation.

Financial assets measured at amortized cost (including cash and cash equivalents, bills receivable, accounts receivable, other receivables and other financial assets measured at amortized cost) are based on the original recognition. The total book amount determined by the effective interest method is measured after deducting any impairment loss after amortization, and any foreign currency exchange gains and losses are recognized in profit and loss.

Except for the following two cases, interest income is calculated by multiplying the effective interest rate by the total book value of financial assets:

(a) For purchased or created credit-impaired financial assets, interest income is calculated by multiplying the credit-adjusted effective interest rate by the amortized cost of the financial asset.

(b) For financial assets that are not purchased or original credit impairment, but subsequently become credit impairment, you should be confident to calculate interest income by multiplying the effective interest rate by the amortized cost of the financial asset from the next reporting period after the impairment.

Equivalent cash includes time deposits that are highly liquid, convertible into fixed cash at any time and have little risk of value changes within 3 months from the date of acquisition and are used to meet short-term cash commitments.

C. Investment in equity instruments measured at fair value through other comprehensive gains and losses:

At the time of initial recognition, the consolidated company can make an irrevocable choice to designate investment in equity instruments that are not held for trading and that are not recognized by the purchaser of a business merger or have consideration at fair value through other comprehensive gains and losses.

Equity instrument investments measured at fair value through other comprehensive gains and losses are measured at fair value, and subsequent

changes in fair value are reported in other comprehensive gains and losses and accumulated in other equity. At the time of investment disposal, the accumulated profits and losses are directly transferred to retained earnings and are not reclassified as profits and losses.

Dividends from equity instrument investments measured at fair value through other comprehensive gains and losses are recognized in the profit and loss when the rights of the consolidated company to receive payments are established unless the dividend clearly represents part of the investment cost recovery.

(2) Impairment of Financial Assets:

- A. The consolidated company assesses the impairment losses of financial assets (including accounts receivable) and lease receivables measured at amortized cost based on expected credit losses on each balance sheet date.
- B. Accounts receivable and lease receivables are recognized as allowance losses based on expected credit losses during the duration. For other financial assets, first assess whether there is a significant increase in credit risk since the initial recognition. If there is no significant increase, the allowance loss is recognized based on the 12-month expected credit loss; if it has increased significantly, the allowance loss is recognized based on the expected credit loss during the duration.
- C. Expected credit loss is the weighted average credit loss based on the risk of default. The 12-month expected credit loss refers to the expected credit loss caused by the possible default event of the financial instrument within 12 months after the reporting date, and the lifetime expected credit loss represents the expected credit loss caused by all possible default events during the expected lifetime of the financial instrument.

The impairment loss of all financial assets is reduced by the allowance account.

(3) Delisting of Financial Assets

The consolidated company only delists financial assets when the contractual rights from the cash flow of financial assets have lapsed, or the financial assets have been transferred and almost all the risks and rewards of the ownership of the assets have been transferred to other companies.

When a financial asset measured at amortized cost is delisted as a whole, the difference between its book value and the consideration received is recognized in profit or loss. When equity instrument investments measured at fair value through other comprehensive gains and losses are delisted as a whole, accumulated gains and losses are directly transferred to retained earnings and are not reclassified as gains and losses.

2. Financial Liabilities and Equity Instruments

(1) Classification of liabilities or equity:

The debt and equity instruments issued by the amalgamating company are classified as financial liabilities or equity based on the substance of the contractual agreement and the definition of financial liabilities and equity instruments.

An equity instrument refers to any contract that recognizes the remaining equity of the consolidated company after deducting all its liabilities from its assets. The equity instruments issued by the consolidated company are recognized at the amount obtained after deducting the direct issuance costs.

(2) Financial Liabilities

Financial liabilities are not held for trading and are not designated as those measured at fair value through profit and loss (including payables). The initial recognition is measured at fair value plus directly attributable transaction costs; subsequent evaluation adopts the effective interest method to amortize post-sale cost measurement.

(3) Delisting of Financial Liabilities

The consolidated company de-lists financial liabilities when contractual obligations have been fulfilled, cancelled, or expired.

When excluding financial liabilities, the difference between its book value and the total consideration paid or payable (including any transferred non-cash assets or liabilities assumed) is recognized as profit or loss.

(15) Provision for Liabilities

When the consolidated company has a current obligation (statutory or constructive obligation) due to past events and is likely to be required to pay off the obligation, and the amount of the obligation can be reliably estimated, the liability provision shall be

recognized. The amount recognized as a liability reserve is based on the risk and uncertainty of the obligation and is the best estimate of the expenditure required to settle the obligation on the balance sheet date. The provision for liabilities is measured by discounting the estimated cash flow of the settlement obligation.

(16) Income Recognition

After the consolidated company identifies performance obligations in the customer contract, it allocates the transaction price to each performance obligation, and recognizes revenue when each performance obligation is met.

1. Commodity sales revenue:

- (1) The consolidated company manufactures and sells audio-visual electronic products, various home appliances and other related products. Sales revenue is recognized when the control of the product is transferred to the customer, that is, when the product is delivered to the designated location and meets the performance obligation, it will be deducted estimated customer returns, discounts, and other similar discounts. Based on historical experience and considering different contract conditions, the consolidated company estimates the possible sales returns and discounts, and recognizes refund liabilities (list other current liabilities) and product rights to be returned (list other current assets) . In principle, the credit period of the consolidated company to customers is from 10 days to 90 days from monthly settlement. The consideration for the sales revenue of commodities is the short-term accounts receivable. Since the discounting effect is not significant, it is measured based on the original invoice amount.
- (2) The consolidated company provides a standard warranty for the products it sells, and has the obligation to refund product defects, and recognize the liability provision when selling the goods.
- (3) Accounts receivables are recognized when the control of the product is transferred to the customer, because the consolidated company has an unconditional right to the contract price from that point in time, and the consideration can be collected from the customer only after time has passed. The advance receipts received before the product arrives are recognized as contract liabilities.

2. Labor Income

Labor income from maintenance services is recognized when labor services are provided. The income generated by the provision of labor services in accordance with the contract is recognized according to the degree of completion of the contract.

(17) Lease

The consolidated company assesses whether the contract belongs to (or contains) a lease on the date of contract establishment.

1. The consolidated company is the lessor:

When the lease clause transfers almost all the risks and rewards attached to the ownership of the asset to the lessee, it is classified as a financial lease. All other leases are classified as operating leases.

When the amalgamating company subleases the right-of-use asset, it uses the right-of-use asset (not the underlying asset) to determine the classification of the sublease. However, if the main lease is a short-term lease for which the recognition exemption applies to the consolidated company, the sublease is classified as an operating lease.

Under operating leases, lease payments after deducting lease incentives are recognized as income on a straight-line basis during the relevant lease period. The original direct cost incurred in obtaining an operating lease is added to the book value of the underlying asset and recognized as an expense during the lease period on a straight-line basis. The lease negotiation with the lessee is handled as the new lease from the effective date of the lease modification.

2. The consolidated company is the lessee:

Except for the lease payments of low-value underlying asset leases and short-term leases that are subject to the applicable recognition exemption, the lease payments are recognized as expenses on a straight-line basis during the lease period, and other leases are recognized as the right-of-use asset and lease liability on the lease start date.

The right-of-use asset is originally measured at cost (including the original measured amount of the lease liability, the lease payment paid before the lease start date, minus the lease incentives received, the original direct cost and the estimated cost of restoring the underlying asset), and the subsequent cost minus accumulated depreciation and Measure the amount after the accumulated impairment loss and adjust the

remeasurement amount of the lease liability.

Except for those that meet the definition of investment real estate, right-of-use assets are separately expressed on the consolidated balance sheet. For the recognition and measurement of right-of-use assets that meet the definition of investment property, please refer to Note 4 (10) Accounting Policy for Investment Property.

Right-of-use assets are depreciated on a straight-line basis from the lease start date to the expiration of the service life or the expiration of the lease term, whichever is earlier.

The lease liability was originally measured at the present value of the lease payment. If the implicit interest rate of the lease is easy to determine, the lease payment is discounted using that interest rate. If the interest rate is not easy to determine, use the lessee's incremental borrowing interest rate.

Subsequently, the lease liability is measured on the amortized cost basis using the effective interest method, and the interest expense is amortized during the lease period. If changes in the future lease payments during the lease period or changes in the index or rate used to determine lease payments result in changes in future lease payments, the consolidated company will then measure the lease liabilities and adjust the right-of-use assets accordingly. However, if the book value of the right-of-use assets has been reduced to zero, then the remaining remeasured amount is recognized in profit and loss. For lease modifications that are not treated as separate leases, remeasurement of the lease liability due to the reduction in the scope of the lease is to reduce the right-of-use assets and recognize the profit and loss of the partial or full termination of the lease; the remeasurement of the lease liability due to other modifications is to adjust the right-of-use assets. Lease liabilities are separately expressed in the consolidated balance sheet.

(18) Employee Benefits

Short-term employee benefits are measured by the expected non-discounted amount of cash paid and are recognized as expenses when the relevant services are provided.

Regarding the definite allocation plan, the amount of the retirement fund that should be allocated is recognized as the current pension cost based on accrual. The advance payment is recognized as an asset within the scope of refundable cash or reduced future payments.

The net obligation under the definite benefit plan is calculated by discounting the number

of future benefits earned by the employee in the current or past services, and the current value of the definite benefit obligation on the balance sheet date minus the fair value of the planned assets. The net obligation to determine benefits is calculated annually by actuaries using the projected unit benefit method, and the discount rate is determined by referring to the market yield rate of high-quality corporate bonds whose balance sheet date is consistent with the currency and period of the determined benefit plan; in high-quality corporate bonds for countries without a deep market, the market yield rate of government bonds (on the balance sheet date) is used. The remeasurement amount generated by the determined benefit plan is recognized in other comprehensive profit and loss in the current period and included in the retained surplus. The related expenses of the previous service cost are immediately recognized as profit and loss.

Resignation benefits are benefits provided when the employee's employment is terminated before the normal retirement date or when the employee decides to accept the company's welfare invitation in exchange for termination of employment. The merging company recognizes expenses when it is no longer able to withdraw the offer of resignation benefits or when the relevant restructuring costs are recognized, whichever is earlier. It is not expected that benefits paid in full 12 months after the balance sheet date should be discounted.

(19) Borrowing Cost

The borrowing cost directly attributable to the acquisition, construction or production of a qualified asset is a part of the cost of the asset until almost all necessary activities for the asset to reach its intended use or sale status have been completed.

Specific borrowings, such as investment income earned by temporary investment before the occurrence of capital expenditures that meet the requirements, are deducted from the borrowing costs that meet the capitalization conditions.

Except for the above, all other borrowing costs are recognized as profit or loss in the current period.

(20) Income Tax

Income tax expense is the sum of current income tax and deferred income tax.

1. Current Income Tax

The consolidated company determines the current income (loss) in accordance with the

laws and regulations established by each income tax reporting jurisdiction, and calculates the payable (recoverable) income tax based on it.

The undistributed surplus calculated in accordance with the provisions of the Income Tax Law of the Republic of China is subject to additional income tax, which is recognized in the annual shareholders' meeting.

Adjustments to income tax payable in previous years are included in current income tax.

2. Deferred Income Tax

Deferred income tax is calculated based on the temporary difference between the book value of assets and liabilities and the tax basis for calculating taxable income. Deferred income tax liabilities are generally recognized for all taxable temporary differences, while deferred income tax assets are recognized when there is a high probability of taxable income that can be used to deduct temporary differences or loss deductions.

Taxable temporary differences related to investment in subsidiaries are recognized as deferred income tax liabilities, but if the consolidated company can control the timing of the reversion of the temporary difference, and the temporary difference is likely to not revert in the foreseeable future except. The deductible temporary differences related to this type of investment will be recognized as deferred income tax only if it is likely to have sufficient taxable income to realize the temporary differences, and within the scope expected to return in the foreseeable future assets.

The carrying amount of deferred income tax assets is reviewed on each balance sheet date, and the carrying amount is reduced for those that are no longer likely to have sufficient taxable income to recover all or part of their assets. For those that have not been recognized as deferred income tax assets, they are also reviewed on each balance sheet date, and if they are likely to generate taxable income in the future for recovering all or part of their assets, the book amount will be increased.

Deferred income tax assets and liabilities are measured by the tax rate for the period in which the expected liability is settled, or the asset is realized. The tax rate is based on the tax rate and tax law that has been legislated or substantively legislated on the balance sheet date. The measurement of deferred income tax liabilities and assets reflects the tax consequences arising from the way the consolidated company expects to recover or settle the carrying amount of its assets and liabilities on the balance sheet

date.

3. Current and Deferred Income Tax

Current and deferred income taxes are recognized in profit or loss, but the current and deferred income taxes related to items recognized in other comprehensive profit or loss or directly included in equity are respectively recognized in other comprehensive profit or loss or directly included in equity.

5. Major sources of uncertainty in major accounting judgments, estimates and assumptions:

When the consolidated company adopts the accounting, policies described in Note 4, the management must make relevant judgments, estimates and assumptions based on historical experience and other relevant factors for those who cannot easily obtain information about the carrying amounts of assets and liabilities from other sources. The estimates and related assumptions are based on historical experience and other factors deemed relevant. Actual results may differ from estimates.

Estimates and basic assumptions are continuously reviewed. If the revision of the estimate only affects the current period, it shall be recognized in the current period of the revision of the accounting estimate. If the revision of the accounting estimate affects both the current period and the future period, it shall be recognized in the current period and future period of the estimate revision.

The main sources of uncertainties in significant accounting judgments, estimates and assumptions of the consolidated company are as follows:

(1) Evaluation of Inventory

Since inventory must be priced at the lower of cost and net realizable value, the consolidated company must use judgment and estimation to determine the net realizable value of the inventory at the end of the financial reporting period.

Due to the rapid changes in the industry, the consolidated company assesses the amount of inventory due to normal depletion, obsolescence, or no market sales value at the end of the financial reporting period, and offsets the inventory cost to the net realizable value. This inventory evaluation is mainly based on the estimated product demand in a specific period in the future, so significant changes may occur.

(2) Estimated Impairment of Financial Assets

The estimated impairment of accounts receivable assumes of default rate and expected loss

rate of the consolidated company. The consolidated company considers historical experience, current market conditions and industrial economic conditions to make assumptions and select input values for impairment assessment. For the important assumptions and input values used, please refer to Note 6 (5). If the actual future cash flow is less than expected, a significant impairment loss may occur or the recognized impairment loss may be reversed.

(3) Assessment of impairment of non-financial assets:

In the process of asset impairment assessment, the consolidated company must rely on subjective judgments and determine the independent cash flow of a specific asset group, the number of years of asset durability, and the possible future gains and expenses based on asset usage patterns and industrial characteristics, any estimated changes brought about by the company's strategy or changes in the economy may cause significant impairment in the future.

(4) Investment impairment assessment using the equity method

When there are signs of impairment that an investment using the equity method may have been impaired and the carrying amount may not be recovered, the merging company immediately assesses the impairment of the investment. The consolidated company evaluates the impairment based on the future cash flow forecast of the invested company, including the sales growth rate and capacity utilization rate estimated by the internal management of the invested company, and analyzes the reasonableness of related assumptions.

(5) The realizability of deferred income tax assets:

Deferred income tax assets are recognized when there is likely to be sufficient taxable income to deduct temporary differences in the future. When assessing the realizability of deferred income tax assets, significant accounting judgments and estimates of management must be involved, including assumptions such as expected future sales revenue growth and profitability, tax exemption period, available income tax deductions and tax planning. Any changes in the global economic environment, industrial environment and laws and regulations may cause major adjustments in deferred income tax assets.

(6) Evaluation of Warranty Preparation

Incremental costs related to the after-sales maintenance of the product (such as labor costs (whether internal or external) and material costs) and other costs that cannot be claimed from the supplier for maintenance, is listed in accordance with the after-sales warranty

contract of the product or the warranty preparation policy of the merged company.

When determining the amount of warranty provision, the management estimates the possibility of repairs and returns based on experience, technical requirements, and average figures in the relevant industry. It is estimated that many factors may have an adverse effect, including additional modifications to the order in response to customer requirements or technical needs, and other unforeseen problems and circumstances. Any of these factors may affect the possibility of repairs or returns, and in turn affect the final repair and return costs involved in the future.

(7) Calculation of net defined benefit liabilities:

When calculating and determining the present value of benefit obligations, the consolidated company must use judgments and estimates to determine the relevant actuarial assumptions on the balance sheet date, including discount rates and future salary growth rates. Any change in actuarial assumptions may significantly affect the amount of benefit obligations determined by the consolidated company.

(8) Income Recognition

The estimates of returns and discounts related to sales revenue are estimated product returns and discounts that may occur based on historical experience and other known reasons. They are listed as a reduction in sales revenue in the period when the products are sold, and the consolidated company regularly reviews the estimated rationality.

6. Explanation of important accounting items:

(1) Cash and Cash Equivalents

	December 31, 2020	December 31, 2019
Cash on hand and petty cash	\$ 2,660	\$ 2,484
Deposits in banks	477,555	521,610
Cash equivalents		
Time deposits	40,433	44,295
	<u>\$ 520,648</u>	<u>\$ 568,389</u>

The credit quality of the financial institutions with which the merged company has transactions is good, and the merged company has transactions with multiple financial institutions to diversify the credit risk, and the probability of default is expected to be very low.

(2) Financial assets measured at fair value through profit and loss:

	December 31, 2020	December 31, 2019
<u>Current</u>		
Measured at fair value through profit or loss :		
Fund beneficiary certificate	\$ 2,893	\$ 2,898

The net (loss) benefits of financial assets measured at fair value through profit and loss in 2020 and 2019 are NTD (5) thousand and NTD 136,000 (listed under "Other gains and losses").

(3) Financial assets measured at fair value through other comprehensive income:

Equity Instrument Investment

	December 31,2020	December 31,2019
<u>Current</u>		
Emerging stock— Clientron Corp.	\$ 87,312	\$ —
<u>Non-current</u>		
Emerging stock— Clientron Corp.	\$ —	\$ 115,617

The consolidated company's investment in domestic stocks is for the purpose of medium- and long-term holding, and it is expected to make a profit through long-term investment. The management believes that if the fair value fluctuation of the investment is included in the profit and loss, it is inconsistent with the investment plan, so it chooses to designate it as the fair value measurement through other comprehensive profit and loss. The consolidated company was approved by the board of directors on March 29th, 2021. In accordance with the company's financial plan, it plans to sell 5,100 thousand shares of Clinetron corporation. on the open market.

(4) Financial assets measured at amortized cost:

	December 31, 2020	December 31, 2019
<u>Current</u>		
Domestic investment		
Pledged time deposits	\$ 28,480	\$ —
Time deposits more than three months	54,720	—
	<u>83,200</u>	<u>—</u>
Foreign investment		
Time deposits more than three months	42,724	131,066
	<u>\$ 125,924</u>	<u>\$ 131,066</u>
Interest rate	<u>0.15%~0.56%</u>	<u>1.95%~2%</u>

For information on providing guarantees for financial assets measured at amortized cost, please refer to Note 8.

(5) Bills receivable and net accounts receivable:

	December 31, 2020	December 31, 2019
<u>Notes receivable</u>		
From operations	\$ 12,736	\$ 12,853
<u>Accounts receivable</u>		
At amortized cost		
Carrying amounts	\$ 155,355	\$ 192,428
Less: Loss allowance	(45,001)	(56,450)
	<u>\$ 110,354</u>	<u>\$ 135,978</u>

1. In principle, the credit period of the consolidated company to customers is from 10 days to 90 days from the monthly settlement, and the accounts receivable are not subject to interest. In order to reduce the credit risk, the management of the consolidated company assigns a dedicated team responsible for the determination of the credit limit, credit approval and other monitoring procedures to ensure that appropriate actions have been taken in the recovery of overdue accounts receivable. In addition, the consolidated company will review the recoverable amount of accounts receivable one by one on the balance sheet date to ensure that the accounts receivable that cannot be recovered have been properly deducted.

2. The consolidated company recognizes the allowance loss of notes and accounts receivable based on expected credit losses during the duration. The expected credit loss during the lifetime is based on the customer's past default history, current financial status, past collection experience, and observable changes in the national or regional economic situation related to the default of accounts receivable, and are set according to the loss patterns of different customer groups to determine the expected credit loss rate.
3. If there is evidence that the counterparty of the transaction is facing serious financial difficulties and the consolidated company cannot reasonably expect the recoverable amount, for example, the counterparty is in liquidation or the debt has been overdue for more than 2 years, the consolidated company will directly offset the relevant accounts receivable, however recourse activities will continue, and the amount recovered due to recourse is recognized in the profit and loss
4. The allowance loss for notes receivable and accounts receivable of the consolidated company is as follows:

December 31st, 2020

	Group A	Group B	Group C	Total
Carrying amounts	\$ 75,509	\$ 62,203	\$ 30,379	\$ 168,091
Loss allowance	(4,960)	(40,011)	(30)	(45,001)
Amortized cost	\$ 70,549	\$ 22,192	\$ 30,349	\$ 123,090

Group A is evaluated based on 0.04% to 100% for customers in Taiwan; Group B is evaluated based on 4.43% to 100% for customers in China; Group C is evaluated based on 0.03% to 0.09% for customers in Malaysia.

December 31st, 2019

	Group A	Group B	Group C	Total
Carrying amounts	\$ 90,384	\$ 95,041	\$ 19,856	\$ 205,281
Loss allowance	(3,898)	(52,532)	(20)	(56,450)
Amortized cost	\$ 86,486	\$ 42,509	\$ 19,836	\$ 148,831

Group A is evaluated based on 0.05% to 100% for customers in Taiwan; Group B is evaluated based on 41.12% to 100% for customers in China; Group C is evaluated based on 0.03% to 0.09% for customers in Malaysia.

5. The aging analysis of notes receivable and accounts receivable is as follows:

December 31, 2020				
	Notes receivable		Accounts receivable	
Not past due	\$	12,736	\$	98,368
Past due within 30 days		—		2,694
Past due 31-90 days		—		5,074
Past due 91-180 days		—		164
Past due over 181 days		—		49,055
	\$	12,736	\$	155,355

December 31, 2019				
	Notes receivable		Accounts receivable	
Not past due	\$	12,853	\$	100,889
Past due within 30 days		—		2,978
Past due 31-90 days		—		1,268
Past due 91-180 days		—		2,296
Past due over 181 days		—		84,997
	\$	12,853	\$	192,428

The above is an aging analysis based on the number of overdue days.

6. The information on changes in notes receivable and allowance loss for accounts receivable is as follows:

	FY 2020	FY 2019
Balance, beginning of year	\$ 56,450	\$ 72,115
Reversal	(11,899)	(12,108)
Offset due to uncollectible	(103)	(1,991)
Effect of exchange rate change	553	(1,566)
Balance, end of year	\$ 45,001	\$ 56,450

(6) Other Receivables

	December 31, 2020	December 31, 2019
Assignment of claims receivable	\$ 8,755	\$ 27,387
Disposal of land receivable	—	16,000
Tax refund receivable	509	295

Other receivable from related parties	98,605	101,101
	<u>123,714</u>	<u>171,135</u>
Less : Loss allowance	(85,436)	(92,612)
	<u>\$ 38,278</u>	<u>\$ 78,523</u>

1. The information on changes in allowance loss for other receivables is as follows

	FY 2020	FY 2019
Balance, beginning of year	\$ 92,612	\$ 93,542
Reversal	(7,248)	(2,057)
Offset	(8)	2,057
Offset due to uncollectible	—	(34)
Effect of exchange rate change	80	(896)
Balance, end of year	<u>\$ 85,436</u>	<u>\$ 92,612</u>

2. The company's subsidiary-ACTION ASIA (SHENZHEN) CO., LTD. (hereinafter referred to as Action Asia) and Qingdao Haier Electronics Co., Ltd. (hereinafter referred to as Haier Company) signed a "customized underwriting cooperation agreement" (including creditor's rights) in January 2016 Transfer agreement), the two parties agree that Haier will provide brand and platform resources, and Action Asia will be responsible for production and sales. In addition, according to the contract between the two parties, Action Asia shall purchase the accounts receivable (debt transfer agreement) of Haier Company's development of the box project before January 1st, 2015, and Haier Company shall deliver the credit certificate to Action Asia, the accounts receivable in the preceding paragraph If the payment is collected by Haier Company, it shall be transferred to Action Asia (debt transfer).

Due to the contract performance dispute between Action Asia and Haier Company, Action Asia re-evaluated the transaction mode and appointed a lawyer to evaluate the contract. The lawyer appointed that Haier Company has not fulfilled its obligations in accordance with the contract so far, and the contract should be invalid. Action Asia submitted an arbitration application to the China International Economic and Trade Arbitration

Commission on November 28th, 2016, stating that Action Asia has the right to terminate the contract in accordance with the law and requested Haier Company to return the money received from Action Asia.

Action Asia has signed a settlement agreement with Haier Company on March 29th, 2017, stipulating that Action Asia shall continue to perform the creditor's rights transfer agreement (this creditor's rights are hereinafter referred to as the contract payment), and will use Action Asia's accounts receivable from Haier Company and A deposit of NTD 142,828 thousand (NTD 32,407 thousand) was deposited to offset the remaining contract payment.

As of March 31st, 2017, Action Asia has paid the contract payment of Haier Company (including Action Asia's accounts receivable and deposit margin offset against Haier Company) RMB 178,900 thousand (RMB 40,593,000). The receivables of this debt assignment agreement on December 31st, 2020 and 2019 are NTD 8,755 thousand (RMB 2,000 thousand) and NTD 27,387 thousand (RMB 6,363 thousand), respectively, and other receivables are listed.

(7) Disposal group pending sale:

On March 29th, 2021, the board of directors decided to dispose of the 100% equity of ACTION TECHNOLOGY (JIAN) CO., LTD. held by the subsidiary company ALMOND GARDEN CORP., and the consolidated company has begun processing related sales matters, so December 31st, 2020 the assets and liabilities of ACTION TECHNOLOGY (JIAN) CO., LTD. are transferred to the disposal group for sale.

1. The main categories of assets and liabilities of the disposal group held for sale are as follows:

	December 31, 2020	
Cash and cash equivalents	\$	14,522
Accounts receivable, net		3,120
Prepayments		1,517
Other current assets		14
Property, plant and equipment		8,960
Investment property		71,546
	\$	99,679

	December 31, 2020
Accounts payable	\$ 1,544
Other payables	2,633
Other current liabilities	2,320
	\$ 6,497

The above information is compiled based on the amount after the merger of the inter-company transactions has been eliminated.

2. Income of the discontinued operations after the merger and write-off is as follows:

	For the year ended December 31, 2020	For the year ended December 31, 2019
Operating revenue	\$ 8,901	\$ 9,625
Operating costs	(5,044)	(5,452)
Gross profit	3,857	4,173
Operating expenses	(2,842)	(2,671)

3. Important rental activities and terms:

- (1) The subject assets to be leased by the amalgamated company include houses and buildings and official vehicles. The lease contract period is usually between 2 to 5 years. The lease contract is negotiated individually and contains various terms and conditions. Except that the leased asset cannot be used as a loan guarantee, no other restrictions are imposed.
- (2) The consolidated company signed a land use right contract at Pendaftaran Hakmilik Tanah, Pulau Pinang in 2000. The lease term is 60 years, and the lease has been paid in full when the lease was signed. Right of land use rights, income rights, transfer and lease, etc. is granted within the land use period.
- (3) The consolidated company signed a land use right contract located in Pendaftaran Hakmilik Tanah, Pulau Pinang in 2002. The lease term was 48 years, and the lease was fully paid when the lease was signed. Right of land use rights, income rights, transfer and lease, etc. is granted within the land use period.
- (4) The consolidated company signed a land use right contract at the Ji'an County Land and Resources Bureau, Jiangxi Province in 2006. The lease term is 50 years, and the lease has been paid in full when the lease was signed. Right of land use rights, income rights, transfer and lease, etc. is granted within the land use period.
- (5) The consolidated company signed a land use right contract at the Shanghai Municipal Housing and Land Administration Bureau in 2007, the lease term is 50 years, and the

lease has been paid in full when the lease was signed. Right of land use rights, income rights, transfer and lease, etc. is granted within the land use period.

- (6) The consolidated company signed a contract for the right to use the building located in the Housing Bureau of Baoan District, Shenzhen in 2014. The lease term was 70 years, and the lease was paid in full when the lease was signed. Right of land use rights, income rights, transfer and lease, etc. is granted within the land use period.

4. Other Rental Information

	FY 2020	FY 2019
Expense relating to short-term leases	\$ 4,371	\$ 5,149
Expense relating to low-value asset leases	\$ 208	\$ 235
Total cash outflow for lease	\$ 25,536	\$ 21,553

The consolidated company chose to apply the exemption for recognition of short-term leases of houses and buildings and leases of low-value assets, and not recognize related right-of-use assets and lease liabilities for such leases.

(13) Lease Agreement-Lessor

- The assets leased by the consolidated company include land and buildings. The lease contract period usually ranges from 1 to 5 years. The lease contract is negotiated individually and contains various terms and conditions. In order to preserve the use of leased assets, the lessee is usually required not to sublet, sublet, or pledge all or part of the leased object and other restrictions and agreements.
- The benefits recognized by the consolidated company based on the operating lease contract are as follows:

	FY 2020	FY 2019
Rent income	\$ 150,522	\$ 164,118

3. FY2020

The analysis of the maturity date of the total lease payments receivable of the consolidated company under operating leases is as follows:

	December 31, 2020	December 31, 2019
Year 1	\$ 126,879	\$ 150,538
Year 2	107,514	93,718
Year 3	65,632	69,946
Year 4	36,543	39,360
Year 5	7,298	26,738
	<u>\$ 343,866</u>	<u>\$ 380,300</u>

Balance, end of year	<u>\$ 27,434</u>	<u>\$ 24,547</u>
Current	<u>\$ 21,193</u>	<u>\$ 9,633</u>
Noncurrent	<u>\$ 6,241</u>	<u>\$ 14,914</u>

The warranty liability provision of the consolidated company is mainly related to the sales of application products such as home appliances and liquid crystal display players. The warranty liability provision is estimated based on the historical warranty information of the product. The consolidated company estimates that the liability provision will be in the next 1-2 years It happened one after another.

(20) Pension

1. Determine the appropriation plan:

A. Since July 1st, 2015, the company has established a definite retirement method in

accordance with the "Labor Pension Regulations", which is applicable to employees of their own nationality. The company applies the part of the labor pension system stipulated by the "Labor Retirement Regulations" for employees' choice, with a monthly contribution of 6% of the salary to the employee's personal account of the Labor Insurance Bureau, and the payment of the employee's pension is based on the employee's personal pension. The amount of the special account and accumulated income is received in the form of a monthly pension or a lump-sum pension.

- B. The company's overseas subsidiaries set aside a monthly pension based on a certain percentage of the total salary of local employees. The company has no further obligations other than the monthly payment.
- C. In the consolidated profit and loss statement of the consolidated company in year ended December 31st, 2020 & 2019, the pension cost of the afore-mentioned pension method was NTD 6,402,000 and NTD 6,396 thousand, respectively.

2. Determine the welfare plan:

In accordance with the provisions of the "Labor Standards Law", the company and its domestic subsidiaries have established welfare-determined retirement measures, which are applicable to the years of service of all regular employees before the implementation of the "Labor Pension Regulations" on July 1st, 2015, and in the implementation of the "Labor Pension Regulations" choose to continue to apply the labor standard law employees' follow-up service years. For employees who meet the retirement conditions, the pension payment is calculated based on the length of service and the average salary of the 6 months before retirement, service years of less than 15 years (inclusive) will be given 2 bases for each full year, and service years of more than 15 years will be given 1 base for each full year, but the cumulative maximum is limited to 45 bases. The company and its domestic subsidiaries allocate 3% to 10% of the total salary monthly to the retirement fund, which is deposited in the Bank of Taiwan in a special account in the name of the Labor Retirement Reserve Supervisory Committee. In addition, before the end of each year, the company and its domestic subsidiaries will estimate the balance of the special account for workers' retirement reserves in the preceding paragraph. If the balance is not enough to pay the pension amount calculated in accordance with the foregoing calculation for the estimated eligible workers in the next year, the company and

the domestic subsidiary will withdraw the balance before the end of March of the following year. This special account is managed by the Labor Fund Utilization Bureau of the Ministry of Labor, and the company has no right to influence the investment management strategy.

The confirmed benefit plan amounts recognized in the balance sheet are as follows:

	December 31, 2020	December 31, 2019
Present value of defined benefit obligation	\$ (69,277)	\$ (63,822)
Fair value of plan assets	34,915	28,234
Net defined benefit liability	\$ (34,362)	\$ (35,588)

The changes in net defined benefit liabilities are as follows:

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability
Balance at January 1, 2020	\$ (63,822)	\$ 28,234	\$ (35,588)
Service cost			
Current service cost	(1,049)	—	(1,049)
Interest expense	(433)	187	(246)
Components of defined benefit costs recognized in profit or loss	(1,482)	187	(1,295)
Remeasurement on the net defined benefit liability:			
Return on plan assets(excluding amounts included in interest expense)	—	981	981
Changes in financial assumptions	(1,897)	—	(1,897)
Experience adjustments	(2,076)	—	(2,076)
Components of defined benefit costs recognized in other comprehensive income	(3,973)	981	(2,992)
Contributions from employers	—	5,513	5,513
Benefits paid	—	—	—
Balance at December 31, 2020	\$ (69,277)	\$ 34,915	\$ (34,362)

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability
Balance at January 1, 2019	\$ (61,748)	\$ 25,895	\$ (35,853)
Service cost			
Current service cost	(1,061)	—	(1,061)
Interest expense	(545)	223	(322)
Components of defined benefit costs recognized in profit or loss	(1,606)	223	(1,383)
Remeasurement on the net defined benefit liability:			
Return on plan assets(excluding amounts included in interest expense)	—	853	853
Changes in financial assumptions	(1,013)	—	(1,013)
Experience adjustments	(832)	—	(832)
Components of defined benefit costs recognized in other comprehensive income	(1,845)	853	(992)
Contributions from employers	—	2,640	2,640
Benefits paid	1,377	(1,377)	—
Balance at December 31, 2019	\$ (63,822)	\$ 28,234	\$ (35,588)

The consolidated company is exposed to the following risks due to the pension system of the "Labor Standards Law":

1. Investment risk: The Labor Fund Utilization Bureau of the Ministry of Labor invests labor retirement funds in equity securities, debt securities, and bank deposits through its own use and entrusted operations, but in accordance with the provisions of the "Labor Standards Law", the overall asset return It must not be lower than the local bank's 2-year fixed deposit interest rate; if the interest rate is lower than that, the national treasury will make up for it.
2. Interest rate risk: The decline in the interest rate of government bonds will increase the present value of defined welfare obligations, but the debt investment returns of planned assets will also increase, and the impact of the two on the net defined welfare liabilities will partially offset the effect.
3. Salary risk: The calculation for determining the present value of the benefit obligation refers to the future salary of the plan members. Therefore, the increase in the salary of the plan members will increase the present value of the determined benefit obligation. The main assumptions of actuarial evaluation are listed as follows:

	December 31, 2020	December 31, 2019
Discount rate	0.3%	0.6%~0.7%
Future salary increase rate	1.0%~1.5%	1.0%~1.5%

The changes in the main actuarial assumptions adopted on December 31st 2020 & 2019, will increase (decrease) the present value of the determined benefit obligation as follows:

December 31, 2020	Increase of actuarial assumptions 0.25%	Decrease of actuarial assumptions 0.25%
Discount rate	\$ (1,258)	\$ 1,291
Future salary increase rate	\$ 1,105	\$ (1,083)

December 31, 2019	Increase of actuarial assumptions 0.25%	Decrease of actuarial assumptions 0.25%
Discount rate	\$ (1,262)	\$ 1,298
Future salary increase rate	\$ 1,130	\$ (1,106)

The sensitivity analysis above is based on the analysis of the impact of a single assumption change while other assumptions remain unchanged. In practice, many changes in assumptions may be linked. The sensitivity analysis is consistent with the method used to calculate the net pension liabilities of the balance sheet. The methods and assumptions used in preparing the sensitivity analysis in this period are the same as those in the previous period.

As of December 31st, 2020, the weighted average duration of the retirement plan was 7 to 8 years. In addition, the consolidated company expects to allocate NTD 2,638 thousand to the confirmed benefit plan within one year after the reporting date on December 31st, 2020.

(21) Equity

	December 31, 2020	December 31, 2019
Authorized capital	\$ 4,500,000	\$ 4,500,000
Issued capital	\$ 2,771,575	\$ 2,771,575

As of December 31st, 2020 & 2019, the company's nominal number of shares was 450,000 thousand shares, each with a par value of NTD 10, and the number of issued shares was 277,158 thousand shares.

(22) Capital Reserve

	FY 2020		
	Dividend of a claim extinguished by a prescription	From share of changes in equities of subsidiaries	Total
Balance at January 1, 2020	\$ 259	\$ —	\$ 259
From share of changes in equities of subsidiaries	—	1,343	1,343
Balance at December 31, 2020	\$ 259	\$ 1,343	\$ 1,602

	FY 2019
	Dividend of a claim extinguished by a prescription
Balance at January 1, 2019	\$ 259
Balance at December 31, 2019	

According to the provisions of the Company Law, the surplus from the issuance of shares in excess of the par value and the capital reserve obtained from the donation can be used to make up for losses. When the company has no accumulated losses, new shares or shares will be issued in proportion to the shareholders' original shares. cash. In addition, in accordance with the relevant provisions of the Securities Exchange Law, when the capital reserve above is allocated for capitalization, the total amount shall not exceed 10% of the paid-in capital each year. The company shall not use the capital reserve to

supplement the capital loss unless the surplus reserve is still insufficient to fill the capital loss.

(23) Retention of surplus and dividend policy:

1. According to the company's articles of association, if there is a surplus in the annual final accounts, the tax should be paid first to make up for the losses of the previous years. The 10% of the second allocation is the statutory surplus reserve, but when the statutory surplus reserve has reached the paid-in capital, it may no longer be listed. After the rest of the special surplus reserve is allocated or converted according to laws or regulations or the competent authority, together with the undistributed surplus at the beginning of the period, the board of directors shall draft a surplus distribution proposal and submit it to the shareholders meeting to resolve the distribution of shareholder dividends.
2. In addition, in accordance with the provisions of the company's articles of association on dividend policy, based on the company's operational needs and the consideration of maximizing shareholders' equity, the company's dividend policy will be based on the company's future capital expenditure budget and capital needs, the proportion of cash dividends shall not be less than 30% of the total dividends.
3. The statutory surplus reserve shall not be used except for making up the company's losses and issuing new shares or cash in proportion to the shareholders' original shares. However, if new shares or cash are issued, the portion of the reserve exceeding 25% of the paid-in capital shall be used as limit.
4. The company draws up and reverts the special surplus reserve in accordance with FSC Certificate No. 1010012865 and the "Questions and Answers Concerning the Application of Special Surplus Reserves after the adoption of International Financial Reporting Standards (IFRSs)". When the deduction balance of other shareholders' equity is reversed thereafter, the surplus may be distributed on the reversed part.
5. The company will hold a meeting of board of directors on March 29th, 2021, and proposes a surplus distribution proposal for the year ended December 31st, 2020. The distribution situation is as follows:

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 4,370	\$ —
Special capital reserve	35,135	—
Cash dividends to shareholders	27,716	0.1
	\$ 67,221	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

6. On June 15th, 2020, the company passed a resolution of the shareholders' meeting to approve the profit distribution plan of the year ended December 31st, 2019. The distribution situation is as follows:

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 5,473	\$ —
Cash dividends to shareholders	60,975	0.22
	\$ 66,448	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

7. The company passed the resolution of the shareholders' meeting on June 27th, 2019 and passed the profit distribution plan of the year ended December 31st, 2018. The distribution situation is as follows

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 14,828	\$ —
Cash dividends to shareholders	88,690	0.32
	\$ 103,518	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

(24) Special surplus reserve:

The company's original retained earnings (cumulative loss) was negative (cumulative loss) of NTD 175,305 thousand before the conversion of IFRSs on January 1st, 2013, and the net increase in undistributed surplus due to the conversion of IFRSs was NTD 379,723 thousand, the FSC Certificate No. 1010012865 of April 6th, 2012 stipulates that a special surplus reserve

of NTD 204,418 thousand shall be set aside within the scope of the surplus amount. When the company subsequently uses, disposes, or reclassifies related assets, the original proportion of special surplus reserves shall be reversed.

(25) Other equity items:

Depreciation	42,558	19,016	61,574
Amortization	1,697	6,870	8,567

By nature \ By function	For the year ended December 31,2019		
	Recognized in cost of revenue	Recognized in operating Expense	Total
Employee benefits expense			
Payroll expense	\$ 69,204	\$ 120,397	\$ 189,601
Employee insurance expense	5,163	5,691	10,854
Post-employment benefits expense	2,559	5,220	7,779
Other employee benefits	2,715	8,371	11,086
Depreciation	40,341	18,155	58,496
Amortization	1,216	6,848	8,064

2. Employee benefits

- (1) According to the articles of association of the company, if the company makes a profit in the current year, it shall allocate no less than 5% for employee remuneration and no more than 4% for directors' remuneration; independent directors do not

participate in the distribution, but the company still accumulates in the event of a loss, the compensation amount shall be reserved. Employee remuneration can be made in stocks or cash, and its payment objects may include employees of affiliated companies who meet the conditions set by the board of directors.

The current year's profit as mentioned in the preceding paragraph refers to the current year's pre-tax benefits before deducting the distribution of employee compensation and directors' compensation.

The distribution of employee remuneration and directors' remuneration shall be made by the board of directors with more than two-thirds of the directors' present and a resolution approved by more than half of the directors present, and report to the shareholders meeting.

- (2) The employee compensation and director compensation estimated by the company in the year ended December 31st, 2020 & 2019 are estimated at 5% and 4% respectively:

	For the year ended December 31,2020	For the year ended December 31,2019
Employee compensation	\$ 2,592	\$ 3,018
Director's remuneration	\$ 2,073	\$ 2,414

The estimated amount is consistent with the amount resolved by the board of directors. The above employee compensation and director compensation will be paid in cash.

- (3) After the annual consolidated financial report is approved and issued, if the amount still changes, it will be treated according to the change in accounting estimates and adjusted and recorded in the next year.
- (4) Information on employee remuneration and directors' remuneration approved by the company's board of directors can be found at the Public Information Observatory.

(34) Income Tax

1. The adjustment of the income tax expense recognized in the profit and loss of the consolidated company in year ended December 31st, 2020 & 2019 is as follows

FY2001	Approved	2021	32,727
FY2004	Approved	2024	390,553
FY2005	Approved	2025	11,952
FY2007	Approved	2027	120,090
FY2008	Reviewed	2028	38,446
FY2009	Reviewed	2029	1,755
FY2020	Reviewed	2030	5,356
			<u>\$ 698,504</u>

7. The company's and domestic subsidiaries' profit-making business income tax assessment status is as follows:

Company name	Year of Assessment
The company	2018
Realise Tech-service Co.,Ltd	2018

(35) Earnings Per Share

	For the year ended Dec.31,2020	For the year ended Dec.31,2019
Basic earnings per share		
Continuing operation income	\$ 0.15	\$ 0.19
Discontinued operation income	0.02	0.01
Total for Basic earnings per share	<u>\$ 0.17</u>	<u>\$ 0.20</u>
Earnings per share-diluted		
Continuing operation income	\$ 0.15	\$ 0.19
Discontinued operation income	0.02	0.01
Total for earnings per share-diluted	<u>\$ 0.17</u>	<u>\$ 0.20</u>

1. Basic earnings per share

	For the year ended December 31,2020	For the year ended December 31,2019
Net Income attributable to stockholders of the parent company-Continuing operations	\$ 39,385	\$ 52,834
Net income attributable to stockholders of the parent company-Discontinued operation	6,711	1,902
Net income attributable to stockholders of the parent company	<u>\$ 46,096</u>	<u>\$ 54,736</u>
Weighted-average number of common stocks for basic earnings per share (thousand shares)	<u>277,158</u>	<u>277,158</u>
Earnings per share-basic (NTD)— Continuing operations	\$ 0.15	\$ 0.19
Earnings per share-basic(NTD)— Discontinued operation	0.02	0.01
Earnings per share-basic(NTD)	<u>\$ 0.17</u>	<u>\$ 0.20</u>

2. Diluted earnings per share

	For the year ended December 31,2020	For the year ended December 31,2019
Net income attributable to stockholders of the parent company— Continuing operations	\$ 39,385	\$ 52,834
Net income attributable to stockholders of the parent company— Discontinued operation	6,711	1,902
Net income attributable to stockholders of the parent company	<u>\$ 46,096</u>	<u>\$ 54,736</u>
Weighted-average number of common stocks for basic earnings per share (thousand shares)	<u>277,158</u>	<u>277,158</u>
Compensation of employees (thousand shares)	431	954
Weighted-average number of common stocks for earnings per share-diluted (thousand shares)	<u>277,589</u>	<u>278,112</u>
Earnings per share-basic (NTD)— Continuing operations	\$ 0.15	\$ 0.19
Earnings per share-basic (NTD)— Discontinued operation	0.02	0.01
Earnings per share-basic (NTD)	<u>\$ 0.17</u>	<u>\$ 0.20</u>

If the company can choose to pay employee compensation in stocks or cash, when calculating the diluted earnings per share, it is assumed that the employee compensation will be issued in the form of stocks, and the weighted average number of shares outstanding when the potential common stock has a dilutive effect is calculated as

diluted earnings per share. When calculating the diluted earnings per share before deciding on the number of shares to be issued for employee compensation in the following year, the dilution effect of these potential ordinary shares will also continue to be considered.

(36) Business Combination

1. Acquisition of subsidiaries:

	Main business and products	Acquisition date	Voting ownership interest/Acquisition percentage	Consideration transferred
Action Intelligent(Shenzhen) Co.,Ltd	R&D and sales of AI products	April 16,2019	100%	\$ —
ATZ Electronics Co.,Ltd	R&D and sales of auto products	April 12,2019	51%	\$ 9,041

The consolidated company plans to strengthen the development of smart products for automobiles and home appliances and acquire 100% of the shares of AIS.

The consolidated company plans to expand the automotive electronics market in mainland China and acquires 51% of the equity of ATZ Electronics Co.,Ltd.

2. Transfer consideration

	Action Intelligent(Shenzhen) Co.,Ltd	ATZ Electronics Co.,Ltd
Cash	\$ —	\$ 9,041

3. Assets acquired, and liabilities assumed on the date of acquisition

	Action Intelligent(Shenzhen) Co.,Ltd	ATZ Electronics Co.,Ltd
Assets		
Cash and cash equivalents	\$ 2,058	\$ 26
Other receivables	24	90
Inventories	—	3,850

Other payables	135,598	147,091
Deposit received (non-current included)	20,440	20,122

2. Fair value information of financial instruments

The consolidated company divides financial instruments measured by amortized cost (including cash and cash equivalents, financial assets measured by amortized cost-current, bills receivable, accounts receivable, other receivables, other financial assets, the book amount of deposits of margin, short-term loans, notes payable, accounts payable, other payables and deposited margin) is a reasonable approximation of the fair value. For information on the fair value of financial instruments measured by fair value, please refer to Note 6 (40).

3. Financial risk management policy:

The financial risk management policies of the consolidated company are affected by the characteristics of the electronics and home appliance industries. The financial risks faced by the consolidated company include changes in working capital, credit risk and financial product investment.

In order to achieve the best risk position, the consolidated company intends to adopt the

following different strategies for different risks:

(1) Hedging strategies for changes in working capital:

The consolidated company has appropriate short-term bank loan quotas, and controls the timing of cash inflows and outflows, so as to maintain proper liquidity in capital allocation.

(2) Credit risk:

The consolidated company has a strict credit evaluation policy, which only deals with counterparties with good credit status, and uses credit protection measures in a timely manner to reduce credit risk.

(3) Financial product investment:

Among the equity financial products invested by the consolidated company, the financial assets whose fair value changes are included in the profit and loss and other comprehensive gains and losses have an active market, and the financial assets can be easily sold in the market at a price close to the fair value, and no significant flow is expected to have current risk.

(4) In terms of risk control, the head of the financial department shall conduct regular assessments to monitor transactions and profit and loss at any time, and report to the board of directors when abnormalities are found.

4. The nature and extent of major financial risks:

(1) Market risk

A. Exchange rate risk

(A) If the purchase and sales of the consolidated company are denominated in U.S. dollars, the fair value will change according to market exchange rate fluctuations. However, the company holds foreign currency assets and liabilities that are equal during the period of receipt and payment, and the major market risks can be compared with each other and offset.

(B) The business of the consolidated company involves a number of functional currencies. Therefore, due to exchange rate fluctuations, foreign currency assets and liabilities are affected by exchange rate fluctuations. Information on foreign currency assets and liabilities is as follows:

Unit: Thousands of Foreign Currency/ Thousands of NTD
For the year ended December 31,2020

<u>(Foreign currency : Functional currency)</u>	Foreign Currency	Exchange Rates	Carrying amount (NTD)	Sensitivity Analysis

(C) The unrealized exchange gains and losses of the consolidated company's monetary items that have a significant impact due to exchange rate fluctuations are explained as follows:

The foreign currency exchange gains (losses) (including realized and unrealized) of the consolidated company in the years ended December 31st, 2020 & 2019 were (NTD 7,099) thousand and NTD 7,505 thousand, respectively. Due to the various types of functional currencies of the merged entity, it is impossible to classify each major Affect foreign currency disclosure of exchange gains and losses.

B. Price Risk

(A) Since the investment held by the amalgamating company has a public market price, the amalgamating company is exposed to price risk. In order to manage the price risk of financial instrument investment, the consolidated company has set a stop loss point, so it is expected that no significant price risk will occur. The consolidated company has no risk of commodity price risk.

(B) The consolidated company mainly invests in financial products such as beneficiary certificates and domestic equity securities in the counter. The prices of these financial products will be affected by the uncertainty of the future value of the investment target. If the price of these financial products rises or falls by 1%, and all other factors remain unchanged, the net profit (loss) for after-tax in the years ended December 31st, 2020 & 2019 will be derived from the benefits of financial products measured at fair value through profit and loss. Or losses will increase or decrease by NTD 29,000; the gains or losses of equity investments measured at fair value in other comprehensive gains and losses will increase or decrease by NTD 873,000 and NTD 1,156 thousand, respectively.

C. Interest rate risk

If the borrowed money of the consolidated company is a fixed-rate debt, since changes in market interest rates will not affect future cash flows, there is no cash flow risk due to changes in interest rates, but fair value interest rate risks are borne.

For debts with floating interest rates, changes in market interest rates will cause the effective interest rates of debt financial products to change accordingly, which will cause future cash flows to fluctuate. Part of the risk is offset by cash held at floating interest rates and cash equivalents.

(2) Credit Risk

- A. Credit risk is the risk of financial losses incurred by the consolidated company due to the inability of customers or financial instrument counterparties to fulfill contractual obligations. In accordance with the internally specified credit policy, each operating entity in the amalgamating company must conduct management and credit risk analysis on each of its new customers before deciding the terms and conditions for payment and delivery. The internal risk control system evaluates the credit quality of customers by considering their financial status, experience and other factors. The limits of individual risks are set by the board of directors based on internal and external ratings, and the use of credit lines is regularly monitored. When the consolidated company sells goods, it has assessed the credit status of the counterparty of the transaction. It is expected that the counterparty of the transaction will not default, so the possibility of credit risk is extremely low. The financial assets and liabilities held for trading are traded through market orders or transactions with counterparties with good credit. It is expected that the counterparties will not default, so the possibility of credit risk is not high.
- B. In the years ended December 31st, 2020 & 2019, there was no case of exceeding the credit limit, and the management did not expect any major losses due to the non-performance of the counterparty.

(3) Liquidity Risk

- A. The cash flow forecast is executed by the financial department of the company and is summarized by the financial department of the company. The financial department of the company monitors the forecast of the liquidity requirements of the combined company to ensure that it has sufficient funds to meet its operational needs and maintain a sufficient unused loan commitment line at any time.

- B. When the remaining cash held by each operating entity exceeds the requirements for the management of working capital, the remaining funds are invested in interest-bearing demand deposits, time deposits and marketable securities, and the instruments selected by them have appropriate maturity. Daily may have sufficient liquidity to respond to the above forecast and provide sufficient dispatch water levels. As of December 31st, 2020 & 2019, the positions of the investments (except cash and cash equivalents) held by the consolidated company were NTD 159,169 thousand and NTD 249,581 thousand, respectively. It is expected that cash flow can be generated immediately to manage liquidity risk.
- C. The following table shows the non-derivative financial liabilities of the consolidated company, grouped according to the relevant maturity date. The non-derivative financial liabilities are analyzed based on the remaining period from the balance sheet date to the contract maturity date. The contractual cash flow amount disclosed in the table below is the undiscounted amount.

	As of December 31,2020			
	Less than 1 year	1~2year	2~5year	Total
<u>Non-derivative financial liability</u>

(40) Fair Value Information

1. For information on the fair value of financial assets and financial liabilities of the consolidated company that are not measured by fair value, please refer to Note 6 (39) 2 for explanation. Please refer to Note 6 (14) for the information on the fair value of investment real estate measured by cost of the consolidated company.

2. The various levels of evaluation techniques used to measure the fair value of financial and non-financial instruments are defined as follows:

Level 1: Public quotation (unadjusted) of the same asset or liability in an active market.

Level 2: In addition to the public quotation included in the first level, the input value of an asset or liability that is directly (that is, price) or indirectly (that is derived from price) observable.

Level 3: The input value of an asset or liability that is not based on observable market data.

3. For financial instruments measured at fair value on December 31st, 2020 & 2019, the consolidated company is classified based on the nature, characteristics and risks of the assets and the basic level of fair value. The relevant information is as follows:

Fair value on a recurring basis	December 31,2020			
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit and loss	\$ 2,893	\$ —	\$ —	\$ 2,893
Financial assets at fair value through other comprehensive income— current	87,312	—	—	87,312
Total	<u>\$ 90,205</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 90,205</u>
Fair value on a recurring basis	December 31,2019			
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit and loss	\$ 2,898	\$ —	\$ —	\$ 2,898
Financial assets at fair value through other comprehensive income — noncurrent	115,617	—	—	115,617
Total	<u>\$ 118,515</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 118,515</u>

4. Evaluation techniques and assumptions used to measure fair value

The fair values of financial assets and financial liabilities that have standard terms and conditions and are traded in an active market are determined by reference to market quotes, including the stocks of the China Industrial Exchange and the beneficiary certificates of funds.

5. There was no transfer of the fair value hierarchy of financial assets in 2020 & 2019.

7. Related party transactions:

The transaction amount and balance between the company and its subsidiary (a related person of the company) have been eliminated when preparing the consolidated financial report and have not been disclosed in this note.

(1) Name and relationship of related parties:

Related party name	Categories
DEDE TECHNOLOGY (SHENZHEN) CO., LTD.	Associates

Total		\$ 866,268	\$ 1,249,152

9. Significant contingent liabilities and unrecognized contractual commitments

Except for those already mentioned in other notes, the major commitments, and contingencies of the consolidated company at the balance sheet date are as follows:

- (1) The consolidated company issues endorsement guarantee notes due to credit loan quotas and commitments. As of December 31st, 2020 and 2019, they were NTD 711,000 thousand and NTD 655,000 thousand, respectively.
- (2) The forward letters of credit issued by the consolidated company for purchasing commodities and raw materials as of December 31st, 2020 and 2019, were NTD 53,699 thousand and NTD 43,673 thousand in circulation, respectively.
- (3) A subsidiary of the company-Action Asia (Shenzhen) Co., Ltd. (Action Asia) and Shanghai Hanwang Geshi Equity Investment Fund Partnership (Limited Partnership) and Shanghai Geshi Equity Investment Fund Partnership in February 2015 (Limited Partnership) and He Anqi (hereinafter referred to as Shanghai Geshi Group) and other parties signed an agreement on the capital increase of Shenzhen Fuyunming Network Technology Co., Ltd. Shanghai Geshi Group believes that Shenzhen Fuyunming Internet Technology Co., Ltd. held

by its three parties has reached the equity repurchase conditions stipulated in the capital increase agreement, and Action Asia shall fulfill its obligation to repurchase shares and pay the share repurchase price. Therefore, in October 2019, an arbitration application was filed with the China International Economic and Trade Arbitration Commission, requesting that Action Asia should pay NTD 15,051 thousand (RMB 3,439 thousand) and interest of NTD 181,000 (RMB 41 thousand), and a false seizure of NTD 15,670 thousand (RMB 3,580 thousand) in the account funds of Action Asia was applied on January 19th, 2020. The case was heard by the China International Economic and Trade Arbitration Commission on September 14th, 2020 and is expected to be ruled before May 2nd, 2021. Due to the case being under trial, it is difficult to assess the impact on the merged company. In the future, if any additional impact of this event is generated, the consolidated company will evaluate it in accordance with accounting principles and disclose it in the financial report.

10. Major disaster losses: None.

11. Significant post-period events: none.

12. Others: None.

13. Note Disclosure Matters

When preparing the consolidated financial report, all major transactions between the parent and subsidiary companies and their balances have been eliminated.

(1) Information about major transactions:

1. Loan funds to others: Attached Table 1.
2. Endorsement guarantee for others: attached table two.
3. Circumstances of holding marketable securities at the end of the period: Attached Table 3.
4. The cumulative amount of buying or selling of the same securities reaches NTD 300 million or more than 20% of the paid-in capital: none.
5. The amount of real estate acquired reaches NTD 300 million or more than 20% of the paid-in capital: None.
6. The amount of disposition of real estate reaches NTD 300 million or more than 20% of the paid-in capital: None.
7. The amount of goods purchased or sold with related parties reaches NTD100 million or more than 20% of the paid-in capital: Note 4.

8. The amount due from a related party reaches NTD 100 million or more than 20% of the paid-in capital: None.
9. Engaged in derivatives trading: None.
10. Business relations and important transactions and amounts between parent and subsidiary companies and between subsidiaries: Attached Table 5.

(2) Relevant information about reinvestment business:

The name of the investee company, its location... and other relevant information: Attached Table 6.

(3) Mainland China Investment Information:

1. The name of the Chinese investee company, main business items, paid-in capital, investment methods, capital remittances and exits, shareholding ratio, investment gains and losses, book value of investment at the end of the period, repatriated investment income and investment limits in China: Attached table seven.
2. Significant transactions that occur directly or indirectly with mainland investee companies via third regions, including their prices, payment terms, unrealized gains and losses, and other relevant information that helps to understand the impact of mainland investment on financial statements: Attached Table 1 ~ Schedule VI.

(4) Information on major shareholders: Attached Table 8.

14. Department Information

(1) General information

The management of the merged company operates its business and makes decisions from the perspective of the merged company system and geographical distinctions, mainly divided into the ACTION ASIA LTD. system (abbreviated as AAL system), ALMOND GARDEN CORP. system (abbreviated as AGC system) and the Taiwan region operating department. Reporting department.

(2) Measurement of departmental information

The chief operating decision maker of the consolidated company evaluates the performance of each operating department based on the after-tax net profit. The departmental net profit after tax reported by the consolidated company to the chief operating decision maker is measured in the same way as the income and expenses in the income statement. There is no material inconsistency between the accounting policies of

the operating department of the consolidated company and the summary of important accounting policies described in Note 4.

The departments that the consolidated company should report are as follows:

AAL department: Mainly produces automotive electronics and related accessories in Malaysia and Shenzhen, China, researches, produces and sells electronic products and accessories in Shenzhen, China, and operates warehousing and logistics services in Shanghai.

AGC Department: Mainly engaged in the production of imported raw materials.

Taiwan region: mainly engaged in the sales and maintenance of various electrical appliances and home appliances under the Kolin brand.

(3) Adjustment information of departmental profit and loss

The following reportable departmental information provided to key decision makers does not include the amount of any suspended business unit. Please refer to Note 6 (7) for the description of the suspended business unit.

Unit: Thousands of NTD

Main shareholder information
December 31st, 2020

Share	Share of ownership	Percentage of ownership
Major shareholders		
PENG CHUIN-PING	20,589,303	7.42%
TA PO INVESTMENT LTD.	16,716,170	6.03%

Note 1: The information of major shareholders in this table is based on the last business day of the end of each quarter by China National Security Company, and calculates that shareholders hold 5% of the company's ordinary shares and special shares that have completed unregistered delivery (including treasury shares). The above information. As for the share capital recorded in the company's financial report and the company's actual number of shares delivered without physical registration, there may be differences or differences due to different calculation bases.

Note 2: If the information on the Shanghai Development Bank is that shareholders deliver shares to the trust, they are disclosed in individual accounts by the trustee who opened the trust account by the trustee. As for the shareholder's declaration of insider's equity holding more than 10% of the shares in accordance with the Securities and Exchange Act, his shareholding includes his own shareholding plus the shares delivered to the trust and the right to use the trust property, etc. For information on insider's equity declaration, please refer to Public Information Observatory.

Appendix B

Action Electronics CO., LTD.
Parent Company Only Financial Statements and Independent
Auditor's Report for the Years Ended December 31st,
2020 and 2019

Address: No. 198, Zhongyuan Road, Zhongli District, Taoyuan City

Phone: (03) 451-5494

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

Action Electronics Co., Ltd. Public Certificate:

Opinion

We have audited Action Electronics Co., Ltd.'s individual balance sheet as of December 31, 2020 and 2019, and the individual's comprehensive income statement, individual statements of changes in equity, and individual statements of cash flow, and Individual financial statements of January 1 to December 31, 2020 and 2019, and the notes to the individual financial statement (including the summary of major accounting policies).

In our opinion, based upon the auditors results and other auditors report, the accompanying parent company only financial statement present fairly, in all material respects, the accompanying parent company only financial position of the company as of December 31, 2020 and 2019, and its parent company only financial performance and its parent company only cash flows for the years then ended in accordance with the regulations governing the preparation of financial reports by securities issuers.

Basis for opinion

We conducted our audits in accordance with the regulations governing auditing and attestation of financial statements by certified public accountants and auditing standards generally accepted in the republic of China. Our responsibilities under those standards are further described in the auditors' responsibilities for the audit of the parent company only financial statements section of our report. We are independent of the company in accordance with the norm of professional ethics for certified public accountant of the public of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believed that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements for the year ended December 31, 2020. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and forming our

opinion thereon, and we do not provide a separated opinion on these matters

The key audit matters of Action Electronics Co., Ltd.'s individual financial statement in year 2020 are as follows:

Occurred Impairment of investment accounted for using the equity method

For the accounting policy, please refer to note 4(6) of the individual financial report of equity investment; for the description of accounting items, please refer to note 6(7) of the individual financial statement

Action Electronics Co., Ltd. used the equity method to invest NT\$2,143,344,000 on December 31, 2020, accounting for 64% of total assets, and the share of interest recognized by the equity method in year 2020 was NT\$67,247,000, accounting for 143% of net profit before tax. Since these amounts are considered significant, and when the management performs impairment assessments, the calculation of the recoverable amount involves many assumptions and estimates. The process is inherently highly uncertain. Therefore, the impairment of investment using the equity method is named as one of key review items for this year.

We follow bellow listed main auditing procedures:

1. to assess the cash-generating units that the management recognizes as reason of causing impairment and whether there are signs of impairment shown or not.
2. to understand and evaluate important assumptions such as future cash flow forecasts and capital cost ratios used by management for impairment testing.
3. Through procedures such as inquiring management, identify whether relevant matters that can affect the results of the impairment test will occur in the future of the balance sheet.
4. Assess whether the management has properly disclosed the equity method evaluation investment policy and related information.

Recognition of income

For accounting policies on income recognition, please refer to Note 4(13) of the individual financial statement; for accounting items, please refer to Note 6(23) of the individual financial statement.

The income of Action Electronics Co., Ltd. is mainly recognized based on the rewards of commodities risk transfer, which directly affects the company's annual profit and loss. Action Electronics Co., Ltd. shall recognize the rewards of transferring

commodity risk in accordance with its trading conditions to recognize income. Therefore, the revenue recognition period and recognized amount are considered as one of the key audit items.

Main auditing procedures used in executing audition

1. To understand and test the internal control related to the recognition of sales revenue of Action Electronics Co., Ltd.

2. To understand the types of income and trading conditions of Action Electronics Co., Ltd. to assess whether the accounting policies at the time of income recognition are appropriate.

3. With sampling method, to test the sales transactions before and after the balance sheet date of Action Electronics Co., Ltd. to understand the period of income attribution and whether significant sales returns and discounts have occurred.

Other matters-using other auditors' reports

Action Electronics Co., Ltd.'s annual individual financial report of the year 2020 was enlisted as invested company as the equity method is used to evaluate the investment. The financial report of the relevant subsidiary ACTION INDUSTRIES(M) SDN. BHD. has not been audited by us, but by other auditors. Therefore, in our opinion on the individual financial report of the accompanying individual financial statements; the amount of which using the equity method and the recognition of its share of profit and loss are based on the auditor's reports. On December 31, 2020, the investment in the above-mentioned investee company recognized by the equity method was NT\$117,131,000, accounting for 3% of the total assets; from January 1 to December 31 in 2020, was recognized by the equity method. The profit share was NT\$7,662,000 which accounts for 16% of the net profit before tax.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the regulations governing the preparation of financial reports by securities issuers, and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Action Electronics Co., Ltd.'s ability to continue as a going concern, disclosing, as applicable, matters related to going concerns and using the going concern basis of accounting unless management either intends to liquidate Action Electronics Co., Ltd. or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

1. identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

2. obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstance, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.

3. evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

4. conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

5. evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statement represent the underlying transaction and events in a manner that achieves fair presentation.

6. obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationship and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matter communicated with those charged with governance, we determined those matters with were of most significance in the audit of the parent company only financial statements for the year ended December 31, 2020 and are

therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

4. Summary of Major Accounting Policies

A summary of the important accounting policies of the company is as follows:

(1) Compliance Statement

This parent company only Financial Report is prepared in accordance with the financial reporting standards for securities issuers.

(2) Preparation Basis

Except for the financial instruments measured at fair value and the current value of the defined benefit obligations minus the net defined benefit liabilities recognized at the fair value of the planned assets, this parent company only Financial Report is prepared on the historical cost basis.

The preparation of financial reports that comply with IFRSs requires the use of some important accounting estimates. In the process of applying the accounting policies of the amalgamating company, management also requires the use of its judgment, involving highly judged or complicated items, or involving major assumptions and estimates of the parent company only financial report. For items, please refer to Note 5 for instructions.

"The company" adopts the equity method when prepares individual financial reports for investment in subsidiaries. In order to concord the value of profit and loss, other comprehensive profit and loss and equity of this individual financial report the same as the current year's profit and loss, other comprehensive profit and loss and equity attributable to the owners of the company in both consolidated financial report and parent only financial report; certain accounting differences between the individual basis and the consolidated basis are adjusted. "Investment using the equity method", "Share of profit and loss of a

subsidiary recognized using the equity method", "Share of other comprehensive profit and loss of a subsidiary recognized using the equity method" and related equity items.

(3) Standards for distinguishing between current and non-current assets and liabilities

1. Assets that meet one of the following conditions are classified as current assets; assets that do not belong to current assets are classified as non-current assets:
 - (1) The asset is expected to be realized in the normal business cycle or intended to be sold or consumed.
 - (2) Holders mainly for trading purposes.
 - (3) Expected to be realized within twelve months after the balance sheet date.
 - (4) Cash or cash equivalents, except for those restricted in exchange or used to settle liabilities at least twelve months after the balance sheet date.
2. Liabilities that meet one of the following conditions are classified as current liabilities; those that do not belong to current liabilities are classified as non-current liabilities:
 - (1) Those expected to be settled during the normal business cycle.
 - (2) Holders mainly for trading purposes.
 - (3) Expected to be settled within twelve months after the balance sheet date.
 - (4) The settlement period cannot be unconditionally deferred to at least twelve months after the balance sheet date. The terms of the liability, which may be settled by the issuance of equity instruments based on the choice of the counterparty, do not affect its classification.

(4) Foreign Currency

When preparing financial reports, those who trade in currencies other than the individual's functional currency (foreign currency) are converted into functional currency records based on the exchange rate on the transaction day.

Monetary items in foreign currencies are translated at the closing exchange rate on each balance sheet date. The exchange difference arising from the delivery of monetary items or the conversion of monetary items is recognized in the profit and loss in the current period.

Foreign currency non-monetary items measured by fair value are converted at the exchange rate on the day when the fair value is determined, and the resulting conversion difference is listed in the current profit and loss. However, if the fair value change is recognized in other comprehensive gains and losses, the resulting conversion difference is listed in other

comprehensive profit and loss.

Non-monetary items in foreign currencies measured by historical cost are converted at the exchange rate on the transaction date and will not be converted again.

When preparing the financial report, the assets, and liabilities of foreign operating organizations (including subsidiaries and affiliates in countries where they operate or in currencies different from those of the company) are converted into NTD at the exchange rate on each balance sheet date. The income and expense items are converted at the average exchange rate of the current period, and the resulting conversion differences are listed in other comprehensive income and losses and are accumulated in the foreign operating institution's financial statements under equity.

If the company disposes of all the equity of the foreign operating organization, or disposes of part of the equity of the foreign operating organization's subsidiary but loses control, or the retained equity after the disposal of the foreign operating organization's affiliated company is a financial asset and shall be handled in accordance with the accounting policy of financial instruments, all accumulated exchange differences attributable to the owner of the company and related to the foreign operating organization will be reclassified to profit and loss.

If the partial disposal of a subsidiary of a foreign operating organization does not result in the loss of control, the accumulated exchange difference is re-attributed to the subsidiary's non-controlling interests in proportion and is not recognized as profit or loss. In the event that a significant influence remains after the disposal of the affiliated company of the foreign operating organization, the accumulated exchange difference will be reclassified to profit and loss based on the disposal ratio.

(5) Inventory

Inventory is evaluated based on the lower of cost and net realizable value. Inventory is calculated based on the weighted average method. Net realizable value refers to the balance of the estimated selling price minus the estimated costs and sales expenses that need to be invested in completion of the project.

(6) Investment accounted for using the equity method

The company uses the equity method to handle investments in subsidiaries.

A subsidiary refers to an entity that the company has control over. Under the equity method, the investment is initially recognized at cost, and the book amount obtained in the future

will increase or decrease with the company's share of subsidiary profits and losses and other comprehensive profits and losses and profit distribution. In addition, changes in the company's other rights and interests of subsidiaries are recognized based on the shareholding ratio.

When the company's changes in the ownership and equity of the subsidiary do not result in the loss of control, it is treated as an equity transaction. The investment book value and actual paid or received consideration at fair value difference, will be recognized as equity directly.

When the loss of "the company" equals or exceeds its equity in its subsidiary (including the book value and actual (including the book value of the subsidiary under the equity method and other long-term equity that is essentially part of the company's net investment in the subsidiary), it is continued to recognize losses in proportion to shareholding.

The amount of the acquisition cost exceeding the company's share of the net fair value of the identifiable assets and liabilities of the subsidiaries that constitute the business on the acquisition date is classified as goodwill, which is included in the carrying amount of the investment and cannot be amortized; The amount by which the net fair value of the identifiable assets and liabilities of the subsidiary's identifiable assets and liabilities that constitute the business on the day exceeds the acquisition cost is listed as the current income.

While assessing impairment, the company considers the cash-generating unit from the entire complete financial report and compares its recoverable amount with the book value.

Until the recoverable amount of the asset increases subsequently, the reversal of the impairment loss shall be recognized as an interest, but the book value of the asset after the reversal of the impairment loss shall not exceed the asset that should be deducted if the impairment loss is not recognized the book amount after amortization. The impairment loss attributable to goodwill cannot be reversed in subsequent periods.

When the company loses control over a subsidiary, it measures its remaining investment in its former subsidiary at the fair value on the date of loss of control. The fair value of the remaining investment and the difference between any disposal price and the book value of the investment on the date of loss of control are included in current period profit and loss. In addition, all amounts recognized in other comprehensive profits and losses related to the

subsidiary are accounted for on the same basis as the company's direct disposal of related assets or liabilities.

The unrealized gains and losses of downstream transactions between the company and its subsidiaries are eliminated in the individual financial report. The gains and losses arising from the counter-current and side-current transactions between the company and its subsidiaries are recognized in parent company only financial reports only to the extent that it is irrelevant with the company's equity in the subsidiaries.

(7) Property, Plant, and Equipment

Property, plant, and equipment are recognized at cost, and subsequently measured at the cost minus accumulated depreciation and accumulated impairment losses.

Property, plant and equipment under construction are recognized at the cost minus accumulated impairment losses. Cost includes professional service fees and borrowing costs that meet the capitalization conditions.

When these assets are completed and reach the expected state of use, they are classified into the appropriate categories of property, plant and equipment, and depreciation begins.

Except for self-owned land, which is not depreciated, the rest of the property, plant and equipment are depreciated on a straight-line basis within the service life of each significant part. The company shall review the estimated service life, residual value and depreciation method at least at the end of each year and postpone the effect of changes in applicable accounting estimates.

When property, plant and equipment are delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(8) Investment Property

Investment property refers to property held for the purpose of earning rent or capital appreciation or both (including property and right-of-use assets that meet the definition of investment property and are in the process of establishing a license). Investment property also includes land held for future use that has not yet been determined.

Self-owned investment property is initially measured at cost (including transaction costs), and subsequently measured at the amount of cost minus accumulated depreciation and accumulated impairment losses.

The investment property acquired by the lease is initially measured at cost (including the

original measured amount of the lease liability and the lease payment paid before the lease start date), and subsequently measured at the amount after the cost minus the accumulated depreciation and accumulated impairment losses, and adjust the remeasurement of lease liabilities.

All investment property is depreciated on a straight-line basis.

Investment property under construction is recognized at the cost minus the accumulated impairment loss. Cost includes professional service fees and borrowing costs that meet the capitalization conditions. These assets begin to be depreciated when they reach the expected state of use.

Investment property is transferred to real estate, plant and equipment based on the book value on the day when it was transferred for self-use.

The property of property, plant and equipment is transferred to investment property based on the book value at the end of self-use.

When investment real estate is delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(9) Intangible Assets

1. Obtained Separately

Intangible assets with limited useful life acquired separately are initially measured at cost, and subsequently measured at the amount of cost minus accumulated amortization and accumulated impairment losses. Intangible assets are amortized on a straight-line basis during the useful life. The company shall review the estimated useful life, residual value and amortization method at least at the end of each year and postpone the impact of changes in applicable accounting estimates.

2. Obtained from a Business Combination

The intangible assets obtained in a business combination are recognized at the fair value on the acquisition date and recognized separately from goodwill. The subsequent measurement method is the same as the intangible assets obtained separately.

3. In addition to the column:

When intangible assets are delisted, the difference between the net disposal price and the asset's book value is recognized in profit and loss.

(10) Impairment of Non-Financial Assets

The company assesses on each balance sheet date whether there are any signs that property, plant and equipment, right-of-use assets, and intangible assets may have been impaired. If there are any signs of impairment, estimate the recoverable amount of the asset. If the recoverable amount of an individual asset cannot be estimated, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount is the higher of the fair value less the cost of sale and its use value. If the recoverable amount of an individual asset or cash-generating unit is lower than its book value, the book value of the asset or cash-generating unit is reduced to its recoverable amount, and the impairment loss is recognized in profit and loss.

When the impairment loss is subsequently reversed, the carrying amount of the asset or cash-generating unit is adjusted to the revised recoverable amount, but the increased carrying amount does not exceed the asset or cash-generating unit if the impairment is not recognized in the previous year for the book amount determined at the time of the loss (minus amortization or depreciation). The reversal of the impairment loss is recognized in the profit and loss.

(11) Financial Instruments

Financial assets and financial liabilities are recognized on the balance sheet when the company becomes a party to the contractual terms of the instrument.

In the initial recognition of financial assets and financial liabilities, if financial assets or financial liabilities are not measured at fair value through profit or loss, they are measured at fair value plus transaction costs directly attributable to the acquisition or issuance of financial assets or financial liabilities. Transaction costs directly attributable to the acquisition or issuance of financial assets or financial liabilities measured at fair value through profit and loss are immediately recognized as profit and loss.

1. Financial Assets

Conventional transactions of financial assets are recognized and delisted by accounting on the transaction date.

(1) Type of Measurement

The types of financial assets held by the company are financial assets measured at fair value through profit and loss, financial assets measured at amortized cost, and

equity instrument investment measured at fair value through other comprehensive gains and losses.

A. Financial assets measured at fair value through profit and loss:

Financial assets measured at fair value through profit or loss include financial assets that are compulsorily measured at fair value through profit or loss. Mandatory financial assets measured at fair value through profit or loss include equity instrument investments that are not designated to be measured at fair value through other comprehensive profits and losses, and debt instrument investments that are not classified as measured at amortized cost or measured at fair value through other comprehensive profits and losses. Financial assets measured at fair value through profit and loss are measured at fair value, and the benefits or losses resulting from re-measurement are recognized in profit and loss.

B. Financial assets measured at amortized cost:

If the financial assets invested by the company meet the following two conditions, they are classified as financial assets measured at amortized cost:

- (a) It is held under a certain business model whose purpose is to hold financial assets to collect contractual cash flows; and
- (b) The terms of the contract generate cash flows on a specific date, and these cash flows are all interest on the payment of the principal and the amount of principal in circulation.

Financial assets measured at amortized cost (including cash and cash equivalents, bills receivable, accounts receivable, other receivables and other financial assets measured at amortized cost) are based on the original recognition. The total book amount determined by the effective interest method is measured after deducting any impairment loss after amortization, and any foreign currency exchange gains and losses are recognized in profit and loss.

Except for the following two cases, interest income is calculated by multiplying the effective interest rate by the total book value of financial assets:

- (a) For purchased or created credit-impaired financial assets, interest income is calculated by multiplying the credit-adjusted effective interest rate by the

amortized cost of the financial asset.

- (b) For financial assets that are not purchased or original credit impairment, but subsequently become credit impairment, you should be confident to calculate interest income by multiplying the effective interest rate by the amortized cost of the financial asset from the next reporting period after the impairment.

Equivalent cash includes time deposits that are highly liquid, convertible into fixed cash at any time and have little risk of value changes within 3 months from the date of acquisition and are used to meet short-term cash commitments.

- C. Investment in equity instruments measured at fair value through other comprehensive gains and losses:

At the time of initial recognition, the company can make an irrevocable choice to designate investment in equity instruments that are not held for trading and that are not recognized by the purchaser of a business merger or have consideration at fair value through other comprehensive gains and losses.

Equity instrument investments measured at fair value through other comprehensive gains and losses are measured at fair value, and subsequent changes in fair value are reported in other comprehensive gains and losses and accumulated in other equity. At the time of investment disposal, the accumulated profits and losses are directly transferred to retained earnings and are not reclassified as profits and losses.

Dividends from equity instrument investments measured at fair value through other comprehensive gains and losses are recognized in the profit and loss when the rights of the company to receive payments are established unless the dividend clearly represents part of the investment cost recovery.

- (2) Impairment of Financial Assets:

- A. The company assesses the impairment losses of financial assets (including accounts receivable) and lease receivables measured at amortized cost based on expected credit losses on each balance sheet date.
- B. Accounts receivable and lease receivables are recognized as allowance losses based on expected credit losses during the duration. For other financial assets,

first assess whether there is a significant increase in credit risk since the initial recognition. If there is no significant increase, the allowance loss is recognized based on the 12-month expected credit loss; if it has increased significantly, the allowance loss is recognized based on the expected credit loss during the duration.

- C. Expected credit loss is the weighted average credit loss based on the risk of default. The 12-month expected credit loss refers to the expected credit loss caused by the possible default event of the financial instrument within 12 months after the reporting date, and the lifetime expected credit loss represents the expected credit loss caused by all possible default events during the expected lifetime of the financial instrument.

The impairment loss of all financial assets is reduced by the allowance account.

(3) Delisting of Financial Assets

The company only delists financial assets when the contractual rights from the cash flow of financial assets have lapsed, or the financial assets have been transferred and almost all the risks and rewards of the ownership of the assets have been transferred to other companies.

When a financial asset measured at amortized cost is delisted as a whole, the difference between its book value and the consideration received is recognized in profit or loss. When equity instrument investments measured at fair value through other comprehensive gains and losses are delisted as a whole, accumulated gains and losses are directly transferred to retained earnings and are not reclassified as gains and losses.

2. Financial Liabilities and Equity Instruments

(1) Classification of liabilities or equity:

The debt and equity instruments issued by the amalgamating company are classified as financial liabilities or equity based on the substance of the contractual agreement and the definition of financial liabilities and equity instruments.

An equity instrument refers to any contract that recognizes the remaining equity of the company after deducting all its liabilities from its assets. The equity instruments issued by the company are recognized at the amount obtained after deducting the

direct issuance costs.

(2) Financial Liabilities

Financial liabilities are not held for trading and are not designated as those measured at fair value through profit and loss (including payables). The initial recognition is measured at fair value plus directly attributable transaction costs; subsequent evaluation adopts the effective interest method to amortize post-sale cost measurement.

(3) Delisting of Financial Liabilities

The company de-lists financial liabilities when contractual obligations have been fulfilled, cancelled, or expired.

When excluding financial liabilities, the difference between its book value and the total consideration paid or payable (including any transferred non-cash assets or liabilities assumed) is recognized as profit or loss.

(12) Provision for Liabilities

When the company has a current obligation (statutory or constructive obligation) due to past events and is likely to be required to pay off the obligation, and the amount of the obligation can be reliably estimated, the liability provision shall be recognized. The amount recognized as a liability reserve is based on the risk and uncertainty of the obligation and is the best estimate of the expenditure required to settle the obligation on the balance sheet date. The provision for liabilities is measured by discounting the estimated cash flow of the settlement obligation.

(13) Income Recognition

After the company identifies performance obligations in the customer contract, it allocates the transaction price to each performance obligation, and recognizes revenue when each performance obligation is met.

1. The company manufactures and sells audio-visual electronic products, various home appliances and other related products. Sales revenue is recognized when the control of the product is transferred to the customer, that is, when the product is delivered to the designated location and meets the performance obligation, it will be deducted estimated customer returns, discounts, and other similar discounts. Based on historical experience and considering different contract conditions, the company estimates the

possible sales returns and discounts, and recognizes refund liabilities (list other current liabilities) and product rights to be returned (list other current assets) . In principle, the credit period of the company to customers is from 10 days to 90 days from monthly settlement. The consideration for the sales revenue of commodities is the short-term accounts receivable. Since the discounting effect is not significant, it is measured based on the original invoice amount.

2. The company provides a standard warranty for the products it sells, and has the obligation to refund product defects, and recognize the liability provision when selling the goods.
3. Account receivables are recognized when the control of the product is transferred to the customer, because the company has an unconditional right to the contract price from that point in time, and the consideration can be collected from the customer only after time has passed. The advance receipts received before the product arrives are recognized as contract liabilities.

(14) Lease

The company assesses whether the contract belongs to (or contains) a lease on the date of contract establishment.

1. The company is the lessor:

When the lease clause transfers almost all the risks and rewards attached to the ownership of the asset to the lessee, it is classified as a financial lease. All other leases are classified as operating leases.

When the amalgamating company subleases the right-of-use asset, it uses the right-of-use asset (not the underlying asset) to determine the classification of the sublease. However, if the main lease is a short-term lease for which the recognition exemption applies to the company, the sublease is classified as an operating lease.

Under operating leases, lease payments after deducting lease incentives are recognized as income on a straight-line basis during the relevant lease period. The original direct cost incurred in obtaining an operating lease is added to the book value of the underlying asset and recognized as an expense during the lease period on a straight-line basis. The lease negotiation with the lessee is handled as the new lease from the effective date of the lease modification.

2. The company is the lessee:

Except for the lease payments of low-value underlying asset leases and short-term leases that are subject to the applicable recognition exemption, the lease payments are recognized as expenses on a straight-line basis during the lease period, and other leases are recognized as the right-of-use asset and lease liability on the lease start date.

The right-of-use asset is originally measured at cost (including the original measured amount of the lease liability, the lease payment paid before the lease start date, minus the lease incentives received, the original direct cost and the estimated cost of restoring the underlying asset), and the subsequent cost minus accumulated depreciation and measure the amount after the accumulated impairment loss and adjust the remeasurement amount of the lease liability.

Except for those that meet the definition of investment real estate, right-of-use assets are separately expressed on the balance sheet. For the recognition and measurement of right-of-use assets that meet the definition of investment property, please refer to Note 4 (10) Accounting Policy for Investment Property.

Right-of-use assets are depreciated on a straight-line basis from the lease start date to the expiration of the service life or the expiration of the lease term, whichever is earlier.

The lease liability was originally measured at the present value of the lease payment. If the implicit interest rate of the lease is easy to determine, the lease payment is discounted using that interest rate. If the interest rate is not easy to determine, use the lessee's incremental borrowing interest rate.

Subsequently, the lease liability is measured on the amortized cost basis using the effective interest method, and the interest expense is amortized during the lease period. If changes in the future lease payments during the lease period or changes in the index or rate used to determine lease payments result in changes in future lease payments, the company will then measure the lease liabilities and adjust the right-of-use assets accordingly. However, if the book value of the right-of-use assets has been reduced to zero, then the remaining remeasured amount is recognized in profit and loss. For lease modifications that are not treated as separate leases, remeasurement of the lease liability due to the reduction in the scope of the lease is to reduce the right-of-use assets and recognize the profit and loss of the partial or full termination of the lease; the

remeasurement of the lease liability due to other modifications is to adjust the right-of-use assets. Lease liabilities are separately expressed in the balance sheet.

(15) Employee Benefits

Short-term employee benefits are measured by the expected non-discounted amount of cash paid and are recognized as expenses when the relevant services are provided.

Regarding the definite allocation plan, the amount of the retirement fund that should be allocated is recognized as the current pension cost based on accrual. The advance payment is recognized as an asset within the scope of refundable cash or reduced future payments.

The net obligation under the definite benefit plan is calculated by discounting the number of future benefits earned by the employee in the current or past services, and the current value of the definite benefit obligation on the balance sheet date minus the fair value of the planned assets. The net obligation to determine benefits is calculated annually by actuaries using the projected unit benefit method, and the discount rate is determined by referring to the market yield rate of high-quality corporate bonds whose balance sheet date is consistent with the currency and period of the determined benefit plan; in high-quality corporate bonds for countries without a deep market, the market yield rate of government bonds (on the balance sheet date) is used. The remeasurement amount generated by the determined benefit plan is recognized in other comprehensive profit and loss in the current period and included in the retained surplus. The related expenses of the previous service cost are immediately recognized as profit and loss.

Resignation benefits are benefits provided when the employee's employment is terminated before the normal retirement date or when the employee decides to accept the company's welfare invitation in exchange for termination of employment. The merging company recognizes expenses when it is no longer able to withdraw the offer of resignation benefits or when the relevant restructuring costs are recognized, whichever is earlier. It is not expected that benefits paid in full 12 months after the balance sheet date should be discounted.

(16) Income Tax

Income tax expense is the sum of current income tax and deferred income tax.

1. Current Income Tax

The company determines the current income (loss) in accordance with the laws and

regulations established by each income tax reporting jurisdiction, and calculates the payable (recoverable) income tax based on it.

The undistributed surplus calculated in accordance with the provisions of the Income Tax Law of the Republic of China is subject to additional income tax, which is recognized in the annual shareholders' meeting.

Adjustments to income tax payable in previous years are included in current income tax.

2. Deferred Income Tax

Deferred income tax is calculated based on the temporary difference between the book value of assets and liabilities and the tax basis for calculating taxable income. Deferred income tax liabilities are generally recognized for all taxable temporary differences, while deferred income tax assets are recognized when there is a high probability of taxable income that can be used to deduct temporary differences or loss deductions.

Taxable temporary differences related to investment in subsidiaries are recognized as deferred income tax liabilities, but if the company can control the timing of the reversion of the temporary difference, and the temporary difference is likely to not revert in the foreseeable future except. The deductible temporary differences related to this type of investment will be recognized as deferred income tax only if it is likely to have sufficient taxable income to realize the temporary differences, and within the scope expected to return in the foreseeable future assets.

The carrying amount of deferred income tax assets is reviewed on each balance sheet date, and the carrying amount is reduced for those that are no longer likely to have sufficient taxable income to recover all or part of their assets. For those that have not been recognized as deferred income tax assets, they are also reviewed on each balance sheet date, and if they are likely to generate taxable income in the future for recovering all or part of their assets, the book amount will be increased.

Deferred income tax assets and liabilities are measured by the tax rate for the period in which the expected liability is settled, or the asset is realized. The tax rate is based on the tax rate and tax law that has been legislated or substantively legislated on the balance sheet date. The measurement of deferred income tax liabilities and assets reflects the tax consequences arising from the way the company expects to recover or settle the carrying amount of its assets and liabilities on the balance sheet date.

3. Current and Deferred Income Tax

Current and deferred income taxes are recognized in profit or loss, but the current and deferred income taxes related to items recognized in other comprehensive profit or loss or directly included in equity are respectively recognized in other comprehensive profit or loss or directly included in equity.

5. Major sources of uncertainty in major accounting judgments, estimates and assumptions:

When the company adopts the accounting, policies described in Note 4, the management must make relevant judgments, estimates and assumptions based on historical experience and other relevant factors for those who cannot easily obtain information about the carrying amounts of assets and liabilities from other sources. The estimates and related assumptions are based on historical experience and other factors deemed relevant. Actual results may differ from estimates.

Estimates and basic assumptions are continuously reviewed. If the revision of the estimate only affects the current period, it shall be recognized in the current period of the revision of the accounting estimate. If the revision of the accounting estimate affects both the current period and the future period, it shall be recognized in the current period and future period of the estimate revision.

The main sources of uncertainties in significant accounting judgments, estimates and assumptions of the company are as follows:

(1) Evaluation of Inventory

Since inventory must be priced at the lower of cost and net realizable value, the company must use judgment and estimation to determine the net realizable value of the inventory at the end of the financial reporting period.

Due to the rapid changes in the industry, the company assesses the amount of inventory due to normal depletion, obsolescence, or no market sales value at the end of the financial reporting period, and offsets the inventory cost to the net realizable value. This inventory evaluation is mainly based on the estimated product demand in a specific period in the future, so significant changes may occur.

(2) Estimated Impairment of Financial Assets

The estimated impairment of accounts receivable assumes of default rate and expected loss rate of the company. The company considers historical experience, current market conditions

and industrial economic conditions to make assumptions and select input values for impairment assessment. For the important assumptions and input values used, please refer to Note 6 (5). If the actual future cash flow is less than expected, a significant impairment loss may occur or the recognized impairment loss may be reversed.

(3) Assessment of impairment of non-financial assets:

In the process of asset impairment assessment, the company must rely on subjective judgments and determine the independent cash flow of a specific asset group, the number of years of asset durability, and the possible future gains and expenses based on asset usage patterns and industrial characteristics, any estimated changes brought about by the company's strategy or changes in the economy may cause significant impairment in the future.

(4) Investment impairment assessment using the equity method

When there are signs of impairment that an investment using the equity method may have been impaired and the carrying amount may not be recovered, the merging company immediately assesses the impairment of the investment. The company evaluates the impairment based on the future cash flow forecast of the invested company, including the sales growth rate and capacity utilization rate estimated by the internal management of the invested company, and analyzes the reasonableness of related assumptions.

(5) The realizability of deferred income tax assets:

Deferred income tax assets are recognized when there is likely to be sufficient taxable income to deduct temporary differences in the future. When assessing the realizability of deferred income tax assets, significant accounting judgments and estimates of management must be involved, including assumptions such as expected future sales revenue growth and profitability, tax exemption period, available income tax deductions and tax planning. Any changes in the global economic environment, industrial environment and laws and regulations may cause major adjustments in deferred income tax assets.

(6) Evaluation of Warranty Preparation

Incremental costs related to the after-sales maintenance of the product (such as labor costs (whether internal or external) and material costs) and other costs that cannot be claimed from the supplier for maintenance, is listed in accordance with the after-sales warranty contract of the product or the warranty preparation policy of the merged company.

When determining the amount of warranty provision, the management estimates the possibility of repairs and returns based on experience, technical requirements, and average figures in the relevant industry. It is estimated that many factors may have an adverse effect, including additional modifications to the order in response to customer requirements or technical needs, and other unforeseen problems and circumstances. Any of these factors may affect the possibility of repairs or returns, and in turn affect the final repair and return costs involved in the future.

(7) Calculation of net defined benefit liabilities:

When calculating and determining the present value of benefit obligations, the company must use judgments and estimates to determine the relevant actuarial assumptions on the balance sheet date, including discount rates and future salary growth rates. Any change in actuarial assumptions may significantly affect the amount of benefit obligations determined by the company.

(8) Income Recognition

The estimates of returns and discounts related to sales revenue are estimated product returns and discounts that may occur based on historical experience and other known reasons. They are listed as a reduction in sales revenue in the period when the products are sold, and the company regularly reviews the estimated rationality.

6. Explanation of important accounting items:

(1) Cash and Cash Equivalents

	December 31, 2020	December 31, 2019
Cash on hand and petty cash	\$ 882	\$ 869
Deposits in banks	56,361	74,827
	<u>\$ 57,243</u>	<u>\$ 75,696</u>

The credit quality of the financial institutions with which the merged company has transactions is good, and the merged company has transactions with multiple financial institutions to diversify the credit risk, and the probability of default is expected to be very low.

(2) Financial assets measured at fair value through other comprehensive income:

Equity Instrument Investment

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
<u>Current</u>		
Emerging stock— Clientron Corp.	\$ 87,312	\$ —
<u>Non-current</u>		
Emerging stock— Clientron Corp.	\$ —	\$ 115,617

The company's investment in domestic stocks is for the purpose of medium- and long-term holding, and it is expected to make a profit through long-term investment. The management believes that if the fair value fluctuation of the investment is included in the profit and loss, it is inconsistent with the investment plan, so it chooses to designate it as the fair value measurement through other comprehensive profit and loss. The company was approved by the board of directors on March 29th, 2021. In accordance with the company's financial plan, it plans to sell 5,100 thousand shares of Clientron corporation. on the open market.

(3) Financial assets measured at amortized cost:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
<u>Current</u>		
Domestic investment		
Pledged time deposits	28,480	\$ —
Time deposits more than three months	42,720	—
	<u>\$71,200</u>	<u>—</u>
Interest rate	<u>0.15%~0.3%</u>	

For information on providing guarantees for financial assets measured at amortized cost, please refer to Note 8.

(4) Bills receivable and net accounts receivable:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
<u>Notes receivable</u>		
From operations	<u>\$ 10,497</u>	<u>\$ 10,629</u>
<u>Accounts receivable</u>		
At amortized cost		
Carrying amounts	\$ 62,047	\$ 78,559
Less: Loss allowance	<u>(4,785)</u>	<u>(3,724)</u>
	<u>\$ 57,262</u>	<u>\$ 74,835</u>

1. In principle, the credit period of the company to customers is from 10 days to 90 days from the monthly settlement, and the accounts receivable are not subject to interest. In order to reduce the credit risk, the management of the company assigns a dedicated team responsible for the determination of the credit limit, credit approval and other monitoring procedures to ensure that appropriate actions have been taken in the recovery of overdue accounts receivable. In addition, the company will review the recoverable amount of accounts receivable one by one on the balance sheet date to ensure that the accounts receivable that cannot be recovered have been properly deducted.
2. The company recognizes the allowance loss of notes and accounts receivable based on expected credit losses during the duration. The expected credit loss during the lifetime is based on the customer's past default history, current financial status, past collection experience, and observable changes in the national or regional economic situation related to the default of accounts receivable, and are set according to the loss patterns of different customer groups to determine the expected credit loss rate.
3. If there is evidence that the counterparty of the transaction is facing serious financial difficulties and the company cannot reasonably expect the recoverable amount, for example, the counterparty is in liquidation or the debt has been overdue for more than 2 years, the company will directly offset the relevant accounts receivable, however recourse activities will continue, and the amount recovered due to recourse is recognized in the profit and loss
4. The allowance loss for notes receivable and accounts receivable of the company is as follows:

December 31st, 2020

	Not past due	Past due within 30 days	Past due 31-90 days	Past due 91-180 days	Past due over 181 days	Total
Rate of expected credit loss	0.06%	0.07%	0.08%	0.08%	100%	
Carrying amounts	\$ 67,853	\$ —	\$ —	\$ —	\$ 4,691	\$ 72,544
Loss allowance	(94)	—	—	—	(4,691)	(4,785)
Amortized cost	\$ 67,759	\$ —	\$ —	\$ —	\$ —	\$ 67,759

December 31st, 2019

	Not past due	Past due within 30 days	Past due 31-90 days	Past due 91-180 days	Past due over 181 days	Total
Rate of expected credit loss	0.06%	0.06%	0.07%	0.07%	0.07%

- The property, plant and equipment of the company are depreciated based on the following durable years:

Buildings	5 to 56 years
Machinery and equipment	5 to 9 years
Transportation equipment	6 years
Office equipment	3 to 6 years
- The company is an active asset, and will jointly build the "Yisheng Zhihui Science and Technology Park" with the number 239 and 240-1 of the Zhongli Zhonggong Section and the number 241 of the Zhonggong Section held by Youyuanlai Investment Co., Ltd., and approved by the board of directors on June 15th, 2020, the company and reclassified the property as investment property with its book value at the time of change of use.
- For information on guarantees provided for property, plant and equipment, please refer to Note 8.

(9) Lease Agreement-Lessee

1. Right-of-use assets

	December 31, 2020	December 31, 2019
Carrying amounts		
Buildings	9,471	12,720
Transportation equipment	1,789	—
	<u>\$ 11,260</u>	<u>\$ 12,720</u>

	December 31, 2020	December 31, 2019
Additions to right-of-use assets	<u>\$ 2,386</u>	<u>\$ 12,540</u>
Depreciation of right-of-use assets		
Buildings	3,249	2,289
Transportation equipment	597	—
	<u>\$ 3,846</u>	<u>\$ 2,289</u>

Except for the additional and recognized depreciation expenses listed above, the company's right-of-use assets did not undergo major sublease and depreciation in year ended December 31st, 2020 & 2019.

2. Lease Liabilities

	December 31, 2020	December 31, 2019
Carrying amounts		
Current portion	<u>\$ 3,831</u>	<u>\$ 3,119</u>
Noncurrent portion	<u>\$ 7,576</u>	<u>\$ 9,570</u>

The discount rate ranges for lease liabilities are as follows:

	December 31, 2020	December 31, 2019
Buildings	1.63%~1.66%	1.63%~1.66%
Transportation equipment	7.13%	—

3. Important rental activities and terms:

The subject assets to be leased by the amalgamated company include houses and buildings and official vehicles. The lease contract period is usually between 2 to 5 years. The lease contract is negotiated individually and contains various terms and conditions. Except that the leased asset cannot be used as a loan guarantee, no other restrictions are imposed.

4. Other Rental Information

	FY 2020	FY 2019
Expense relating to short-term leases	\$ 112	\$ 733
Expense relating to low-value asset leases	\$ 208	\$ 235
Total cash outflow for lease	\$ 4,285	\$ 3,301

The company chose to apply the exemption for recognition of short-term leases of houses and buildings and leases of low-value assets, and not recognize related right-of-use assets and lease liabilities for such leases.

(10) Lease Agreement-Lessor

1. The assets leased by the company include land and buildings. The lease contract period usually ranges from 1 to 5 years. The lease contract is negotiated individually and contains various terms and conditions. In order to preserve the use of leased assets, the lessee is usually required not to sublet, sublet, or pledge all or part of the leased object and other restrictions and agreements.
2. The benefits recognized by the company based on the operating lease contract are as follows:

	FY 2020	FY 2019
Rent income	\$ 5,836	\$ 8,732

4. The analysis of the maturity date of the total lease payments receivable of the company under operating leases is as follows:

	December 31, 2020	December 31, 2019
Year 1	\$ 3,237	\$ 3,583
Year 2	2,134	688
Year 3	335	—
	<u>\$ 5,706</u>	<u>\$ 4,271</u>

Freight payable	5,776	1,740
Marketing fee payable	3,958	3,146
Advertising payable	1,087	586
Others	7,459	8,205
Other payable- related parties	32,421	6,892
Total	<u>\$ 67,795</u>	<u>\$ 36,027</u>

Others under other payables mainly consist of payable environmental protection recovery charges, after-sales service fees, insurance premiums, preservation fees, house tax, inspection fees and other payments.

(16) Provision for Liabilities

	FY 2020	FY 2019
<u>Warranty</u>		
Balance, beginning of year	\$ 2,233	\$ 709
Additions	2,656	4,305
Write-off	(3,976)	(2,781)
Balance, end of year	<u>\$ 913</u>	<u>\$ 2,233</u>
Current	<u>\$ —</u>	<u>\$ —</u>
Noncurrent	<u>\$ 913</u>	<u>\$ 2,233</u>

The warranty liability provision of the company is mainly related to the sales of application products such as home appliances and liquid crystal display players. The warranty liability provision is estimated based on the historical warranty information of the product. The company estimates that the liability provision will be in the next 1-2 years It happened one after another.

(17) Pension

1. Determine the appropriation plan:

Since July 1st, 2015, the company has established a definite retirement method in accordance with the "Labor Pension Regulations", which is applicable to employees of their own nationality. The company applies the part of the labor pension system stipulated by the "Labor Retirement Regulations" for employees' choice, with a monthly contribution of 6% of the salary to the employee's personal account of the Labor Insurance Bureau, and the payment of the employee's pension is based on the employee's personal pension. The amount of the special account and accumulated income is received in the form of a monthly pension or a lump-sum pension.

In the profit and loss statement of the company in year ended December 31st, 2020 & 2019, the pension cost of the afore-mentioned pension method was NTD 1,978 and NTD 2,084 thousand, respectively.

2. Determine the welfare plan:

In accordance with the provisions of the "Labor Standards Law", the company and its domestic subsidiaries have established welfare-determined retirement measures, which are applicable to the years of service of all regular employees before the implementation of the "Labor Pension Regulations" on July 1st, 2015, and in the implementation of the "Labor Pension Regulations" choose to continue to apply the labor standard law employees' follow-up service years. For employees who meet the retirement conditions, the pension payment is calculated based on the length of service and the average salary of the 6 months before retirement, service years of less than 15 years (inclusive) will be given 2 bases for each full year, and service years of more than 15 years will be given 1 base for each full year, but the cumulative maximum is limited to 45 bases. The company and its domestic subsidiaries allocate 3% to 10% of the total salary monthly to the retirement fund, which is deposited in the Bank of Taiwan in a special account in the

name of the Labor Retirement Reserve Supervisory Committee. In addition, before the end of each year, the company and its domestic subsidiaries will estimate the balance of the special account for workers' retirement reserves in the preceding paragraph. If the balance is not enough to pay the pension amount calculated in accordance with the foregoing calculation for the estimated eligible workers in the next year, the company and the domestic subsidiary will withdraw the balance before the end of March of the following year. This special account is managed by the Labor Fund Utilization Bureau of the Ministry of Labor, and the company has no right to influence the investment management strategy.

The confirmed benefit plan amounts recognized in the balance sheet are as follows:

	December 31, 2020	December 31, 2019
Present value of defined benefit obligation	\$ (15,863)	\$ (13,692)
Fair value of plan assets	11,083	10,580
Net defined benefit liability	\$ (4,780)	\$ (3,112)

The changes in net defined benefit liabilities are as follows:

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability
Balance at January 1, 2020	\$ (13,692)	\$ 10,580	\$ (3,112)
Service cost			
Current service cost	(45)	—	(45)
Interest expense	(82)	63	(19)
Components of defined benefit costs recognized in profit or loss	(127)	63	(64)
Remeasurement on the net defined benefit liability:			
Return on plan assets(excluding amounts included in interest expense)	—	376	376
Changes in financial assumptions	(309)	—	(309)
Experience adjustments	(1,735)	—	(1,735)
Components of defined benefit costs recognized in other comprehensive income	(2,044)	376	(1,668)
Contributions from employers	—	64	64
Balance at December 31, 2020	\$ (15,863)	\$ 11,083	\$ (4,780)

	Present value of defined benefit obligation	Fair value of plan assets	Net defined benefit liability
Balance at January 1, 2019	\$ (12,681)	\$ 10,093	\$ (2,588)
Service cost			
Current service cost	(46)	—	(46)
Interest expense	(101)	81	(20)
Components of defined benefit costs recognized in profit or loss	(147)	81	(66)
Remeasurement on the net defined benefit liability:			
Return on plan assets(excluding amounts included in interest expense)	—	335	335
Changes in financial assumptions	(180)	—	(180)
Experience adjustments	(684)	—	(684)
Components of defined benefit costs recognized in other comprehensive income	(864)	335	(529)
Contributions from employers	—	71	71
Balance at December 31, 2019	\$ (13,692)	\$ 10,580	\$ (3,112)

The company is exposed to the following risks due to the pension system of the "Labor Standards Law":

1. Investment risk: The Labor Fund Utilization Bureau of the Ministry of Labor invests labor retirement funds in equity securities, debt securities, and bank deposits through its own use and entrusted operations, but in accordance with the provisions of the "Labor Standards Law", the overall asset return It must not be lower than the local bank's 2-year fixed deposit interest rate; if the interest rate is lower than that, the national treasury will make up for it.
2. Interest rate risk: The decline in the interest rate of government bonds will increase the present value of defined welfare obligations, but the debt investment returns of planned assets will also increase, and the impact of the two on the net defined welfare liabilities will partially offset the effect.
3. Salary risk: The calculation for determining the present value of the benefit obligation refers to the future salary of the plan members. Therefore, the increase in the salary of the plan members will increase the present value of the determined benefit obligation.

The main assumptions of actuarial evaluation are listed as follows:

	December 31, 2020	December 31, 2019
Discount rate	0.3%	0.6%
Future salary increase rate	1.5%	1.5%

The changes in the main actuarial assumptions adopted on December 31st 2020 & 2019, will increase (decrease) the present value of the determined benefit obligation as follows:

December 31, 2020	Increase of actuarial assumptions 0.25%	Decrease of actuarial assumptions 0.25%
Discount rate	\$ (258)	\$ 265
Future salary increase rate	\$ 221	\$ (217)

December 31, 2019	Increase of actuarial assumptions 0.25%	Decrease of actuarial assumptions 0.25%
Discount rate	\$ (224)	\$ 230
Future salary increase rate	\$ 193	\$ (190)

The sensitivity analysis above is based on the analysis of the impact of a single assumption change while other assumptions remain unchanged. In practice, many changes in assumptions may be linked. The sensitivity analysis is consistent with the method used to calculate the net pension liabilities of the balance sheet. The methods and assumptions used in preparing the sensitivity analysis in this period are the same as those in the previous period.

As of December 31st, 2020, the weighted average duration of the retirement plan was 7 years. In addition, the company expects to allocate NTD 64 thousand to the confirmed benefit plan within one year after the reporting date on December 31st, 2020.

(18) Equity

	December 31, 2020	December 31, 2019
Authorized capital	\$ 4,500,000	\$ 4,500,000
Issued capital	\$ 2,771,575	\$ 2,771,575

As of December 31st, 2020 & 2019, the company's nominal number of shares was 450,000 thousand shares, each with a par value of NTD 10, and the number of issued shares was 277,158 thousand shares.

(19) Capital Reserve

	FY 2019
	Dividend of a claim extinguished by a prescription
Balance at January 1, 2019	\$ 259
Balance at December 31, 2019	—

According to the provisions of the Company Law, the surplus from the issuance of shares in excess of the par value and the capital reserve obtained from the donation can be used to make up for losses. When the company has no accumulated losses, new shares or shares will be issued in proportion to the shareholders' original shares. cash. In addition, in accordance with the relevant provisions of the Securities Exchange Law, when the capital reserve above is allocated for capitalization, the total amount shall not exceed 10%

of the paid-in capital each year. The company shall not use the capital reserve to supplement the capital loss unless the surplus reserve is still insufficient to fill the capital loss.

(20) Retention of surplus and dividend policy:

1. According to the company's articles of association, if there is a surplus in the annual final accounts, the tax should be paid first to make up for the losses of the previous years. The 10% of the second allocation is the statutory surplus reserve, but when the statutory surplus reserve has reached the paid-in capital, It may no longer be listed. After the rest of the special surplus reserve is allocated or converted according to laws or regulations or the competent authority, together with the undistributed surplus at the beginning of the period, the board of directors shall draft a surplus distribution proposal and submit it to the shareholders meeting to resolve the distribution of shareholder dividends.
2. In addition, in accordance with the provisions of the company's articles of association on dividend policy, based on the company's operational needs and the consideration of maximizing shareholders' equity, the company's dividend policy will be based on the company's future capital expenditure budget and capital needs, the proportion of cash dividends shall not be less than 30% of the total dividends.
3. The statutory surplus reserve shall not be used except for making up the company's losses and issuing new shares or cash in proportion to the shareholders' original shares. However, if new shares or cash are issued, the portion of the reserve exceeding 25% of the paid-in capital shall be used as limit.
4. The company draws up and reverts the special surplus reserve in accordance with FSC Certificate No. 1010012865 and the "Questions and Answers Concerning the Application of Special Surplus Reserves after the adoption of International Financial Reporting Standards (IFRSs)". When the deduction balance of other shareholders' equity is reversed thereafter, the surplus may be distributed on the reversed part.
5. The company will hold a meeting of board of directors on March 29th, 2021, and proposes a surplus distribution proposal for the year ended December 31st, 2020. The distribution situation is as follows:

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 4,370	\$ —
Special capital reserve	35,135	—
Cash dividends to shareholders	27,716	0.1
	\$ 67,221	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

6. On June 15th, 2020, the company passed a resolution of the shareholders' meeting to approve the profit distribution plan of the year ended December 31st, 2019. The distribution situation is as follows:

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 5,473	\$ —
Cash dividends to shareholders	60,975	0.22
	\$ 66,448	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

7. The company passed the resolution of the shareholders' meeting on June 27th, 2019 and passed the profit distribution plan of the year ended December 31st, 2018. The distribution situation is as follows

	Amount	Cash dividends per share(NT\$)
Legal capital reserve	\$ 14,828	\$ —
Cash dividends to shareholders	88,690	0.32
	\$ 103,518	

For information about the afore-mentioned surplus distribution, please inquire through channels such as the "Public Information Observatory" of the Taiwan Stock Exchange.

(21) Special surplus reserve:

The company's original retained earnings (cumulative loss) was negative (cumulative loss) of NTD 175,305 thousand before the conversion of IFRSs on January 1st, 2013, and the net increase in undistributed surplus due to the conversion of IFRSs was NTD 379,723 thousand, the FSC Certificate No. 1010012865 of April 6th, 2012 stipulates that a special surplus reserve

of NTD 204,418 thousand shall be set aside within the scope of the surplus amount. When the company subsequently uses, disposes, or reclassifies related assets, the original proportion of special surplus reserves shall be reversed.

Other employee benefits	—	2,701	2,701
Depreciation	1,344	6,225	7,569
Amortization	—	6,393	6,393

- (1) The average number of employees of the company in 2020 and 2019 was 58 and 62, respectively, of which 6 directors were not part-time employees.
- (2) The company's average employee benefit expenses in 2020 and 2019 were 1,052 thousand and 994 thousand, respectively. The average employee salary expenses were 885 thousand and 839 thousand, respectively, and the average employee salary expenses were adjusted and changed by 5%.
- (3) The company had adopted the audit committee to replace the supervisor system in 2020 and 2019, consequently, no supervisor's remuneration allocated.
- (4) The salary and remuneration policies of the company's directors, managers and employees are as follows:
 - A. Directors: The remuneration of the directors of the company is handled in accordance with rules and regulations of the company, to authorize the board of directors to determine salary and remunerations according to their degree of participation and value of contribution in the operation of the company, based upon the domestic and overseas industry standards.

- B. Managers: The amount of remuneration awarded to the managers of the company is reviewed by the remuneration committee and submitted to the board of directors for resolution based on their positions, contributions, and company operating performance for the year.
- C. Staff: The company's employee salary and remuneration policy is to provide employees with average salary and benefits. Based on the company's operating performance and each employee's position, contribution, and performance to determine the year-end bonus and related remuneration, the amount and distribution method are recommended by the remuneration committee and approved by to the board of directors.

2. Employee benefits

- (1) According to the articles of association of the company, if the company makes a profit in the current year, it shall allocate no less than 5% for employee remuneration and no more than 4% for directors' remuneration; independent directors do not participate in the distribution, but the company still accumulates in the event of a loss, the compensation amount shall be reserved. Employee remuneration can be made in stocks or cash, and its payment objects may include employees of affiliated companies who meet the conditions set by the board of directors.

The current year's profit as mentioned in the preceding paragraph refers to the current year's pre-tax benefits before deducting the distribution of employee compensation and directors' compensation.

The distribution of employee remuneration and directors' remuneration shall be made by the board of directors with more than two-thirds of the directors' present and a resolution approved by more than half of the directors present, and report to the shareholders meeting.

- (2) The employee compensation and director compensation estimated by the company in the year ended December 31st, 2020 & 2019 are estimated at 5% and 4% respectively:

	For the year ended December 31,2020	For the year ended December 31,2019
Employee compensation	\$ 2,592	\$ 3,018
Director's remuneration	\$ 2,073	\$ 2,414

The estimated amount is consistent with the amount resolved by the board of

directors. The above employee compensation and director compensation will be paid in cash.

- (3) After the annual parent company only financial report is approved and issued, if the amount still changes, it will be treated according to the change in accounting estimates and adjusted and recorded in the next year.
- (4) Information on employee remuneration and directors' remuneration approved by the company's board of directors can be found at the Public Information Observatory.

(30) Income Tax

(31) Earnings Per Share

	For the year ended Dec.31,2020	For the year ended Dec.31,2019
Basic earnings per share	\$ 0.17	\$ 0.20
Diluted earnings per share	\$ 0.17	\$ 0.20

1. Basic earnings per share

	For the year ended December 31,2020	For the year ended December 31,2019
Net income attributable to stockholders of the parent company	\$ 46,096	\$ 54,736
Weighted-average number of common stocks for basic earnings per share (thousand shares)	277,158	277,158
Earnings per share-basic(NTD)	\$ 0.17	\$ 0.20

2. Diluted earnings per share

	For the year ended December 31,2020	For the year ended December 31,2019
Net income attributable to stockholders of the parent company	\$ 46,096	\$ 54,736
Weighted-average number of common stocks for basic earnings per share (thousand shares)	277,158	277,158
Compensation of employees (thousand shares)	431	954
Weighted-average number of common stocks for earnings per share-diluted (thousand shares)	277,589	278,112
Earnings per share-basic (NTD)	\$ 0.17	\$ 0.20

If the company can choose to pay employee compensation in stocks or cash, when calculating the diluted earnings per share, it is assumed that the employee compensation will be issued in the form of stocks, and the weighted average number of shares outstanding when the potential common stock has a dilutive effect is calculated as diluted earnings per share. When calculating the diluted earnings per share before deciding on the number of shares to be issued for employee compensation in the following year, the dilution effect of these potential ordinary shares will also continue to

be considered.

(33) Capital Risk Management

The capital management objectives of the combined company are to ensure that the company can continue to operate, maintain the best capital structure to reduce capital costs, and provide remuneration to shareholders. In order to maintain or adjust the capital structure, the combined company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

(34) Financial Instruments

1. Types of financial instruments

	As of December 31,2020	As of December 31,2019
<u>Financial assets</u>		
Cash and cash equivalents	\$ 57,243	\$ 75,696
Financial assets at fair value through other comprehensive income (non-current included)	87,312	115,617

Notes receivable	10,497	10,629
Accounts receivable	57,262	74,835
Other receivables	89,912	149,107
Refundable deposit (non-current included)	1,684	594
<u>Financial liabilities</u>		
Short-term loan	\$ 474,027	\$ 492,555
Notes payable	3,378	2,337

	As of December 31,2020	As of December 31,2019
Accounts payable	30,785	37,114
Other payables	67,795	36,027
Deposit received (non-current included)	1,086	925

2. Fair value information of financial instruments

The company divides financial instruments measured by amortized cost (including cash and cash equivalents, financial assets measured by amortized cost-current, bills receivable, accounts receivable, other receivables, other financial assets, the book amount of deposits of margin, short-term loans, notes payable, accounts payable, other payables and deposited margin) is a reasonable approximation of the fair value. For information on the fair value of financial instruments measured by fair value, please refer to Note 6 (40).

3. Financial risk management policy:

The financial risk management policies of the company are affected by the characteristics of the electronics and home appliance industries. The financial risks faced by the company include changes in working capital, credit risk and financial product investment. In order to achieve the best risk position, the company intends to adopt the following different strategies for different risks:

(1) Hedging strategies for changes in working capital:

The company has appropriate short-term bank loan quotas, and controls the timing of cash inflows and outflows, so as to maintain proper liquidity in capital allocation.

(2) Credit risk:

The company has a strict credit evaluation policy, which only deals with counterparties with good credit status, and uses credit protection measures in a timely manner to reduce credit risk.

(3) Financial product investment:

Among the equity financial products invested by the company, the financial assets whose fair value changes are included in the profit and loss and other comprehensive gains and losses have an active market, and the financial assets can be easily sold in the market at a price close to the fair value, and no significant flow is expected to have current risk.

(4) In terms of risk control, the head of the financial department shall conduct regular assessments to monitor transactions and profit and loss at any time, and report to the board of directors when abnormalities are found.

4. The nature and extent of major financial risks:

(1) Market risk

A. Exchange rate risk

(A) If the purchase and sales of the company are denominated in U.S. dollars, the fair value will change according to market exchange rate fluctuations. However, the company holds foreign currency assets and liabilities that are equal during the period of receipt and payment, and the major market risks can be compared with each other and offset.

(B) The business of the company involves a number of functional currencies. Therefore, due to exchange rate fluctuations, foreign currency assets and liabilities are affected by exchange rate fluctuations. Information on foreign currency assets and liabilities is as follows:

<u>Monetary items</u>						
USD	289	29.98	8,664	1%	87	70

(C) The unrealized exchange gains and losses of the company's monetary items that have a significant impact due to exchange rate fluctuations are explained as follows:

The foreign currency exchange gains (losses) (including realized and unrealized) of the company in the years ended December 31st, 2020 & 2019 were (NTD 9,383) thousand and NTD 1,123 thousand, respectively. Due to the various types of functional currencies of the merged entity, it is impossible to classify each major Affect foreign currency disclosure of exchange gains and losses.

B. Price Risk

(A) Since the investment held by the amalgamating company has a public market price, the amalgamating company is exposed to price risk. In order to manage the price risk of financial instrument investment, the company has set a stop loss point, so it is expected that no significant price risk will occur. The company has no risk of commodity price risk.

(B) The company mainly invests in financial products such as beneficiary certificates and domestic equity securities in the counter. The prices of these financial products will be affected by the uncertainty of the future value of the investment target. If the price of these financial products rises or falls by 1%, and all other factors remain unchanged, the net profit (loss) for after-tax in the years ended December 31st, 2020 & 2019 will be derived from the gains or losses of equity investments measured at fair value in other comprehensive gains and losses will increase or decrease by NTD 873 and NTD 1,156 thousand, respectively.

C. Interest rate risk

If the borrowed money of the company is a fixed-rate debt, since changes in market interest rates will not affect future cash flows, there is no cash flow risk due to

changes in interest rates, but fair value interest rate risks are borne. For debts with floating interest rates, changes in market interest rates will cause the effective interest rates of debt financial products to change accordingly, which will cause future cash flows to fluctuate. Part of the risk is offset by cash held at floating interest rates and cash equivalents.

(2) Credit Risk

- A. Credit risk is the risk of financial losses incurred by the company due to the inability of customers or financial instrument counterparties to fulfill contractual obligations. In accordance with the internally specified credit policy, each operating entity in the amalgamating company must conduct management and credit risk analysis on each of its new customers before deciding the terms and conditions for payment and delivery. The internal risk control system evaluates the credit quality of customers by considering their financial status, experience and other factors. The limits of individual risks are set by the board of directors based on internal and external ratings, and the use of credit lines is regularly monitored. When the company sells goods, it has assessed the credit status of the counterparty of the transaction. It is expected that the counterparty of the transaction will not default, so the possibility of credit risk is extremely low. The financial assets and liabilities held for trading are traded through market orders or transactions with counterparties with good credit. It is expected that the counterparties will not default, so the possibility of credit risk is not high.
- B. In the years ended December 31st, 2020 & 2019, there was no case of exceeding the credit limit, and the management did not expect any major losses due to the non-performance of the counterparty.

(3) Liquidity Risk

- A. The cash flow forecast is executed by the financial department of the company and is summarized by the financial department of the company. The financial department of the company monitors the forecast of the liquidity requirements of the combined company to ensure that it has sufficient funds to meet its operational needs and maintain a sufficient unused loan commitment line at any time.

- B. When the remaining cash held by each operating entity exceeds the requirements for the management of working capital, the remaining funds are invested in interest-bearing demand deposits, time deposits and marketable securities, and the instruments selected by them have appropriate maturity. Daily may have sufficient liquidity to respond to the above forecast and provide sufficient dispatch water levels. As of December 31st, 2020 & 2019, the positions of the investments (except cash and cash equivalents) held by the company were NTD 101,552 thousand and NTD 115,617 thousand, respectively. It is expected that cash flow can be generated immediately to manage liquidity risk.
- C. The following table shows the non-derivative financial liabilities of the company, grouped according to the relevant maturity date. The non-derivative financial liabilities are analyzed based on the remaining period from the balance sheet date to the contract maturity date. The contractual cash flow amount disclosed in the table below is the undiscounted amount.

	As of December 31,2020			
	Less than 1 year	1~2year	2~5year	Total
<u>Non-derivative financial liability</u>				
Short-term debt	\$ 475,547	\$ —	\$ —	\$ 475,547
Notes payable	3,378	—	—	3,378
Accounts payable	30,785	—	—	30,785

Deposit received (non-current included)	12	913	—	925
	<u>\$ 573,286</u>	<u>\$ 4,095</u>	<u>\$ 6,663</u>	<u>\$ 584,044</u>

(35) Fair Value Information

1. For information on the fair value of financial assets and financial liabilities of the company that are not measured by fair value, please refer to Note 6 (39) 2 for explanation. Please refer to Note 6 (14) for the information on the fair value of investment real estate measured by cost of the company.

2. The various levels of evaluation techniques used to measure the fair value of financial and non-financial instruments are defined as follows:

Level 1: Public quotation (unadjusted) of the same asset or liability in an active market.

Level 2: In addition to the public quotation included in the first level, the input value of an asset or liability that is directly (that is, price) or indirectly (that is derived from price) observable.

Level 3: The input value of an asset or liability that is not based on observable market data.

3. For financial instruments measured at fair value on December 31st, 2020 & 2019, the company is classified based on the nature, characteristics and risks of the assets and the basic level of fair value. The relevant information is as follows:

Fair value on a recurring basis	December 31,2020			
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through other comprehensive income – current	\$ 87,312	\$ –	\$ –	\$ 87,312

Fair value on a recurring basis	December 31,2019			
	Level 1	Level 2	Level 3	Total
Financial assets at fair value through other comprehensive income – noncurrent	\$ 115,617	\$ –	\$ –	\$ 115,617

4. Evaluation techniques and assumptions used to measure fair value

The fair values of financial assets and financial liabilities that have standard terms and conditions and are traded in an active market are determined by reference to market quotes, including the stocks of the China Industrial Exchange and the beneficiary certificates of funds.

5. There was no transfer of the fair value hierarchy of financial assets in 2020 & 2019.

Note 1: The business transaction information between the parent company and its subsidiaries should be indicated in the serial number column respectively. The method of filling in the serial number is as follows:

1. Fill in 0 for the parent company.
2. Subsidiaries are numbered sequentially starting from Arabic numeral 1 according to the company.

Note 2: The relationship with the trader has the following three types, and the type can be marked (if it is the same transaction between parent and subsidiary companies or between subsidiaries, there is no need for repeated disclosure. For example, if the parent company has disclosed the transaction between the parent company and the subsidiary company, the subsidiary part does not need to be disclosed again; if the subsidiary company has disclosed the transaction between one of its subsidiaries, the other subsidiary company need not be disclosed repeatedly.):

1. Parent company to subsidiary. 2. Subsidiary to parent company. 3. Subsidiary to subsidiary.

Note 3: The transaction is mainly in the nature of capital loans and advances on behalf of others, so it is not applicable.

Note 4: The calculation of the ratio of the transaction amount to the total revenue or total assets. If it is an asset-liability account, it is calculated as the ending balance of the total assets; if it is a profit and loss account, it is calculated based on the cumulative amount of the period in the combined total revenue.

Note 5: Individual transaction amounts that do not reach 1% of the combined total revenue or combined total assets will not be disclosed; in addition, the asset side and income side are the methods of disclosure.

Note 6: When preparing this parent company only financial statement, it has been written off.

Table 5 (1)

Intercompany relationships and significant intercompany transactions for the year ended December 31,2019

Unit: Thousand NTD

No (Note1)	Company name	Counter Party	Nature of relationship(Note 2)	Intercompany Transactions				Note
