Section D – Risks		
D.2	Key information on the key risks that are specific to the Issuer	<p>Principal Risks relating to the Issuer: Material risks and their impact are described below in two sections: (i) Material existing and emerging risks by Principal Risk and (ii) Material existing and emerging risks potentially impacting more than one Principal Risk. The five principal risks are currently categorised as: (1) Credit Risk; (2) Market Risk; (3) Funding Risk; (4) Operational Risk; and (5) Conduct Risk (within the meaning of the Issuer's Enterprise Risk Management Framework, each a "Principal Risk").</p> <p>(i) Material existing and emerging risks by Principal Risk:</p> <p>Credit risk: The financial condition of the Group's customers, clients and counterparties, including governments and other financial</p>

institutions, could adversely affect the Group. The term "**Group**" means Barclays PLC together with its subsidiaries. The Group may suffer financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group. Furthermore, the Group may also suffer loss when the value of the Group's investment in the financial instruments of an entity falls as a result of that entity's credit rating being downgraded. In addition, the Group may incur significant unrealised gains or losses due to changes in the Group's credit spreads or those of third parties, as these changes affect the fair value of the Group's derivative instruments, debt securities that the Group holds or issues, and loans held at fair value.

Market risk: The Group's financial position may be adversely affected by changes in both the level and volatility of prices leading to lower revenues, or reduced capital. The Group is also at risk from movements in foreign currency exchange rates as these impact the sterling equivalent value of foreign currency denominated assets in the banking book, exposing it to currency translation risk.

Funding risk: The ability of the Group to achieve its business plans may be adversely impacted if it does not effectively manage its capital (including leverage), liquidity and other regulatory requirements. The Group may not be able to achieve its business plans due to: (i) being unable to maintain appropriate capital ratios; (ii) being unable to meet its obligations as they fall due; (iii) rating agency methodology changes resulting in ratings downgrades; and (iv) adverse changes in foreign exchange rates on capital ratios.

Operational risk: The operational risk profile of the Group may change as a result of human factors, inadequate or failed internal processes and systems, or external events. The Group is exposed to many types of operational risk. This includes: fraudulent and other internal and external criminal activities; the risk of breakdowns in processes, controls or procedures (or their inadequacy relative to the size and scope of the Group's business); systems failures or an attempt, by an external party, to make a service or supporting infrastructure unavailable to its intended users, and the risk of geopolitical cyber threat activity which destabilises or destroys the Group's information technology, or critical infrastructure the Group depends upon but does not control. The Group is also subject to the risk of business disruption arising from events wholly or partially beyond its control for example natural disasters, acts of terrorism, epidemics and transport or utility failures, which may give rise to losses or reductions in service to customers and/or economic loss to the Group. All of these risks are also applicable where the Group relies on outside suppliers or vendors to provide services to it and its customers. The operational risks that the Group is exposed to could change rapidly and there is no guarantee that the Group's processes, controls, procedures and systems are sufficient to address, or could adapt promptly to, such changing risks to avoid the risk of loss.

Legal, competition and regulatory matters: Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and financial crime may negatively affect the Group's results, reputation and ability to conduct its business.

Risks arising from regulation of the financial services industry: The

financial services industry continues to be the focus of significant regulatory change and scrutiny which may adversely affect the Group's business, financial performance, capital and risk management strategies.

Conduct risk:

Organisational Change: The Group is at risk of not being able to meet customer and regulatory expectations due to a failure to appropriately manage the: (i) complexity in business practice, processes and systems; (ii) challenges faced in product suitability, automation and portfolio-level risk monitoring; (iii) resilience of its technology; and, (iv) execution strategy, including the failure to fulfil the high level of operational precision required for effective execution in order to deliver positive customer outcomes.

Legacy Issues: Barclays remains at risk from the potential outcomes of a number of investigations relating to its past conduct. Many stakeholders will remain sceptical and so the risk to Barclays' reputation will remain. Barclays continues to work to rebuild customer trust and market confidence impacted by legacy issues.

Market Integrity: There are potential risks arising from conflicts of interest. While primarily relevant to the Investment Bank, these potential risks may also impact the corporate and retail customer base.

Financial Crime: The Group, as a global financial services firm, is exposed to the risks associated with money laundering, terrorist financing, bribery and corruption and sanctions.

Any one, or combination, of the above risks could have significant impact on the Group's reputation and may also lead to potentially large costs to both rectify this issue and reimburse losses incurred by customers and regulatory censure and penalties.

- (ii) Material existing and emerging risks potentially impacting more than one Principal Risk:

Structural Reform (emerging risk):

The UK Financial Services (Banking Reform) Act 2013 (the UK Banking Reform Act) and associated secondary legislation and regulatory rules, require the separation of the Group's UK and EEA retail and SME deposit-taking activities into a legally, operationally and economically separate and independent entity and restrict the types of activity such an entity may conduct (so-called 'ring fencing').

Business conditions, general economy and geopolitical issues:

The Group's performance could be adversely affected in relation to more than one Principal Risk by a weak or deteriorating global economy or political instability. These factors may also occur in one or more of the Group's main countries of operation. The Group offers a broad range of services to retail, institutional and government customers, in a large number of countries. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where it is active, or any other systemically

		<p>important economy, could adversely affect the Group's performance.</p> <p>Business Change/Execution (emerging risk):</p> <p>As Barclays moves towards a single point of entry (Holding Company) resolution model and implementation of the Structural Reform Programme Execution, the expected level of structural and strategic change to be implemented over the medium term will be disruptive and is likely to increase funding and operational risks for the Group and could impact its revenues and businesses.</p> <p>If any of the risks were to occur, singly or in aggregate, they could have a material adverse effect on the Group's business, results of operations and financial condition.</p> <p>Regulatory action in the event a bank in the Group (such as the Issuer) is failing or likely to fail could materially adversely affect the value of the Securities: The Bank Recovery and Resolution Directive (the "BRRD") provides an EU-wide framework for the recovery and resolution of credit institutions and investment firms, their subsidiaries and certain holding companies. The BRRD (including the Bail-In tool) was implemented in the United Kingdom Banking Act 2009 as amended ("Banking Act") in January 2015 and came into force on 1 January 2016. The Banking Act confers substantial powers on a number of UK authorities designed to enable them to take a range of actions in relation to UK banks or investment firms and certain of their affiliates in the event a bank or investment firm in the same group is considered to be failing or likely to fail. The exercise of any of these actions in relation to the Issuer could materially adversely affect the value of the Securities.</p> <p>Under the terms of the Securities, investors have agreed to be bound by the exercise of any UK bail-in power by the relevant UK resolution authority.</p> <p>A downgrade of the credit rating assigned by any credit rating agency to the Issuer could adversely affect the liquidity or market value of the Securities. Credit ratings downgrade could occur as a result of, among other causes, changes in the ratings methodologies used by credit rating agencies. Changes in credit rating agencies' views of the level of implicit sovereign support for European banks and their groups are likely to lead to credit ratings downgrades.</p> <p>The Issuer is affected by risks affecting the Group: The Issuer is also affected by risks affecting the Group as there is substantial overlap in the businesses of the Issuer and its subsidiaries. Further, the Issuer can be negatively affected by risks and other events affecting its subsidiaries even where the Issuer is not directly affected.</p>
D.6	<p>Key information on the key risks that are specific to the Securities including a risk warning that investors may lose some or all of the value of</p>	<p>You may lose up to the entire value of your investment in the Securities:</p> <p>You will lose up to the entire value of your investment if the Issuer fails or is otherwise unable to meet its payment obligations.</p> <p>You may also lose the value of your entire investment, or part of it, if:</p> <ul style="list-style-type: none"> • the Underlying Assets perform in such a manner that the redemption amount payable to you (whether at maturity or following any early redemption) is less than the initial purchase price;

<p>their investment</p>	<ul style="list-style-type: none"> • you sell your Securities prior to maturity in the secondary market (if any) at an amount that is less than the initial purchase price; • the Securities are redeemed early following the occurrence of an extraordinary event in relation to the Underlying Asset(s), the Issuer, the Issuer's hedging arrangement, the relevant currencies or taxation (such as following an additional disruption event) and the amount you receive on such redemption is less than the initial purchase price; and/or • the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to you and/or the value of the Securities is reduced. <p>Return linked to performance of Underlying Assets: The return payable on the Securities is linked to the change in value of the Underlying Assets over the life of the Securities. Any information about the past performance of any Underlying Asset should not be taken as an indication of how prices will change in the future. You will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of any Underlying Asset.</p> <p>Risk of withdrawal of the public offering: In case of a public offer, the Issuer may provide in the Final Terms that it is a condition of the offer that the Issuer may withdraw the offer for reasons beyond its control, such as extraordinary events that in the determination of the Issuer may be prejudicial to the offer. In such circumstances, the offer will be deemed to be null and void. In such case, where you have already paid or delivered subscription monies for the relevant Securities, you will be entitled to reimbursement of such amounts, but will not receive any remuneration that may have accrued in the period between their payment or delivery of subscription monies and the reimbursement of the Securities.</p> <p>Reinvestment risk/loss of yield: Following an early redemption of the Securities for any reason, holders may be unable to reinvest the redemption proceeds at a rate of return as high as the return on the Securities being redeemed.</p> <p>Equity Index risks: Securities linked to the performance of equity indices provide investment diversification opportunities, but will be subject to the risk of fluctuations in both equity prices and the value and volatility of the relevant equity index. Securities linked to equity indices may not participate in dividends or any other distributions paid on the shares which make up such indices, accordingly, you may receive a lower return on the Securities than you would have received if you had invested directly in those shares.</p> <p>The Index Sponsor can add, delete or substitute the components of an equity index at its discretion, and may also alter the methodology used to calculate the level of such index. These events may have a detrimental impact on the level of that index, which in turn could have a negative impact on the value of and return on the Securities.</p> <p>Worst-of: You are exposed to the performance of every Underlying Asset. Irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fail to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you might receive no interest payments and/or could lose some or all of your initial investment.</p> <p>Volatile market prices: The market value of the Securities is unpredictable and</p>
-------------------------	--

		<p>may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p>
