Dear Sirs

In continuation of our letters dated 14th November, 2013 and 16th December, 2013 wherein we have informed that Continuous Polymerisation Unit - Polyester (CPU-Polyester) at Bharuch Site was stopped on 12th November, 2013 for preventive maintenance after a gap of four years. Consequently, Continuous Polyester Spinning Lines were also stopped. During the course of preventive maintenance, the Company has also taken up modification of Polyester Spinning Lines to improve flexibility in manufacturing process. The Company has decided to carry out some more modification work on Polyester Spinning Lines. As a result, shut down of CPU and Continuous Polyester Spinning Lines will remain for some more time of about 3-4 months. The stoppage of CPU and Continuous Polyester Spinning Lines does not have any adverse impact on overall profitability of the Company due to severely squeezed margins in polyester yarns.

This is for your information.

Thanking you

Yours faithfully
For CENTURY ENKA LIMITED

(C.B. Gagrani)
Company Secretary
