The above preliminary consolidated statement of cash flows should be read in conjunction with the accompanying notes

Note 1. Basis of preparation

The financial report is preliminary financial report which:

- has been prepared in accordance with ASX Listing Rule 4.3A.
- has been derived from the unaudited consolidated Annual Report which has been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities. These financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board ('IASB').
- has been prepared on historical basis, unless otherwise stated.
- is presented with values rounded to the nearest dollars in accordance with ASIC Legislative Instrument 2016/191, unless otherwise stated.
- is presented in Australian dollars, which is the functional currency of the Group. The Group has a subsidiary operating in United Kingdom.
- adopts all new and amended Accounting Standards and Interpretations issued by the AASB that are relevant to the Group and effective for reporting periods starting on or before 1 July 2023.
- does not early adopt any new Accounting Standards and Interpretations that have been issued or amended but are not yet effective, unless otherwise stated.

The Preliminary Financial Report does not include all the disclosures of the type normally included in the Annual Report. Accordingly, the unaudited Preliminary Financial Report should be read in combination with the Annual Report for the year ended 30 June 2024 and any public announcements issued by the Company in accordance with the continuous disclosure requirements of the *Corporations Act 2001*.

Historical cost convention

The financial statements have been prepared under the historical cost convention, except for, where applicable, the revaluation of financial assets and liabilities at fair value through profit or loss, financial assets at fair value through other comprehensive income, investment properties, certain classes of property, plant and equipment and derivative financial instruments.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in **note 2**.

Note 1. Basis of preparation (continued)

The un-audited Preliminary Financial Report has been prepared on the going concern basis, which contemplates continuity of normal business activities and the realisation of assets and discharge of liabilities in the normal course of business.

As disclosed in the financial statements, the Group incurred a loss of \$9,298,599 (Company 30 June 2024: \$1,698,495) and had net cash outflows from operating of \$4,080,911 (Company 30 June 2024: \$749,391) and investing activities outflow of \$958,970 (Company 30 June 2024: inflow \$801,221) respectively for the year ended 30 June 2025. As at that date, the Group had net assets of \$45,940,806 (Company 30 June 2024: \$2,073,472). The ability of the Group to continue as a going concern is principally dependent upon the ability of the Group to secure funds by raising additional capital from equity markets and managing cash flows in line with available funds.

The Group has the ability to reduce forecast expenditure if required and it is anticipated that additional capital can be raised in the future if required. The financial report has been prepared on a going concern basis which assumes that the Company will continue to pay its debts as and when they fall due. The validity of this assumption depends on:

- The Company's ability to raise additional capital as required; and
- The Company's ability to generate cash flows from the successful operations of its primary activities.

Should the Group be unable to maintain sufficient funding as outlined above, there is material uncertainty whether or not the Company will be able to continue as a going concern and therefore, whether it will realise its assets and extinguish its liabilities and commitments in the normal course of business and at the amounts stated in the financial report. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Group not continue as a going concern.

The Directors believe that the Group will be successful in the above matters and accordingly, have prepared the preliminary financial report on a going concern basis. At this time, the Directors are of the opinion that no asset is likely to be realised for an amount less than the amount at which it is recorded in the financial report at 30 June 2025.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Share-based payment transactions

The Group measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. The fair value is determined by using either the Binomial or Black-Scholes model taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Allowance for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience and historical collection rates.

Goodwill and other indefinite life intangible assets

The Group tests annually, or more frequently if events or changes in circumstances indicate impairment, whether goodwill and other indefinite life intangible assets have suffered any impairment, in accordance with the accounting policy stated in . The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of assumptions, including estimated discount rates based on the current cost of capital and growth rates of the estimated future cash flows.

Note 2. Critical accounting judgements, estimates and assumptions (continued)

Customer Contracts

The customer contracts are acquired in a business combination, estimate their fair value at the acquisition date. The management has involves using valuation techniques such as the income approach, which requires assumptions about discount rates of 21% to amortise the customer contracts over three years.

Business combinations

As discussed in , business combinations are initially accounted for on a provisional basis. The fair value of assets acquired, liabilities and contingent liabilities assumed are initially estimated by the Group taking into consideration all available information at the reporting date. Fair value adjustments on the finalisation of the business combination accounting are retrospective, where applicable, to the period the combination occurred and may have an impact on the assets and liabilities, depreciation and amortisation reported.

Discontinued Operations

In preparing the preliminary financial report, management has made several key judgments and estimates regarding the classification and measurement of discontinued operations. These include:

Classification as Discontinued Operations: Management determined that the sale of the Miner Hosting Services Business represents a strategic shift that will have a major effect on the company's operations and financial results. This judgment was based on the division's contribution to total revenues and assets.

Measurement of Assets: The assets were measured at the lower of their carrying amount and fair value less costs to sell. This required significant judgment in estimating the fair value of the division's assets, including property, plant, and equipment, and intangible assets.

Timing of Recognition: The decision to classify the Miner Hosting Services Business as held for sale was made when management committed to a plan to sell the asset, and it was available for immediate sale in its present condition. The sale was expected to be completed within one year from the date of classification.

Presentation and Disclosure: The results of the Miner Hosting Services Business division have been presented separately in the income statement as discontinued operations. The major classes of assets and liabilities of the division have been presented separately in the balance sheet. Additional disclosures include the nature of the discontinued operations, the major classes of assets and liabilities, and the financial effects of the disposal.
