Dear Sirs,

Tata Power Solar commissions world's largest rooftop solar for RSSB-EES

Tata Power Solar India Limited, India's largest integrated solar player, has successfully commissioned a 12 MW solar rooftop project for R.S.S.B. EDUCATIONAL & ENVIRONMENTAL SOCIETY (RSSB-EES). Built across 8 sheltered venues in a single premise at the Radha Soami Satsang Beas - Dera Baba Jaimal Singh in Amritsar, the project is the largest solar rooftop plant in the world, set up in a single phase. The plant will produce more than 150 lakh units of power annually and offset over 19000 tonnes of carbon emissions every year.

The rooftop project is set up under the Punjab Government's grid connected rooftop solar projects scheme, wherein power from the plant will be fed to the grid. In April 2014, same organisation had set up a similar 7.524 MWp solar plant on a single rooftop.

The Press Release to be issued by the Company is attached for your ready reference.

Yours faithfully,
For The Tata Power Company Limited

(H. M. Mistry)
Company Secretary

Encl.

Tata Power Solar commissions world's largest rooftop solar for RSSB-EES

Roof Top Solar generating a cumulative capacity of 12 MW at Punjab

Bengaluru, India; 10 December, 2015: Tata Power Solar, India's largest integrated solar player, has successfully commissioned a 12 MW solar rooftop project for R.S.S.B. EDUCATIONAL & ENVIRONMENTAL SOCIETY (RSSB-EES). Built across 8 sheltered venues in a single premise at the Radha Soami Satsang Beas - Dera Baba Jaimal Singh in Amritsar, the project is the largest solar rooftop plant in the world, set up in a single phase. The plant will produce more than 150 lakh units of power annually and offset over 19000 tonnes of carbon emissions every year.

RSSB is a non-profit philosophical organization with its headquarters in Beas, Punjab. It is based on the spiritual teachings of all religions. RSSB-EES is a charitable organization based at Dera Baba Jaimal Singh, which operates multiple charitable initiatives in the field of environment and education. The rooftop project is set up under the Punjab Government's grid connected rooftop solar projects scheme, wherein power from the plant will be fed to the grid. In April 2014, same organisation had set up a similar 7.524 MWp solar plant on a single rooftop.

Speaking on the project, Mr. Ashish Khanna, CEO & ED, Tata Power Solar Systems Ltd, said, "We are really pleased and proud to have commissioned world's largest rooftop solar plant for RSSB-EES. This has been commissioned in a single phase on multiple roofs covering an area of 1.621 million sq.ft with varying roof profiles, roof types and truss frames. With world-class safety being our ethos, the project was commissioned on schedule with highest quality standards by systematic and planned engineering and executed in a safe manner with zero-incidents. This is credible especially when our teams were working on heights with delicate roof material and have achieved this without disrupting the sanctity and utilization of the concerned buildings. The vision shown by RSSB-EES leaders to develop this type of a plant is admirable. This not only highlights their green & environmental focus but also showcases the potential of rooftops in building energy independence."

Tata Power Solar was ranked #1 in the solar rooftop market in the recently published *India Solar Rooftop Map 2016* report by BRIDGE TO INDIA, a leading Cleantech consulting firm. Apart from the 12 MW project with RSSB-EES, Tata Power Solar has other operating Roof Tops of over 65 MW of distributed generation.

for immediate use

PRESS RELEASE**About Tata Power Solar:**

Tata Power Solar, wholly owned subsidiary of Tata Power has 25 years of deep domain expertise and is one of the pioneering solar manufacturers in the world and India's largest specialised EPC player. Founded in 1989, the company was originally formed as a joint venture between Tata Power and British Petroleum Solar (BP Solar). As a pioneer and market leader in the solar space, headquartered in Bangalore, Tata Power Solar now operates independently as a wholly owned subsidiary of Tata Power.

As one of the largest solar manufacturers in India, Tata Power Solar operates world-class manufacturing unit in Bangalore, with a production capacity of 200 MW of modules and 180 MW of cells. It has completed more than 185+ MW of ground-mount utility scale and 65 MW of rooftop and distributed generation projects across the country till date. It also offers a diverse line of solar solutions for both urban and rural markets – these include rooftop solutions, solar pumps and power packs among others. Tata Power Solar is committed to enabling solar everywhere and aims to provide energy access to millions of people across the country via its integrated solar solutions. About Tata Power:

Tata Power is India's largest integrated power company with a growing international presence. The Company together with its subsidiaries and jointly controlled entities has an installed gross generation capacity of [8669] MW and a presence in all the segments of the power sector viz. Fuel Security and Logistics, Generation (thermal, hydro, solar and wind), Transmission, Distribution and Trading. It has successful public-private partnerships in Generation, Transmission and Distribution in India namely "Tata Power Delhi Distribution Limited" with Delhi Vidyut Board for distribution in North Delhi, 'Powerlinks Transmission Ltd.' with Power Grid Corporation of India Ltd. for evacuation of Power from Tala hydro plant in Bhutan to Delhi and 'Maithon Power Ltd.' with Damodar Valley Corporation for a 1050 MW Mega Power Project at Jharkhand. Tata Power has developed the country's first 4000 MW Ultra Mega Power Project at Mundra (Gujarat) based on super-critical technology. It is also one of the largest renewable energy players in India. Its international presence includes strategic investments in Indonesia through a 30% stake in the leading coal company PT Kaltim Prima Coal (KPC), 26% stake in mines at PT Baramulti Suksessarana Tbk ("BSSR") and a geothermal project; in Singapore through Trust Energy Resources to securitise coal supply and the shipping of coal for its thermal power generation operations; in South Africa through a joint venture called 'Cennerg' to develop projects in South Africa, Botswana and Namibia; in Australia through investments in enhanced geothermal and clean coal technologies and in Bhutan through a hydro project in partnership with The Royal Government of Bhutan. With its track record of technology leadership, project execution excellence, world class safety processes, customer care and driving green initiatives, Tata Power is poised for a multi-fold growth and committed to 'lighting up lives' for generations to come.
