

UNITED RENEWABLE ENERGY CO., Ltd.

2024/12/25

COMPANY INTRO

1

Founded: Aug 2005
Merged: Oct 2018
(NSP, Gintech, Solartech merged to become largest solar company in Taiwan)

2

Mkt cap: about NT\$16.8 billion
No of employee: 1,181

3

Location
Taiwan: Taipei, Hsinchu Science Park,
Chunan, Tainan
US: Los Angeles
Southeast Asia: Thailand

4

Majority shareholder included:
National Development Fund & Yao-Hwa
Glass (11.9%)
Delta Electronics (1.92%)

POWER Your World

- **Products and Major Business:**

- **Solar Business : Solar Cell and Module manufacturing**
- **PV System : PV project development, EPC and O&M**
- **Energy Storage: products and system integration**

Only global solar company in Taiwan

- **URECO's global business**

2022 (Revenue:NT\$18.8 billion)

2023 (Revenue:NT\$12.5 billion)

- **URE's growth engines: domestic energy transition policy and strong international demand for PV products**

Revenue by products

1Q-3Q 2023

1Q-3Q 2024

- Utilizing vertical integration, gradually expanding into downstream industries and develop new business

Solar Business (Solar Cell/Module)

01

Why URECO?

● Taiwan No. 1

- Largest PV supplier in Taiwan for 4 consecutive years
- Only company to be awarded Taiwan Excellent PV for 11 years (2013~2023)
- Bloomberg New Energy Finance awarded Tier One PV supplier (2017~2024)
- Highest Efficiency
- Highest value: Bifacial products and recyclable
- Most reliable
- Environmental friendly

Awards and Certification

Certificates

URECO has been granted awards and certification by many third parties and institutions around the world.

Taiwan Solar Modules

Taiwan No.1

High Efficiency
(Bi-facial/Double glass/transparent
back sheet)

M10/144 : 560W
M10/120 : 470W
M10/108 : 420W

TOPCon
(Best performance in terms of efficiency
and in high temperature)

2024 new product

M10/144 : 590W
M10/120 : 490W
M10/108 : 440W

Early adopter of bifacial modules

Bifacial module most suitable for rooftop

● Bifacial PV Modules

- Larger surface for energy generation, effective use of reflective light, improve PV system power generation capacity

- URECO was an early adopter of bifacial products

URECO module for all terrain

Ground Mount

Large car park

Rooftop

C&I, residential,
livestock barn
rooftop

Sport facilities

School sport
facilities

Floating

Water reservoir

AquaPV

Farm or fishing

PV System

02

太陽能系統事業部

Taiwan Team

US Team

Project Development

Own 500MW solar project assets in 5 years, generate stable income

Supply Chain Advantage

Superior engineering, module production and integration of supply chain to lower cost and

Professional Asset Management

Professional O&M team to operate YieldCo to generate stable income

Clean Focus group (CFR & GES USA)

Develop/construction/invest/O&M exceed 200MW solar projects, focus on C&I roof (Walmart, Target and Amazon)

Total solution provider

Manufacturing

PV system
development

EPC

O&M

20 years stable
income

North America
329MW

Europe
39MW

Dubai
28MW

Latin America
90MW

**Taiwan
230MW**

Taiwan PV assets

- First PV station commercially operated on June 2012
- URECO maintain and operate over 230MW
- PV system distributed across Taiwan
 - North to Mudan Elementary School
 - East to Port of Hualien
 - West to Penghu
 - South to Fangliao

Abundant power generation information allows URECO to independently developed monitoring system to make more accurate power generation forecasts and management

Outlook for URECO PV system business

Strengthening Taiwan's manufacturing industry's international competitiveness with green energy

powering electrical systems

Green energy supply

PV system O&M

Energy Storage

03

Energy storage products

UL9540
UL1973
UL1998
UL991
UL1741
NEC 706
NFPA 70E

C&I

- Peak shaving
- Voltage and frequency regulation
- Micro grid application
- Demand response

Residential

- Energy independence
- Reduce electricity cost
- Backup power
- Environmental friendly

UPS

Lithium-Ion Battery Pack

- UPS LFP Battery
- Customize Lithium-Ion Battery Pack
- Specialized Mobile Radio

Portable

- Energy independence (mobility)
- Outdoor activities and rescue tools
- Backup power

ENGINEERING PROCUREMENT & CONSTRUCTION (EPC)

Taipower Tainan project (Cigu salt field) (3 connected sites totaling **150MW of PV power**)

20MWh BESS system AFC / PV smoothing

Sourcing
Logistics

EPC
Execution

Pile Driving

Inspection /
Building

- Battery module / EPC
- Utility scale ESS project:
Taipower
- World class partners : Saft, Power Electronics, etc.

PV System

04

Taiwan (ground mount/utility scale project)

Taiwan (Rooftop)

Taiwan (Floating)

Overseas (North America, Europe, Middle East)
