C.2	Currency of the Securities Issue:	Currency: Subject to any applicable legal or regulatory restrictions, the Notes may be issued in any currency (the "Specified Currency"). The Specified Currency of the Notes is GBP.
C.5	Free Transferability :	The Notes are freely transferable. However, applicable securities laws in certain jurisdictions impose restrictions on the offer and sale of the Notes and accordingly the Issuer and the dealers have agreed restrictions on the offer, sale and delivery of the Notes in the United States, the European Economic Area, Isle of Man, South Africa, Guernsey and Jersey, and such other restrictions as may be required in connection with the offering and sale of a particular Tranche of Notes in order to comply with relevant securities laws.
C.8	The Rights Attaching to the Securities, including Ranking and Limitations to those Rights:	Status: The Notes are unsecured. The Notes will constitute direct, unconditional, unsubordinated obligations of the Issuer that will rank <i>pari passu</i> among themselves and (save for certain obligations required to be preferred by law) equally with all other unsecured obligations (other than subordinated obligations, if any) of the Issuer from time to time outstanding. Interest: The Notes are non-interest bearing. Redemption of the Notes: The Notes will be redeemed on their maturity date. In addition, the Notes may be redeemed prior to their stated maturity for taxation reasons, on account of certain events affecting the Preference Shares or following an event of default. Payments of Principal: Payments of principal in respect of Notes will in all cases be calculated by reference to the percentage change in value of one or more preference shares issued by Zebra Capital II Limited ("Preference Shares") in respect of the relevant series of Notes. The terms of each class of Preference Shares will be contained in the Memorandum and Articles of Association of Zebra Capital II Limited and the Preference Share confirmation relating to such class. The redemption price of each class of Preference Shares will be calculated by reference to a single share, a basket of shares, an index or a basket of indices (the "Underlying"). The Underlying for the Notes is a single share. Taxation: All payments in respect of the Notes will be made without deduction for or on account of withholding taxes imposed by the United Kingdom unless such withholding or deduction is required by law. In the event that any such deduction is made, the Issuer will not be required to pay any additional amounts in respect of such withholding or deduction / the Issuer will pay additional amounts in respect of such withholding or deduction, subject to exemptions. Denomination: The Notes will be issued in denominations of GBP 1.00. Governing Law: English law

C.11	Listing and Trading:	This document has been approved by the FCA as a base prospectus in compliance with the Prospectus Directive and relevant implementing measures in the United Kingdom for the purpose of giving information with regard to the Notes issued under the Programme described in this Base Prospectus during the period of twelve months after the date hereof. Application has also been made for the Notes to be admitted during the twelve months after the date hereof to listing on the Official List of the FCA and to trading on the Regulated Market of the London Stock Exchange plc (the "London Stock Exchange"). Application will be made for the Notes to be admitted to listing on the Official List of the FCA and to trading on the London Stock Exchange effective on or about 2 March 2015.
C.15	Effect of value of underlying instruments:	The performance of an underlying asset/instrument (being an index, share, basket of shares or basket of indices (the "Underlying")), determines the redemption price and final value (on a one for one basis) of a class of preference share issued by Zebra Capital II Limited (the "Preference Share"), a special purpose vehicle incorporated in the Cayman Islands which is independent of the Issuer and whose business consists of the issuance of Preference Shares in connection with the Programme. The percentage change in the final value of the relevant Preference Share or Preference Shares compared to its or their issue price is then used to calculate the value and return on the Notes. As a result, the potential effect of the performance of the Underlying on the return on the Notes means that investors may lose some or all of their investment. For the avoidance of doubt, the Notes are not backed by or secured on the Preference Shares and accordingly, only a nominal amount of the Preference Shares may be issued by Zebra Capital II Limited regardless of the principal amount of the applicable issuance of Notes by the Issuer. <i>In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the Underlying, the Notes (including the return on the Notes) are described as being linked to the Underlying.</i> The redemption amount of the Notes is linked to the performance of Euro STOXX® 50 Index. The market price or value of the Notes at any times is expected to be affected by changes in the value of the Preference Share and the Underlying.
C.16	Expiration or maturity date:	The Maturity Date of the Notes is 2 March 2021.
C.17	Settlement procedure:	The Notes will be cash-settled.

C.18	Return on securities:	The Notes that may be issued under the Programme are Upside Notes with Capital at Risk, Upside Plus Notes with Capital at Risk, Kick Out Upside Plus Notes with Capital at Risk, Kick Out Notes with Capital at Risk, Multi Equity Kick Out Notes with Capital at Risk, N-Barrier Equity Linked Notes (Accumulation) with Capital at Risk or Range Accrual Equity Linked Notes (Accumulation) with Capital at Risk. The performance of an underlying asset (being an index, share, basket of shares or basket of indices (the "Underlying")), determines the redemption price of a class of preference shares (the "Preference Share"). This redemption price is used to calculate the final value of such Preference Share on a one for one basis. The percentage change in the final value of the Preference Share as against its issue price is then used to calculate the return on the Notes. As a result, the potential effect of the value of the underlying on the return on the Notes means that investors may lose some or all of their investment. <i>In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the Underlying, Notes (including the return on the Notes) are described as being linked to the Underlying.</i> <i>In this Element C, if the applicable Notes are linked to Preference Shares which are not linked to an index but are linked to a share, basket of shares or basket of indices, any reference in this Element C to "index" shall be construed as including, in the alternative, a reference to "share", "basket of indices" and "basket of shares" (as applicable) and, consequently, references to:</i> <i>(i) "level" in respect of a single index shall be construed as references to "price" in respect of a single share, "the weighted average of the level of each index in the basket" in respect of a basket of indices, and "the weighted average of the price of each share in the basket" in respect of a basket of shares;</i> <i>(ii) "initial index level" in respect of a single index shall be construed as "initial share price" in respect of a single share, "the weighted average of the initial index level of each index in the basket" in respect of a basket of indices, and "the weighted average of the initial share price of each share in the basket" in respect of a basket of shares; and</i> <i>(iii) "final index level" in respect of a single index shall be construed as references to "final share price" in respect of a single share, "the weighted average of the final index level of each index in the basket" in respect of a basket of indices, and "the weighted average of the final share price of each share in the basket" in respect of a basket of shares.</i>

		Upside Plus Notes with Capital at Risk: The Notes are zero coupon Upside Plus Notes with Capital at Risk. <i>Scenario A – Upside Plus Return</i> If at maturity the level or price of the Underlying is greater than a specified percentage of the initial level or price of the Underlying, an investor will receive: • "Digital Return" being their initial investment multiplied by a specified percentage return. If at maturity the level or price of the Underlying has increased by more than a specified percentage of the initial level or price of the Underlying, an investor will receive the Digital Return plus: • "Upside Return" being a percentage based on the difference between the final level or price of the Underlying, and the specified percentage of the initial level or price of the Underlying; this additional return may be subject to a cap (i.e. maximum amount) or gearing (i.e. a percentage by which any change in the level or price of the Underlying is multiplied). <i>Scenario B – No Return</i> At maturity investors may receive their initial investment with no additional return in the following circumstances, depending on whether a "Trigger Event"* is specified as applicable in the Final Terms. • If Trigger Event is specified as applicable in the Final Terms: If at maturity the level or price of the Underlying is less than or equal to a specified percentage of the initial level or price of the Underlying (as applicable), an investor will receive its initial investment with no additional return, provided that a Trigger Event has not occurred. • If Trigger Event is not specified as applicable in the Final Terms: If at maturity the level or price of the Underlying is equal to a specified percentage of the initial level or price of the Underlying (as applicable), an investor will receive its initial investment with no additional return. <i>Scenario C – Loss of Investment</i> If at maturity the level or price of the Underlying is less than or equal to a specified percentage of the initial level or price of the Underlying (as applicable) and (only if specified as applicable in the Final Terms) a Trigger Event has occurred, an investor's investment will be reduced by 1% for every 1% fall of the level or price of the Underlying at maturity. *A "Trigger Event", where specified as applicable in the relevant Final Terms, is the fall in the level or price of the Underlying below a specified percentage of the initial level or price of the Underlying either: (i) at any time during the period specified in the relevant Final Terms or (ii) on a particular date or dates specified in the relevant Final Terms.
--	--	--

C.19	Exercise price or final reference price of the underlying:	The performance of an underlying asset (being an index, share, basket of shares, basket of indices or worst performing index or share in a basket of indices or shares). The "Underlying" for the Notes is a single share, determines the redemption price of a class of preference share (the "Preference Share"), such redemption price being used to calculate the final value of such Preference Shares on a one for one basis. The percentage change in the final value of the Preference Share compared to its issue price is then used to calculate the return on the Notes. <i>In this section, for ease of explanation rather than refer to the Notes being linked to the value of the Preference Share which is in turn linked to the Underlying, Notes (including the return on the Notes) are described as being linked to the Underlying.</i> The determination of the performance of the Underlying will be carried out by the Preference Share Calculation Agent, being Investec Bank plc. The Preference Shares Calculation Agent will compare an initial level of the Underlying with a final level of the Underlying. The initial level of the Underlying will be the closing level on the Issue Date. The final level of the Underlying will be the arithmetic average of the closing level on each scheduled trading day in the period from and including a final averaging start date to and including the final averaging end date. The level of the Underlying used to determine whether or not an automatic early redemption is applicable will be the arithmetic average of the closing level on each scheduled trading day in the period from and including an automatic early redemption averaging start date to and including the automatic early redemption averaging end date. The determination of the redemption amount of the Notes will be carried out by the Calculation Agent, being Investec Bank plc.

SECTION D - RISKS

D.2	Risks specific to the issuer:	The Issuer's businesses, earnings and financial condition may be affected by the instability in the global financial markets and economic crisis in the eurozone: The performance of the Issuer may be influenced by the economic conditions of the countries in which it operates, particularly the UK and Australia. The outlook for the global economy is uncertain, in particular in European markets due to sovereign debt and speculation around the future of the euro. These market conditions have exerted downward pressure on asset prices and on availability and cost of credit for financial institutions and will continue to impact the credit quality of the Issuer's customers and counterparties. The Issuer may experience increased funding costs and find continued participation in certain markets more challenging. The risk of one or more countries leaving the euro may also have an impact on the Issuer's UK market. Such conditions may cause the Issuer to incur losses, experience reductions in business activity, find continued participation in certain markets more challenging, and experience increased funding costs and funding pressures, lower share prices, decreased asset values, additional write-downs and impairment charges and lower profitability. The precise nature of all the risks and uncertainties the Issuer faces as a result of current economic conditions cannot be predicted and many of these risks are outside the control of the Issuer and materialisation of such risks may adversely affect the Issuer's financial condition and results of operations. The Issuer's business performance could be affected if its capital resources and liquidity are not managed effectively: The Issuer's capital and liquidity is critical to its ability to operate its businesses, to grow organically and to take advantage of strategic opportunities. The Issuer is required by regulators in the UK, Australia and other jurisdictions to maintain adequate capital and liquidity. Proposals relating to Basel III, the Capital Requirements Directive IV and those of the UK Independent Commission on Banking are likely to impact the management methods of the Issuer in relation to liquidity and capital resources and may also increase the costs of doing business. Any onerous regulatory requirements introduced by regulators could result in inefficiencies in the Issuer's balance sheet structure which may adversely impact the Issuer's profitability and results. Any failure to maintain any increased regulatory capital requirements or to comply with any other requirements introduced by regulators could result in intervention by regulators or the imposition of sanctions, which may have a material adverse effect on the Issuer's profitability and results. The maintenance of adequate capital and liquidity is also necessary for the Issuer's financial flexibility in the face of any turbulence and uncertainty in the global economy. Extreme and unanticipated market circumstances, similar to those experienced in the recent global financial crisis and situations arising from a further deterioration in the Eurozone, may cause exceptional changes in the Issuer's markets, products and other businesses. Any exceptional changes that limit the Issuer's ability effectively to manage its capital resources could have a material adverse impact on the Issuer's profitability and results. If such exceptional changes persist, the Issuer may not have sufficient financing available to it on a timely basis or on terms that are favourable to it to develop or enhance its businesses or services, take advantage of business opportunities or respond to competitive pressures.
-----	-------------------------------	---

D.6	Risks specific to the securities:	Capital at Risk: The Notes are not capital protected. Accordingly, there is no guarantee that the return on a Note will be greater than or equal to the amount invested in the Notes initially or that an investor's initial investment will be returned. Investors may lose some or all of their initial investment. Unlike an investor investing in a savings account or similar investment, where an investor may typically expect to receive a low return but suffer little or no loss of their initial investment, an investor investing in the Notes may expect to potentially receive a higher return but may also expect to potentially suffer a total or partial loss of their initial investment. Return linked to performance of the relevant Preference Share: The return on the Notes is calculated by reference to the percentage change in value of one or more preference shares, the redemption price on such preference shares being based on the performance of an underlying asset (being an index, share, basket of shares or basket of indices (the "Underlying")). Poor performance of the relevant Underlying could result in investors, at best, forgoing returns that could have been made had they invested in a different product or, at worst, losing some or all of their initial investment. <i>In this section, for ease of explanation, the return on the Notes is summarised by reference to the performance of the Underlying rather than the applicable Preference Share.</i> Loss of investment: Other than where the Final Terms specify that Barrier is applicable and the level of the index has not breached a certain specified level at a specified time or during a specified period (the "Barrier"), if at maturity the level of the Underlying is less than a certain other specified level (the "Return Threshold"), the return on the Notes will be: less than the initial investment and investors will suffer a reduction of their initial investment in proportion (or a proportion multiplied by a gearing percentage) with the decline in the performance of the index (the "downside") during a specified period or on a specified date. Accordingly investors will be fully exposed to the downside of the relevant index level and, as a result, may lose all of their initial investment; Leverage factor (Gearing): The return on the Notes may be subject to a leverage factor of less than 100% and accordingly the investors may receive a lower Upside Return than they would have done had the Notes not been subject to Gearing. Conversely, if the Notes are subject to a leverage factor of more than 100%, a small downward movement in the final level or price of the relevant Underlying could result in investors suffering significant losses. Capped return: The return on the Notes may be capped, and accordingly the investors may receive a lower Upside Return than they would have done had the Notes not been subject to a Cap. This could result in the investors forgoing returns that could have been made had they invested in a product without a similar cap.

Such determinations and calculations will determine the amounts that are required to be paid by the Issuer to holders of the Notes. Accordingly, when the Issuer acts as Calculation Agent, Preference Share Calculation Agent or Valuation Agent

		its duties as agent (in the interests of holders of the Notes) may conflict with its interests as Issuer of the Notes.
E.7	Estimated Expenses:	Not applicable. Expenses in respect of the offer or listing of the Notes are not charged by the Issuer or Offeror or Dealer to the investor.
