Business & Operations Highlights:

Aurionpro's second quarter of Fiscal Year 2013-2014 was a positive one highlighted by continued growth and increased profitability based on improvements in operational efficiencies. Programs initiated in previous quarters to better shape the company around its most scalable and profitable businesses continued, and several milestones were achieved to help hone the company's focus. One such effort was the company's divestiture of its Capital Markets technologies business, E2E infotech.

The quarter was also punctuated by infrastructure and intellectual property investments in order to bring various software and services offerings to market most effectively. To that end, Aurionpro's Mumbai, India development center has achieved ISO 20000-1 and ISO 27001 certifications, ensuring consistent and repeatable delivery quality through world-class processes and operational controls.

Similar investments made across the company have been translating into consistent growth across all divisions. Business expansion in North America is particularly encouraging as deepening partnerships with world-class technology firms such as Oracle have significantly expanded Aurionpro's sales pipeline. Regional expansion in other geographies has also garnered a number of recent deals and a new client win in Southeast Asia is a showcase of such efforts. CKB, one of Indonesia's leading logistics providers, has selected Aurionpro's Supply Chain Management software, SCMProFit, and has recently gone live successfully with the product suite.

Reflecting on the performance of Aurionpro's second quarter, Samir Shah, Aurionpro's COO, commented, "The recent efforts placed on streamlining operational and delivery activities have proven effective, and improved profitability is now being demonstrated in conjunction with consistent revenue growth. The final phase of Aurionpro's corporate restructuring is in the process of being implemented, after which all efforts will be focused on accelerating growth while increasing profit margins."
