The stage of completion of the project is determined by the proportion that contract costs incurred for shipments made upto the balance sheet date bear to the estimated contract costs for total shipments for the contracts. Had the Company continued to use the earlier policy, the revenue for the year would have been higher by ₹ 271 lakhs, the charge for provision for future loss would have been lower by ₹ 449 lakhs and profit before tax for the current year would have been lower by ₹ 178 lakhs. The impact on account of change in accounting policy is recognised in the opening reserves on the date of transition and consequential impact is recognised in the Statement of Profit and Loss.
