Total Creates a Digital Innovation Center in India in Partnership with Tata Consultancy Services

PARIS | MUMBAI, July 17, 2018: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS), a leading global IT services, consulting and business solutions organization, has today signed a partnership agreement with Total, a global integrated energy producer and provider, to create a digital innovation center in India.

Based in Pune in the state of Maharashtra, the center will explore disruptive technologies and solutions.

"For a large industrial group like Total, it is essential to always stay ahead of these topics," said Marie-Noëlle Semeria, Senior Vice President and Group Chief Technology Officer at Total. "After having integrated digital solutions within the Group, we now want to invent those of tomorrow by combining Total's know-how with the agility of TCS."

The partnership will initially focus on refining. The intensive use of digital technologies will help drive the various building blocks of refining (production units, processes, and the supply chain and petroleum product markets) to improve refinery performance. Real-time data analytics, the Internet of Things, automation, artificial intelligence and agile methodology will be used to improve industrial efficiency, energy performance and availability rates.

"With the digital innovation center, we are positioning ourselves as a pioneer working to develop a smart, connected refinery that will allow us to improve our industrial competitiveness. We want to invent the Refinery 4.0," said Bernard Pinatel, President Refining & Chemicals at Total.

Based on the TCS concept of "entrepreneurship-in-residence," Total will work with TCS' technology and domains experts. TCS will also bring to Total its network, its structured co-innovation approach and its unique Business 4.0 cooperation framework.

"The energy and resources sector is one of TCS' fastest growing business units. We are delighted to sign this strategic digital innovation partnership with Total for which we will leverage our Business 4.0 framework, with a focus on agile, intelligent automation, internet of things, analytics and cloud-based solutions," said Debashis Ghosh, President of Energy, Resources and EPC Business at TCS.

About Tata Consultancy Services Ltd (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for the last fifty years. TCS offers a consulting-led, cognitive powered, integrated portfolio of IT, Business & Technology Services, and engineering. This is delivered through its unique Location Independent Agile delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 400,000 of the world's best-trained consultants in 46 countries. The company generated consolidated revenues of US \$19.09 billion for year ended March 31, 2018 and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award winning work with communities across the world have earned it a place in leading sustainability indices such as the Dow Jones Sustainability Index (DJSI), MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
