Ainsworth Game Technology Limited Full Year Results

Following a strategic review undertaken by recently appointed Chief Executive Officer (CEO), Mr Danny Gladstone, AGT today announced that due to a continued shortfall in sales in the second half of FY2007 it anticipates a second half result similar to the \$17.7 million loss recorded for the 6 month period ended 31 December 2006.

Positive progress and initiatives undertaken across a number of areas of the business including significant streamlining of game and platform design, intensified focus on product and service quality and building sales networks in critical markets, along with game and product approvals, are yet to be reflected in the Company's current performance. The Company's newly developed product range is currently undergoing the regulatory approval process and delays experienced are impacting the current results. The resolution of a royalty dispute will now ensure more flexible and creative development projects can be expedited.

Executive Chairman, Mr LH Ainsworth, indicated that significant restructuring of the Company in the first half of FY07 and continuing Company wide streamlining of procedures will enhance operating and cost efficiencies in FY08.

Revenue is expected from recent gaming licences secured in New Jersey, Pennsylvania, Wisconsin, Connecticut and Florida once necessary product approvals are received. The new appointment of an experienced gaming executive in the USA with over 20 years industry experience will assist in growing sales within these markets.

Mr Gladstone indicated that significant progress had been made following his appointment in February 2007 and the Company's continued investment in product development and rationalisation across all global operations will result in improved trading performance in FY08. As previously reported, the ongoing funding of the Company has been further strengthened by a commitment of financial support by an entity controlled by Mr LH Ainsworth.
