

### Statement from the Board of Directors

We hereby confirm that the financial statements for the period from 1 October 2022 to 31 March 2023, to the best of our knowledge, have been prepared in accordance with IAS 34 – Interim Financial Reporting – and that the information in the accounts gives a true and fair view of the Group and of the Group’s assets, liabilities, financial position and overall results.

We also confirm that, to the best of our knowledge, the half-year report gives a true and fair view of the main events during the accounting period and their effect on the accounts for the second half year, as well as the principal risks and uncertainties, described below (which have remained unchanged from those disclosed in the Company Annual Report of FY22), facing the Company and the Group in the next accounting period.

This Statement was approved by the board of directors and signed on its behalf by:

A handwritten signature in blue ink, reading "Trond Williksen", is positioned above a horizontal line.

Trond Williksen

(Chief Executive Officer)

Date: 23 May 2023

## Principal risks and uncertainties

The Group's principal risks are categorised as either strategic, operational, financial or emerging risks and are developed through the Audit Committee and Board's review of the Group's risk register, performance of our businesses and analysis of emerging global trends.

### Strategic risks

Risks	Risk commentary	Risk mitigation and controls	Business Areas affected
Competition and loss of competitive advantage	<ul style="list-style-type: none"> <li>Falling behind competitors with the development and commercialisation of new, innovative products.</li> <li>Threat to market share and revenues.</li> </ul>	<ul style="list-style-type: none"> <li>Innovative development focus and strong pipeline of products.</li> <li>Intellectual Property ("IP") protection including patents.</li> <li>Strong customer relationships with key account structure.</li> </ul>	Advanced Nutrition, Health and Genetics
Reliance on continued success of existing products	<ul style="list-style-type: none"> <li>The Group is currently exposed to risk by limited diversity of revenue streams.</li> <li>Risks associated with legal costs of protecting Group IP.</li> <li>Group products require the holding of certain licences, accreditations or regulatory approvals that could be withdrawn.</li> <li>Failure to gain additional claims on the labels for certain Group products which could result in reduced revenue from such products.</li> </ul>	<ul style="list-style-type: none"> <li>Increasing number of products/ services from development pipeline is diversifying revenues.</li> <li>Strong Group legal team with dedicated IP expertise.</li> <li>Vigorous defence of own IP.</li> <li>High levels of employee competency and stringent processes related to regulatory affairs.</li> </ul>	Advanced Nutrition, Health and Genetics
Delivery of cross-Group synergies	<ul style="list-style-type: none"> <li>Risks associated with failure to fully realise operational synergies and cost benefits.</li> <li>Lower profitability and cash generation, and slower returns than anticipated.</li> <li>Risks on delivering the synergy within the timeline set.</li> </ul>	<ul style="list-style-type: none"> <li>EMT continues tracking progress of the Group strategy on a weekly basis.</li> <li>Extended-EMT assists with planning and managing key projects.</li> </ul>	Advanced Nutrition, Health and Genetics
New product and service commercialisation	<ul style="list-style-type: none"> <li>Risk that pipeline products may be delayed or fail technically before launch.</li> <li>The Group's strategy has a significant focus on new products and services and a material failure to deliver would be damaging.</li> <li>Risk inherent in timing and market penetration of new products and services.</li> </ul>	<ul style="list-style-type: none"> <li>Close dialogue with regulators.</li> <li>The innovation board (which includes the head of Group Innovation) monitors the R&amp;D projects across the Group.</li> <li>Experienced Group regulatory affairs team, commercial team and Marketing team.</li> <li>Close dialogue with customers regarding their product and service satisfaction to enable efficient and appropriate reaction to their feedback and needs.</li> </ul>	Advanced Nutrition, Health and Genetics

## Operational risks

Risks	Risk commentary	Risk mitigation and controls	Business Areas affected
Environmental risk and crisis management	<ul style="list-style-type: none"> <li>The nature of certain of the Group's operating activities exposes us to certain significant risks to the environment, such as incidents associated with releases of chemicals or hazardous substances when conducting our operations, which could result in liability, fines, risk to our product permissions and reputational damage.</li> <li>There is a risk that natural disasters could lead to damage to infrastructure, loss of resources, products or containment of hazardous substances.</li> <li>Our business activities could be disrupted if we do not respond, or are perceived not to respond, in an appropriate manner to any major crisis or if we are not able to restore or replace critical operational capacity.</li> </ul>	<ul style="list-style-type: none"> <li>We have implemented standards and requirements which govern key risk management activities such as inspection, maintenance, testing, business continuity and crisis response.</li> </ul>	Advanced Nutrition, Health and Genetics
Biological and climatic risks	<ul style="list-style-type: none"> <li>The Group is exposed to the risk of disease within the Group's own operations and disease in the market resulting in possible border closures.</li> <li>Sales of the Group's sea lice medicines and other relevant solutions such as CleanTreat® are affected by the degree of sea lice challenge in the environment, which is driven by sea temperatures and other biological factors.</li> </ul>	<ul style="list-style-type: none"> <li>The Group operates the highest levels of biosecurity.</li> <li>The Group holds genetic stock at multiple sites; increasingly sources from its own land-based salmon breeding facilities.</li> <li>The Group operates containment zones which mitigates the risk of border closures affecting its ability to import or export.</li> <li>The Group has placed increased focus on insuring its biological stock.</li> <li>The Group's product diversity across business areas offers some mitigation.</li> </ul>	Advanced Nutrition, Health and Genetics
Volatility of end markets (salmon, sea bass and shrimp markets) and market and regulatory trends	<ul style="list-style-type: none"> <li>Market fluctuations in shrimp production volumes and pricing, often influenced by disease, drive customer and food services demand for shrimp.</li> <li>Market and regulatory trends for tackling sea lice have an influence on customer demand for the Group's sea lice products.</li> </ul>	<ul style="list-style-type: none"> <li>The geographic diversity of the business area's customer base offers some mitigation.</li> <li>The Group's product diversity across business areas offers some mitigation.</li> </ul>	Advanced Nutrition, Health and Genetics
Threats to the supply chain	<ul style="list-style-type: none"> <li>Benchmark is reliant on a small number of key raw materials and suppliers for important products.</li> <li>The Group has R&amp;D and production sites which are important to its</li> </ul>	<ul style="list-style-type: none"> <li>Dual supplies of raw materials where possible.</li> <li>Supplies secured with contractual arrangements, and import authorisations in the process of being</li> </ul>	Advanced Nutrition, Genetics, Health
