Under the Proposed Transaction, TTML equity shareholders would be issued equity shares of BAL ('Share Entitlement Ratio').

For the aforesaid purpose, BAL and TTML have respectively appointed WCC and SRBC to prepare a report (the 'Report') on the Share Entitlement Ratio to be placed before the Board of Directors of the Companies.

The Valuers have been appointed separately and have worked independently in their analysis. WCC owns responsibility only to BAL and SRBC owns responsibility only to TTML.

The Valuers have received same information and clarifications from the Companies. For recommending the Share Entitlement Ratio, the Valuers have independently arrived at different values. However, to arrive at the consensus on the Share Entitlement Ratio, appropriate discussions, averaging and rounding off in the values arrived at by the Valuers have been done.

We have considered facts made known (past or future) to us till the date of our Report.

This Report is our deliverable in respect of our recommendation of Share Entitlement Ratio for the purpose of the Proposed Transaction.

The Management has informed us that there would not be any material change in the equity share capital of TTML and BAL till the closing of the Proposed Transaction, except to the extent of Employee Stock Options Schemes (ESOPs) of BAL.

This Report is subject to the scope, assumptions, exclusions, limitations and disclaimers detailed hereinafter. As such, the Report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to therein.

APPROACH - BASIS OF PROPOSED TRANSACTION

We understand from the Management that the proposed Scheme of Arrangement contemplates the demerger of the CMB of TTML to BAL pursuant to sections 230 to 232 of the Companies Act, 2013. Arriving at the Share Entitlement Ratio for the proposed demerger of the CMB of TTML into BAL would require determining the value of the CMB of TTML relative to value of equity shares of BAL. These values are to be determined independently without considering the current Proposed Transaction.

There are several commonly used and accepted methods for determining the value of CMB of TTML and BAL, which have been considered in the present case, to the extent relevant and applicable, including:

1. Market Price method
2. Comparable Companies Multiples method
3. Discounted Cash Flows method
4. Net Asset Value method

It should be understood that the valuation of any business / company or its assets is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In addition, this valuation will fluctuate with changes in prevailing market conditions, the conditions and prospects, financial and otherwise, of the companies, and other factors which generally influence the valuation of business / companies and their assets.

The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, in an independent and bona fide manner, based on our previous experience of assignments of a similar nature.

Market Price (MP) Method

The market price of an equity share as quoted on a stock exchange is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares. But there could be situations where the value of the share as quoted on the stock market would not be regarded as a proper index of the fair value of the share especially where the market values are fluctuating in a volatile capital market or when market prices do not seem to be reflective of financial performance. Further, in the case of a demerger, where there is a question of evaluating the shares of one company against those of another, the volume of transactions and the number of shares available for trading on the stock exchange over a reasonable period would have to be of a comparable standard.

In the present case, the shares of BAL are listed on BSE and NSE and there are regular transactions in their equity shares with reasonable volumes. In these circumstances, the volume

Recommendation of share entitlement ratio for the proposed demerger of the CMB of TTML into BAL

weighted average share price observed on NSE for BAL over a reasonable period has been considered for determining the value of BAL under the market price methodology.

For TTML, since the CMB is only one of the many businesses, we have not used the market price method. Further, it would be difficult to attribute value to CMB from the total Market Capitalisation of TTML.

Comparable Companies' Market/Transaction Multiple (CCM) method

Under this method, value of the company is arrived at by using multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies and transaction valuations of listed or unlisted comparable companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

We identified listed comparable companies and available transactions, based on business of TTML and thereafter adjusted the selected multiples based on size, growth, profitability and the circles in which TTML operates.

Considering that BAL is well traded, we did not apply CCM method for arriving at per share value of BAL.

Discounted Cash Flows (DCF) Method

Under the DCF method the projected free cash flows to the firm are discounted at the weighted average cost of capital. The sum of the discounted value of such free cash flows is the value of the firm.

Using the DCF analysis involves determining the following:

Estimating future free cash flows:

Free cash flows are the cash flows expected to be generated by the company that are available to all providers of the company's capital – both debt and equity.

Appropriate discount rate to be applied to cash flows i.e. the cost of capital:

This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to the total capital of the company. The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

We have not been provided with mid-term/long term forecasts by TTML. TTML management informed us that they could not prepare the same considering uncertainties surrounding the continuation of the business. Hence, we have not considered DCF method for valuation purpose.

Recommendation of share entitlement ratio for the proposed demerger of the CMB of TTML into BAL

Considering that BAL is well traded, we did not apply the DCF method for arriving at per share value of BAL.

Net Asset Value (NAV) Methodology

The asset based valuation technique is based on the value of the underlying net assets of the business, either on a book value basis or realizable value basis or replacement cost basis.

In case of CMB of TTML, a large portion of assets in the books is represented by purchased telecom spectrum. The Management has informed us that the 30 September 2017 financials of TTML (prepared although yet to be approved by the Board) are expected to have significant impairment write downs for CMB assets including spectrum.

According to us, the spectrum price benchmarks for 2016 auctions have limited relevance now due to the following factors:

- Unsold spectrum in the auctions
- Reduction in number of players due to
 - Consolidation (eg. Idea-Vodafone, Bharti-Telenor)
 - Possible discontinuation of business (eg. Reliance Communication, Aircel)
- Increase in spectrum holdings due to consolidation and asset purchases (eg. Tikona-Bharti)

Additionally, telecom sector is moving towards 4G making 3G bands non-lucrative. TTML did not have any 4G spectrum and management of TTML informed us that they had already considered all possible strategic options for CMB. As per management of TTML, considering limited scope of meaningful revival of profitability, there were no other realistic options available to them.

Considering the uncertainties around possible sale/pricing of individual assets in this situation and consequential costs/liabilities, we believe estimation of realizable value of assets would not be realistically possible with sufficient degree of objectivity.

MAJOR FACTORS THAT WERE TAKEN INTO ACCOUNT DURING THE VALUATION

- CMB of TTML has witnessed decline in revenues and has negative EBITDA margins.
- Challenging competitive environment which limited the scope of meaningful revival of profitability of CMB of TTML
- TTML has limited visibility on the continuity of the operations of the CMB and therefore has not been able to provide mid/long term cash flow forecasts.
- The equity shares of BAL are frequently traded on both the stock exchanges, BSE & NSE in India.

BASIS OF PROPOSED TRANSACTION

The basis of valuation would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove.

CMB of TTML has been valued using CCM method and BAL using MP method.

In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion by the Valuer and judgment taking into accounts all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiment, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share. This concept is also recognised in judicial decisions.

In light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend that the Share Entitlement Ratio for the Proposed Transaction should be anywhere in the following range:

- Lower Range: 1 equity share of BAL of INR 5 each fully paid up for every 5,964 shares of TTML of INR 10 each fully paid up (refer Table A below)
- Upper Range: 1 equity share of BAL of INR 5 each fully paid up for every 1,575 shares of TTML of INR 10 each fully paid up (refer Table B below)

This is based on the overlapping equity ranges for CMB of TTML as per the Valuers' workings of INR 0.09 per share to INR 0.33 per share.

Please note that we have not considered the issuance of Redeemable Preference Shares ("RPS") by BAL to the RPS holders in TTML for the estimation of the Share Entitlement Ratio.

Meaning of Internal Financial Controls Over Financial Reporting

6. A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

7. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Bharti Airtel Limited ("the Company") as of March 31, 2018 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2018, based on the criteria for internal control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Order under Section 31 (1) of the Competition Act, 2002

1. On 16.10.2017, the Competition Commission of India ("**Commission**") received a notice under sub-section (2) of Section 6 of the Competition Act, 2002 ("**Act**"), given by Bharti Airtel Limited ("**Airtel**").
2. The proposed combination envisages acquisition of 100 percent of the consumer mobile business currently run by Tata Teleservices Limited ("**TTSL**") and Tata Teleservices (Maharashtra) Limited ("**TTML**") ("**Tata CMB**") by Airtel ("**Proposed Combination**"). The Notice was filed with the Commission pursuant to execution of a binding term sheet, by and between Airtel, TTSL, TTML and Tata Sons Limited on 12.10.2017 ("**Acquisition Agreement**"). Airtel submitted certain additional information/clarification(s) vide emails dated 26.10.2017, 03.11.2017 and 07.11.2017 and 10.11.2017.

COMPETITION COMMISSION OF INDIA
(Combination Registration No. C-2017/10/531)

3. Airtel, a part of Bharti Enterprises group (“**Bharti Group**”), is a publicly traded global telecommunications corporation with operations in 17 countries across Asia and Africa. It is engaged in provision of various B2C and B2B telecommunication services. B2C services include, *inter-alia*, retail mobile telephony services, wireline services etc. and B2B services include, *inter-alia*, National Long Distance Services (“**NLD**”), International Long Distance Services (“**ILD**”) etc. Airtel provides mobile telephony services in all telecom circles in India.
4. TTSL, a part of Tata Group, is engaged in the business of wired telephone service, wireless telephone service and Internet and broadband services in a number of telecom circles in India. TTML is an associate company of TTSL and is a telecom service provider in Maharashtra.
5. The Commission observed that the Proposed Combination envisaged acquisition of consumer mobile business or retail mobile telephony business of Tata companies by Airtel.
6. The Commission observed that retail mobile telephony services can be classified on the basis of various criteria such as type of service, type of customer and type of access equipment. However, considering the fact that the Proposed Combination is not likely to result in appreciable adverse effect on competition, for the reasons contained in the ensuing paragraphs, exact delineation of the relevant product market is left open.
7. As regards relevant geographic market, the Commission decided that the same may be defined in terms of each overlapping circle, i.e., Karnataka, Andhra Pradesh, Tamil Nadu, Madhya Pradesh, UP (East), UP (West), Punjab, Haryana, Gujarat, Delhi, Kolkata, Kerala, Odisha, Bihar, Rajasthan, West Bengal, Himachal Pradesh, Mumbai and Maharashtra.

Assessment in terms of factors contained in Section 20(4) of the Act

Concentration analysis

8. The Commission noted that the issue of market shares and concentration is also dealt in the guidelines for transfer/merger of service licences on compromises, arrangement and

amalgamation of companies, issued by Ministry of Communications and Information Technology, Government of India in 2014 (“**DoT Merger Guidelines**”). As per the DoT Merger Guidelines, in case of merger or acquisition or amalgamation proposals that result in market share in any service area exceeding 50 percent, the resultant entity should reduce its market shares to 50 percent within a period of one year from the date of approval of merger or acquisition or amalgamation (“**Market Share Caps**”). As regards holding of spectrum by a TSP, the Commission noted that the spectrum holding in a licensed service area is subject to cap of 25 percent of the total spectrum assigned and 50 percent of the spectrum assigned in a specific band. (“**Spectrum Caps**”). The Parties have submitted that they will comply with the Spectrum Caps and the Market Share Caps. However, in this regard, the Commission observed that assessment of a proposed combination would need to be based, independently of such guidelines, on factors as contained in Section 20(4) of the Act.

9. The Commission, considering revenue market shares¹, observed that market is highly concentrated with pre-combination HHIs exceeding 2000 in all telecom circles (except Haryana, Mumbai and Punjab where HHIs are more than 1800). The position of the Parties in various telecom circles can be tabulated as under:

Table 1: Revenue based market share of the Parties in overlapping circles

Combined Market Share	Number and name of Circles
Less than 20%	1 [Kerala]
20% < 30%	1 [Gujarat]
30%<40%	9 [Tamil Nadu; Haryana; UP (East); UP (West); Madhya Pradesh; Maharashtra; Mumbai; West Bengal; Kolkata]
40% < 50%	3 [Delhi; Punjab; Rajasthan]
More than 50%	5 [Himachal Pradesh; Karnataka; Andhra Pradesh; Bihar; Odisha]

10. As a next step in competition assessment, the Commission examined the impact of the Proposed Combination on the level of concentration as reflected in incremental HHI. Such

¹ The market shares, incremental market shares, HHIs and incremental HHIs are calculated on the basis of market shares in terms of gross revenue of the Parties and other operators in overall retail mobile telephony services market for the quarter ending 30.06.2017.

COMPETITION COMMISSION OF INDIA
(Combination Registration No. C-2017/10/531)

examination was undertaken for 17 telecom circles wherein the combined market share is estimated to be more than 30 percent. The Commission observed that the change in HHI is significant in respect of all the telecom circles (except West Bengal and Himachal Pradesh), ranging from around 168 in Rajasthan to around 958 in Karnataka.

11. The Commission noted that the spectrum holding of the Acquirer may exceed Spectrum Caps in terms of total spectrum assigned in Bihar telecom circle. However, based on examination of spectrum holding of different TSPs in all overlapping telecom circles, the Commission noted that the spectrum seems to be fairly distributed between the various TSPs. Further, the Commission also noted that there is a significant quantity of unsold spectrum in each telecom circle which may also obviate any access issues.

Likelihood that the combination would result in the removal of a vigorous and effective competitor or competitors in the market

12. The Commission assessed as to how Tata CMB is placed in terms of closeness of competition to Airtel and its overall effectiveness as a competitor. In this regard, the Commission noted the following:
 - i. Tata CMB has a limited product offering. It is engaged in providing 2G and 3G services. Tata CMB does not include 4G services and as submitted, it does not intend to invest in spectrum and network for introducing 4G services;
 - ii. The Diversion Ratio from Airtel to Tata CMB is negligible. As regards diversion from Tata CMB to Airtel, it is noted that though there is significant diversion, Airtel is not the only preferred operator and there is equally significant diversion to Vodafone and Idea; and
 - iii. The market share of Tata CMB has been steadily declining in almost all the overlapping telecom circles. The same is also reflected in the revenue and EBIDTA of Tata CMB. [...]

The aforesaid analysis reveal that Tata CMB neither seems to be a close competitor of Airtel nor an effective competitor going forward.

COMPETITION COMMISSION OF INDIA
(Combination Registration No. C-2017/10/531)

Buyer Power

13. The Commission in its earlier decision in combination of Idea and Vodafone's telecommunication business² had observed that there is significant constraint on the TSPs from the buyer side in the mobile retail telephony services market. The observation was based on factors such as multi-SIMing, ease of substitution due to option of mobile number portability and significant churn rates. The Commission noted that the same assessment also applies in the instant case.

Extent of competition likely to be maintained after the Proposed Combination

14. The retail mobile telephony services market, post the Proposed Combination would have four private TSPs including the Aircel, RJio, Vodafone-Idea and the Acquirer and one state owned TSP i.e., BSNL/MTNL in all telecom circles.
15. The Commission examined the size and resources of the competitors and is of the opinion that they are in a position to exercise adequate competitive constraints on the Acquirer and to eliminate any likelihood of appreciable adverse effect on competition, if any resulting from the Proposed Combination.

Level of combination in the market

16. The Commission observed that telecom sector is witnessing a stage of consolidation and therefore, it become important to also assess the impact of reduction in number of competitors on the competition. In this regard, the Commission is of the opinion that keeping in view its observations on the effectiveness of Tata CMB as a competitor going forward, the Proposed Combination is not likely to cause a significant change in competition dynamics.
17. Considering the aforesaid factors in totality, the Commission is of the opinion that the Proposed Combination is not likely to result in substantial change in competition dynamics

in retail mobile telephony services in any of the overlapping telecom circles and accordingly does not raise unilateral or coordinated effects concerns.

18. Considering the facts on record, details provided in the Notice given under Section 6(2) of the Act and assessment of the Proposed Combination on the basis of factors stated in Section 20(4) of the Act, the Commission is of the opinion that the Proposed Combination is not likely to have an appreciable adverse effect on competition in India and therefore, hereby approves the same under Section 31(1) of the Act. This order is, however, issued without prejudice to the proceedings under Section 43A of the Act.
19. This order shall stand revoked if, at any time, the information provided by the Acquirer is found to be incorrect.
20. The information provided by the Acquirer is confidential at this stage in terms of and subject to provisions of Section 57 of the Act.
21. The Secretary is directed to communicate to the Acquirer accordingly.
