

ASX RELEASE

24 August 2016

ABT Receives Indonesian Orders for Terra Dura Wheel Ends

Further to our release of July 27 Advanced Braking Technology (ASX: ABV) ('ABT' or 'the Company') is pleased to confirm receipt of its first orders from Indonesia following the successful trial of our Terra Dura, metal wheel ends. ABT will provide an initial 9 vehicle sets as a part of an anticipated 60 vehicle rollout across the rest of the financial year. The initial order is worth in excess of \$100,000 with a total anticipated order value in excess of \$700,000.

ABT's Managing Director, Graeme Sumner said, "We are pleased the trial has progressed to the point that we have now received commercial orders for this new brake design.

About Advanced Braking Technology Ltd

Advanced Braking Technology Ltd (ASX: ABV) develops innovative braking systems. Their first product was the multi-award winning Sealed Integrated Braking System (SIBS®), a comprehensively patented Australian invention, with an environmentally friendly, failsafe braking mechanism suitable for the harshest of conditions. SIBS® brakes are used widely in light commercial vehicles in the Australian mining industry and increasingly throughout the world thanks to a growing global network of distributors.

Advanced Braking Technology have recently developed a revolutionary ultra light polymer brake and also diversified into the retail sector with their Terra Dura product range for 4WDs.
