CYU Objectives by June 2010

Production

Construction

Feasibility

Pre-Feasibility

Resource + Scoping

2 by end of 2010

Development Drilling

Gem, Elaine Dorothy

Prospect + Exploration Drilling

Norwood, Emu, Stanely's Hope

Detailed Surface Evaluation

**Little Isa, Yarraman, Mt Dorothy
Gap, Ravenswood**

Prospecting

Australia

Geologic Targeting

Australia, China, Chile

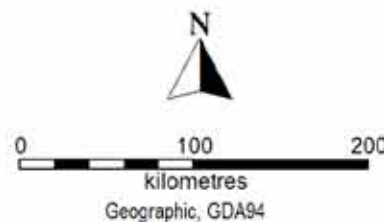

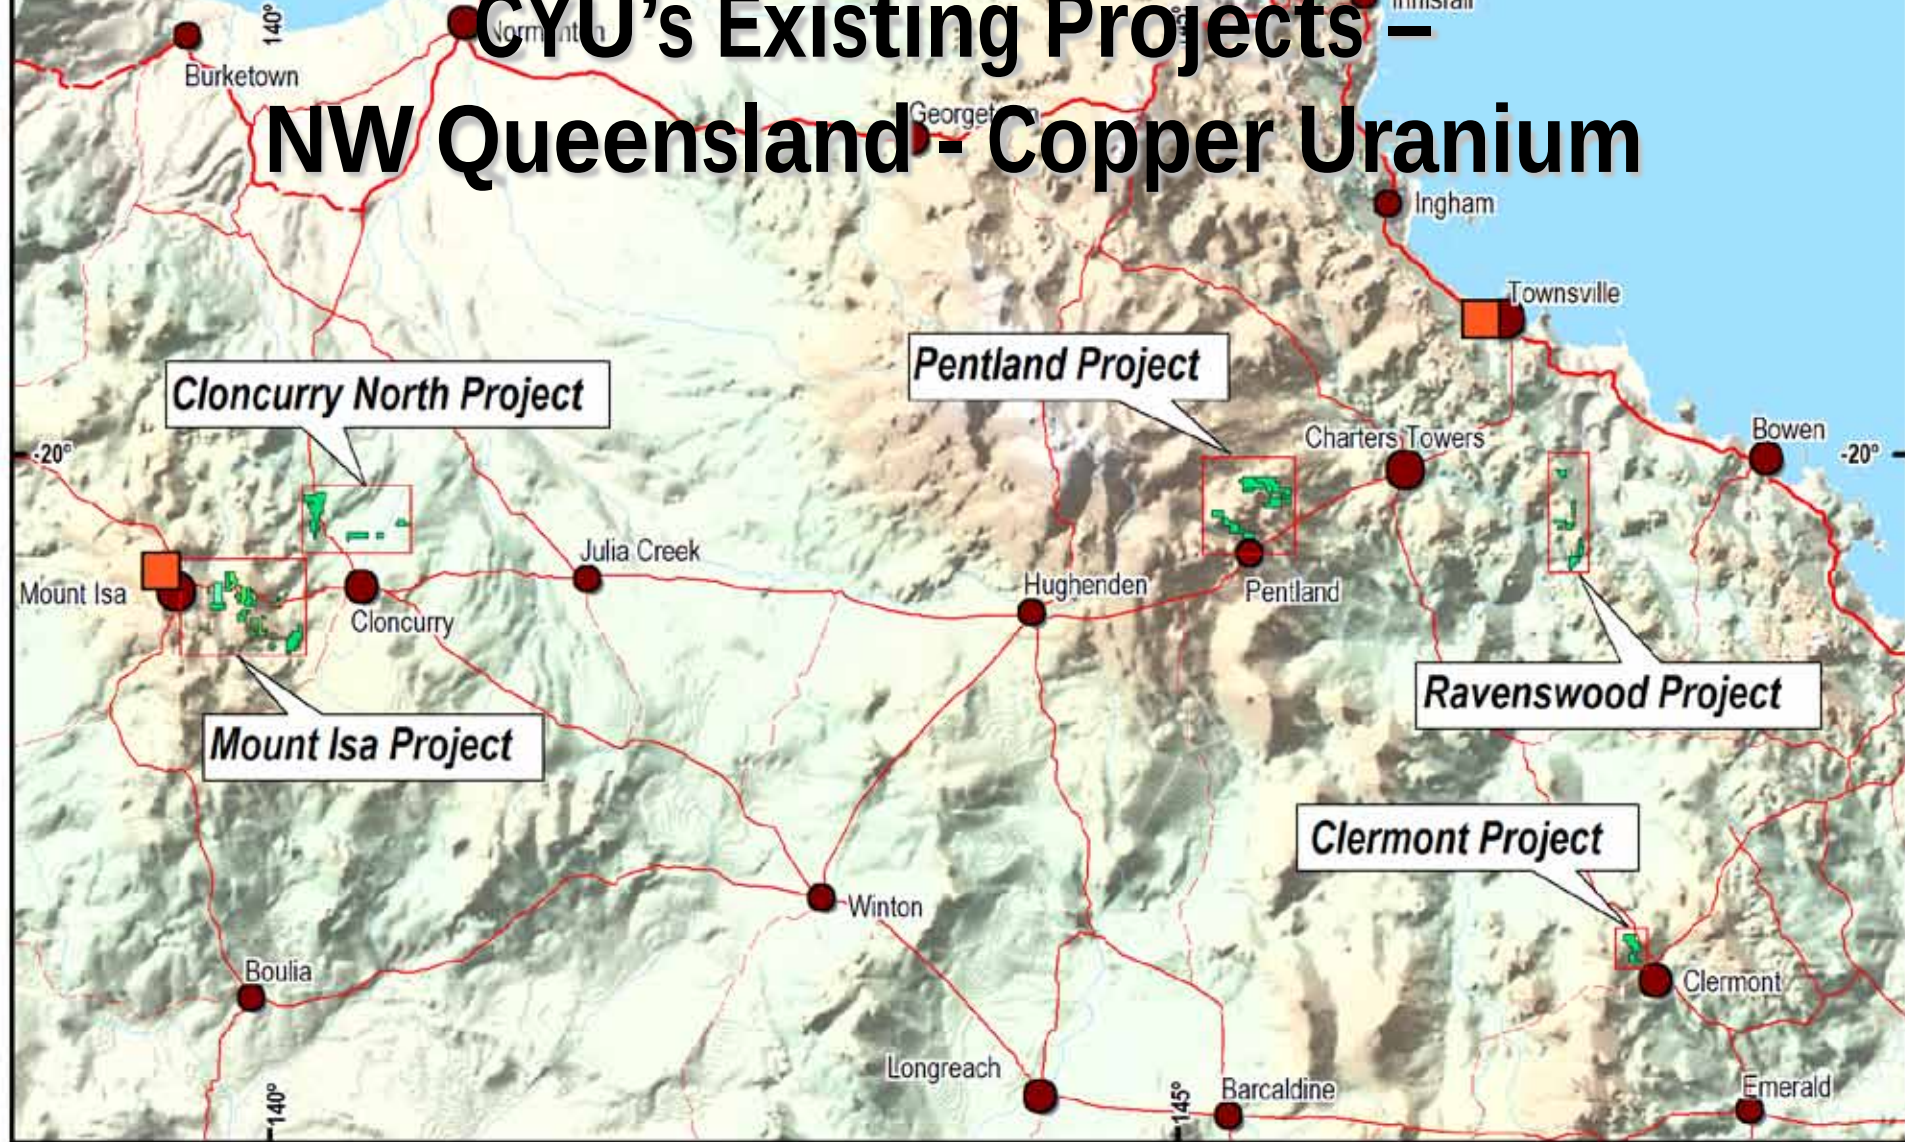

CYU – Operations

Projected Jan to June 2010 - Operations

- Gem Resource Definition drilling and estimate.
- Pentland JV Drilling of Intrusive Related Gold Targets.
- Elaine Dorothy Uranium Target drilling results to model.
- Drilling Stanley's Hope Gold Epithermal Target.
- Drilling Mt Dorothy, Little Isa.

CYU's Existing Projects – NW Queensland - Copper Uranium

Elaine Dorothy – Uranium Target

- An exploration target* for the Elaine One Anomaly is assessed at between 150,000t and 250,000t of mineralisation with grades between 0.34 and 0.56 kg/t U₃O₈ (using a 0.15 kg/t U₃O₈ cutoff grade).
- will be tested by twinning previous high grade intercepts returned in 1955 and 1980.
- Drill defined from 1955 and 1980;
 - 2.3 metres at 2.62 kg/t U₃O₈ from 26 metres,
 - 9.5 metres at 0.36 kg/t U₃O₈ from 13.5 metres.
 - 2 metres at 1.34 kg/t U₃O₈ from 100 metres.
- For reference the mined out Mary Kathleen Mine yielded 9.2 million tonnes at a grade of 1.20 kg/t U₃O₈

** The potential quality and quantity shown within is conceptual in nature and there has been insufficient work done at present to define a Mineral Resource in this area under the JORC (2004) Code. The nature of an Exploration Target is such that it is uncertain if further exploration will result in the determination of a Mineral Resource in this area.*
