

Bryah Drilling Campaign Underway

Drilling at Windalah VMS copper-gold prospect in the Bryah Basin

Highlights:

- **8,000 metre multi-phase reverse circulation/diamond drilling program planned**
- First phase (2,000m) of RC/diamond drilling commenced today
- Program designed to test significant **Volcanogenic Massive Sulphide (VMS) copper-gold target at Windalah prospect**

Bryah Resources Limited ("Bryah" or "the Company") is pleased to advise the start of a major drilling program at the Company's Windalah Prospect within its Bryah Basin Project located in central Western Australia (see Figure 1).

At the Windalah Prospect the Company plans to drill approximately 8,000 metres of Reverse Circulation (RC) /diamond drilling to test below the significant multi-element VMS pathfinder minerals anomaly identified in earlier soil sampling and aircore drilling¹ and where previous drilling has recorded some significant gold results².

This deep drilling is planned to be done in three phases to enable the completion and interpretation of down hole electromagnetic (DHEM) surveys between each drilling phase.

Phase 1 drilling of 2,000 metres started today with an RC rig on site. The drill rig is capable of drilling to the target depths of up to 350 metres, however if groundwater conditions affect sample recovery, the holes will be completed using a diamond core rig. It is planned that once completed each hole will be cased for follow-up DHEM surveying.

The location of the drill holes planned to date is shown in Figure 2 below, with additional holes to be sited once initial results are received.

The board of directors of Bryah Resources Limited has authorised this announcement to be given to the ASX.

About Bryah Resources Limited

Bryah Resources Limited is a copper-gold-manganese focused explorer with 2 projects located in central Western Australia, being the 1,125km² Bryah Basin Project and the 170km² Gabanintha Project.

The Bryah Basin is host to the high-grade copper-gold mines at DeGrussa, discovered by Sandfire Resources Limited in 2009, and at Horseshoe Lights, which was mined until 1994. The Bryah Basin also has several historical and current manganese mines including the Company's recently acquired Horseshoe South mine. The Company has a joint venture agreement with OM (Manganese) Limited in respect to its manganese rights only on approximately 600 km² of its Bryah Basin tenement holdings.

At Gabanintha, Bryah holds the rights to all minerals except Vanadium, Uranium, Cobalt, Chromium, Titanium, Lithium, Tantalum, Manganese & Iron Ore (Excluded Minerals). Australian Vanadium Limited retains 100% rights in the Excluded Minerals on the Gabanintha Project. Bryah has announced a maiden Inferred Mineral Resource at the Tumblegum South Prospect at Gabanintha of 600,000 tonnes @ 2.2 g/t Au for 42,500 oz Au³. The Company recently announced the disposal of the Tumblegum South Deposit to Star Minerals Limited⁴.

Competent Persons Statement – Exploration Results

Where the Company refers to Exploration Results in this announcement (referencing previous releases made to the ASX), the Company is not aware of any new information or data that materially affects the information included in the relevant market announcements.

Competent Person Statement — Mineral Resource Estimation

The information in this announcement that relates to Mineral Resources (see BYH ASX announcement dated 29 January 2020) is based on and fairly represents information compiled by Mr Ashley Jones, Consultant with Kamili Geology Pty Ltd. Mr Jones is a member of the Australasian Institute of Mining and Metallurgy (AusIMM).

The Company confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate with that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not materially changed from the original announcement.

Forward Looking Statements

This report may contain certain “forward-looking statements” which may not have been based solely on historical facts, but rather may be based on the Company's current expectations about future events and results. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward looking statements are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Readers should not place undue reliance on forward looking information. The Company does not undertake any obligation to release publicly any revisions to any “forward looking statement” to reflect events or circumstances after the date of this report, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.
