Dear Sir,

Sub: **Press Release - Alstom T&D India to supply transformers for Neyveli Thermal Power Station**

Please find enclosed herewith Press Release titled – "Alstom T&D India to supply transformers for Neyveli Thermal Power Station".

Thanking you,

Yours faithfully,
For ALSTOM T&D India Limited

Manoj Prasad Singh
Company Secretary

Encl: As above

29 July 2015

Alstom T&D India to supply transformers for Neyveli Thermal Power Station

Alstom T&D India has been awarded once more a contract by Essar Projects India Limited worth close to €11 million (INR 800 million approx.) to supply transformers package for Neyveli New Thermal Power Project (NNTPP) located in the state of Tamil Nadu in India.

The 1000 MW greenfield Neyveli New Thermal Power Project (NNTPP), being developed by Neyveli Lignite Corporation Limited, will be the first lignite-fired 2X500 MW power plant in the country and major source of power to the energy deficient southern states.

Under the scope of the contract, Alstom will be engaged in designing, engineering, manufacturing, testing, installation and commissioning of a set of generator transformers, inter-connecting transformers, station transformers up to 200MVA, 80 MVAR reactor along with other associated equipment. All the equipment will be engineered and manufactured in Alstom's world class facilities in India.

Rathin Basu, Managing Director, Alstom T&D India said: *"The Neyveli project is a significant project considering the crucial role it will play in improving the power situation in the southern region of the country. We are pleased that Alstom's high performing transformers will be installed at the lignite fueled power plant for the effective evacuation of the power. We have achieved the remarkable feat of being the only Indian company to have over 4 years' experience in manufacturing of 765 kV transformers and reactors with localised technology and also supply of more than 200 units of 765 kV transformers and shunt reactors. Our extensive manufacturing footprint, resources and capabilities will be mobilized to make this project a success"*.

Alstom T&D India's green field facility at Vadodara was inaugurated in March 2009. This facility has since ramped up production capabilities to supply transformers and shunt reactors to various clients like Power Grid, state utilities and private generating companies.

In the past, Alstom T&D India has worked with Essar on various projects like e-BOP package of 2x600 MW Salaya, 2x600 MW Mahan, 4x30 MW Paradeep and various switchyard jobs at EPTCL Hazira to name a few.

About Alstom

Alstom is a global leader in the world of power generation, power transmission and rail infrastructure and sets the benchmark for innovative and environmentally friendly technologies. Alstom builds the fastest train and the highest capacity automated metro in the world, provides turnkey integrated power plant solutions and associated services for a wide variety of energy sources, including hydro, nuclear, gas, coal

and wind, and it offers a wide range of solutions for power transmission, with a focus on smart grids. The Group employs 88,000 people in around 100 countries.

Alstom T&D India (globally known as Alstom Grid), is a market leader in the Indian power transmission sector. It has over 100 years of expertise in building the transmission infrastructure for the country. Alstom has a strong portfolio of products, solutions and services, comprising the entire range of transmission equipment up to Extra and Ultra High Voltages (765 kV and beyond) including air-insulated switchgear (AIS) and locally manufactured power transformers and gas-insulated switchgear (GIS). It also provides power electronics solutions (HVDC, FACTS) to create super highways and offers highly advanced power management Smart Grid solutions for transmission and distribution including renewable energies integration. With around 3300 employees and six world class manufacturing sites, Alstom T&D India is future ready to support the rapidly evolving transmission sector in India.
