BYRO BASE METALS PROJECT

GEOPHYSICAL GROUND GRAVITY SURVEY COMPLETED AT THE BYRO NI-CU-PGE PROJECT

Further to the announcement on 13 August 2021, Athena Resources Limited (the Company) (ASX:AHN) is pleased to announce the completion of Geophysical Gravity Surveys at the Company's 100% owned Byro Base Metal Project within its Byro tenements.

Atlas Geophysics have now completed the following infill Ground Bouguer Gravity surveys at the Moonborough and Milly Milly intrusions:

- The Moonborough infill survey was initially designed to include 232 stations. On completion of the survey a further 100 stations were included over anomalous areas requiring further infill for a total of 332 stations.
- The Milly Milly infill survey was initially designed to include 359 stations over two areas, the Conduit Target and the Western Contact with the second intrusion. On completion of the survey a further 62 stations were added over anomalous areas requiring further infill for a total of 421 stations.

All gravity survey data acquired has been quality assessed and is now being modelled and interpreted by Southern Geoscience Consultants. Results from data interpretation and modelling are anticipated to take approximately two weeks.
