ANTEO TECHNOLOGIES INTRODUCES NEW PRODUCT TO MARKET AMG™ Activation Kit for Multiplex Microspheres

Today Anteo Technologies Pty Ltd (a subsidiary of Anteo Diagnostics Limited, ASX: ADO) is launching a new AMG™ Activation Kit for Multiplex Microspheres.

The Anteo Mix&Go™ (AMG) kit has been specifically developed by Anteo's product development team to be compatible with both MagPlex® and MicroPlex® Microspheres for use on the Luminex® platform.

Dr Geoff Cumming, CEO, Anteo Technologies said: "Our newest Activation Kit will save scientists time and effort when using the Luminex multiplex systems because our product provides a stable surface chemistry platform to couple proteins onto microspheres,"

"We have kept Luminex informed of our progress over the research and development phase and now as we introduce this product to market,"

"We think this kit will be of particular interest to new users of the Luminex multiplex systems, who may previously have been using the EDC Chemistry method, because it offers simplified handling and it's fast," said Dr Cumming.

Anteo's patented Mix&Go technology platform, which is used across the company's suite of AMG products, is renowned for providing stability and excellent reproducibility of results. Anteo's unique technology allows activated microspheres to remain stable for up to one year.

How the AMG Activation Kit for Multiplex Microspheres works

The AMG Activation Kit uses Mix&Go technology to stably activate and couple proteins to multiplex microspheres.

Mix&Go allows proteins to bind faster and with more functionality leading to enhanced performance and capture of the target molecules. The microspheres are quickly and easily activated with Mix&Go. They are then stable to store in the activated form, or are immediately ready to couple with protein.

Product Highlights:

- Compatible with MagPlex and MicroPlex Microspheres
- Simplified handling
- Fast and easy to use
- Activated microspheres are stable for one year
- More functional couplings.

Anteo Technologies Pty Ltd

Anteo uses its patented technology to develop, manufacture and commercialise proprietary surface coatings for use in healthcare, life sciences and beyond. Its patented technology is applied in the Mix&Go product range, which delivers solutions to the challenges of establishing highly functional biological interfaces between fragile biomolecules, and synthetic, and often incompatible, materials.

Bio-Layer Pty Ltd, a subsidiary company of Anteo Diagnostics Limited (ASX: ADO) has recently changed its name to Anteo Technologies Pty Ltd. This change does not affect Anteo Diagnostics' shareholders.
