# Amended Announcement: Golden Rim Acquires Additional Burkina Faso Gold Permits

**This is an amendment to the announcement made by the Company on Friday, 28 May 2010.**

**Golden Rim Resources Ltd** (ASX: GMR, **Golden Rim**) today announced it has finalised agreements to acquire an additional 2 gold exploration permits (Kourori and Koro-Sud) in Burkina Faso in West Africa.

Golden Rim now has 14 gold exploration permits in Burkina Faso covering an area of 3,220 $km^2$.

All of the permits are strategically located on multiple greenstone belts highly prospective for the discovery of significant gold mineralisation. They were also selected based on their association with major mineralising structures (most of the large gold deposits in Burkina Faso have been discovered near these major mineralising faults) and because they all have active artisanal gold mining sites.

Craig Mackay, Managing Director of Golden Rim, said "following 6 months of effort our strategy to acquire a large area of highly prospective and under-explored ground in Burkina Faso is proving very successful," said Mr Mackay.

"Based on an existing familiarity with its geology Golden Rim continues to review additional opportunities in Burkina Faso and we expect to finalise additional permit acquisition agreements by the end of the June Quarter," he said.

Combined with its gold properties in Mali, Golden Rim now has a quality gold licence portfolio covering over 3,590$km^2$ in West Africa, which is the fastest growing gold producing region in the world.

Exploration on the Burkina Faso permits will be fast tracked. A very experienced local geological team, lead by our Country Manager, Richard Zongo, is now in place. Our Burkinabe and Australian geologists are currently completing site visits to all of the permit areas. Rock chip samples are being collected and detailed exploration programs are being formulated. Depending on rig availability a scout reverse circulation drilling program is planned for the Gonsin permit for the second half of June.

## About the Agreements

Under the terms of the agreements, Golden Rim may purchase a 100% interest in each of the 2 permits following staged cash payments over a maximum 3 year period from Mme Zaba. Consideration for each of the permits includes an up-front payment of US$5,000, followed by a payment of US$10,000 after 6 months. Further payments are made annually and include US$15,000 at the end of the first year, US$25,000 at the end of the second year, and US$50,000 at the end of the third year.

Each agreement provides for a 1% net smelter return royalty on any gold produced from the permits, payable to the permit vendor. Golden Rim has the right to withdraw from each of the agreements, at any time.

## About Burkina Faso

Burkina Faso is a landlocked country in West Africa surrounded by 6 countries: Mali to the north, Niger to the east, Benin to the southeast, Togo and Ghana to the south, and Côte d'Ivoire to the southwest. Its size is 274,000 km² with an estimated population of more than 15 million. The inhabitants of Burkina Faso are known as Burkinabè. Burkina Faso's capital is Ouagadougou.

Burkina Faso currently has a democratic and stable political climate and is considered investor friendly with low corporate tax rates. The government has a proactive approach to mining and has a modern Mining Code. The Fraser Institute's *2010 Annual Survey of Mining Companies* placed Burkina Faso as the second best African nation in terms of mineral potential and mineral policy.

There has only been limited modern day exploration in this geologically exciting region, which has already yielded encouraging results. Four new gold mines commenced in Burkina Faso between 2007 and 2009. Gold production in 2008 doubled and in 2010, two more mines commenced production.

According to London-based precious-metals consultancy GFMS, West Africa is the fastest growing gold producing region in the world.

### New Mines 2007-2009

- Taparko/Bouroum (1.5M oz) High River Gold
- Youga (1.5M oz ) Etruscan
- Mana (1.2M oz) Semafo
- Kalsaka (0.6M oz) Cluff Gold

### Other Advanced Projects

- Bombore (2.71M oz) Orezone
- Bissa Hill (1.5M oz) High River Gold
- Karma (1.14M oz) Riverstone
- Banfora (1.1M oz) Gryphon Minerals
- Sega (0.6M oz) Orezone
- Battie (1.1M oz) Ampella Mining

### New Mines 2010

- Essakan (5.2M oz) IAMGOLD
- Inata (1.7M oz gold) Avocet

# About Golden Rim Resources Limited

**Golden Rim Resources Ltd** (ASX: GMR) is an exploration and mining company with a focus on copper and gold. The Company is active in West Africa, with gold resources and licences covering over 3,590 square kilometres in the highly prospective Birimian greenstone belts of Mali and Burkina Faso. Golden Rim has a developed a technical and administration team each with over 20 years experience in West Africa.

Abu Dhabi-based Royal Group is a substantial shareholder and strategic partner of Golden Rim. Through an alliance company, Royal Falcon Mining LLC, the companies have secured advanced copper/gold projects (Falun and Bersbo) in Sweden and are seeking further significant investments.

Golden Rim is pursuing an active drilling program in Mali, Burkina Faso and Sweden and is poised to deliver significant growth and value to shareholders.
