

Ambertech Limited to Distribute Radial Engineering

Ambertech is pleased to announce an exclusive distribution arrangement with Radial Engineering to represent its renowned brands in Australia.

Radial is recognized for producing arguably the finest DI boxes, splitters and audio interfacing devices for live, studio and broadcast, an innovative range of stage switchers, as well as the Tonebone award winning range of pedals and pre amp products.

In 2001 the Primacoustic brand of acoustic related products was launched, manufacturing acoustic materials of all types and offering a wide range of acoustic solutions from basic absorption panels, the Recoil Stabilizer™ speaker mount product, through to Room Kits suitable for environments ranging from the home studio to the professional room.

The latest addition to the product range is the new Forest Audio range of high performance audio tools primarily designed for the professional recording market. Watch this space...

Radial Engineering, based outside Vancouver, Canada and with a heritage dating back to the late 70's has a simple philosophy, "To build the very best and most innovative products in the world. What could be easier?"

With a client list ranging from Aerosmith to Matchbox 20, NBC Television to Van Halen and including artists such as Crowded House, Dwight Yokum, Eric Clapton, Jet, Pat Methany and Tommy Emmanuel as well as organizations such as Cirque de Soleil, Clair Bros and Showco, they must be doing something right.
