OFFICIAL RELEASE

Amid growing demand Uflex develops Melamine Free, Acrylic Coated BOPET Film

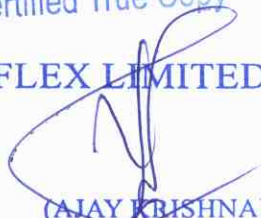

21 September 2016, Poland (Europe): Melamine, a synthetic triazine compound and an organic base is known to impart scratch, wear and puncture resistance to packaging films thereby enhancing the strength of the ensuing laminate structure, but the cons of the compound over weigh its pros. The contamination of pet food with melamine and its analogue cyanuric acid led to kidney failure in thousands of dogs and cats in North America in 2007 drawing much flak. A year later in 2008, melamine again made headlines for wrong reasons- this time detected in powdered milk to make infant formula, the compound was associated with kidney disease in babies.

Amid growing clamour from western food and beverages brands for melamine free packaging, Uflex Limited, India's largest multinational flexible packaging materials and Solution Company at its Film Manufacturing Plant in Poland has developed Grade '**F-AMF**'; Melamine Free Acrylic Coated Bi-axially Oriented Polyethylene Terephthalate (BOPET) clear transparent film that is finding extensive use in conversion, printing, hot fill, retort, pasteurisation and sterilisation among other applications.

The trials that were conducted at Flex Films Europa Sp. z.o.o. (Poland) have yielded excellent results in terms of nil melamine content, good printability and enhanced lamination bond. The film exhibits good transparency and clarity along with excellent machinability and handling properties. One side primer coating provides emphatic adhesion with inks and adhesives. The acrylic coated surface is also recommended for surface printing. The other side of film surface can be corona treated for value addition. The film possesses good mechanical, surface & thermal properties and ensuring excellent processability. This film has been specially developed for FFS machines.

The films **FLEXPET™** and **FLEXMETPROTECT™ (Grade F-AMF)** are manufactured with monomers/starting substances listed in commission regulation (EU) 10/2011 relating to plastic materials and articles intended to come in contact with foodstuffs. All additives used are listed in the plastic regulation (EU) 10/2011. The additives also comply with the BFR (German federal Institute for Risk Assessment, previously known as BgVV & BGA) Recommendation XVII, Polyterephthalic acid diolesters.

Upon successfully developing the Melamine Free Acrylic Coated Bi-axially Oriented Polyethylene Terephthalate (BOPET) film, Mr. Pramod Sirsamkar, President – Technical & New Product Development (Films) at Uflex Limited said, “Looking into the growing consciousness towards health, this Film has been particularly developed amid increasing demand from our customers globally.”

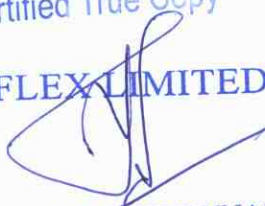

Mr. Ashok Chaturvedi, Chairman & Managing Director, Uflex Limited expressing joy on this development said, **“Melamine Free Acrylic Coated Bi-axially Oriented Polyethylene Terephthalate (BOPET) film is a testament to Uflex’s unwavering commitment towards consumer safety and customer satisfaction across the globe. Additionally this film also exhibits excellent transparency, gloss and printability making it an absolute delight for the converters. I congratulate my R&D team at this success.”**

About Uflex

Uflex is India’s largest end-to-end flexible packaging company and an emerging global player. Since its inception back in 1983, Uflex has grown from strength to strength to evolve as a truly Indian Multinational with consumers spread across the world. Uflex today has state-of-the-art packaging facilities at multiple locations in India with installed capacity of around 100,000 TPA and has packaging film manufacturing facilities in India, UAE, Mexico Egypt, Poland and USA with cumulative installed capacity in excess of 337,000 TPA.

All Uflex plants are accredited with ISO 9001, 14001, HACCP & BRC certifications. Uflex caters to markets spanning across the globe in over 140 countries like USA, Canada, South American countries, UK and other European Countries, Russia, South Africa, CIS, Asian and African nations. Integrated within its core business profile are allied businesses like Engineering, Cylinders, Holography and Chemicals which further give Uflex a superior edge above competition.

Uflex Limited is also a part of the D&B Global Database and winner of various prestigious national and international awards for its products’ excellence. Uflex offers technologically superior packaging solutions for a wide variety of products such as snack foods, candy and confectionery, sugar, rice & other cereals, beverages, tea & coffee, dessert mixes, noodles, wheat flour, soaps and detergents, shampoos & conditioners, vegetable oil, spices, marinates & pastes, cheese & dairy products, frozen food, sea food, meat, anti-fog, pet food, pharmaceuticals, contraceptives, garden fertilizers and plant nutrients, motor oil and lubricants, automotive and engineering components etc.
