ANNOUNCEMENT

ASX: ASN, ASNOC

OTC: ANSNF

Anson to Present at the Future Energy Investor Conference Hosted by Viriathus Capital

Anson is pleased to announce its participation in the Future Energy Conference on Thursday, 21 October 2021.

Developed nations across the globe have established pacts and initiatives to move towards a zero-carbon future. The ASX is home to many companies that are developing projects to help society achieve its zero carbon ambitions, and investors have shown their support for these companies, with many of them reaching all-time highs in the last year. The Future Energy Conference is a platform for those companies to present to the investors that are committing capital to the sector.

Anson's Executive Chairman and CEO, Mr Bruce Richardson, will present at the conference which will be delivered via Zoom to new and existing Shareholders, who will have an opportunity to interact with Mr Bruce Richardson via a live Q&A.

Date: Thursday, 21 October 2021

Timeslot: 9.10am AEDT, 6.10am WST

Registration for the conference is essential. Please register to attend using the link below:

About Anson

Anson Resources Limited (ASX: ASN) is an Australian-based exploration and development company, focused on the discovery, acquisition, and development of natural resources that will meet the demand from rapidly growing new energy and technology markets.

A key component of this strategy is the development of the Paradox Basin Brine Project in southern Utah, USA, where Anson is targeting the recovery of valuable chemicals from a unique salt brine resource. The Paradox Project is targeting the supply of lithium chemicals to the rapidly growing battery market, while extracting additional value from by-products, including bromine, iodine, and boron, contained within the brine.

Anson has also established a portfolio of base metals projects covering 458km² in the highly prospective Yilgarn Craton of Western Australia. A key near-term focus within the WA portfolio is on The Bull Project which covers 82km² and adjoins the high-grade Julimar Ni-Cu-PGE discovery made by Chalice Gold Mines Limited (ASX: CHN).
