# AMP Financial Services – outlook

- Driving growth in EV and VNB through improved cashflows and planner growth (numbers and productivity) off a lower cost base
- Lower investment income likely from reduced capital in business and change in asset mix supporting policyholder liabilities
  - However, large release of capital at year end will strengthen RoIC in FY04
- Targeting increased market share in corporate superannuation, allocated pensions, market-linked pensions, non super investments, banking and risk products

# AMP Capital Investors

- ⌘ Operating margins down 6% on FY02 to A\$68m as improved investment performance and transaction fees largely offset loss of LPTs
- ⌘ Cost ratio up to 63% from 60% due largely to loss of LPTs
- ⌘ Good investment performance with 74% of assets under management at or above benchmark for FY03
  - Investment performance added record value to AMP Life No 1 fund relative to benchmark
- ⌘ RoIC up from 23% to 27% as sale of LPTs lowered invested capital

# AMP Capital Investors - outlook

- Steady operating margins outlook, as LPT revenue replaced by growth in new products
  - A\$585m raised in six new products in Future Directions range since 4Q 03 launch
  - A\$700m raised in Japan's first-ever global property securities mandate from Nikko Asset Management in 2004 YTD
- Focus on delivering superior investment performance
- 'Lead manager' model repositioning AMP Capital as a regional asset manager, partnering with outstanding managers as required to deliver top quality products to clients
- Increasing sales through third party retail distributors

# Cobalt/Gordian

- 18% increase in operating margins on FY02 to A\$58m, driven by effective claims management and commutations, especially in 4Q 03
- Commutation savings delivered A\$49m to margins
- Focus remains on achieving a profitable runoff of the outstanding books while maximising returns to shareholders through:
  - commutations
  - claims management
  - costs
  - capital management

# Gordian Runoff<sup>1</sup> - gross claims reserves<sup>2</sup>

<sup>1</sup> Represents about 90% of total runoff book

<sup>2</sup> Gross discounted claims including risk margins. Prior years adjusted to 31 December 03 exchange rates

# Capital management overview

# Capital overview – financial strength improved

- AFS transfer of A\$1,357m in FY03 represents 2003 profit and surplus capital, comprising:
  - A\$925m from AMP Life statutory funds (A\$200m in 1H03, A\$725m in 2H03) resulting from higher operating profits, stronger investment markets and above-benchmark returns
  - A\$115m from AMP Life – other operations, resulting primarily from higher service company operating profits
  - A\$317m from AMP Banking, following its restructure and mortgage securitisation program
- AMP Life solvency more robust post transfer than at 1H03, FY02 or FY01 with better asset:liability matching
  - AMP Life carries substantial capital in excess of the regulatory minimum
    - 2002    A\$1.40b    (149% coverage of capital adequacy reserves)
    - 2003    A\$1.48b    (160% coverage of capital adequacy reserves)
  - Surplus capital increased even with A\$725m transfer at end 2003
