### **MILLY MILLY NICKEL INTRUSION DETAILED GRAVITY SURVEY UNDERWAY**

Athena is pleased to announce that a detailed gravity survey has started at the Milly Milly (Cu,Ni) intrusion at the Byro Project.

This is the first time a high resolution gravity survey has been undertaken on the Milly Milly Intrusion.

The gravity information from this survey will add to the existing Geological Survey of Western Australia data set, which includes a regional gravity anomaly coincident with the Milly Milly (Cu Ni) Intrusion.

The purpose of the survey is to further define the intrusion and increase confidence in target resolution. The information from the survey will also be correlated with existing high amplitude late time ground EM responses and at the Milly Milly Intrusion.

Yours faithfully

Ed Edwards
