The availability of quality Iron ore in sufficient quantities remained a challenge, impacting the production and capacity utilization. One of Blast Furnaces at Vijayanagar works was under annual shutdown for 22 days and resumed operations on 26th April'13 and therefore the capacity utilization was lower at ~73% at Vijaynagar Works. Similarly one of Blast Furnaces at Salem unit was also under shutdown during April, 2013 which resumed production on 06/05/2013. Consequently, the production was lower during April 2013.
