Notes to Financial Statements**1. Accounting policies and convention**

The accounting policies of Shell plc ('the Company') are explained in the relevant notes.

These unaudited Interim Financial Statements ("Interim Statements") of the Company have been prepared in accordance with IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board ("IASB") and as adopted by the UK. For reporting periods beginning on or after January 1, 2022, the Company's Interim Statements are prepared in accordance with UK-adopted international accounting standards which were established as a result of the UK's exit from the European Union. As applied to the Company there are no material differences from International Financial Reporting Standards as issued by the International Accounting Standards Board. Except for the application of UK-adopted international accounting standards these Interim Statements have been prepared on the basis of the same accounting principles as those used in the Annual Report and Accounts (pages 305 to 315) for the year ended December 31, 2022 as filed with the Registrar of Companies for England and Wales, and should be read in conjunction with these filings.

The financial information presented in the unaudited Interim Statements do not constitute statutory accounts within the meaning of section 434(3) of the Companies Act 2006 ("the Act"). Statutory accounts for the year ended December 31, 2022 were published in Shell's Annual Report and Accounts, a copy of which was delivered to the Registrar of Companies for England and Wales. The auditor's report on those accounts was unqualified, did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying the report and did not contain a statement under sections 498(2) or 498(3) of the Act.

2. Investments in subsidiaries

Investments in subsidiaries are stated at cost, net of any impairment (if applicable). The fair value of share-based compensation for equity-settled plans granted to employees of subsidiaries under the Company's plans is recognised as an investment in subsidiaries from the date of grant over the vesting period with a corresponding increase in equity. In the year of vesting of a plan, the costs for the actual deliveries are charged to the relevant employing subsidiaries. This is recognised as a realisation of the investment originally booked. If the actual vesting costs are higher than the cumulatively recognised share-based compensation charge, the difference is recognised in income.

On October 16, 2023 the Company contributed its investment in Shell Petroleum N.V. to another subsidiary, Shell Group Holding Limited, in exchange for the issue of additional shares by Shell Group Holding to the Company. This transaction did not result in a material impact to the financial position or performance of the Company.

3. Ordinary share capital

At December 31, 2023 the issued share capital of the Company was:

	Nominal value original currency	Nominal value \$ million
6,524,109,049 (September 30, 2023: 6,646,135,379) Ordinary shares of €0.07 each	€456,687,633	544
Total		544

Shell plc

Company Number 04366849

4. Other reserves

Other reserves consist of:

- Merger reserve, which was established as a consequence of the Company becoming the single parent company of Royal Dutch and Shell Transport, and represented the difference between the cost of the investment in those companies and the nominal value of shares issued in exchange for those investments as required by the prevailing legislation at that time, section 131 of the Companies Act 1985.
- A second merger reserve, which was established as a consequence of the Company acquiring BG on February 15, 2016 and represented the difference between the fair value of shares issued in exchange for this investment and the nominal value of the shares as required by the prevailing legislation at that time, section 612 of the Companies Act 2006.
- Capital redemption reserve, which was established in connection with repurchases of shares of the Company.
- Share plan reserve, which represents the fair value of share-based compensation under the Company's equity-settled plans currently in issue.
- Share premium reserve, which represents the difference between the carrying value of loan notes converted to 4,827,974 Class A shares on January 6, 2006 and the nominal value of those shares.
