Dear Sir,

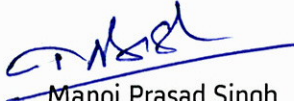

Sub : **Press Release - Alstom T&D India to renovate and modernise grid infrastructure of Bihar**

Please find enclosed herewith Press Release titled – “Alstom T&D India to renovate and modernise grid infrastructure of Bihar”.

Thanking you,

Yours faithfully,

For ALSTOM T&D India Limited

Manoj Prasad Singh
Company Secretary

Encl: As above

21 May 2014

Alstom T&D India to renovate and modernise grid infrastructure of Bihar

Alstom T&D India has secured an order worth INR 506.6 million (approximately €6 million), to renovate and modernise 132/33KV grid substations across various locations¹ for Bihar State Power Transmission Company Limited (BSPTCL). The project will strengthen the transmission system and enhance power evacuation capacity under India's 12th Five Year Plan.

Under this contract, Alstom T&D India will replace ageing and defective substation equipment with new, advanced technology including 132 kV and 33kV outdoor circuit breaker, isolator, lightning arrestors, relay control panels and more. The new equipment will strengthen the substations and hence, stabilise the transmission network in Bihar. Major equipment will be supplied from Alstom T&D India's various manufacturing facilities across the country.

Rathin Basu, Managing Director of Alstom T&D India said, *"Alstom is pleased to contribute to the optimisation of the electrical infrastructure for the state of Bihar. Our service experts use condition and life assessments to provide high quality, cost-efficient solutions for substation renovation, modernisation or extension."*

Bihar is one of the most rapidly growing states in India, and aims to invest significantly in the coming years to revamp the power sector in the state. The state government plans to replace the obsolete infrastructure, increasing power capacity and providing reliable and uninterrupted electricity to its population of approximately 110 million people.²

About Alstom

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. Alstom builds the fastest train and the highest capacity automated metro in the world, provides turnkey integrated power plant solutions and associated services for a wide variety of energy sources, including hydro, nuclear, gas, coal and wind, and it offers a wide range of solutions for power transmission, with a focus on smart grids. The Group employs 93,000 people in around 100 countries. It had sales of over €20 billion and booked €21.5 billion in orders in 2013/14.

¹ 9 different locations in Dehri, Bihar Sharif and Purnea Transmission Zones of BSPTCL will undergo renovation and modernisation

² As per the 2011 Census data

Alstom T&D India (globally known as Alstom Grid), is a market leader in the Indian power transmission sector. It has over 100 years of expertise in building the transmission infrastructure for the country. Alstom has a strong portfolio of products, solutions and services, comprising the entire range of transmission equipment up to Extra and Ultra High Voltages (765 kV and beyond) including air-insulated switchgear (AIS), locally manufactured power transformers and gas-insulated switchgear (GIS). It also provides power electronics solutions (HVDC, FACTS) to create super highways and offers highly advanced power management Smart Grid solutions for transmission and distribution including renewable energies integration. With over 3,500 employees and eight world class manufacturing units, Alstom T&D India is future ready to support the rapidly evolving transmission sector in India.
