Power sector gives boost to coal offtakes at 166.3 MT

Coal India still saddled with huge pit headstocks

FE BUREAU
Kolkata, August 3

EVEN AS THE country's appetite for coal is on the rise with offtake from the coal-fired plants rising sharply to 166.3 million tonne during April-July this fiscal against 127.2 MT during the same period last fiscal, Coal India (CIL) is still saddled with a buffer of 55.8 MT stock despite its marketing efforts reduced pit headstocks by 43.4 MT at the end of July this year. The company achieved the highest ever coal off-take, production and overburden removal (OBR), for July of any year since the company's inception 46 years ago, posting growths of 16.7%, 14.1% and 3.6% respectively.

In terms of supplies to the power generators, CIL's coal supply accounted for about three-fourths of the country's total coal-based power generation of 82.119 billion units during July including generation through imported coal. "If the generation through only domestic coal is

CIL is saddled with a buffer of 55.8 MT stock despite its marketing efforts reduced pit headstocks by 43.4 MT at the end of July this year

considered, then CIL's share would be even higher," a CIL executive said adding the country's power consumption is gradually inching towards pre-pandemic levels.

The company clocked a 30.7% growth in supplies to the power sector during the April-July period with a whopping 39 million tonne (MT) increase, over the same period year ago. Off-take from the power sector for July this year at 39 MTs, registered a 17% growth compared

to 33.3 MTs during July last year. CIL's total coal off-take also increased by 46.7 MTs during the first four months of the fiscal in progress, registering a strong 28.4% growth. The total volume of coal supplied was 210.8 MTs during April-July this fiscal compared to 164 MTs of the corresponding year-ago period.

The PSU coal miner came back strongly with an output of 42.6 MTs in July this year compared to 37.3 MTs during July last year, a growth of 14.1%.

"The double-digit growth of July this year helped the company push up its progressive production growth to 5.2% which at the closure of first quarter was 2.4%," the company executive said.

For April-July this year, CIL produced 166.6 MTs of coal compared to 158.4 MTs during the corresponding period a year ago. Overburden removal was also recorded at 91 million cubic metre (M.Cu.M) for July this year against 89 M.Cu.M of July last year.

However, with the company's production on the rise and pit headstocks still at a buffer, the miner is ready to meet any exigency in coal demand.

STL partners Facebook Connectivity to develop 4G, 5G radio products

FE BUREAU
Pune, August 3

STL, AN INTEGRATOR of digital networks, has collaborated with Facebook Connectivity to design and develop 4G and 5G radio products. This is part of the Evenstar programme to help accelerate the commercial deployment of Open RAN and boost 5G readiness for operators around the world.

The Evenstar programme is a collaborative effort by Facebook Connectivity and global industry partners to accelerate the adoption of Open RAN technology. Through this collaboration, STL will build two advanced, high-power macro radio products. The first one is an O-RAN-compliant radio, providing higher capacity for dense deployments.

As part of the engagement, STL will also develop an O-RAN compliant 4G+5G dual technology radio that supports both technologies individually or/and concurrently.

Chris Rice, CEO of Access Solutions Business at STL, said through this collaboration, STL would assist in creating a robust, open and disaggregated, access network ecosystem. "By enabling an open networking infrastructure through efforts like this one, we are enabling global telecom service providers to take the power of 5G technology to billions of people worldwide at lower cost points," he added. These radio products will be developed over the next year and would enable telecom operators around the world to scale up commercial deployments of open networking infrastructure and prepare their networks for Open RAN 5G.

IT services industry growth to accelerate in FY22: Icr

IT SERVICES COMPANIES are expected to see growth in revenue, driven by robust demand for digital technologies, resulting in higher awards of contracts, according to ratings agency Icr. Further, growth in the financial year 2021-22 will be supported by the pent-up demand of the financial year 2020-21 that was lower due to the initial impact of Covid-19. Gaurav Jain, vice president and sector head at Icr, said IT services companies have managed to overcome supply-led challenges through uninterrupted delivery of services through the work-from-home model.

"As a silver lining, the pandemic is accelerating the secular trends of core modernisation, usage of collaborative technologies, and cloud migration as companies shift to digital business models to pursue work-from-home models, which will benefit the IT services companies," he added. In January-June 2021, traditional sourcing witnessed an annual contract value (ACV) of \$15.2 billion, up by about 15% on a year-on-year basis, owing to accelerated demand for digital technologies, Jain said.

Mumbai tops APAC data centre capacity addition in Q1: Report

PRESS TRUST OF INDIA
Mumbai, August 3

THE FINANCIAL CAPITAL saw the highest addition of data centre capacity in the entire Asia Pacific region in the quarter ending March 2021, boosted by the continuing pandemic-driven lockdowns, says an industry report.

Mumbai added 56 mega watt (mw) in the January-March quarter, the sharpest increase in data centre supply in Asia Pacific, taking the total supply to 753 mw, a report by interna-

tional property consultants Knight Frank said on Tuesday.

Between 2016 and 2019, Mumbai's IT power capacity (the industry word for data centre) rose from 148 mw to 456 mw, the report published in partnership with data centre research and analytics platform DC Byte said. But Mumbai has only 162 mw of live supply and 23 mw under-construction capacity.

The report attributed the record addition in Q1 to the pandemic-driven push for digital services, which began in 2020 when the city added 252

mw to 697 mw over 2019 supply.

The report said while the EMEA (Europe, the Middle East and Africa) markets saw a demand growth of 4% in Q1 of 2021 to 120 mw, the supply grew 10%, totalling to over 180 mw.

In Asia Pacific markets, total supply increased by about 200 mw in Q1, to total supply of 5,800 mw across the region, reflecting a similar supply growth in seen in 2020 when total addition was over 800 mw for the full year.

NOTICE TO SHAREHOLDERS
TRANSFER OF EQUITY SHARES TO INVESTOR EDUCATION & PROTECTION FUND
Notice is given pursuant to the provisions of the Companies Act, 2013 read with the Investor Education and Protection Fund Authority (Accounting, Audit, Transfer and Refund) Rules, 2016 ("the Rules") as notified and amended by the Ministry of Corporate Affairs, New Delhi. The Rules, inter alia, provide for transfer of all shares in respect of which dividend has remained unclaimed by the shareholders for seven consecutive years or more, to the Investor Education and Protection Fund (IEPF) set up by the Central Government. Accordingly, individual communications were sent to the latest available address of those shareholders whose shares are liable to be transferred to IEPF under the said Rules as they have not claimed the dividend for the financial year 2013-14 and all other dividends declared by the Company for 7 consecutive years thereafter. The company has uploaded the details of all unclaimed dividends including the dividend / shares of 2013-14 due for transfer to IEPF Authority on its website <https://www.hindustanpetroleum.com/unclaimeddividend>. View above, shareholders are requested to verify and claim the unpaid dividend for the year 2013-14 (which is due for IEPF transfer on 06-10-2021) immediately but not later than 22-09-2021, before the same is transferred to the IEPF along with shares and also the unclaimed dividends of other years. It may please be noted that if no claim/application is received by the Company or the Registrar and Transfer Agents (RTA) by 22.09.2021, the Company shall with a view to complying with the requirements set out in the Rules, dematerialise and transfer the underlying shares to the IEPF by following the due process as enumerated in the said Rules which is briefly as under:

i) In case of shares held in physical form – by issuance of duplicate share certificate and transfer the same to IEPF. Upon such transfer, the original share certificate(s) lying with the shareholder will stand automatically cancelled and deemed non-negotiable.
ii) In case of shares held in demat mode – by issuance of instruction to member's DP to transfer the shares directly to IEPF.

Kindly note that all future benefits, dividends arising on such shares would also be transferred to IEPF. It may also be noted that as per present rules the shares transferred to IEPF, including all benefits accruing on such shares, if any, can be claimed back from the IEPF Authority after following the procedure prescribed under the said Rules. All shareholders are requested to note the above provisions and claim all unpaid dividends lying with the company from time to time. For submission of aforesaid claims along with supporting documents as may be required for updation of bank details, etc., members may kindly contact the Company's RTA, M/s. Link Intime India Pvt. Executive Director/Area-I

If you are into exporting services, this is the most profitable news you'll read today.

We are Services Export Promotion Council (SEPC). And we are here to make export of services a thriving sector. Basically, think of us as your best friend forever.

How does SEPC help the services export business?

Here's what we do to help your services export business. We offer trade intelligence - that's market analysis, business contacts and business opportunities. We help you with export development - that's training, counselling, strategy formulation and value chain optimization. We help with export promotion - exhibitions and brand campaigns for the sector. And most importantly, we enable the business environment - through policy inputs to ministries, facilitating cross border trade and policy advocacy.

How can your business benefit from SEIS?

An example of SEPC's policy advocacy has been our relentless efforts over the past year to ensure grant of SEIS (Service Export from India Scheme) for

the year 2019-2020. SEIS provides for a mechanism under which service providers who had provided any of the eligible notified services in the financial year 2019-2020 are entitled for certain benefits. You can avail of a duty-free credit scrip which can be used for payment of basic customs duty and certain other duties. These scrips are also freely transferable.

How do you become an SEPC member?

Now that you know what SEPC can do for your business, you should probably scan the QR code in the corner and sign up for an SEPC membership.

If you need any more convincing, feel free to write to us at dg@servicesepc.org

Or you could call us at 011-41046329, 43562656, 46605216.

Or better still, drop by for a cup of coffee at Services Export Promotion Council, DPT – 417, 4th Floor, Prime Towers, Plot No. 79 & 80, Pocket – F, Okhla Industrial Area, Phase – I, New Delhi – 110020.

SEPC
SERVICES EXPORT PROMOTION COUNCIL
(Set up by Ministry of Commerce and Industry, Government of India)
www.servicesepc.org

Services under SEPC: Hotel and Tourism related services • Healthcare services including services by nurses, physiotherapists and paramedical personnel • Maritime Transport services • Accounting/Auditing and book-keeping services • Entertainment services including Audio-Visual services • Legal services • Architectural services and related services • Environmental services • Educational services • Consultancy services • Distribution services • Advertising services • Marketing Research and Public Opinion Polling services • Management services • Printing and Publishing services • Other Services
