ASX Announcement (AMX)

Aerometrex Secures Significant Government Contract Wins, Strengthening Growth Outlook

Aerometrex Limited (ASX: AMX, 'Aerometrex' or 'the Company') is pleased to announce that it has secured a series of new government contracts across federal, state and local departments during FY26. The Company believes its status as an Australian-owned and operated business, with established sovereign capability and onshore delivery, has been a key differentiator in recent tender processes and a contributing factor to these successful outcomes.

The contracts, awarded following competitive tender processes, span MetroMap subscription and MetroMap and LiDAR project revenue and represent a combined value of approximately $2.5 million over 3 years. No single contract is individually material to the Company. However, in aggregate, the awards provide increased revenue visibility over the medium term and further strengthen the Company's government customer base.

As an Australian-owned and operated business, Aerometrex continues to benefit from increasing government emphasis on sovereign capability, local supply chains, and support for domestic industry. The Company's established national footprint, proven delivery capability, and compliance with Australian regulatory and security standards position it favourably in ongoing and future procurement processes.

Chief Executive Officer Robert Veitch, said:

"We are proud to support Australian government agencies with high-quality, locally delivered solutions. Our Australian ownership and onshore operational model provide government clients with confidence around security, responsiveness, and long-term partnership.

These contract awards validate our strategy and strengthen our recurring revenue base. With a robust pipeline of opportunities across multiple departments, we see significant potential to expand our government portfolio in the years ahead."

The Company continues to pursue additional government opportunities currently in tender or advanced negotiation stages and remains focused on disciplined growth, operational excellence, and long-term shareholder value creation.

Further updates will be provided as material developments occur.

This release is approved by the Board of Directors of Aerometrex Limited.
