TCS and U.S. Chamber of Commerce Foundation Assemble Leaders to Discuss Digital Technology's Impact on the Future of Philanthropy

Tata Consultancy Services and Other Experts Discuss How to Incorporate AI, Automation, Blockchain, and Cloud Technologies to Solve Problems Affecting Health, Education and the Environment

WASHINGTON DC | MUMBAI, May 24, 2018: Tata Consultancy Services (TCS), (BSE: 532540, NSE: TCS) a leading global IT services, consulting and business solutions organization, in partnership with the U.S. Chamber of Commerce Foundation (USCCF), is convening today for *Digital Empowers: Accelerating Innovation for Business and Social Good* at the Chamber of Commerce in Washington D.C. The forum connects leaders across business, technology, government, policy, and citizenship areas with on-the-ground partners who are shaping the future of innovation and social impact to discuss with nonprofit leaders how technology can solve pressing societal challenges.

Every day, non-profit organizations across the U.S. receive billions in contributions, supporting causes from education, health and the environment, to social wellbeing and arts and humanities. These organizations face challenges, including governance, reporting, impact, and scale. Similar to how digital technology is helping enterprises grow and transform, it can play a pivotal role in alleviating these societal issues and provide an opportunity for social innovation.

The forum's objective is to increase awareness and understanding around the impact of advancements in technology. Speakers from across industries will share how their organizations leverage new technology and digital innovations, including blockchain, design thinking, virtual reality, robotics, and cloud analytics to increase access and equity to individuals and communities.

"In the Business 4.0 era, we have the unique opportunity to harness the abundance of digital technologies to leapfrog innovation for business and social good," said Balaji Ganapathy, Head of Workforce Effectiveness, TCS. "Having leaders from across sectors involved helps to develop a shared vision, increases awareness, advocacy and public-private partnerships, and creates a paradigm shift towards creating exponential value for our fellow citizens and the community."

"At the most basic level—businesses are problem solvers. From providing invaluable services to innovating new products, the private sector—by design—finds opportunity and drives solutions," said Marc DeCoursey, Senior Vice President, U.S. Chamber Foundation. "So it only makes sense that leading businesses are also leveraging technology to solve some of the greatest social issues of our time."

The event's program will discuss ways to develop partnerships, funding opportunities and human and technology capital. Featured speakers include Surya Kant, President of North America, UK and Europe at Tata Consultancy Services; Kevin Brault, Principal and Federal Health Care Sector Leader at Deloitte & Touche LLP; Dr. Kingsley Fregne, Group Leader of Robotics & Intelligent systems, Advanced Technology Laboratories at Lockheed Martin; Denise Spell, Chief of Operations and Engineering at the Field Innovation Team; and Jeff Weld, Ph.D., Senior Policy Advisor and Assistant Director for STEM Education at the White House Office of Science and Technology Policy. TCS and USCCF will also publish a report defining the strategies organizations can utilize to benefit from advanced technology.

For immediate use **PRESS RELEASE****About Tata Consultancy Services Ltd. (TCS)**
