Alcidion secure \$2.35m contract with Western Health

Highlights:

-) \$2.35m contract for Footscray, Williamstown & Sunshine Hospitals.**
-) Initial Term of three years, with an option to extend for an additional two years.**
-) Apple iPad's view Electronic Patient Records and highlight emerging clinical risk.**
-) Optimises Patient Flow, Bed Management across the hospital group.**

Adelaide, South Australia, 6th April 2016 - As announced on 1 August 2016, Western Health and Alcidion Group Limited (ASX:**ALC**) reached a Memorandum of Understanding (MoU) to utilise the company's technology across their public hospital facilities in the western suburbs of Melbourne: the Footscray, Sunshine and Williamstown Hospitals and the Sunbury day facility. Alcidion is delighted to announce that the MoU has now proceeded into a contract, under the same material terms as described in the MoU.

The Miya platform provides all the necessary data to best manage patient care, from the reception of the patient (Emergency Department or elective admissions) through the hospital wards and specialist clinical areas, through to discharge. Clinicians can access individual patient information on mobile devices at the point of care, on computer work stations distributed across the hospitals, and on large format digital displays in shared work areas. Multiple Apple iPads are deployed in every ward and clinical service area thus saving clinicians and care team members valuable time in their patient care interactions.

This data access includes clinical information such as pathology and radiology results as well as access to clinical documentation. Furthermore, the platform identifies emerging clinical risk and highlights "at risk" patients to the clinicians.

In the Emergency Department, clinical staff can quickly identify those patients nearing the National Emergency Access Target (NEAT) and plan care accordingly.

The patient flow component of Alcidion's solution provides an overview of capacity and demand at both the ward and unit level, providing real time information about open and available beds, patients coming in (together with the admission source) and potential and confirmed ward discharges.

CEO of Alcidion Group Limited, Mr Ray Blight commented, "We are very pleased to have Western Health extend their relationship with Alcidion. Western Health should be commended on their commitment to excellence in innovation and Alcidion is privileged to be work closely on these ground-breaking initiatives".

“Efficiency improvements are by far the most significant driver for investments in patient flow solutions. More specifically, healthcare organisations are focused on improving bed turnaround times and reducing patient wait times. We are delighted to be working with Alcidion in this cutting-edge Patient Flow Solution”, Executive Director of Operations, Western Health, Russell Harrison said in a statement.

The contract is for an initial three-year term at \$1.45m, with Western Health holding the option to extend the agreement for \$450,000 per annum for the following two consecutive years.

About Alcidion

Alcidion Group Limited (ASX:ALC) is a publically listed, innovative health informatics company that specializes in clinical products that improve productivity, safety and efficiency. Alcidion's solutions target key problems for Emergency Rooms, Inpatient Services and Outpatient Departments and are built upon a next generation health informatics platform, which incorporates an intelligent EMR, Clinical Decision Support Engine, Data Integration Capability, Smartforms, Terminology Support and Standards Based Web Services.

Alcidion's focus is on delivering solutions that enable high performance healthcare and which assist clinicians by minimising key clinical risks, tracking patient progress through journeys and improving quality and safety of patient care.

About Western Health

Western Health manages three acute public hospitals: Western Hospital at Footscray; Sunshine Hospital at St Albans; and the Williamstown Hospital. It also operates the Sunbury Day Hospital, and a Transition Care Program at Hazeldean in Williamstown. A wide range of community based services are also managed by Western Health, along with a large Drug and Alcohol Service.

Western Health provides a comprehensive, integrated range of services from its various sites; ranging from acute tertiary services in areas of emergency medicine, intensive care, medical and surgical services, through to subacute care and specialist ambulatory clinics. Western Health provides a combination of hospital and community-based services to aged, adult and paediatric patients and newborn babies.

Employing nearly 6500 staff Western Health has a strong philosophy of working with its local community to deliver excellence in patient care.
