Forward-Looking Statements

This presentation contains forward looking statements concerning the projects owned by AusQuest Limited. Statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events and results may differ materially from those described in the forward looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments. Data and amounts shown in this presentation relating to capital costs, operating costs and project timelines are internally generated best estimates only. All such information and data is currently under review as part of AusQuest Limited's ongoing development and feasibility studies. Accordingly, AusQuest Limited cannot guarantee the accuracy and/or completeness of the figures or data included in the presentation until the feasibility studies are completed.

Competent Person's Statement

The details contained in this report that pertain to exploration results are based upon information compiled by Mr Graeme Drew, a full-time employee of AusQuest Limited. Mr Drew is a Fellow of the Australasian Institute of Mining and Metallurgy (AUSIMM) and has sufficient experience in the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Drew consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.

JORC – Exploration Targets

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information in this presentation relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

Currency

All dollar amounts shown in this presentation are in Australian dollars unless otherwise stated.

PERU PROJECTS – COPPER COUNTRY

CHOLOLO – PORPHYRY CU PROSPECT

- Close to infrastructure – road, rail, power - 20km from Ilo port – 1100m RL
- Initial drilling completed (10/5300m) – final results & assessment pending

CHOLOLO- SCHEMATIC DRILL INTERCEPTS

- Wide spaced drilling (+500m) intersected large scale porphyry alteration
- Alteration can provide vectors to mineralisation
- Advanced argillic in CDDH09 & 04
- Phyllic in CDDH06, 04 & 09
- Pyrite & base metal halo in CDDH01, 02, 03, 05, 07
- Iron (Mt) + copper veins in CDDH08
- Large system &/or multiple systems proximal to drilling?
- Full assessment awaits final data

CHOLOLO- PORPHYRY CU TARGETS?

- Initial indicators suggest possible porphyry centre(s) close to the Chololo Fault

CERRO DE FIERRO – NEW IOCG TARGET(S)

- Close to Marcona (Fe), Mina Justa, Pampa Pongo (Fe-Cu-Au) & Los Chapitos (Cu)
- Magnetic target(s) identified from Company's proprietary airborne data
- Extensive Cu & regional scale potassic alteration implies IOCG prospectivity

CERRO DE FIERRO – DRILL PROGRAM

- Large scale IP / magnetic target associated Cu-Au anomalies – IOCG / Manto?
- **Second target to be drilled in Peru (~3500m) under Strategic Alliance (S32)**

AUSTRALIA – PROJECTS (South32)

- Focus on **large scale** base metal projects (WA - QLD)
- 7 projects being tested under Strategic Alliance in **2018**
- **Drilling** of sediment-hosted Zn targets at Blue Billy JV
- **Drilling** of Ni-Cu targets at Balladonia & Jimberlana
- Cu-Ni **target definition** at Yallum Hill and Caramulla
- Sediment-hosted Zn **target definition** at Tangadee
- IOCG **target definition** at Hamilton - (NW Qld)

BLUEBILLY JV (South32) – SEDEX ZINC

- Fault bound synclines host for SEDEX Zn deposits - Lady Loretta, Teena, HYC, Century

- Wide-spaced RC drilling to test structural targets - Assays pending

JIMBERLANA (South32) NI-CU PROJECT

- Jimberlana Dyke - large (200km x 1-2km) highly fertile (Ni) mafic intrusion defined by mag/gravity
- Priority massive sulphide targets (Ni-Cu) most likely near base of intrusion (< 800m depth - Jimberlana)
- Diamond drilling (2/716m) & DHEM to test targets identified by MLTEM surveys

BALLADONIA (South32) NI-CU PROJECT

- Large tenement holding (1040km²) in Fraser Range Region of WA
- Six drill targets identified by EM Surveys
- Diamond (~1200m) & Aircore (~1300m) drilling to test bedrock conductors
