BETTER BAUXITE

Australian Bauxite Limited is a new exploration company that holds the core of the Eastern Australian Bauxite Province in 17 tenements covering over 5,000 km² in Queensland and NSW all selected on 3 principles: good quality bauxite, proximity to infrastructure connected to Export Ports and free of socio-environmental constraints. All tenements are 100% owned, free of obligations to construct major processing plants and free of third-party agreements or royalties.

At the company's first drilling prospect, a maiden resource of 22 million tonnes has been reported from drilling less than 10% of the identified bauxite deposit.

From a small beginning and listing at 20 cents per share, the company is already creating shareholder value - and the best is yet to come.
