COMPANY ANNOUNCEMENT

Living Cell Technologies Announces Conversion by Noteholders

January 25 , 2008 – Melbourne, Australia and Auckland, New Zealand - Living Cell Technologies Limited (ASX:LCT; OTC: LVCLY.PK) today announced that its convertible noteholders have agreed to convert all the convertible notes issued by LCT on June 29, 2006, into ordinary shares of LCT.

The noteholders are converting their repayment amount (principal and accrued interest) into ordinary shares at the 2006 stipulated price of A\$0.175 per share. The notes have a face value of US\$1.5 million. With accrued interest, the repayment amount is US\$1,795,436. At an exchange rate of 0.865396, this equates to A\$2,074,699 and will result in 11,855,422 shares being issued by LCT.

The conversion is subject to shareholder approval of the issuance of 24,150,408 shares at A\$0.29 to Palmert Members Ltd, as announced on January 9, 2008 and the closing of that transaction. LCT intends to hold a shareholders meeting in early March 2008 to seek approval of this issue.

LCT and the noteholders have agreed that on satisfaction of the terms of the conversion conditions, all of the parties' past, current, and future claims directly or indirectly arising out of or relating to the convertible notes would be released and discharged.

Richard Justice, LCT's Chief Financial Officer said, 'The conversion of the promissory notes into ordinary shares, rather than acceptance of repayment demonstrates growing confidence in LCT as a company'

About Living Cell Technologies: www.lctglobal.com

Living Cell is developing cell-based products to treat life threatening human diseases. The Company owns a biocertified pig herd that it uses as a source of cells for treating diabetes and neurological disorders. For patients with Type 1 diabetes, the Company transplants microencapsulated islet cells so that near-normal blood glucose levels may be achieved without the need for administration of insulin or at significantly reduced levels. The company entered clinical trials for its diabetes product in 2007. For the treatment of Huntington's disease and other neurological disorders, the company transplants microencapsulated choroid plexus cells that deliver beneficial proteins and neurotrophic factors to the brain. Living Cell's technology enables healthy living cells to be injected into patients to replace or repair damaged tissue without requiring the use of immunosuppressive drugs to prevent rejection. Living Cell also offers medical-grade porcine-derived products for the repair and replacement of damaged tissues, as well as for research and other purposes.
