

INFORMATION STATEMENT

The Asian Development Bank (ADB) intends to issue its notes and bonds (Securities) from time to time with maturities and on terms determined by market conditions at the time of sale. ADB may sell the Securities to dealers or underwriters who may resell them or ADB may sell the Securities directly or through agents.

The specific currency, aggregate principal amount, maturity, interest rate or method for determining such rate, interest payment dates, purchase price to be paid by ADB, any terms for redemption or other special terms, form and denomination of any Securities, information as to stock exchange listing and the names of the dealers, underwriters or agents in connection with the sale of such Securities being offered by ADB at a particular time, as well as any other information that may be required, will be set forth in a prospectus or supplemental information statement or similar document.

AVAILABILITY OF INFORMATION

ADB will provide, without charge, additional copies of this Information Statement upon request. Written or telephone requests should be directed to ADB's principal office at 6 ADB Avenue, Mandaluyong City, 1550 Metro Manila, Philippines, Attention: Funding Division, Treasury Department, tel: +63 2 632 4444, fax: +63 2 636 2444 or to the following ADB representative offices: (i) Barckhausstrasse 1, 60325 Frankfurt, Germany, tel: +49 69 2193 6400, fax: +49 69 2193 6444; (ii) Kasumigaseki Bldg. 8th Floor, 3-2-5 Kasumigaseki, Chiyoda-ku, Tokyo 100-6008, Japan, tel: +81 3 3504 3160, fax: +81 3 3504 3165; and (iii) 900 17th Street NW, Suite 900, Washington, D.C. 20006, U.S.A., tel: +1 202 728 1500, fax: +1 202 728 1505.

The Information Statement is also available on ADB's Investor Relations website at www.adb.org/site/investors/main. Other documents and information on ADB's website are not intended to be incorporated by reference in this Information Statement.

Recipients of this Information Statement should retain it for future reference, since it is intended that each prospectus or supplemental information statement or similar document issued after the date hereof will refer to this Information Statement for a description of ADB and its financial condition, until a new information statement is issued.

25 April 2017

The issuance of this Information Statement or any prospectus or supplemental information statement or similar document and any offering and sale of Securities does not constitute a waiver by ADB or by any of its members, Governors, Alternate Governors, Executive Directors, Alternate Executive Directors, officers or employees of any of the rights, immunities, privileges or exemptions conferred upon any of them by the Agreement Establishing the Asian Development Bank or by any statute, law or regulation of any member of ADB or any political subdivision of any member, all of which are hereby expressly reserved.

No person is authorized to give any information or to make any representation not contained in this Information Statement, prospectus, any supplemental information statement or similar document. Any information or representation not contained herein must not be relied upon as having been authorized by ADB or by any of its dealers, underwriters or agents. Neither this Information Statement nor any prospectus or supplemental information statement or similar document constitutes an offer to sell or solicitation of an offer to buy securities in any jurisdiction to any person to whom it is unlawful to make such an offer or solicitation.

Except as otherwise indicated, all amounts in this Information Statement and any prospectus or supplemental information statement or similar document are expressed in United States dollars.

This Information Statement contains forward-looking statements which may be identified by such terms as “believes”, “expects”, “intends” or similar expressions. Such statements involve a number of assumptions and estimates that are based on current expectations, which are subject to risks and uncertainties beyond ADB’s control. Consequently, actual future results could differ materially from those currently anticipated.

SUMMARY INFORMATION

(As of 31 December 2016, unless otherwise indicated)

The Asian Development Bank (ADB) is an international organization established in 1966 and owned by its 67 members. ADB's main goal is to reduce poverty in Asia and the Pacific region through inclusive economic growth, environmentally sustainable growth, and regional integration. ADB pursues its goal primarily by providing various forms of financial assistance to its developing member countries such as loans, technical assistance, grants, guarantees, and equity investments.

ADB was founded mainly to act as a financial intermediary to transfer resources from global capital markets to developing member countries for economic development. Its ability to intermediate funds from global capital markets for lending to its developing members is an important element in achieving its development missions.

ADB's five largest shareholders are Japan and the United States (each with 15.6% of total shares), the People's Republic of China (6.4%), India (6.3%), and Australia (5.8%).

Equity: ADB's members have subscribed to \$142,699 million of capital as of 31 December 2016, \$7,154 million of which was for paid-in shares subscribed and the remainder of which is callable. The callable capital is available as needed for debt service payments and thus provides the ultimate backing for ADB's borrowings and guarantees. It cannot be called to make loans. ADB's equity also included reserves totaling \$10,815 million.

Borrowings: ADB's borrowing policy limits ADB's gross outstanding borrowings to no more than the sum of callable capital of non-borrowing members, paid-in capital, and reserves (including surplus). Based on this policy, the sum of such capital and reserves as of 31 December 2016 was \$110,043 million. The aggregate of ADB's gross outstanding borrowings after swaps of \$77,232 million as of 31 December 2016 was equivalent to 70% of such ceiling.

Net Income: Net income for 2016 was \$7 million, as compared to net income of \$556 million in 2015, representing an annualized return of 0.01% (0.65% in 2015) on its average earning assets. Operating income, which is determined on a management reporting basis, was \$521 million for 2016, as compared to \$343 million for 2015, representing an annualized return of 0.56% (0.40% in 2015) on its average earning assets.

Loan Portfolio: ADB's ordinary operations loans outstanding, undisbursed balances of effective loans, and loans not yet effective in its ordinary operations totaled \$105,841 million.

Of this total, 91.5% represented sovereign loans, that is, loans to the public sector (member countries and, with the guarantee of the concerned member, government agencies or other public entities), and 8.5% represented nonsovereign loans, that is, loans to private sector enterprises, financial institutions, and selected nonsovereign public sector entities. ADB has never suffered any losses of principal on sovereign loans and maintains a position of not taking part in debt rescheduling agreements. Occasional delays have occurred in loan service payments on its sovereign loans but these have not been material to ADB's operations. The loan in non-accrual status of \$20 million as of 31 December 2016 represented 0.03% of the total outstanding ordinary capital resources loans. ADB's lending policy limits the total amount of disbursed loans, disbursed equity investments and related prudential buffer, and the maximum amount that could be demanded from ADB under its guarantee portfolio, to the total amount of ADB's unimpaired subscribed capital, reserves, and surplus, exclusive of the special reserve. As of 31 December 2016, the total of such loans (including other debt securities), equity investments and related prudential buffer, and guarantees was \$68,786 million, compared with the maximum lending ceiling of \$154,938 million, which resulted in a headroom of \$86,152 million.

Risk Management: ADB seeks to mitigate exchange rate risks by matching its liabilities in various currencies with assets in those same currencies. ADB uses derivatives, including currency and interest rate swaps, in connection with its operations in order to reduce its borrowing costs, generate investment income, and manage its balance sheet risks. The derivative assets and liabilities totaled \$29,143 million and \$32,079 million, respectively. The notional principal amount of outstanding interest rate swaps totaled \$61,601 million. To control its credit exposures on swaps, ADB has set credit rating requirements for counterparties. In addition, ADB requires all swap transactions to be subject to collateral support requirements.

The above information should be read in conjunction with the detailed information and financial statements appearing elsewhere in this Information Statement.

USE OF PROCEEDS

The net proceeds to ADB from the sale of Securities will be included in the ordinary capital resources of ADB and used in its ordinary operations. (See *Part III D. Operating Activities*).

This document provides Management's Discussion and Analysis (MD&A) of the financial condition and results of operations for the Asian Development Bank for the year ended 31 December 2016. ADB undertakes no obligation to update any forward looking statements. Certain reclassifications of prior years' information have been made to conform to the current year's presentation. For further details, see Note B: Summary of Significant Accounting Policies in the Notes to Financial Statements 31 December 2016 and 2015 of ADB's Ordinary Capital Resources.

I. OVERVIEW

The Asian Development Bank (ADB), a multilateral development bank, was established in 1966 under the Agreement Establishing the Asian Development Bank (the Charter).¹ ADB is owned by 67 members, 48 of which are regional members, including Japan, Australia and New Zealand, providing 63.5% of its capital and 19 non-regional members, including the United States, Canada and 17 European countries, providing 36.5% of its capital.

The vision of ADB is an Asia and Pacific free of poverty. Its mission is to help its developing member countries (DMCs) reduce poverty and improve living conditions and quality of life. ADB's strategy for reducing poverty focuses on achieving three strategic agendas: inclusive economic growth, environmentally sustainable growth, and regional integration.

ADB provides various forms of financial assistance to its DMCs. The main instruments are loans, technical assistance (TA), grants, guarantees, and equity investments. These instruments are financed through ordinary capital resources (OCR), Special Funds, and trust funds. ADB's ordinary operations are financed from OCR and special operations from Special Funds. The Charter requires that funds from each resource be kept and used separately. Trust funds are generally financed by contributions and administered by ADB as the trustee.

ADB also offers debt management products to its members and entities fully guaranteed by members such as interest rate swaps and cross currency swaps (including local currency swaps) for their third party liabilities. ADB also provides policy dialogue and advisory services, and mobilizes financial resources through its cofinancing operations, which access official and other concessional, commercial, and export credit sources to maximize the development impact of its assistance. Cofinancing for ADB projects can be in the form of external loans, grants for TA and components of loan projects, equity, and credit enhancement products such as guarantees and syndications.

II. COMBINATION OF OCR AND ADF RESOURCES

On 1 January 2017, ADB transferred loans and other assets totaling \$30,812 million from Asian Development Fund (ADF), the concessional lending window of ADB to OCR in accordance with the Board of Governors resolution authorizing the termination of ADF's lending operations. The resolution stemmed from a proposal introduced in 2014 to enhance ADB's financial capacity in a sustainable manner through more efficient and effective management of its capital resources. The proposal entailed combining ADF lending operations with the OCR and retaining the ADF as a grant-only operation. ADB would continue concessional lending on the same terms and conditions as currently provided to ADF countries through the OCR window, while the ADF would continue to provide grant assistance. The initiative will expand ADB's lending capacity—particularly to poor countries and the private sector, enhance its risk-bearing capacity, and strengthen its readiness to respond to future economic crises and natural disasters.

The transfer of these assets was treated as a contribution from ADF to OCR and a return of the set-aside resources from ADF to OCR.² This resulted in the recognition of a one-time income of \$30,748 million in OCR and a return of the set-aside resources of \$64 million. On 15 March 2017, the Board of Governors approved the allocation of the one-time income from the transfer of ADF assets to OCR Ordinary Reserve effective 1 January 2017.

¹ ADB. 1966. *Agreement Establishing the Asian Development Bank*. Manila.

² The undisbursed ADF loan balance of SDR6,281 million (\$8,444 million equivalent) was also assumed by OCR on 1 January 2017.

The transferred ADF assets are composed of loans, including accrued interest totaling \$27,088 million and liquid assets totaling \$3,724 million. Table 1 shows the balance sheet of OCR after the transfer of certain ADF assets. The sources of funding for the transferred ADF assets came from donor contributions, OCR net income transfers and set-aside resources. For further details on the composition of the sources, refer to disclosure on subsequent events in Note V of OCR financial statements and Note L of ADF financial statements.

Notes:

1. The undisbursed ADF loan balance as of 31 December 2016 of \$8,444 million was assumed by OCR on 1 January 2017.

2. 0 = amount less than \$0.5 million.

^a Including net unamortized loan origination cost, allowance for loan losses and Heavily Indebted Poor Countries debt relief, and fair value adjustment.

III. ORDINARY CAPITAL RESOURCES

This section describes the OCR operations prior to the transfer of ADF lending operations effective 1 January 2017.

Funding for OCR operations comes from three distinct sources: funds borrowed from capital markets and private placements, paid-in capital provided by shareholders, and accumulated retained income (reserves). The financial strength of ADB is based on the support it receives from its shareholders and on its financial policies and practices; shareholder support is reflected by capital subscriptions of members and the record of ADB borrowing members in meeting their debt service obligations.

Borrowed funds, together with equity, are used to fund OCR lending and investment activities and other general operations. ADB is rated triple-A by the major rating agencies and its bonds are viewed as high quality debt by investors. ADB's funding strategy is aimed at ensuring availability of funds for its operations at the most stable and lowest possible cost. Such strategy has enabled ADB to achieve cost-efficient funding levels for its borrowing members.

Loans are generally provided to DMCs that have attained higher economic development and to nonsovereign borrowers. Sovereign loans are priced on a cost pass-through basis, which means the cost of funding the loans plus a contractual spread is passed to the borrowers. ADB applies market-based pricing for nonsovereign loans. In addition to direct lending, ADB also provides guarantees to assist DMC governments and nonsovereign borrowers in securing commercial funds for ADB-assisted projects.

A. Basis of Financial Reporting

Statutory reporting. ADB prepares OCR financial statements in accordance with accounting principles generally accepted in the United States of America (US GAAP), referred to in this document as the "statutory reporting basis."

ADB manages its balance sheet by selectively using derivatives to minimize interest rate and currency risks associated with its financial instruments. Derivatives are used to enhance asset and liability management of individual positions and overall portfolios. ADB has elected not to define any qualifying hedging relationships, not because economic hedges do not exist, but rather because the application of hedging criteria under US GAAP does not make fully evident ADB's risk management strategies.

ADB reports all derivative instruments on the balance sheet at fair value and recognizes the changes in fair value for the period as part of net income. ADB also elects to measure financial instruments at fair value on a selective basis and opts to measure at fair value borrowings that are swapped or have floating interest rates, to apply a consistent accounting treatment between the borrowings and their related swaps. ADB continues to report its loans and the remaining borrowings at amortized cost, and reports most of its investments (except time deposits and other debt securities that are recorded at cost) at fair value.

Management reporting. The asymmetric accounting treatment—in which certain financial instruments (including all derivatives, swapped and floating-rate borrowings, and certain investments) are recorded at their fair value, while loans and a portion of borrowings and investments are recorded at amortized cost—leads ADB Management to believe that statutory income may not fully reflect the overall economic value of ADB's financial position. Accordingly, ADB also reports operating income, which excludes the impact of the fair value adjustments associated with financial instruments from the results of OCR operations. ADB uses operating

income as the key measure to manage its financial position, make financial management decisions, and monitor financial ratios and parameters.

Operating income does not include unrealized gains or losses of the portfolio. The unrealized gains or losses, although an important indicator of the portfolio performance, generally represent changes in income as a result of fluctuations in the fair value of selected borrowings and derivatives. Because ADB does not actively trade these financial instruments, such gains or losses are generally not realized, unless ADB is forced to do so by risk events before maturity. ADB has instituted conservative risk management policies to mitigate such risks.

ADB intends to hold most borrowings and related swaps until maturity or call, hence net interim unrealized gains and losses reported under the statutory reporting basis will eventually converge with the net realized income and expenses that ADB recognizes over the life of the financial instrument.

The management reporting basis balance sheet reconciled from the statutory reporting basis balance sheet as of 31 December 2016 is provided in the Appendix.

B. Selected Financial Data

Selected financial data are presented on a statutory reporting basis and management reporting basis (Table 2). Rates of return on equity and earning assets under the management reporting basis improved in 2016 compared with 2015, mainly as a result of higher capital gains on equity investment sales. Conversely, under statutory reporting basis, rates of return on equity and earning assets were close to nil in 2016 because the unfavorable fair value adjustments on borrowings and related derivatives almost matched the operating income. Return on loans, return on investments and cost of borrowings, under both the statutory and management reporting bases increased due primarily to the rising trend in US dollar interest rates (Table 3). Under management reporting basis, the margin between return on loans and cost of borrowings was stable at 0.64% in 2016 and 2015. Income and expenses are discussed in the next section.

C. Overall Financial Results

Net income. Table 4 presents the overall financial results for 2016 and 2015. Net income was \$7 million, compared with \$556 million for 2015. The decreased net income from 2015 is mainly attributed to the unrealized losses from ADB's borrowings and associated derivatives.

Table 4: Overall Financial Results for the Year Ended 31 December

() = negative, EI = equity investments, OCR = ordinary capital resources.

Note: 0 = amount less than \$0.5 million.

^a Includes income and related expenses from guarantees and income from trust funds administration.

Operating income. Operating income in 2016 increased to \$521 million, from \$343 million in 2015.³ The change in operating income was primarily driven by:

- (i) \$365 million increase in income from loans, due to increase in average outstanding loans and higher interest rates;
- (ii) \$87 million increase in income from investments due to higher average return and slight growth in average investments;
- (iii) \$97 million increase in income from equity investments mainly due to divestment gains;

These were partially offset by:

- (iv) \$378 million increase in borrowings and related expenses resulting from rising trend in short-term interest rates and larger average outstanding borrowings; and
- (v) \$7 million increase in administrative expenses.

³ Operating income is defined as statutory net income before unrealized gains or losses and ADB's proportionate share in unrealized gains or losses from equity investment accounted for under the equity method.

Net unrealized gains and losses. During 2016, ADB reported net unrealized losses of \$520 million (2015: \$239 million net unrealized gains), which primarily consisted of fair value adjustments on certain borrowings and derivatives used for hedging borrowings, investments and loans. A large portion of the net unrealized losses was the result of changes in the fair value of borrowings and related derivatives amounting to \$523 million (2015: net unrealized gains of \$244 million) due to movements in ADB's credit spreads, interest rates and yield basis spreads.

D. Operating Activities

ADB provides financial assistance under its ordinary operations to its DMCs through loans (including other debt securities), guarantees and equity investments to help them meet their development needs. ADB also promotes cofinancing of its projects and programs to complement its assistance with funds from official and commercial sources, including export credit agencies. ADB also provides debt management products to its members and member-guaranteed entities for their third party liabilities.

1. Loans

ADB is authorized under the Charter to make, participate in or guarantee loans to its DMCs, to any of their agencies, instrumentalities or political subdivisions, and to any entities or enterprises operating within such countries, as well as to international or regional agencies or entities concerned with the economic development of the region. Such loans are made only for projects or programs of high developmental priority.

ADB's lending limitation policy limits the total amount of disbursed loans, disbursed equity investments and related prudential buffer, and the maximum amount that could be demanded from ADB under its guarantee portfolio, to the total amount of ADB's unimpaired subscribed capital, reserves, and surplus, exclusive of the special reserve. As of 31 December 2016, the total of such loans (including other debt securities), equity investments and related prudential buffer, and guarantees was \$68,786 million (2015: \$63,042 million), compared with the maximum lending ceiling of \$154,938 million (2015: \$159,136 million), which resulted in a headroom of \$86,152 million (2015: \$96,094 million).

ADB's projects undergo an evaluation and approval process that includes such factors as economic, social, environmental, technical, institutional and financial feasibility, effect on the general development activity of the country concerned, contribution to economic development, capacity of the borrowing country to service additional external debt, effect on domestic savings, balance of payments effects, impact of new technologies on productivity, and expansion of employment opportunities.

Except in special circumstances, ADB requires that the proceeds of its loans (including other debt securities), and equity investments and the proceeds of the loans it guarantees be used only for procurement of goods and services produced in and supplied from member countries. Loan disbursements must comply with the requirements specified in loan agreements. ADB's staff review progress and monitor compliance with ADB policies. ADB's Independent Evaluation Department, reporting directly to ADB's Board of Directors, evaluates the development effectiveness of ADB's operations.

ADB offers the multitranche financing facility (MFF), a debt financing facility that delivers financial resources for a program or investment in a series of separate financing tranches over a fixed period. Financing tranches may be provided as loans, guarantees, or any combination of these instruments based on periodic financing requests (PFRs) submitted by the borrower.

In 2011, ADB reviewed its policy-based lending and enhanced the program lending policy by mainstreaming programmatic budget support and enhancing crisis response capacity. Consequently, ADB offers four policy-based lending products, each catering to a different situation in a DMC: stand-alone policy-based lending, programmatic approach, special policy-based lending, and countercyclical support facility (CSF) lending.

In April 2011, ADB established the project design facility (PDF) on a pilot basis to support project preparation, particularly detailed engineering designs, through project design advances (PDA). The facility is designed to be refinanced from the proceeds of the ADB loan for the ensuing project. The pilot period has been extended for 3 years (until 31 December 2017).

In March 2013, the Board of Directors approved piloting results-based lending (RBL). This modality will support government-owned sector programs and disburse ADB financing based on program results. Loan terms under RBL are the same as for investment projects.

Nonsovereign operations. ADB provides lending without sovereign guarantee to privately-held or state-owned or subsovereign entities. In its nonsovereign operations, ADB provides financial assistance on market-based terms and conditions to provide investment capital. ADB's nonsovereign operations primarily focus on two of the core areas of operations identified in Strategy 2020, namely infrastructure (with particular emphasis on energy) and finance. Strategic interventions focus on renewable energy and other infrastructure sectors. ADB's participation is meant to catalyze or bring about financing from other sources – both local and foreign – and not to compete with these sources. ADB cannot be the largest single investor in an enterprise. As needed, ADB will help mobilize additional debt from commercial banks, other development institutions, and financing partners.

Loan approvals, disbursements, repayments, and prepayments. In 2016, approved loans totaled \$13,572 million, representing a \$934 million increase from 2015 (\$12,638 million).⁴ ADB approved 68 sovereign loans totaling \$11,387 million, including three PDA loans for \$25 million and 32 nonsovereign loans totaling \$2,185 million, compared with 2015 approvals of 58 sovereign loans totaling \$10,488 million, including one PDA loan for \$3 million and 24 nonsovereign loans totaling \$2,150 million.

In 2016, MFFs totaling \$4,393 million (2015: \$1,224 million) were approved under OCR while \$283 million were reallocated from ADF (2015: \$130 million were reallocated to ADF and a cofinancier).⁵ Under the MFFs, PFRs totaling \$2,319 million were approved in 2016 (2015: \$2,609 million); a total of \$2,582 million was disbursed in 2016 (2015: \$2,149 million). In 2016, ADB approved two OCR loans totaling \$375 million under RBL (2015: three loans totaling \$1,025 million); and disbursed a total of \$398 million (2015: \$193 million).

Disbursements in 2016 totaled \$9,763 million (\$8,247 million for sovereign loans and \$1,516 million for nonsovereign loans), a slight increase from the \$9,667 million disbursed in 2015 (\$8,223 million for sovereign loans and \$1,444 million for nonsovereign loans). Regular principal repayments in 2016 were \$3,818 million (2015: \$3,325 million), while prepayments totaled \$311 million (2015: \$154 million). In 2016, 10 loans were fully prepaid for \$275 million, and three loans were partially prepaid for \$36 million. As of 31 December 2016, loans outstanding after allowance for loan losses and net unamortized loan origination cost totaled \$67,599 million, of which sovereign loans represented \$62,413 million and nonsovereign loans \$5,186 million.

A summary of the OCR total loan portfolio by member country as of 31 December 2016 is set forth in OCR-6 of the Financial Statements. A breakdown by sector of loans as of 31 December

⁴ These are net of adjustments and terminations prior to signing.

⁵ These amounts may be adjusted based on flexibility in the use of OCR and ADF funding.

2016 is shown in Table 5.

Table 5: Sectoral Breakdown of Total OCR Loan Portfolio^a
As of 31 December 2016

Sector	\$ million	%
Transport	36,954	34.9
Energy	25,372	24.0
Public Sector Management	10,904	10.3
Water and Other Urban Infrastructure and Services	10,196	9.6
Finance	8,560	8.1
Agriculture, Natural Resources and Rural Development	5,972	5.6
Education	2,854	2.7
Multi-Sector	2,561	2.4
Industry and Trade	1,517	1.4
Health	734	0.7
Information and Communication Technology	217	0.2
Total	105,841	100.0

OCR = ordinary capital resources.

Note: Percentages may not sum precisely because of rounding.

^a Includes outstanding loans of \$67,547 million, effective but undisbursed loans of \$26,898 million and approved loans that are not yet effective of \$11,396 million. Of the approved loans that are not yet effective, only \$2,890 million have been signed, but the loans are not effective and disbursements will not start until the relevant conditions to the effectiveness of the loans have been fulfilled.

The majority of outstanding loans (92.2%) have been made to the public sector (member countries and, with the guarantee of the concerned member, government agencies or other public entities) (Table 6). The rest have been made to private sector enterprises, financial institutions, and selected nonsovereign public sector entities.

Table 6: Loan Status at 31 December 2016 and 2015

Item	Outstanding				Effective but Undisbursed			
	2016		2015		2016		2015	
	\$ million	%	\$ million	%	\$ million	%	\$ million	%
Sovereign	62,278	92.2	57,432	92.8	25,575	95.1	24,334	93.9
Nonsovereign	5,269	7.8	4,457	7.2	1,323	4.9	1,577	6.1
Total Loans	67,547	100.0	61,889	100.0	26,898	100.0	25,911	100.0

Note: Excludes approved loans that are not yet effective totalling \$11,396 million in 2016 (2015: \$10,099 million).

Status of loans. One nonsovereign loan was in nonaccrual status with outstanding principal of \$20 million and no overdue principal as of 31 December 2016 (nil – 31 December 2015).

Lending windows. ADB's currently available lending windows are the LIBOR-based loan (LBL) window and the local currency loan (LCL) window. The LBL has been the primary lending facility for OCR sovereign operations since 2001. The LBL is designed to meet demand by borrowers for loan products that suit project needs and effectively manage their external debt. The LBL also gives borrowers a high degree of flexibility in managing interest rate and exchange rate risks, while providing low intermediation risk to ADB. ADB has offered LCLs to nonsovereign borrowers since November 2002, and this was expanded to sovereign borrowers in August 2005.

Discontinued lending windows. With the introduction of the LBL in July 2001, ADB's pool-based single currency loans (PSCL), market-based loans (MBL), and fixed-rate multicurrency loans were no longer offered.

A breakdown of ADB's loan portfolio by loan product as of 31 December 2016 and 2015 is presented in Table 7.

Table 7: Loan Portfolio by Lending Windows

as of 31 December 2016 and 2015

Item	(\$ million)			
	Sovereign		Nonsovereign	
	2016	2015	2016	2015

Outstanding	62,278	57,432	5,269	4,457
Effective but Undisbursed	25,575	24,334	1,323	1,577

– = nil, LIBOR = London interbank offered rate.

Note: Excludes approved loans that are not yet effective totalling \$11,396 million in 2016 (2015: \$10,099 million).

Sovereign loan charges. LBLs carry a floating lending rate that comprises a funding cost margin over or under the 6-month London interbank offered rate (LIBOR) and an effective contractual spread. LCLs may be made on a floating rate basis, and typically reset every 6 months. The cost-base rate of an LCL is based on back-to-back or a pool-based funding. The lending rate is reset every 6 months on each interest reset date and can be converted into a fixed rate at the request of the borrower. The lending rates for PSCLs are based on the previous semester's average cost of borrowing. Interest rates for MBL are either fixed or floating. The floating rates are determined based on the 6-month LIBOR, with reset dates of 15 March and 15 September or 15 June and 15 December. OCR loans under PDF carry standard OCR lending rates. Payment of interest is deferred until the PDA is refinanced out of the loan proceeds or other repayment terms take effect.

A commitment charge is levied on the undisbursed loans beginning 60 days after signing of the applicable loan agreement; charges begin to accrue when the loan becomes effective, except for PDAs where commitment charges start to accrue after two years from the date the PDA agreement is signed.

Lending spread. Effective in 2000, all sovereign loans without specific provisions in the loan agreements were charged a lending spread of 60 basis points over the base lending rate.

Starting in 2004, ADB provided a 20 basis points waiver on the lending spread for borrowers or guarantors that have no OCR loans in arrears under ADB sovereign operations.⁶ The waiver for

⁶ Applicable for sovereign loans negotiated before 1 October 2007.

the applicable loans is reviewed annually. In December 2014, the Board of Directors approved the continuation of this waiver⁷ for borrowers of US dollar PSCL covering interest periods commencing from 1 January 2015 to 31 December 2015. Subsequently, the Board approved extending this waiver, the most recent extension being for interest periods commencing 1 January 2017 to 31 December 2017. In 2016, the total waiver provided on the lending spread was \$5 million (2015: \$6 million).

In December 2007, the ADB Board of Directors approved a revision to the pricing structure for all LBLs and LCLs negotiated on or after 1 October 2007, eliminating the waiver mechanism and provided a credit of 0.4% for the duration of the loan. This resulted in an effective contractual spread of 20 basis points over the base lending spread.

The Board of Directors subsequently revised the loan charges, where for LBLs and LCLs (i) negotiated from 1 July 2010 up to and including 30 June 2011, that the credit of 0.4% be reduced to 0.3% for the duration of the loan, to result in a contractual spread of 0.3% over the base lending rate; and (ii) negotiated from 1 July 2011, that the credit of 0.4% be reduced to 0.2% for the duration of the loan. This resulted in a contractual spread of 0.4% over the base lending rate.

In December 2013, the Board of Directors approved a revision to the loan pricing for all LBLs and LCLs negotiated on or after 1 January 2014, reducing the credit of 0.2% to 0.1% for the duration of the loan. This resulted in a contractual spread of 0.5% over the base lending rate.

The loans approved under the CSF carry a lending spread of 200 basis points over the base lending rate.

Maturity premium. In December 2011, the Board of Directors approved the introduction of maturity premiums for all LBLs (other than PDF loans) and LCLs for which formal loan negotiations were completed on or after 1 April 2012 of:

- (i) 10 basis points per annum on loans with an average loan maturity of greater than 13 years and up to 16 years, and
- (ii) 20 basis points per annum on loans with an average loan maturity of greater than 16 years and up to 19 years.

ADB also introduced a limit on the average loan maturity for new loans to not exceed 19 years. As of 31 December 2016, 179 approved loans totaling \$27,141 million were subject to maturity premium (2015: 140 approved loans totaling \$20,643 million [footnote 4]).

Rebates and surcharges. To maintain the principle of the cost pass-through pricing policy, ADB passes on the actual funding cost margin above or below LIBOR to its borrowers through a surcharge or rebate (Table 8). The funding cost margins are reset semi-annually (on 1 January and 1 July), and are based on the actual average funding cost margin for the preceding 6 months. The rebates or surcharges are passed on to borrowers by incorporating them into the interest rate for the succeeding interest period. ADB returned a sub-LIBOR funding cost margin of \$62 million to its borrowers in 2016 (2015: \$75 million).

⁷ This applies to borrowers or guarantors that do not have any OCR loans in arrears under ADB's sovereign operations.

Table 8: Funding Cost Margin on LIBOR-based Loans^a

Type	(% per year)			
	(Rebate) or Surcharge			
	1 July 2016	1 January 2016	1 July 2015	1 January 2015
LIBOR-based Loans				
US dollar	(0.07)	(0.11)	(0.12)	(0.15)
Yen	(0.48)	(0.47)	(0.46)	(0.42)
Euro	(0.35)	(0.39)	n/a	n/a
New Zealand dollar	0.29	0.29	0.29	0.29
CSF Loans				
US dollar	(0.04)	(0.04)	n/a ^b	n/a ^b

() = negative, n/a = not applicable, CSF = Countercyclical Support Facility, LIBOR = London interbank offered rate, US = United States.

^a Funding cost margins are announced on 1 January and 1 July and are valid for 6 months.

^b Disbursements under CSF for 2015 were made only in December.

Lending rates for PSCLs are based on the previous semester's average cost of borrowing (Table 9) and carry a lending spread of 60 basis points.

Table 9: PSCL Lending Rates^a

	(% per year)		
	2016	2015	Currency
1 January	5.66	5.51	US dollar ^b
	0.36	0.48	Yen
1 July	6.01	5.59	US dollar ^b
	0.27	0.40	Yen

PSCL = pool-based single currency loan, US = United States.

^a Lending rates are set semi-annually on 1 January and 1 July and are valid for 6 months.

^b Net of 20 basis points lending spread waiver.

Commitment charge. ADB borrowers are charged commitment fees on the undisbursed loan balances for sovereign LBLs. The charges differ depending on when the loan was negotiated (Table 10).

Table 10: Commitment Fees

Negotiation Date	(% per year)			
	Project loans	Policy-based loans CSF	Others	Results-based lending loans
On or before 1 January 2007, with undisbursed balance as of 1 January 2007	0.75 ^a	n/a	–	n/a
After 1 January 2007 and before 1 October 2007	0.35	n/a	–	n/a
On or after 1 October 2007	0.15	0.75	0.15	0.15

– = nil, n/a = not applicable, CSF = Countercyclical Support Facility.

^a Progressive.

Nonsovereign loan charges. For nonsovereign loans, ADB applies market-based pricing to determine the lending spread, front-end fees, and commitment charges for each loan. The lending spread is intended to cover ADB's risk exposure to specific borrowers and projects and the front-end fee to cover the administrative costs incurred in loan origination. Front-end fees are typically 1% to 1.5% depending on the transaction. ADB applies a commitment fee (typically 0.50% to 0.75% per year) on the undisbursed loan balance.

LCLs are priced based on relevant local funding benchmarks or ADB's funding costs and a market-based spread.

Direct value-added official loan cofinancing. In 2016, \$7,362 million from official sources was mobilized for loan cofinancing for 43 loan projects, of which \$784 million is under ADB administration and \$6,578 million is under collaborative arrangements. (Refer to Note F of OCR Financial Statements for loans administered by ADB as of 31 December 2016).

2. Guarantees

Guarantees are typically designed to facilitate cofinancing by mitigating the risk exposure of commercial lenders and capital market investors. Guarantees can be provided when ADB has a direct or indirect participation in a project or a related sector, through a loan, equity investment or technical assistance, ADB provides two primary guarantee products – a credit guarantee and a political risk guarantee. ADB's credit guarantee is designed as credit enhancements for eligible projects to cover risks that the project and its commercial cofinancing partners cannot easily absorb or manage on their own. ADB also provides political risk guarantees to cover specifically defined political risks. Reducing these risks can make a significant difference in mobilizing debt funding for projects. ADB has used its guarantee instruments successfully for infrastructure projects, financial institutions, capital markets, and trade finance. These instruments generally are not recognized in the balance sheet and have off-balance-sheet risks. For guarantees issued and modified after 31 December 2002, ADB recognizes at the inception of a guarantee the noncontingent aspect of its obligations. In 2016, ADB approved one new guarantee facility and an additional approval to one existing facility totaling \$515 million (2015: two new guarantee facilities and an additional approval to one existing facility totaling \$341 million).

ADB's exposure on guarantees as of 31 December 2016 and 2015 are shown in Table 11.

Table 11: Outstanding Guarantee Exposure

As of 31 December 2016 and 2015

(\$ million)		
Item	2016	2015
Credit guarantee		
Trade related	1,088	525
Non-Trade related	996	809
Political risk guarantee	21	73
Total	2,105	1,407

Note: Trade related guarantees are gross of risk distribution amounting to \$476 million in 2016 (2015: \$135 million)

Trade Finance Program. The Trade Finance Program (TFP), which started operations in 2004, comprises three products: (i) a credit guarantee facility, under which ADB issues guarantees to participating international and regional banks to guarantee payment obligations issued by an approved DMC and/or local banks in selected DMCs; (ii) a revolving credit facility, under which ADB provides trade-related loans to DMC banks in support of DMC companies' export and

import activities; and (iii) a risk participation agreement, under which ADB shares risk with international banks to support and expand trade in challenging and frontier markets. The credit guarantee and risk participation agreement are unfunded products, while the revolving credit facility is funded.

In 2016, TFP supported \$3,090 million (2015: \$2,548 million) in trade through 62 DMC banks in 14 different countries. Of the trade supported, \$1,325 million was financed by ADB (2015: \$1,133 million) and \$1,765 million was cofinanced (2015: \$1,415 million).

TFP transactions have average maturities of less than 180 days which enabled the TFP to revolve its \$1 billion limit in 2016 to finance a total of \$1,325 million of guarantees and loans. As of 31 December 2016, TFP unused risk participation amounted to \$125 million (2015: \$275 million), TFP guarantees outstanding totaled \$1,088 million (2015: \$525 million) and loans outstanding totaled \$43 million (2015: \$16 million). Of the outstanding TFP guarantees and loans, \$481 million were with risk distribution (2015: \$140 million), resulting in a net exposure of \$650 million (2015: \$402 million).

Supply Chain Finance Program. In 2012, ADB established the Supply Chain Finance Program totaling \$200 million to provide guarantees and loans (both without government guarantee) through partner financial institutions to support payments to suppliers and distributors of goods in DMCs. In 2016, the program provided guarantees of \$101 million (2015: \$46 million) and the outstanding guarantee amount as of 31 December 2016 was \$29 million (2015: \$22 million).

3. Syndications

Syndications refer to the pooling of financing and sharing of risk among financiers. It enables ADB to mobilize cofinancing by transferring some or all of the risks associated with its loans and guarantees to other financing partners.⁸ Thus, syndications decrease and diversify the risk profile of ADB's financing portfolio. Syndications may be on a funded or unfunded basis, and they may be arranged on an individual, portfolio, or any other basis consistent with industry practices. Under this activity, in 2016, \$203 million of B-loans were approved for five projects (2015: \$1,085 million for eight projects).⁹

4. Equity Investments

The Charter allows the use of OCR for equity investments up to 10% of ADB's unimpaired paid-in capital actually paid up at any given time together with reserves and surplus, excluding special reserves. At the end of 2016, the total equity investment portfolio for OCR, including prudential buffers¹⁰, was \$1,133 million (2015: \$1,187 million), or about 63% (2015: 67%) of the ceiling defined by the Charter.

In 2016, ADB approved four equity investments totaling \$77 million (2015: four equity investments totaling \$130 million [footnote 4]). Equity investments disbursements in 2016 totaled \$79 million, a 36% decrease from the \$123 million in 2015, and received a total of \$261 million from capital distributions and divestments, whether in full or in part, in 30 projects. The divestments were carried out in a manner consistent with good business practices, after ADB's development role in its investments had been fulfilled, and without destabilizing the companies.

⁸ Depending on whether ADB retains risk or not, ADB may or may not have a contingent liability.

⁹ A B-loan is a tranche of a direct loan nominally advanced by ADB, subject to eligible financial institutions taking funded risk participation within such a tranche and without recourse to ADB. It complements an A-loan funded by ADB. B-loan figures for 2016 and 2015 include US dollar and local currency complementary loans.

¹⁰ Represents 80% and 100% of the signed and undisbursed amounts for private equity funds and direct equity investments, respectively.

5. Debt Management Products

ADB offers debt management products to members and entities fully guaranteed by members in relation to their third-party liabilities.

Debt management products offered by ADB include currency swaps, including local currency swaps, and interest rate swaps. While currency swaps include the possibility of members or guaranteed entities transforming a foreign currency liability into a local currency liability, the reverse transformation of a local currency liability into a foreign currency liability is not offered.

E. Financing Resources

ADB's ordinary operations are financed from ADB's OCR, which consist primarily of its subscribed capital stock, proceeds from its borrowings, and funds derived from its ordinary operations.

1. Equity

As of 31 December 2016, ADB had 67 members with Japan and the United States as the two largest shareholders. Out of the 67 members, 27 members are non-borrowing members holding 66.8% of total shareholdings with a total voting power of 61.5%. The capital subscription of all ADB members is shown in OCR-8 of the Financial Statements.

The total authorized capital of ADB was 10,638,933 shares valued at \$143,022 million as of 31 December 2016. The details of ADB's equity as of 31 December 2016 and 2015 are shown in Table 12.

Table 12: Details of Equity
(\$ million)

	2016	2015
Subscribed	142,699	147,052
Less: Callable capital subscribed	135,545	139,678
Paid-in capital subscribed	7,154	7,374
Less: Other adjustments ^a	79	81
	7,075	7,293
Add: Reserves ^b , Surplus, Accumulated Net Income and Other Comprehensive Loss less nonnegotiable, noninterest-bearing demand obligations on account of subscribed capital and net notional amounts required to maintain value of currency holdings	10,139	10,153
Total Equity	17,214	17,446

^a Comprises capital transferred to the Asian Development Fund and discount. (See OCR-9 of the Financial Statements, Note M).

^b For a description of reserves, see OCR-9 of the Financial Statements, Note N.

Total shareholders' equity decreased from \$17,446 million as of 31 December 2015 to \$17,214 million as of 31 December 2016. This mainly resulted from (i) \$203 million comprehensive loss in 2016 mainly from unfavorable fair value changes in available for sale investments and adjustments to the postretirement benefit liabilities, (ii) \$160 million transfers to Special Funds, and (iii) \$64 million drop in the USD value of paid-in capital brought by the depreciation of special drawing rights (SDR) against the US dollar, net of members' maintenance of value obligations; offset by the (iv) demand notes encashment totaling \$189 million.

Callable capital. Callable capital can be called only if required to meet ADB's obligations incurred on borrowings or guarantees under OCR. No call has ever been made on ADB's callable capital.

Paid-in capital. ADB's paid-in capital may be freely used in its ordinary operations, except that DMCs have the right under the Charter to restrict the use of a portion of their paid-in capital to making payments for goods and services produced and intended for use in their respective territories. (See OCR-9 of the Financial Statements, Note C).

The Charter authorizes the Board of Governors, by a vote of two-thirds of the total number of Governors representing at least three-quarters of the total voting power of the members, to set aside to Special Funds up to 10% of ADB's unimpaired capital paid-in by members. (See IV Special Funds). As of December 31, 2016, a total of \$64 million (0.9% of unimpaired paid-in capital) had been set aside and transferred to the ADF, one of ADB's Special Funds. This was subsequently returned to OCR on 1 January 2017 following the termination of ADF's lending operations.

Allocation of OCR net income. In accordance with Article 40 of the Charter, the Board of Governors annually approves the allocation of the previous year's net income to reserves and/or surplus. In addition, to the extent feasible, it approves the transfer of part of net income to Special Funds to support development activities in the DMCs.

In May 2016, the Board of Governors approved the following with respect to ADB's 2015 net income of \$537 million, after appropriation of guarantee fees to special reserve: (i) \$43 million representing the adjustment to the Loan Loss Reserve as of 31 December 2015, be added from the loan loss reserve to the net income; (ii) \$213 million representing the Accounting Standards Codification (ASC) 815/825 adjustments and the unrealized portion of net income from equity investments accounted for under the equity method for the year ended 31 December 2015, be added to the Cumulative Revaluation Adjustments account; (iii) \$208 million be allocated to the Ordinary Reserve; (iv) \$120 million be allocated to ADF; and (v) \$40 million be allocated to Technical Assistance Special Fund (TASF).

2. Borrowings

General Borrowing Policies. Under the Charter, ADB may borrow only with the approval of the country in whose market ADB's obligations are to be sold and the member in whose currency such obligations are to be denominated. ADB must also obtain the approvals of the relevant countries so that the proceeds of its borrowings may be exchanged for the currency of any member without restriction. The Charter also requires ADB, before determining to sell its obligations in a particular country, to consider the amount of previous borrowings in that country, the amount of previous borrowings in other countries, and the availability of funds in such other countries, giving due regard to the general principle that its borrowings should to the greatest extent possible be diversified as to country of borrowing.

ADB's borrowing policy limits ADB's gross outstanding borrowings to no more than the sum of callable capital of non-borrowing members, paid-in capital, and reserves (including surplus). Based on such policy, the sum of such capital and reserves as of 31 December 2016 was \$110,043 million (\$112,755 million in 2015). The aggregate of ADB's gross outstanding borrowings after swaps of \$77,232 million as of 31 December 2016 (2015: \$68,965 million) was equivalent to 70% (61% in 2015) of such ceiling.

Funding Operations. ADB raises funds for its ordinary operations through the issue and sale of debt obligations in the international capital markets. ADB's primary borrowing objective is to ensure the availability of funds for its operations at the most stable and lowest possible cost. Subject to this objective, ADB seeks to diversify its funding sources across markets, instruments, and maturities. In 2016, ADB continued to employ a strategy of issuing liquid benchmark bonds to maintain its strong presence in key currency bond markets, and raising funds through opportunistic financing and private placements, such as retail-targeted transactions and structured notes, which provide ADB with cost-efficient funding levels.

2016 funding operations. In 2016, ADB raised the equivalent of \$20,602 million (2015: \$18,948 million) in medium- and long-term funds with 74 borrowing transactions. The new borrowings were raised in 14 currencies: Australian dollar, Brazilian real, yuan, euro, Georgian lari, Hong Kong dollar, Indian rupee, yen, New Zealand dollar, pound sterling, Singapore dollar, South African rand, Turkish lira, and US dollar. The average maturity to first call date of these borrowings is 4.1 years (2015: 4.7 years). Of the 2016 borrowings, \$18,190 million was raised through 28 public offerings and the remaining \$2,412 million was raised through 46 private placements.

Following the launch of the Green Bond program in 2015, ADB issued a dual tranche green bond offering in 2016 raising a total of \$1.3 billion. Total green bonds outstanding as of end 2016 was \$1.8 billion.

ADB also raised \$8,341 million (\$4,082 million in 2015) of short-term funds under its Euro-Commercial Paper Program (ECP). Of the ECPs issued in 2016, \$2,330 million were outstanding as of 31 December 2016. Table 13 shows details of 2016 borrowings as compared with 2015.

Table 13: Borrowings
(\$ million)

Item	2016	2015

Public Offerings	5	5
Private Placements	10	9
Short Term^a		
Total Principal Amount ^b	8,341	4,082
Number of Transactions	62	29
Number of Currencies	1	1

^a All euro commercial papers.

^b At year-end, the outstanding principal amount was \$2,330 million in 2016 (\$1,317 million in 2015).

Use of derivatives. ADB undertakes currency and interest rate swaps to cost-efficiently and on a fully hedged basis raise the currencies needed for its operations, while maintaining its borrowing presence in major capital markets. Figures 1 and 2 show the effects of swaps on the currency composition and interest rate structure of ADB's outstanding borrowings as of 31

December 2016. Interest rate swaps are also used for asset and liability management purposes to match the liabilities with the interest rate characteristics of loans.

F. Liquidity Portfolio

The liquidity portfolio helps ensure the uninterrupted availability of funds to meet loan disbursements, debt servicing, and other cash requirements; provides a liquidity buffer in the event of financial stress; and contributes to ADB's earning base. ADB's Investment Authority governs ADB's investments in liquid assets. The primary objective is to maintain the security and liquidity of the funds invested. Subject to these two parameters, ADB seeks to maximize the total return on its investments. ADB does not switch currencies to maximize returns on investments, and investments are generally made in the same currencies in which they are received. At the end of 2016, ADB held liquid investments in 23 currencies.

Liquid investments are held in government or government-related debt instruments, time deposits, and other unconditional obligations of banks and financial institutions. To a limited extent, they are also held in corporate bonds that are rated at least A–. These investments are held in five portfolios—core liquidity, operational cash, cash cushion, discretionary liquidity, and ad hoc—all of which have different risk profiles and performance benchmarks. The year-end balance of the portfolios in 2016 and 2015 is presented in Table 14. The amortized cost and fair value returns of the portfolios are presented in Table 15.

Table 14: Year-End Balance of Investment Portfolio^a

(\$ million)		
Item	2016	2015
Core Liquidity Portfolio	16,367	15,308
Cash Cushion Portfolio	1,538	550
Operational Cash Portfolio	98	113
Discretionary Liquidity Portfolio	8,437	7,771
Ad hoc Portfolio	120	127
Total	26,560	23,869

^a Including securities purchased under resale arrangements, securities transferred under repurchase agreements, and investment related swaps. The composition of the liquidity portfolio may shift from year to year as part of ongoing liquidity management.

Table 15: Return on Investment Portfolio

(%)				
Item	Annualized Return			
	Amortized Cost		Fair Value	
	2016	2015	2016	2015
Core Liquidity Portfolio	1.9	1.8	1.0	1.3
Operational Cash Portfolio	0.7	0.3	0.7	0.3
Cash Cushion Portfolio	0.9	0.6	0.9	0.6
Discretionary Liquidity Portfolio ^a	0.5	0.3	0.5	0.3
Ad hoc Portfolio	3.4	3.1	5.0	0.9

Note: The amortized returns are based on income from investments and realized gains and losses reported in the Statement of Income and Expenses. The fair value return incorporate unrealized gains and losses that are reported as part of other comprehensive income loss and movements are dependent on prevailing market environment.

^a Spread over funding cost.

The core liquidity portfolio (CLP) is invested to ensure that the primary objective of a liquidity buffer is met. Cash inflows and outflows are minimized to maximize the total return relative to a defined level of risk. The portfolio has been funded by equity, and the average duration of the major currencies in the portfolio was about 3.1 years (2015: 2.6 years) as of 31 December 2016.

The operational cash portfolio, designed to meet net cash requirements over a 1-month horizon, is funded by equity and invested in short-term highly liquid money market instruments.

The cash cushion portfolio holds the proceeds of ADB's borrowing transactions pending disbursement. It is invested in short-term instruments and aims to maximize the spread earned between the borrowing cost and the investment income.

The discretionary liquidity portfolio is used to support medium-term funding needs and is funded by debt to provide flexibility in executing the funding program over the medium-term to opportunistically permit borrowing ahead of cash-flow needs, and to bolster ADB access to short-term funding through continuous presence in the market.

G. Contractual Obligations

In the normal course of business, ADB enters into contractual obligations that may require future cash payments. Table 16 summarizes ADB's significant contractual cash obligations as of 31 December 2016 and 2015. Long-term debt includes direct medium- and long-term borrowings, excluding swaps, and excludes unamortized premiums, discounts, and the effects of applying ASC 815. Other long-term liabilities correspond to accrued liabilities, including pension and postretirement medical benefits.

Table 16: Contractual Cash Obligations

(\$ million)		
Item	2016	2015
Long-Term Debt	55,928	51,820
Undisbursed Loan Commitments	29,787	29,801
Guarantee Commitments	2,462	1,975
Undisbursed Equity Investment Commitments	422	432
Undisbursed Commitment for Other Debt Securities	75	4
Other Long-Term Liabilities	1,445	1,358
Total	90,119	85,390

H. Risk Management

In its operations, ADB faces various kinds of risks, including financial, operational, and other organizational risks. ADB has a risk management framework that is built on the three core components of governance, policies, and processes. Governance starts with the Board of Directors, which plays a key role in reviewing and approving risk policies that define ADB's risk appetite. ADB also maintains an independent risk management group and has various management-level committees with responsibility to oversee bank-wide risk issues and endorse related decisions for approval by the Board and President. ADB's risk management framework also includes the Risk Committee, which provides high-level oversight of ADB's risks and recommends risk policies and actions to the President.

ADB monitors the credit profile of existing transactions in the operations portfolio, conducts risk assessments of new nonsovereign transactions, and assumes responsibility for resolving distressed transactions when necessary. It also monitors market and credit risks in treasury operations, such as the credit quality of counterparties, interest rate risk, and foreign exchange risk. In addition, ADB has developed an operational risk management framework for the institution. For the aggregate portfolio, ADB monitors limits and concentrations; sets aside loan loss reserves; provides loan loss provisions, including collective provision requirements; and assesses its capital adequacy.

Risk to which ADB is exposed in carrying out its mission include: (i) credit risk, (ii) market risk, (iii) liquidity risk, and (iv) operational risk. This section discusses each of these risks as well as ADB's capital adequacy—ADB's ultimate protection against unexpected losses—and its asset and liability management.

1. Credit Risk

Credit risk is the risk of loss that could result if a borrower or counterparty defaults or if its creditworthiness deteriorates. Related to credit risk, ADB also faces concentration risk, which arises when a high proportion of the portfolio is allocated to a specific country, industry sector, obligor, type of instrument, or individual borrower.

ADB assigns a risk rating to each loan, guarantee, and treasury counterparty (Table 17). For nonsovereign transactions, the rating typically is not better than that of the sovereign.

Table 17: Asian Development Bank Internal Risk Rating Scale

ADB Internal Rating Scale	Credit Rating Agency Equivalent	ADB Definitions
1	AAA / Aaa to A / A2	Lowest expectation of credit risk
2	A– / A3	Very low credit risk
3	BBB+ / Baa1	Low credit risk
4	BBB / Baa2	Low credit risk
5	BBB– / Baa3	Low to medium credit risk
6	BB+ / Ba1	Medium credit risk
7	BB / Ba2	Medium credit risk
8	BB– / Ba3	Medium credit risk
9	B+ / B1	Significant credit risk
10	B / B2	Significant credit risk
11	B– / B3	Significant credit risk
12	CCC+ / Caa1	High credit risk
13	CCC / Caa2 to C	Very high credit risk
14	D	Default

n/a = not applicable.

Note: Numbers may not sum precisely because of rounding.

^a The sum of disbursed and outstanding loan balances (including investments in nonconvertible debentures reported as other debt securities) and the present value of guaranteed obligations.

^b At fair value. Inclusive of investments in compulsorily convertible debentures reported as other debt securities.

ADB is exposed to credit risk in its sovereign, nonsovereign, and treasury operations. The sovereign portfolio includes sovereign loan and guarantees as well as one equity investment, while the nonsovereign portfolio includes nonsovereign loan and guarantees, equity investments (direct and private equity funds), and other debt securities. The treasury portfolio includes fixed-income securities, cash and cash equivalents, and derivatives. Table 18 details the credit risk exposure and weighted average risk rating for each asset class. Aggregate credit risk has remained at 3.9 (BBB) in 2016 as the growth of the nonsovereign portfolio with relatively weaker credit rating (BB+ on average) was offset by the growth of the highly-rated Treasury portfolio (AA) and sovereign portfolio (BBB-). In terms of volume, ADB's nonsovereign loan and guarantee exposure increased by 29% while the annual growth in sovereign and Treasury operations were limited to 8% and 11%, respectively.

Credit risk in the sovereign portfolio. Sovereign credit risk is the risk that a sovereign borrower or guarantor will default on its loan or guarantee obligations. ADB manages its sovereign credit risk through loan loss reserves and by maintaining conservative equity levels. OCR has experienced no loss of principal from sovereign operations. When countries have delayed payments, they have returned their loans to accrual status, and ADB has never had to write off a sovereign loan funded from OCR.

ADB charges provisions against income for a specific transaction if it is considered impaired. In addition, ADB also appropriates loan loss reserves within equity for the average loss that ADB could incur in the course of lending. The provisions are based on projections of future repayment capacity. The loan loss reserve is based on the historical default experience of sovereign borrowers to multilateral development banks. The sum of the provisions and loan loss reserve represents ADB's expected loss for sovereign operations. The 2016 results are discussed below.

Sovereign loan and guarantee exposure. The weighted average risk rating of the sovereign loan and guarantee portfolio remained at 4.9 (BBB-) in 2016 as improving sovereign credit conditions in some ADB DMCs were offset by rating downgrades of other ADB DMCs and higher disbursements to countries with weaker ratings (Figure 3). Refer to Note F of OCR Financial Statements for additional information.

Sovereign concentrations. ADB has assumed some concentration risk to fulfill its development mandate. The three largest borrowers—the People’s Republic of China, India, and Indonesia—represented 59.8% of the portfolio in 2016 (Table 19).

Table 19: Sovereign Country Exposure^a

As of 31 December 2016 and 2015

Note: Numbers may not sum precisely because of rounding.

^a The sum of disbursed and outstanding loan balances, present value of guaranteed obligations and fair values of equities.

Expected loss. In 2016, ADB experienced an improvement in the credit quality of some countries in the sovereign portfolio. Because of an increase to the ADB’s sovereign exposure, the expected loss increased from \$136 million in 2015 to \$151 million in 2016 (Table 20).

Table 20: Sovereign Portfolio Expected Loss

As of 31 December 2016 and 2015

Item	2016		2015

— = nil, SO = sovereign operations.

^a Allocation to the loan loss reserve is subject to the Board of Governors’ approval in May 2017.

Credit and equity risks in the nonsovereign portfolio. Nonsovereign credit risk is the risk that a borrower will default on a loan or guarantee obligation for which ADB does not have recourse to a sovereign entity. ADB’s nonsovereign credit risk is considered more significant than in the sovereign operations because of the uncertain economic environment in some ADB markets. In addition, ADB’s exposure is concentrated in the energy and finance sectors. ADB employs various policy-based measures to manage these risks.

The Investment Committee and the Risk Committee oversee risks in the nonsovereign portfolio. The Investment Committee reviews all new nonsovereign transactions for creditworthiness and pricing. The Risk Committee monitors aggregate portfolio risks and individual transactions with deteriorating creditworthiness. The Risk Committee also endorses changes in portfolio risks and management policy, and approves provisions for impaired transactions.

ADB manages its nonsovereign credit risk by assessing all new transactions at the concept clearance stage and before final approval. Following approval, all exposures are reviewed at least annually; more frequent reviews are performed for those that are more vulnerable to default or have defaulted. In each review, ADB assesses whether the risk profile has changed; takes necessary actions to mitigate risks and either confirms or adjusts the risk rating; and updates the valuation for equity investments including assessing whether impairments are

considered other than temporary. ADB will provide specific provisions where necessary in accordance with its provisioning policy.

ADB recognizes specific provisions in net income for known or probable losses in individual loans or guarantees, and collective provisions for probable losses that exist collectively in disbursed loans rated below investment grade. In addition, ADB appropriates loan loss reserves within equity for the average loss that ADB would expect to incur in the course of lending for credit transactions that are rated investment grade and for the undisbursed portions of credit transactions rated worse than investment grade. Specific provisions are based on projections of future repayment capacity. The collective provision and loan loss reserve are based on historical default data from Moody's Investors Service that is mapped to ADB's portfolio. ADB annually tests whether this external data reasonably corresponds to ADB's actual loss experience and may adjust estimates on the basis of this back testing. The sum of the specific provision, collective provision, and loan loss reserve represents ADB's expected loss for nonsovereign operations.

ADB uses limits for countries, industry sectors, corporate groups, obligors, products and individual transactions to manage concentration risk in the nonsovereign portfolio. The 2016 results are discussed below.

Nonsovereign loan and guarantee exposure. ADB assigns a risk rating to each nonsovereign loan and guarantee. ADB's weighted average risk rating improved slightly to 6.0 (BB+) in 2016 from 6.2 (BB+) in 2015 as transactions with high credit risk declined mainly due to (i) upgrades of some nonsovereign transactions following a high-risk sovereign's rating upgrade (Figure 4) and (ii) the full repayment of an impaired account. Refer to Note F of OCR Financial Statements for additional information.

Nonsovereign equity exposure. The nonsovereign private equity portfolio has two components: (i) direct equity investments, where ADB owns shares in investee companies; and (ii) private equity funds, where ADB has partial ownership of a private equity fund, managed by a fund manager, which acquires equity stakes in investee companies. ADB's nonsovereign private equity portfolio decreased to \$692 million in 2016 from \$797 million in 2015. The

decrease was mainly due to exits and write-offs of some investments during the year. Refer to Note H of OCR Financial Statements for additional information.

Nonsovereign concentrations. The three largest nonsovereign country exposures as of 31 December 2016 were India (22.1%), the People's Republic of China (17.0%), and Thailand (7.2%). The exposure of the top three countries decreased from 50.7% in 2015 to 46.3% in 2016 (Table 21). All country exposures complied with ADB exposure limits.

Table 21: Nonsovereign Country Exposure^a

As of 31 December 2016 and 2015

Country	2016		2015	
	\$ million	%	\$ million	%
India	1,585	22.1	1,274	21.8
People's Republic of China	1,216	17.0	1,174	20.1

Others	3,177	44.3	2,268	38.9
Total	7,175	100.0	5,837	100.0

Note: Numbers may not sum precisely because of rounding.

^a The sum of disbursed and outstanding loan balances, present value of guaranteed obligations and fair values of equities.

ADB employs the Global Industry Classification Standard for its nonsovereign exposures. Under this standard, utilities represent the largest sectoral share of ADB's nonsovereign exposures (Table 22). ADB maintains higher exposures to this sector because of the importance of infrastructure to economic development. In addition, the high level of exposure to the utilities sector is deemed acceptable because of the systemic importance of utilities to the national economies in which they operate, and the lack of correlation between the utilities sector in one country and another. The utilities sector is also fragmented with seven major sub-industries. To mitigate sector concentration, ADB conducts additional monitoring of and reporting on this sector and employs specialists in these areas.

Table 22: Nonsovereign Sector Exposure

As of 31 December 2016 and 2015

Sector	2016		2015	
	\$ million	%	\$ million	%
Utilities	2,656	37.0	2,626	45.0
Banks	1,511	21.1	1,246	21.3
Diversified Financials	916	12.8	710	12.2
Insurance	832	11.6	469	8.0
Administration	502	7.0	297	5.1

Collective Provision for Loan Losses	31	0.5	28	0.6
Loan Loss Reserve Requirement	36 ^b	0.6	37	0.7
Expected Loss	82	1.3	71	1.4

NSO = nonsovereign operations.

Note: Numbers may not sum precisely because of rounding.

^a Percentage only applies to the loan and guarantee operations of the nonsovereign portfolio.

^b Allocation to the loan loss reserve is subject to the Board of Governors' approval in May 2017.

Credit risk in the treasury operations. Issuer default and counterparty default are credit risks that affect the liquidity portfolio. Issuer default is the risk that a bond issuer will default on its interest or principal payments, while counterparty default is the risk that a counterparty will not meet its contractual obligations to ADB.

To mitigate issuer and counterparty credit risks, ADB transacts only with institutions rated by reputable international rating agencies. Moreover, the liquidity portfolio is generally invested in conservative assets, such as money market instruments and government securities. In addition, ADB has established exposure limits for its corporate investments, depository relationships, and other investments.

ADB has counterparty eligibility criteria to mitigate counterparty credit risk arising through derivative transactions. In general, ADB will only undertake swap transactions with counterparties that meet the required minimum counterparty credit rating, have executed an International Swaps and Derivatives Association Master Agreement or its equivalent, and have signed a credit support annex. Under the credit support annex, derivative positions are marked to market daily, and the resulting exposures are generally collateralized by cash or US government securities. ADB also sets exposure limits for individual swap counterparties and monitors these limits against current and potential exposures. ADB enforces daily collateral calls as needed to ensure that counterparties meet their collateral obligations.

The weighted average credit rating for the liquidity portfolio was AA in 2016. About 98% of the portfolio was rated A– or better.

As of 31 December 2016 and 2015, no fixed-income instruments, derivatives, or other treasury exposures were past due or impaired.

Deposits. Generally, credit risk from investment deposits is low. ADB only invests with depository institutions that have a minimum long-term average credit rating of A+ or a short-term credit rating of A-1. ADB maintains a watch list of institutions that it perceives as potentially riskier based on regular internal credit risk assessments. Moreover, the size of the investment deposits is limited by the counterparty's equity and creditworthiness.

Fixed income. Sovereign and sovereign-guaranteed securities, and those issued by government-related enterprises, including supranationals, represent 93% of ADB's fixed income assets. The remainder is in corporate bonds that are rated at least A– (Table 24). ADB has monitored market developments closely and adjusted its risk exposures accordingly.

Table 24: Fixed Income Portfolio by Asset Class

As of 31 December 2016 and 2015

Item	2016		2015	
	\$ million	%	\$ million	%
Government	10,955	49.2	11,906	57.5
Government Guaranteed	3,726	16.8	2,640	12.7
Government-Sponsored Enterprises and Supranationals	6,018	27.0	4,672	22.6
Corporates	1,552	7.0	1,492	7.2
Total	22,251	100.0	20,710	100.0

Derivatives. All eligible swap counterparties are rated at least A–. Current exposure to counterparties rated below A+ is generally fully collateralized, while the uncollateralized exposure to those rated AA– and above are subject to specified thresholds. ADB maintains and periodically reevaluates a watch list of institutions that it perceives as potentially riskier based on regular internal credit risk assessments. At the end of 2016, all counterparty marked-to-market exposures were fully collateralized, except for three counterparties whose uncollateralized exposures are within their established thresholds.

Country exposure. At the end of 2016, treasury credit risk exposure was allocated across 30 countries with the largest exposure in Japan (Table 25).

Table 25: Treasury Country Exposure

As of 31 December 2016 and 2015

Country	2016		2015	
	\$ million	%	\$ million	%
Japan	8,130	29.7	6,715	27.2
United States	6,862	25.0	6,579	26.7

Korea	2,245	8.2	2,007	8.1
Germany	2,133	7.8	1,861	7.5
Others	5,776	21.1	5,886	24.0
Total	27,397	100.0	24,656	100.0

2. Market Risk

Market risk is the risk of loss on financial instruments because of changes in market prices. ADB principally faces three forms of market risk: (i) equity price risk, which is the risk that the fair value of equities decreases as a result of changes in the levels of equity indices and the value of individual stocks; (ii) interest rate risk; and (iii) foreign exchange risk. Interest rate risk and foreign exchange risk are further discussed below.

Interest rate. Interest rate risk in the operations portfolio is hedged as the basis for borrowers' interest payments are matched to ADB's borrowing expenses. Therefore, the borrower must assume or hedge the risk of fluctuating interest rates, whereas ADB's margins remain largely constant.

ADB is primarily exposed to interest rate risk through the liquidity portfolio. ADB monitors and manages interest rate risks in the liquidity portfolio by employing various quantitative methods. It marks all positions to market, monitors interest rate risk metrics, and employs stress testing and scenario analysis.

ADB uses duration and interest rate value-at-risk (VaR) to measure interest rate risk in the liquidity portfolio. Duration is the estimated percentage change in the portfolio's value in response to a 1% parallel change in interest rates. Interest rate VaR is a measure of possible loss at a given confidence level in a given time frame because of changes in interest rates. ADB uses a 95% confidence level and a 1-year horizon. In other words, ADB would expect to lose at least this amount once every 20 years because of fluctuations in interest rates. ADB uses duration and VaR to measure interest rate risk across the liquidity portfolio, with particular attention to the major CLP, which is the most exposed to interest rate risk.

Foreign exchange. ADB endeavors to minimize exposure to exchange rate risk in its operations. ADB is required to match the currencies of its assets with the currencies of its liabilities, thereby avoiding any transaction-related currency risk. Borrowed funds or funds to be invested may only be converted into other currencies provided that they are fully hedged through cross currency swaps or forward exchange agreements. However, because of its multicurrency operations, ADB is exposed to fluctuations in reported US dollar results due to currency translation adjustments.

ADB monitors VaR and duration, and performs stress testing to manage market risk in the liquidity portfolio. The major currencies of the CLP bear the majority of ADB's market risks and account for 57% of ADB's OCR liquid asset portfolio. Major currencies include the US dollar, yen, euro, pound sterling, Australian dollar, and Canadian dollar and represented 93% of the CLP.

Value-at-risk. The interest rate 1-year value-at-risk of the major CLP, increased from 1.5% of ADB's equity in 2015 to 2.7% in 2016. This means that there is a 5.0% probability that the portfolio will lose more than 2.7% (\$497 million) of its value due to interest rate volatility over the next year assuming normal market conditions.

Duration. The major CLP's interest rate sensitivity, as reflected in its weighted portfolio duration, increased from 2.6 years as of the end of 2015 to 3.1 years as of the end of 2016.

Stress testing. ADB measures how sensitive the major CLP is to interest rate changes. If interest rates were to rise 2%, the major CLP would be expected to lose 6.0% (\$916 million). ADB also uses scenario analysis to assess how the major CLP would respond to significant changes in market factors, such as those that have occurred in the past. Because of the high quality of ADB's investments, scenario analysis suggests that the liquidity portfolio would appreciate during many stressed scenarios, as demand for highly rated securities increases (flight to quality).

3. Liquidity Risk

Liquidity risk can arise if ADB is unable to raise funds to meet its financial and operational commitments. ADB maintains core liquidity to safeguard against a liquidity shortfall in case its access to the capital market is temporarily denied. The overriding objective of the liquidity policy is to enable ADB to obtain the most cost-efficient funding under both normal and stressed situations and manage liquidity optimally to achieve its development mission. The Board of Directors approved a revised liquidity policy framework in November 2016. The revised policy redefined the prudential minimum liquidity as 100% of the 1-year net cash requirements. This represents the minimum amount of eligible liquidity necessary for ADB to continue operations

even if access to capital markets is temporarily denied. Maintaining the prudential minimum liquidity level is designed to enable ADB to cover net cash requirements for 12 months without borrowing. The liquidity levels and cash requirements are monitored on an ongoing basis, with quarterly review by the Board of Directors.

4. Operational Risk

ADB defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people, and systems; or from external events. ADB manages its operational risks based on a framework endorsed by the Risk Committee and approved by the President in 2012. The framework enables ADB to implement an approach that focuses on identifying, accessing, and managing risks to minimize potential adverse impacts.

Key components of ADB's operational risk management approach include (i) employing the Operational Risk Self Assessment in its key business areas; (ii) using Key Risk Indicators for operational risk profile monitoring and the collection of risk event information; and (iii) promoting risk awareness, including through presentations to staff on the application of the methodologies. ADB has completed implementing its operational risk management approach across the organization in 2014. ADB will continue maintaining the framework, while retaining the key operational risk methodologies and tools.

Like any other organization, ADB is exposed to various types of operational risk, which it mitigates by applying internal controls and monitoring areas of particular concern. ADB uses risk transfer, including insurance, for mitigating low-frequency, high-severity operational risks. ADB continuously strengthens its business continuity process and particularly information technology (IT) to reduce the impact of disruptions.

5. Capital Adequacy

ADB's most significant risk is potential default of a large portion of its loan portfolio. Credit risk is measured in terms of both expected and unexpected losses. For expected losses, ADB holds loan loss reserves and provisions. For unexpected losses, ADB relies on its income-generating capacity and capital, which is a financial institution's ultimate protection against unexpected losses that may arise from credit and other risks.

ADB principally uses stress testing to assess the capacity of its capital to absorb unexpected losses. The framework has two objectives. First, it measures ADB's ability to absorb income losses because of a credit shock. Through this monitoring, ADB reduces the probability that it would have to rely on shareholder support, such as additional paid-in capital or a capital call.

Second, the framework evaluates ADB's ability to generate sufficient income to support loan growth after a credit shock. As a development institution, ADB's mandate becomes more important during a financial crisis when some DMCs may find their access to capital markets limited. Demand for ADB assistance may rise under such adverse conditions. For the stress test, ADB generates thousands of potential portfolio scenarios and imposes credit shocks that are large enough to account for 99% of those scenarios. ADB then assesses the impact of these shocks on its capital by modeling the ratio of equity to loans over the next 10 years. Throughout 2016, the stress test indicated that ADB had adequate capital to absorb the losses of a severe credit shock and to continue its development lending. ADB is currently reviewing its capital adequacy framework following the combination of the OCR and ADF lending operation.

During 2016, ADB's AAA credit rating was reaffirmed by the three major international credit rating agencies.

6. Asset and Liability Management

ADB has an asset and liability management policy framework that guides all financial policies related to asset and liability management including liquidity, investments, and equity management. The objectives of the asset and liability management are to safeguard ADB's net worth and capital adequacy, promote steady growth in ADB's risk-bearing capacity, and define financial policies to undertake acceptable financial risks. The aim is to provide resources for developmental lending at the lowest and most stable funding cost to borrowers, along with the most reasonable lending terms, while safeguarding ADB's financial strength. ADB's asset and liability management aims to safeguard net worth from foreign exchange rate risks, protect net interest margin from fluctuations in interest rates, and provide sufficient liquidity to meet the needs of ADB operations.

I. Internal Control over Financial Reporting

ADB Management has been assessing the effectiveness of its internal controls over financial reporting since 2008. ADB uses the revised *Internal Control—Integrated Framework (2013 Framework)* issued by the Committee of Sponsoring Organizations of the Treadway Commission since its effectivity in 2014. The 2013 Framework includes (i) codification of the 17 principles that support the 5 components of internal control, (ii) the concept of considering the potential of fraud risk as part of the risk assessment process, and (iii) considerations on outsourcing and increased relevance of information technology as a result of changes in the business and operating environment. For an effective system of internal control, the 2013 Framework requires that (i) each of the 5 components and the 17 principles is present and functioning, and (ii) the 5 components are operating together in an integrated manner.

ADB assessed the effectiveness of its internal control over financial reporting for its 2016 financial statements. ADB applied a risk-based evaluation framework for the assertion of the effectiveness of internal control over financial reporting for OCR and Special Funds, except for the ADB Institute (ADBI). The scope included a review of 53 business processes for financial reporting and four domains for the IT general computer controls. ADB staff across several departments and offices were responsible for (i) identifying and testing key controls, and (ii) assessing and evaluating the design and operating effectiveness of the business processes. The effectiveness of ADB's internal control over financial reporting has been audited by its external auditor, as stated in their respective reports, which expressed an unmodified opinion on the effectiveness of ADB's internal control over financial reporting for OCR and Special Funds (except for ADBI) as of 31 December 2016.

J. Critical Accounting Policies and Estimates

Significant accounting policies are contained in Note B of the OCR financial statements. As disclosed in the financial statements, Management estimates the fair value of financial instruments. Because the estimates are based on judgment and available information, actual results may differ and could have a material impact on the financial statements.

Fair value of financial instruments. Under statutory reporting, ADB carries selected financial instruments and derivatives, as defined by ASC Topics 815 and 825, on a fair value basis. These financial instruments include embedded derivatives that are valued and accounted for in the balance sheet as a whole. Fair values are usually based on quoted market prices. If market prices are not readily available, fair values are usually determined using market-based pricing models incorporating market data requiring judgment and estimates. These are discussed in more detail in Note B of OCR's financial statements.

The pricing models used to determine the fair value of ADB's financial instruments are based on discounted cash-flow models. ADB reviews the pricing models to assess whether the assumptions are appropriate and produce results that reflect the reasonable valuation of the financial instruments. In addition, the fair values derived from the models are subject to ongoing internal and external verification and review. The models use market-sourced inputs, such as interest rates, exchange rates, and option volatilities. The selection of these inputs may involve some judgment and may impact net income. ADB believes that the estimates of fair values are reasonable.

Provision for loan losses and loan loss reserves. In 2006, the Board of Directors approved the revision of the loan loss provisioning methodology for ADB's nonsovereign operations to a risk-based model. Provision against loan losses for impaired loans reflects Management's judgment and estimate of the present value of expected future cash flows discounted at the loan's effective interest rate. ADB considers a loan impaired when, based on current information and events, ADB will probably be unable to collect all the amounts due according to the loan's contractual terms. The provisioning estimate is done quarterly. In 2010, ADB refined the provisioning methodology to include collective provisioning for the nonsovereign portfolio.

ADB uses an internal risk-rating system to estimate expected loss for unimpaired loans. The probability of default is based on the historical default experience of sovereign borrowers to multilateral development institutions; for nonsovereign loans, it is based on Moody's Investors Service default data. A loan loss reserve is established within equity for the expected losses as an allocation of net income, subject to the approval of the Board of Governors.

Pension and other postretirement benefits. ADB provides staff pension and postretirement medical benefits for all eligible staff members, provided they have not reached the normal retirement age of 60. Net periodic benefit costs are allocated between OCR and the ADF based on the agreed cost-sharing methodology. The underlying actuarial assumptions used to determine the projected benefit obligations, accumulated benefit obligations, and funded status associated with these plans are based on market interest rates, past experience, and Management's best estimate of future benefit changes and economic conditions. For further details, refer to Notes to Financial Statements—Note Q—Staff Pension and Postretirement Medical Benefits.

IV. SPECIAL FUNDS

ADB is authorized by its Charter to establish and administer Special Funds. These are the ADF, the TASF, the Japan Special Fund (JSF), ADBI, the Regional Cooperation and Integration Fund (RCIF), the Climate Change Fund (CCF), Asia Pacific Disaster Response Fund (APDRF), and the Financial Sector Development Partnership Special Fund (FSDPSF). Financial statements for each Special Fund are prepared in accordance with US GAAP except for the ADF, for which special purpose financial statements are prepared.

A. Asian Development Fund

Until 31 December 2016, the ADF was ADB's concessional financing window for DMCs with per capita gross national income below the ADB operational cutoff and limited or low creditworthiness. It provided a multilateral source of concessional assistance dedicated exclusively to reducing poverty and improving the quality of life in Asia and the Pacific. The ADF had received contributions from 34 donors (regional and nonregional). Cofinancing with bilateral and multilateral development partners complements ADF resources.

Starting 1 January 2017, concessional lending on the same terms and conditions continues under the expanded OCR while ADF remains as a grant-only operation. Table 26 shows the balance sheet of ADF after the transfer of certain assets to OCR.

Table 26: Asian Development Bank—Asian Development Fund
Summary Statement of Effect of Asset Transfer to OCR

(\$ million)

	Balance as of 31 December 2016	Asset Transfer to OCR 1 January 2017	Balance as of 1 January 2017

Note: 0 = amount less than \$0.5 million.

^a Net of allowance for Heavily Indebted Poor Countries debt relief.

Contributed resources. In July 2012, the Board of Governors adopted a resolution providing for the 10th replenishment of the ADF (ADF XI) and the 5th regularized replenishment of the TASF. The resolution provided for a substantial replenishment of the ADF to finance ADB's concessional program for 4 years from January 2013, and for replenishment of the TASF in conjunction with the ADF replenishment to finance TA operations under the TASF. The total replenishment of SDR8,415 million (\$13,155 million equivalent at the exchange rates provided in the resolution) comprised SDR5,018 million (\$7,844 million equivalent) financed from internal resources, SDR3,090 million (\$4,831 million equivalent) from new donor contributions, and SDR307 million (\$480 million equivalent) from net income transfers from OCR. The replenishment became effective on 4 June 2013. As of 31 December 2016, ADB had received instruments of contributions from all 32 donors. The remaining unpaid contributions under ADF IX, ADF X and ADF XI as of 31 December 2016 totaled \$385 million.

ADF 12 Replenishment. The eleventh replenishment of the ADF (ADF 12) is the first replenishment in which the ADF will operate as a grant-only facility. In July 2016, the Board of Governors adopted Resolution No. 382 providing for ADF 12 and the sixth regularized replenishment of the TASF for 4 years from January 2017. The total replenishment of \$3,798

million consists of \$3,337 million for ADF 12 and \$461 million for the TASF. The replenishment will be financed from donor contributions (\$2,580 million equivalent at the exchange rates provided in the resolution), OCR net income transfer (\$1,038 million), and income from liquidity investments (\$180 million).

Currency management. Based on ADF's currency management framework, its resources are managed using the SDR basket of currencies (US dollar, euro, pound sterling, yen and yuan) as the basis. ADF donor contributions and loan reflows received in currencies that are not part of the SDR basket are converted into one of the currencies in the basket to maintain the SDR-based liquidity portfolio. In addition, since 2006, the borrower's obligations for new ADF loans are determined in SDR.

Starting in 2008, ADB extended the full-fledged SDR approach to ADF legacy loans by providing ADF borrowers the option to convert their existing liability (i.e., disbursed and outstanding loan balance) in various currencies into SDR, while the undisbursed portions were to be treated as new loans redenominated in SDR. As of 31 December 2016, 21 of 29 borrowing members agreed to the conversion. The outstanding balance of their SDR-converted loans amounted to \$12,197 million. The SDR conversion option was discontinued on 1 January 2017. As of 31 December 2016, the eligible loans of eight borrowers totaled \$2,684 million, or 9.8% of total disbursed and outstanding loans.

In anticipation of the termination of ADF lending operations and transfer of ADF loans and other assets to the OCR effective on 1 January 2017, a comprehensive review of ADF financial management and policies was undertaken and approved by the Board of Directors in February 2016. Since the US dollar has been adopted for ADF grant operations, starting in January 2017, ADF commitment authority and liquidity will be determined and managed in US dollars to mitigate commitment and disbursement risks.

Framework for grants and hard-term facility. In September 2007, the Board of Directors approved the ADF grant framework, which limits grant eligibility to ADF-only countries and introduced a new hard-term ADF lending facility. The facility had a fixed interest rate of 150 basis points below the weighted average of the 10-year fixed swap rates of the SDR basket of currencies plus the OCR lending spread, or the current ADF rate, whichever was higher. Other terms were similar to those of regular ADF loans.

In June 2012, the Board of Directors approved the hardening of lending terms to blend countries: (i) for project and policy-based loans financed from ADF resources, a 25-year tenor including a 5-year grace period, 2.0% per year interest rate throughout the loan tenor, and equal amortization; and (ii) for hard-term loans, a 25-year tenor including a 5-year grace period; an interest rate calculated as 150 basis points below the weighted average of the 10-year fixed swap rates of the SDR component currencies plus the OCR lending spread, or the applicable ADF interest rates, whichever is higher, throughout the loan tenor; and equal amortization. These new lending terms were applicable to loans for which formal loan negotiations were completed on or after 1 January 2013. In general, blend countries with per capita income not exceeding the International Development Association (IDA) operational cutoff for more than 2 consecutive years and with an active OCR lending program are eligible to borrow from this new facility. The interest rate, which is fixed for the life of hard-term loans approved during the year, is reset every January.

For hard-term ADF loans approved in 2016 and 2015, the interest rate is set at (i) 1.0% during the grace period and 1.5% thereafter for ADF-only countries; and (ii) 2.0% fixed for the life of the loans for blend countries. During 2016 and 2015, no loans were approved under this facility. The hard-term ADF facility has been discontinued effective January 2017.

Liquidity management. ADF manages its liquidity assets under two tranches to enable the optimal use of financial resources. The main objective of the first tranche is to ensure adequate liquidity is available to meet expected cash requirements. The second tranche comprises the prudential minimum liquidity the ADF should hold to meet unexpected demands and any usable liquidity for future commitments. This approach ensures that liquidity is managed transparently and efficiently.

Heavily Indebted Poor Countries Initiative. Launched in 1996 by the International Development Association (IDA) and the International Monetary Fund (IMF), the HIPC Initiative provides partial debt relief to poor countries with external debt that severely burdens export earnings or public finance. In response to ADF donors' request, the ADB Board of Governors adopted a resolution on 7 April 2008 for ADB to participate in the Heavily Indebted Poor Countries (HIPC) Initiative and to provide Afghanistan with debt relief. The estimated principal amount of Afghanistan's ADF debt to be forgiven and charged against ADF income was \$82 million.

On 26 January 2010, the executive boards of the IDA and the IMF agreed that Afghanistan had reached the completion point under the HIPC Initiative. Thus, debt relief to Afghanistan under the initiative had become irrevocable. The amount of debt relief including principal and interest was revised to \$106 million and was to be provided through a reduction of Afghanistan's debt service from July 2008 to February 2028. As of December 2016, the ADF had delivered \$28 million under this arrangement, bringing the balance to \$78 million. In line with the HIPC framework, the write-off of the loan principal and interest of the HIPC-related loans will continue to be undertaken when loan service payments fall due from 1 January 2017 to February 2028. This write-off will be borne by OCR.

Accelerated repayment of loans to Armenia, Azerbaijan, and Georgia. ADF loan agreements include a provision allowing ADB, subject to the approval of the Board of Directors, to modify the lending terms of the outstanding loans of a DMC when its per capita gross national income has exceeded ADB's operational cutoff for five consecutive years and the DMC has graduated from ADF assistance. This provision allows ADB to modify the loan repayment terms by increasing the principal due on each loan service payment date by 100% until the principal amount of the loan is fully repaid. Alternatively, ADB may—at the request of the borrower—increase the interest rate to the extent that it would yield the same grant element¹¹ as would be obtained under the principal option. In February 2016, the Board of Directors approved the application of this provision to the loans of Armenia, Azerbaijan, and Georgia starting 1 January 2017.

Additional currency choices for concessional OCR loans. In November 2016, the Board of Directors approved the provision of additional currency choices for eligible concessional OCR loans effective 1 January 2017, when the ADF lending operations are to be terminated and transferred to OCR. In addition to SDR as a liability currency, concessional OCR loan borrowers may also choose a loan liability currency in a currency that is available under ADB's London interbank offered rate-based product and is a currency that is available in the SDR basket, subject to ADB's confirmation of the availability of such currency. The eligible loans are (i) all concessional OCR loans for which formal loan negotiations are completed on or after 1 January 2017 (i.e., new loans) and (ii) all concessional loans for which formal loan negotiations are completed before 1 January 2017 that are not effective until 30 June 2017 (i.e., other eligible loans). At the end of 2016, there were 36 other eligible loans totaling \$1,902 million (at 31 December 2016 exchange rate).

¹¹ The grant element is the level of concessionality of a loan measured by the difference between the sum of the present values of loan disbursements and loan service payments, expressed as a percentage of the present value of loan disbursements.

Commitment authority. The commitment authority available for future commitments comprises the resources available to the ADF for its future lending activities in the form of loans and grants. These resources are derived from donor contributions, reflow-based resources, and net income transfers from OCR. The balance of the commitment authority available for operations as of 31 December 2016 was \$243 million, compared with \$436 million as of 31 December 2015 (Table 27). As the ADF lending operations will be terminated and transferred to OCR on 1 January 2017, the available commitment authority of \$243 million is allocated between concessional loans (\$228 million) and grants (\$15 million) based on the unutilized allocation for concessional loans and grants.

Table 27: Asian Development Fund Commitment Authority^a

31 December 2016 and 2015

(\$ million)

Item	2016	2015
Carryover of ADF X Commitment Authority ^b	743	766
ADF XI Contributions	3,150	2,345
ADF X Contributions ^c	176	174
ADF VIII and IX Contributions ^d	188	155
Internal Resources ^e	6,746	5,219
Savings and Cancellations	750	671
OCR Net Income Transfer	480	360
Credits from ANE Program	17	—
Total ADF Commitment Authority	12,248	9,691
Loans and Grants Committed	12,006	9,255
ADF Commitment Authority Available for Future Commitments	243^f	436

— = nil, ADF = Asian Development Fund, ANE = accelerated note encashment, OCR = ordinary capital resources.

Note: Numbers may not sum precisely because of rounding.

^a The Asian Development Bank monitors the ADF commitment authority based on special drawing rights. All reported figures are based on special drawing rights translated to US dollar as of 31 December 2016 and 2015 exchange rates.

^b A portion of the carryover funds from ADF X would be used to finance loans and grants that overflowed from 2012 approval.

^c Represents the additional payments of Italy, Spain and the United States including the corresponding pro-rated amounts released by France, Germany and Turkey.

^d Represents payment from the United States including the corresponding pro-rated amounts released by Germany and Turkey.

^e Internal resources include (i) reflow-based resources, (ii) liquidity draw down, and (iii) resources from the three enhancement options.

^f The carry-over amount will be allocated as follows: (i) \$228 million for concessional loans and (ii) \$15 million for grants.

In May 2016, the Board of Governors approved the transfer of \$120 million to the ADF as part of the net income allocation for OCR (2015: \$120 million). In addition, \$750 million from loan and grant savings and cancellations were included in the commitment authority. This resulted from Management's continued assessment of opportunities to free committed resources through cancellations of unused loan and grant balances.

During 2016, deposited installments under ADF XI amounted to \$893 million, and ADF XI promissory notes encashed totaled \$705 million. About \$71 million was transferred to the TASf.

Loan approvals, disbursements, and repayments. In 2016, 53 ADF loans totaling \$2,556 million were approved compared with 43 ADF loans totaling \$2,514 million in 2015. Disbursements during 2016 totaled \$2,027 million, a decrease of 1.0% from \$2,048 million in

2015. At the end of 2016, cumulative disbursements from ADF resources were \$41,813 million. Loan repayments during 2016 totaled \$1,363 million (2015: \$1,242 million). At the end of 2016, outstanding ADF loans amounted to \$27,367 million (2015: \$27,270 million).

In 2016, MFFs for \$100 million (2015: \$211 million) were approved under the ADF and \$283 million were reallocated to OCR (2015: \$8 million were reallocated from OCR).¹² PFRs under the MFFs totaling \$344 million were approved in 2016 (2015: \$341 million). A total of \$348 million was disbursed under the MFFs in 2016 (2015: \$412 million).

Results-based lending. In 2016, two ADF loans for \$141 million were approved under RBL (2015: one loan amounting to \$88 million); disbursements totaled \$45 million (2015: \$47 million).

Project design facility. In April 2011, ADB established the PDF on a pilot basis to support project preparation, particularly detailed engineering designs, through PDA. ADF loans approved under the facility carry standard ADF interest rates. Payment of interest is deferred until the PDA is refinanced out of the loans proceeds, or other repayment terms take effect. In 2016, two loans totaling \$7 million were approved under this facility (2015: nil).

Investment portfolio position. The ADF investment portfolio totaled \$5,739 million at the end of 2016 compared with \$6,030 million at the end of 2015.¹³ About 21% of the portfolio was invested in bank deposits, and 79% in fixed-income securities. The annualized rate of return on ADF investments, including unrealized gains and losses, was 1.1% (2015: 0.7%).

Grants. In 2016, ADB approved 27 grants (2015: 15) totaling \$518 million (2015: \$358 million), of which \$188 million were PFRs under MFFs (2015: \$200 million) (footnote 12), while 18 grants (2015: 16) totaling \$380 million (2015: \$360 million) became effective, and \$4 million (2015: \$12 million) of undisbursed grants were written-back as savings on financially closed and/or cancelled projects.

Direct value-added official and other concessional cofinancing for ADF loans and grants. In 2016, \$1,390 million (2015: \$2,088 million) was mobilized in official loan and grant cofinancing for 41 ADF-financed projects (2015: 39) totaling \$2,180 million (2015: \$1,373 million).

B. Technical Assistance Special Fund

The TASF was established to provide TA on a grant basis, both regionally and to ADB's DMCs.

In July 2012, as part of ADF XI replenishment, donors agreed to contribute 3% of the total replenishment size as the fifth replenishment of the TASF. The replenishment covered 2013–2016.

TASF Sixth Regularized Replenishment. In July 2016, as part of the ADF 12 replenishment, the donors agreed to allocate \$461 million of the total replenishment size as the sixth replenishment of the TASF. The replenishment will cover 2017–2020.

Contributed resources. As of 31 December 2016, 31 donors had committed a total of \$376 million to the TASF as part of the ADF XI and the fifth regularized replenishment of the TASF. Of the total committed contributions, \$358 million had been received.

¹² These amounts are adjusted based on flexibility in the use of OCR and ADF funding.

¹³ Includes securities purchased under resale arrangements.

As part of the ADF X and fourth regularized replenishment of TASF, \$319 million of the total commitment of \$339 million had been received as of 31 December 2016.

During the period, Pakistan made a direct voluntary contribution of \$0.14 million. In addition, \$40 million was allocated to the TASF as part of the OCR's 2015 net income allocation, and \$5 million was committed for the fifth regularized replenishment of the TASF. At the end of 2016, TASF resources totaled \$2,440 million, of which \$2,399 million was committed, leaving an uncommitted balance of \$41 million (\$147 million as of 31 December 2015) (Table 28).

Table 28: Technical Assistance Special Fund

Cumulative Resources
(\$ million)

Item	2016	2015
Regularized Replenishment		
Contributions	1,150	1,145
Allocations from OCR Net Income	989	949
Direct Voluntary Contributions	91	91
Income from Investment and Other Sources	213	204
Transfers from the TASF to the ADF	(3)	(3)
Total	2,440	2,386

() = negative, ADF = Asian Development Fund, OCR = ordinary capital resources, TASF = Technical Assistance Special Fund.

Operations. Net TA commitments (approved and effective) increased from \$124 million in 2015 to \$145 million in 2016 for 180 TA projects and 48 supplementary approvals that were made effective during the year, net of \$28 million (2015: \$24 million) in write-backs of undisbursed TA for completed and canceled TA projects. Undisbursed TA, net of advances for TA increased to \$354 million as of 31 December 2016 (\$339 million as of 31 December 2015). The TASF financed 51% of all TA activities approved in 2016 (2015: 57%).

Investment position. As of 31 December 2016, the total investment portfolio, which was in time deposits, amounted to \$302 million, compared with \$367 million at the end of 2015. Revenue from investments for 2016 and 2015 amounted to \$2 million.

C. Japan Special Fund

The JSF was established in 1988 when ADB, acting as the administrator, entered into a financial arrangement with the Government of Japan, which agreed to make the initial contribution to help ADB's DMCs restructure their economies and broaden the scope of opportunities for new investments, mainly through TA operations.

Contributed resources. As of 31 December 2016, Japan's cumulative contribution to the fund since inception amounted to ¥113 billion (\$974 million equivalent), comprising regular contributions of ¥95 billion (\$823 million equivalent) and supplementary contributions of ¥18 billion (\$151 million equivalent). The uncommitted balance was \$69 million as of 31 December 2016 (\$68 million as of 31 December 2015).

Operations. In 2016 and 2015, no new TA projects or grants were approved or made effective. However, \$1 million was written back for financially completed and cancelled projects in 2016 (2015: \$3 million). Undisbursed TA, net of advances for TA as of 31 December 2016 were \$1 million, compared with \$3 million as of the end of 2015.

Investment position. As of 31 December 2016 and 2015, the total investment portfolio, which was in time deposits, remained at \$69 million.

D. ADB Institute

ADB I was established in 1996 as a subsidiary body of ADB. ADB I's objectives are to identify effective development strategies and capacity improvements for sound development management in the DMCs. Its operating costs are met by ADB I, and it is administered in accordance with the Statute of the Asian Development Bank Institute.

In July 2016, the Government of Japan committed its 27th contribution for ¥672 million (\$7 million equivalent) and in December 2016, committed its 28th contribution for ¥672 million (\$6 million equivalent). In November 2016, the Government of Republic of Korea committed the second installment of its 2nd contribution for \$0.7 million.

As of 31 December 2016, cumulative contributions committed to ADB I amounted to ¥27 billion, A\$2 million, and \$3 million (about \$253 million equivalent). Of the total contributions received, \$234 million had been used by the end of 2016 mainly for research and capacity-building activities, including (i) organizing symposia, forums, and training sessions; (ii) preparing research reports, publications, and websites; and (iii) financing associated administrative expenses. The balance of net current assets (excluding property, furniture, and equipment) available for future projects and programs was about \$10 million.

E. Regional Cooperation and Integration Fund

The RCIF was established in February 2007 in response to the increasing demand for regional cooperation and integration activities among ADB's member countries in Asia and the Pacific. Its main objective is to improve regional cooperation and integration by facilitating the pooling and provision of additional financial and knowledge resources.

Contributed resources. There were no new contributions to RCIF in 2016 and 2015. As of 31 December 2016, RCIF resources totaled \$63 million, of which \$57 million had been used, leaving an uncommitted balance of \$6 million (\$8 million as of 31 December 2015).

Operations. In 2016, net TA expenses totaled \$1.9 million (2015: \$0.1 million), comprising three TA projects and two supplementary approvals totaling \$2.8 million that became effective, and a \$0.9 million write-back on financially completed and/or cancelled projects (2015: two TA projects and one supplementary approval totaling \$1.4 million, and a \$1.3 million write-back). The balance of undisbursed grants, net of grant advances as of 31 December 2016 amounted to \$8 million (2015: \$9 million).

Investment position. As of 31 December 2016, the total investment portfolio, which was in time deposits, amounted to \$12 million (\$15 million as of end of 2015).

F. Climate Change Fund

The CCF was established in April 2008 to facilitate greater investments in DMCs to address the causes and consequences of climate change in combination with ADB assistance in related sectors.

Contributed resources. There were no new contributions to CCF in 2016 and 2015. As of 31 December 2016, CCF resources totaled \$60 million, of which \$52 million had been used, leaving an uncommitted balance of \$8 million (\$11 million as of 31 December 2015).

Operations. In 2016, two TA projects and two supplementary approvals totaling \$2.2 million (2015: nil) became effective, and \$0.7 million of financially completed and/or cancelled projects was written-back (2015: \$0.8 million write-back only). The balance of undisbursed grants and TA, net of advances as of 31 December 2016 amounted to \$10 million (2015: \$11 million).

Investment position. As of 31 December 2016, the total investment portfolio, which was in time deposits, amounted to \$17 million (\$21 million as of 31 December 2015).

G. Asia Pacific Disaster Response Fund

The APDRF was established on 1 April 2009 to provide timely incremental grant resources to DMCs affected by natural disasters.

Contributed resources. There were no new contributions to APDRF in 2016 (2015: \$20 million). As of 31 December 2016, fund resources totaled \$60 million, of which \$52 million had been used, leaving an uncommitted balance of \$8 million (\$17 million as of 31 December 2015).

Operations. In 2016, five grants amounting to \$9.2 million became effective (2015: three grants totaling \$7 million). All undisbursed grants as of 31 December 2016 and 2015 have been advanced.

Investment position. As of 31 December 2016, the total investment portfolio, which was in time deposits amounted to \$7 million (2015: \$11 million).

H. Financial Sector Development Partnership Special Fund

The FSDPSF was established on 31 January 2013 to strengthen regional, subregional, and national financial systems in Asia and the Pacific.

Contributed resources. In 2016, the Government of Luxembourg committed \$3 million equivalent (2015: \$2 million equivalent) of contributions to the fund. As of 31 December 2016, fund resources totaled \$14 million, of which \$7 million had been used, leaving an uncommitted balance of \$7 million (2015: \$7 million as of 31 December 2015).

Operations. In 2016, seven TA projects totaling \$3 million (2015: two TA projects and three supplementary approvals totaling \$2 million) became effective, and \$0.2 million (2015: \$0.1 million) of financially completed and/or cancelled projects were written-back. The balance of undisbursed grants, net of advances as of 31 December 2016 amounted to \$4 million (\$2 million as of 31 December 2015).

Investment position. As of 31 December 2016, the total investment portfolio amounted to \$8 million (\$5 million as of 31 December 2015).

V. GRANT COFINANCING

Trust funds and project-specific grants are key instruments to mobilize and channel financial resources from external sources to finance TA and components of investment projects. They play an important role in complementing ADB's own resources. Multilateral, bilateral, and private sector partners have contributed about \$7,428 million in grants and loans to ADB operations (Table 29). In 2016, grant cofinancing for ADB-approved projects totaled \$952 million, comprising \$148 million for 102 TA projects and \$804 million for components of 40 investment projects. By the end of 2016, ADB was administering 42 trust funds, comprising 31 stand-alone trust funds,¹⁴ and 11 trust funds established under financing partnership facilities. Of these, 27 have balances totaling \$611 million in grants. Additional grant resources from external partners totaled \$362 million in 2016, comprising \$15 million in new commitments, \$221 million in replenishments to existing trust funds, and \$126 million in additional allocation from global funding initiatives.

Financing partners provided the following commitments and replenishments to existing trust funds:

- (i) \$105 million from ANA Trust Fund for the Afghanistan Infrastructure Trust Fund;
- (ii) \$58.8 million from the Government of Japan for the Afghanistan Infrastructure Trust Fund, Japan Fund for Poverty Reduction, Japan Fund for the Joint Crediting Mechanism, and Japan Scholarship Program;
- (iii) \$40 million from the Government of the United States for the Afghanistan Infrastructure Trust Fund;
- (iv) \$14.5 million from the Government of the Republic of Korea for the e-Asia and Knowledge Partnership Fund;
- (v) \$7.8 million from the Nordic Development Fund for the Project Readiness Improvement Trust Fund;
- (vi) \$7.1 million from the Government of Australia as new contribution for the Asia Pacific Project Preparation Facility;
- (vii) \$2.5 million from the Government of Norway for the Clean Energy Fund under the Clean Energy Financing Partnership Facility; and
- (viii) \$0.5 million from the Government of France for the Cooperation Fund Project Preparation in the Greater Mekong Subregion and in Other Specific Asian Countries.

Additional allocations from global funding initiatives comprised \$76 million from the Climate Investment Funds, \$31 million from the Green Climate Fund, \$18 million from the Global Environment Facility, and \$0.5 million from the Global Partnership for Education.

Japan Fund for Poverty Reduction. The Government of Japan established the JFPR in May 2000 to provide grants for projects supporting poverty reduction and related social development activities that add value to projects financed by ADB. In 2010, the JFPR expanded its scope of grant assistance to provide TA grants in addition to project grants. At the end of 2016, the JFPR received a total of \$742 million in contributions from the Government of Japan, and funded 174 grant projects and 224 technical assistance projects.

¹⁴ Trust funds not related to financing partnership facilities and including the Japan Scholarship Program.

Japan Scholarship Program. The Government of Japan established the JSP in 1988 to provide an opportunity for well-qualified citizens of DMCs to undertake postgraduate studies in economics, management, science and technology, and other development-related fields at selected educational institutions in Asia and the Pacific. Between 1988 and 2016, Japan has contributed \$172 million and 3,526 scholarships were awarded to recipients from 37 member countries. Of the total, 3,180 have completed their courses. Women have received 1,317 scholarships. An average of 144 new scholarships per year has been awarded since 2007. As of 2016, JSP has 29 participating institutions in 10 countries.

GOVERNANCE

The Board of Directors has established an Audit Committee, a Budget Review Committee, a Compliance Review Committee, a Development Effectiveness Committee, an Ethics Committee, and a Human Resources Committee.

Audit Committee

The Audit Committee was established to assist the Board of Directors in carrying out its responsibilities as they relate to ADB's financial reporting and audits, including internal controls and risk management. The Audit Committee consists of not more than six members of the Board of Directors. The Chair and other members are appointed by the President in consultation with the Board of Directors.

The Audit Committee assesses in its annual report its work and evaluates its performance annually relative to the Audit Committee's purpose and responsibilities outlined in the Terms of Reference of the Audit Committee. The Audit Committee has an oversight function regarding current areas of financial risk and how these are being managed and must satisfy itself that ADB's financial reporting and audits, including internal controls, are adequate and efficient.

Budget Review Committee

The Budget Review Committee was established to enhance the effectiveness of the Board of Directors in discharging its responsibilities in connection with the approval of the annual administrative budget. The Budget Review Committee consists of not more than six members of the Board of Directors, who may be Directors or Alternate Directors, appointed by the President in consultation with the Board of Directors. The President designates one member as Chair.

The Budget Review Committee reviews the proposed annual administrative budget, taking into account the mid-year review of the current administrative budget, and as needed any major new programs or initiatives with substantive budget implications, and reports its findings to the Board of Directors. It also considers any other aspects of the administrative budget that the President may request and reports its findings to the Board of Directors.

Compliance Review Committee

The Compliance Review Committee was established under ADB's accountability mechanism. The Compliance Review Committee's responsibilities include: clearing the proposed terms of reference of the Compliance Review Panel (CRP) for compliance review before they are released by the CRP; reviewing the CRP's draft compliance review reports; reviewing the CRP's draft reports on monitoring implementation of remedial actions approved by the Board as a result of a compliance review before the CRP finalizes them; and deciding and adjusting the CRP monitoring time frames. The committee consists of six members of the Board of Directors: four from regional members (at least three of whom must be from borrowing countries) and two from nonregional members.

Development Effectiveness Committee

The Development Effectiveness Committee was established to assist the Board of Directors in carrying out its responsibility of ensuring that ADB's programs and activities achieve development effectiveness. Development effectiveness is assessed through ADB's operations evaluation. The Development Effectiveness Committee focuses increasingly on broader evaluations at the country, sector, thematic, and policy levels. The Development Effectiveness Committee consists of not more than six members of the Board of Directors. The President appoints the members of the Development Effectiveness Committee, in consultation with the Board of Directors, and designates one of them as the chairperson of the Committee.

The Development Effectiveness Committee is expected to satisfy itself that ADB's operations evaluation activities are adequate and efficient. In this regard, the specific responsibilities that the Development Effectiveness Committee carries out on behalf of the Board of Directors are as follows: (i) review the annual work program of ADB's Independent Evaluation Department (IED); (ii) review IED's reports and the action taken by ADB on them; (iii) report to the Board of Directors on selected high-priority evaluation issues, if any, that have a significant bearing on the relevance, efficiency and effectiveness of ADB, and make recommendations on such issues; (iv) monitor and report to the Board of Directors on the implementation of its decisions; (v) review the annual programs for the preparation of project completion reports and technical assistance completion reports; and (vi) review the annual report on loan and technical assistance portfolio performance.

Ethics Committee

The Ethics Committee was created to address matters of ethics that may arise under the Code of Conduct adopted by the Board of Directors on 21 November 2006. The provisions of the Code of Conduct apply to all members of the Board of Directors (Executive Directors, Alternate Executive Directors, and temporary Alternate Directors) and to the President. The Ethics Committee consists of five Directors and/or Alternate Directors. When appointing committee members and the Chair, the President seeks to ascertain and abide by the consensus of the Board of Directors.

The Ethics Committee is responsible for advising Executive Directors, Alternate Executive Directors, or the President when they request guidance on actual or potential conflicts of interest or other ethical issues concerning themselves. The Ethics Committee also considers any allegations of misconduct against Executive Directors, Alternate Executive Directors, or the President that relate to the performance of their duties. It recommends whether the facts indicate that misconduct occurred and what measures may be appropriately imposed to the Board of Directors.

Human Resources Committee

The Human Resources Committee is a means by which the Board of Directors can provide guidance on human resources management, in view of Strategy 2020 in terms of the systematic implementation of wide ranging reforms and fundamental improvements to its human resources management. Its primary responsibility includes reviewing, monitoring and making recommendations to the Board of Directors on ADB's human resources strategies and policies. The Human Resources Committee consists of not more than six members of the Board of Directors.

ADMINISTRATION

The Charter provides that ADB shall have a Board of Governors, a Board of Directors, a President, one or more Vice-Presidents and such other officers and staff as may be considered necessary. All the powers of ADB are vested in the Board of Governors, which consists of one Governor and one Alternate appointed by each member. The Board of Governors holds an annual meeting and such other meetings as may be provided for by the Board of Governors or called by the Board of Directors.

The responsibility for the direction of the general operations of ADB rests with the Board of Directors, the members of which serve full-time at ADB's principal office. The Board of Directors has 12 members, of whom eight are elected by the Governors representing regional members and four are elected by the Governors representing non-regional members. The Board of Governors has delegated to the Board of Directors all its powers except those whose delegation is expressly prohibited by the Charter. Each Executive Director is entitled to cast the number of votes that counted toward his or her election, which votes need not be cast as a unit. Executive Directors hold office for a term of two years and may be reelected. Each Executive Director appoints an Alternate Executive Director to act in such Executive Director's absence.

Matters before the Board of Governors or the Board of Directors are decided by a majority of the total voting power of the members represented at the meeting, except in certain cases provided in the Charter in which a higher percentage is required.

The President, who must be a national of a regional member, is elected by the Board of Governors. The President is elected for a 5-year term and may be reelected. The President is the Chairman of the Board of Directors but has no vote except a deciding vote in the case of an equal division of votes. The President is the legal representative of ADB. Under the direction of the Board of Directors, the President conducts the current business of ADB and is its chief of staff. The President is responsible for the organization, appointment and dismissal of the officers and staff in accordance with regulations adopted by the Board of Directors.

The Vice-Presidents are appointed by the Board of Directors on the recommendation of the President. ADB currently has six Vice-Presidents. Each Vice-President holds office for such term, exercises such authority and performs such functions in the administration of ADB as may be determined by the Board of Directors. In the absence or incapacity of the President, the ranking Vice-President exercises the authority and performs the functions of the President.

Board of Directors

Set forth below are the members of the Board of Directors of ADB, their Alternates, and the members which they represented as of 25 April 2017:

Executive Directors	Alternate Executive Directors	Members Represented
Matthew Fox	Scott Dawson	Australia; Azerbaijan; Cambodia; Georgia; Hong Kong, China; Kiribati; Federated States of Micronesia; Nauru; Palau; Solomon Islands; Tuvalu
Philaslak Yuktasemwong	Rokiah Hj Badar	Brunei Darussalam; Malaysia; Myanmar; Nepal; Singapore; Thailand
Hyoung Kwon Ko	Vacant	Republic of Korea; Papua New Guinea; Sri Lanka; Taipei, China; Uzbekistan; Vanuatu; Viet Nam
Mario Sander	Philip Rose	Austria; Germany; Luxembourg; Turkey; United Kingdom
Maurizio Ghirga	Johannes Schneider	Belgium; France; Italy; Portugal; Spain; Switzerland
Koichi Hasegawa	Masashi Tanabe	Japan
Kshatrapati Shivaji	Mahbub Ahmed	Afghanistan; Bangladesh; Bhutan; India; Lao People's Democratic Republic; Tajikistan; Turkmenistan
David Murchison	Joar Strand	Canada; Denmark; Finland; Ireland; The Netherlands; Norway; Sweden
Vacant	Michael Strauss	United States
Paul Dominguez	Muhammad Sami Saeed	Kazakhstan; Maldives; Marshall Islands; Mongolia; Pakistan; Philippines; Timor-Leste
Zhijun Cheng	Wenxing Pan	People's Republic of China
Bhimantara Widyajala	Mario Di Maio	Armenia; Cook Islands; Fiji; Indonesia; Kyrgyz Republic; New Zealand; Samoa; Tonga

Principal Officers

The principal officers of ADB are as follows:

President	Takehiko Nakao
Vice-President (Operations 1)	Wencai Zhang
Vice-President (Operations 2)	Stephen P. Groff
Vice-President (Private Sector and Cofinancing Operations)	Diwakar Gupta
Vice-President (Knowledge Management and Sustainable Development)	Bambang Susantono
Vice-President (Finance and Risk Management)	Ingrid van Wees
Vice-President (Administration and Corporate Management)	Deborah Stokes
Managing Director General	Vacant
The Secretary	WooChong Um
General Counsel	Christopher H. Stephens
Director General, East Asia Department	Ayumi Konishi
Director General, South Asia Department	Hun Kim
Director General, Central and West Asia Department	Sean M. O'Sullivan
Director General, Southeast Asia Department	James A. Nugent
Director General, Pacific Department	Xianbin Yao
Director General, Private Sector Operations Department	Michael Barrow
Director General, Sustainable Development and Climate Change Department	Ma. Carmela D. Locsin
Principal Director, Office of Information Systems and Technology	Shirin Hamid

Director General, Strategy, Policy and Review Department	Indu Bhushan
Director General, Independent Evaluation Department	Marvin Taylor-Dormond
Director General, Budget, Personnel and Management Systems Department	Toshio Oya
Director General, Operations Services and Financial Management Department	Ramesh Subramaniam
Chief Economist and Director General, Economic Research and Regional Cooperation Department	Yasuyuki Sawada
Head, Office of Cofinancing Operations	Kai Preugschat
Principal Director, Office of Administrative Services	Risa Zhijia Teng
Principal Director, Department of External Relations	Satinder Bindra
Treasurer	Pierre Van Peteghem
Controller	Chai Sun Kim
Auditor General	Hock-Chye Ong
Head, Office of Anticorruption and Integrity	Clare Wee
Head, Office of Risk Management	Mitsuhiro Yamawaki
Head, Office of Public-Private Partnership	Ryuichi Kaga

THE CHARTER

The Charter is ADB's governing constitution. It establishes the status, immunities, exemptions, and privileges of ADB, describes its purposes, capital structure and organization, authorizes the operations in which it may engage and prescribes limitations on the carrying out of those operations. The Charter also contains, among other things, provisions with respect to the admission of additional members, increases of the authorized capital stock, the terms and conditions under which ADB may make or guarantee loans, the use of currencies held by it, the withdrawal and suspension of members and the suspension and termination of ADB's operations.

Under the Charter, membership in ADB is open to (i) members and associate members of the United Nations Economic and Social Commission for Asia and the Pacific, and (ii) other regional countries and non-regional developed countries which are members of the United Nations or of any of its specialized agencies. Within the foregoing limitations, new members may be admitted upon the affirmative vote of two-thirds of the total number of Governors representing not less than three-quarters of the total voting power of the members.

The Charter provides that no new membership subscription shall be authorized which would have the effect of reducing the aggregate of capital stock held by regional members below 60% of the total subscribed capital stock. Although any member may withdraw from ADB by delivering written notice, any such member remains liable for all direct and contingent obligations to ADB to which it was subject at the date of delivery of such notice, including its obligations in respect of callable capital. No member has withdrawn from ADB since its establishment.

The Charter may be amended only by resolution of the Board of Governors approved by a two-thirds majority of the total number of Governors representing not less than three-quarters of the total voting power of the members. The unanimous agreement of the Board of Governors is required for the approval of any amendment modifying the right to withdraw from ADB, the preemptive rights to purchase capital stock or the limitation on liability of members. The Charter provides that any question of interpretation of its provisions arising between any member and ADB or between ADB's members shall be submitted to the Board of Directors for decision. Such decision may then be submitted to the Board of Governors, whose decision shall be final.

LEGAL STATUS, PRIVILEGES, AND IMMUNITIES

The Charter contains provisions which accord to ADB legal status and certain immunities and privileges in the territories of each of its members. Certain of these provisions are summarized below.

ADB has full juridical personality with capacity to contract, to acquire and dispose of immovable and movable property and to institute legal proceedings. It is immune from every form of legal process, unless it chooses to waive such immunity, except in cases arising out of or in connection with the exercise of its powers to borrow money, to guarantee obligations or to buy and sell or underwrite the sale of securities. In such cases actions may be brought against ADB in a court of competent jurisdiction in the territory of a country in which it has its principal or a branch office, has appointed an agent for accepting service or notice of process, or has issued or guaranteed securities. No action against ADB may be brought by its members or persons acting for, or deriving claims from, its members.

The Governors, Alternate Governors, Executive Directors, Alternate Executive Directors, officers and employees of ADB, including experts performing missions for it, are immune from legal process for acts performed by them in their official capacities, except when ADB waives such immunity.

The property and assets of ADB are immune from all forms of seizure, attachment or execution before the delivery of final judgment against it. Such property and assets are also immune from search, requisition, confiscation, expropriation or any other form of taking or foreclosure by executive or legislative action. The archives of ADB are inviolable.

ADB and its assets, property, income and its operations and transactions are exempt from all taxation and from all customs duties. ADB is also exempt from any obligation for the payment, withholding or collection of any tax or duty.

AUDIT FEES

Deloitte & Touche LLP, Singapore (D&T) served as ADB's independent auditors for the financial years 2016 and 2015. ADB incurred \$1.9 million for financial year 2016 (\$1.9 million for 2015) in professional fees for audit services of D&T and \$ 0.4 million for financial year 2016 (\$0.7 million for 2015) for non-audit services of other D&T offices worldwide pertaining to ADB's technical assistance projects and staff consulting services. No services for financial information systems design and implementation were rendered by D&T to ADB during 2016 and 2015.

D&T also provided audit services to the Asian Development Bank Institute, an organization affiliated with ADB, for which an amount of \$24.9 thousand for financial year 2016 (\$23.7 thousand for 2015) was incurred.

ADB's Audit Committee is satisfied that D&T's provision of non-audit services does not compromise D&T's independence.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Asian Development Bank ("ADB") is responsible for designing, implementing, and maintaining effective internal control over financial reporting. ADB's internal control over financial reporting is a process designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with generally accepted accounting principles in the United States of America.

ADB's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of ADB; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles in the United States of America, and that receipts and expenditures of ADB are being made only in accordance with authorizations of management and directors of ADB; and (iii) provide reasonable assurance regarding prevention, or timely detection and correction, of unauthorized acquisition, use, or disposition of ADB's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ADB's management assessed the effectiveness of ADB's internal control over financial reporting as of 31 December 2016, based on the criteria established in Internal Control — *Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that assessment, management concluded that, as of 31 December 2016, ADB's internal control over financial reporting is effective based on the criteria established in Internal Control — *Integrated Framework (2013)*.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and the Board of Governors of Asian Development Bank

We have audited the internal control over financial reporting of Asian Development Bank ("ADB") as of December 31, 2016, based on the criteria established in Internal Control — *Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Management's Responsibility for Internal Control over Financial Reporting

ADB's management is responsible for designing, implementing, and maintaining effective internal control over financial reporting, and for its assessment about the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting.

Auditor's Responsibility

Our responsibility is to express an opinion on ADB's internal control over financial reporting based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

An audit of internal control over financial reporting involves performing procedures to obtain audit evidence about whether a material weakness exists. The procedures selected depend on the auditor's judgment, including the assessment of the risks that a material weakness exists. An audit includes obtaining an understanding of internal control over financial reporting and testing and evaluating the design and operating effectiveness of internal control over financial reporting based on the assessed risk.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Definition and Inherent Limitations of Internal Control over Financial Reporting

ADB's internal control over financial reporting is a process designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with accounting principles generally accepted in the United States of America. ADB's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of ADB; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures of ADB are being made only in accordance with authorizations of management and directors of ADB; and (3) provide reasonable assurance regarding prevention, or timely detection and correction, of unauthorized acquisition, use, or disposition of ADB's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, ADB maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Report on Financial Statements

We also have audited, in accordance with auditing standards generally accepted in the United States of America, the accompanying balance sheets of Asian Development Bank ("ADB") – Ordinary Capital Resources as of December 31, 2016 and 2015 and the related statements of income and expenses, comprehensive (loss) income, changes in equity and cash flows, for the years then ended and the related notes to the financial statements. Our report dated March 17, 2017 expressed an unmodified opinion on those financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and the Board of Governors of Asian Development Bank

We have audited the accompanying financial statements of Asian Development Bank ("ADB") – Ordinary Capital Resources, which comprise the balance sheets as of December 31, 2016 and 2015, and the related statements of income and expenses, comprehensive (loss) income, changes in equity, and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of ADB – Ordinary Capital Resources as of December 31, 2016 and 2015, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Report on Internal Control over Financial Reporting

We have also audited, in accordance with auditing standards generally accepted in the United States of America, ADB's internal control over financial reporting as of December 31, 2016, based on the criteria established in Internal Control – *Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 17, 2017 expressed an unmodified opinion on ADB's internal control over financial reporting.

Report on Supplemental Schedules

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The supplemental schedules of summary statements of loans and summary statements of borrowings as of December 31, 2016 and 2015, and statement of subscriptions to capital stock and voting power as of December 31, 2016 are presented for the purpose of additional analysis and are not a required part of the financial statements. These schedules are the responsibility of the ADB's management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements.

Such schedules have been subjected to the auditing procedures applied in our audits of the financial statements and certain additional procedures, including comparing and reconciling such schedules directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, such schedules are fairly stated in all material respects in relation to the financial statements as a whole.

Total	\$ 61,601			

² Include currency and interest rate swaps. At 31 December 2016, the remaining maturity of swap agreements range from less than one year to 20 years. Approximately 82% of the swap receivables and 83% of the payables are due before 1 January 2022.

³ Adjusted by the cumulative effect of the adoption of ASC 815 effective 1 January 2001

⁴ Bonds with put and call options were considered maturing on the first put or call date.

⁵ Represents average current floating rates, net of spread.

⁶ Swaps with early termination date were considered maturing on the first termination date.

⁷ Consists of dual currency swaps with interest receivable in Australian dollar and interest payable in yen.

⁸ Consists of dual currency swaps with interest receivable in US dollar and interest payable in yen.

¹ The authorized capital stock of the ADB has a par value of \$10,000 in terms of US dollars of the weight and fineness in effect on 31 January 1966. Pending ADB's selection of the appropriate successor to the 1966 dollar, the par value of each share is SDR 10,000 for financial reporting purposes. Exchange rate at 31 December 2016 was \$1.34433. (Notes B and M)

The accompanying notes are an integral part of these financial statements (OCR-9).

**ASIAN DEVELOPMENT BANK—ORDINARY CAPITAL RESOURCES
NOTES TO FINANCIAL STATEMENTS
31 December 2016 and 2015**

**NOTE A—NATURE OF OPERATIONS AND LIMITATIONS ON LOANS,
GUARANTEES AND EQUITY INVESTMENTS**

Nature of Operations

The Asian Development Bank (ADB), a multilateral development financial institution, was established in 1966 with its headquarters in Manila, Philippines. ADB and its operations are governed by the Agreement Establishing the Asian Development Bank (the Charter). Its purpose is to foster economic development and co-operation in Asia and the Pacific region and to contribute to the acceleration of the process of economic development of the developing member countries (DMCs) in the region, collectively and individually. Since 1999, ADB's corporate vision and mission has been to help DMCs reduce poverty in the region. This was reaffirmed under the long-term strategic framework for 2008-2020 (Strategy 2020). Under Strategy 2020, ADB's corporate vision continues to be "An Asia and Pacific Free of Poverty" and its mission has been to help its DMCs reduce poverty and improve living conditions and quality of life. ADB has been pursuing its mission and vision by focusing on three complementary strategic agendas: inclusive growth, environmentally sustainable growth, and regional integration.

ADB conducts its operations through the ordinary capital resources (OCR) and Special Funds (See Note S). Mobilizing financial resources, including cofinancing, is another integral part of ADB's operational activities, where ADB, alone or jointly, administers on behalf of donors funds provided for specific uses.

ADB's OCR operations comprise loans, equity investments, investment in debt securities, and guarantees. ADB finances its ordinary operations through borrowings, paid-in capital, and reserves.

ADB is immune from taxation pursuant to Chapter VIII, Article 56, *Exemption from Taxation*, of the Charter.

Combined ADF-OCR Lending Operations

In April 2015, the Board of Governors adopted the resolution authorizing the termination of Asian Development Fund (ADF) loan operations and the transfer of ADF loans, resources originally set-aside from the OCR, and certain other assets as may be determined by the Board of Directors to OCR effective 1 January 2017. After the effective date of this transfer, concessional lending to lower-income countries will continue from the expanded OCR (See Note V).

Limitations on Loans, Guarantees, and Equity Investments

Article 12, paragraph 1 of the Charter provides that the total amount outstanding of loans, equity investments, and guarantees made by ADB shall not exceed the total of ADB's unimpaired subscribed capital, reserves, and surplus, exclusive of the special reserve. ADB's policy on lending limitations limits the total amount of disbursed loans, disbursed equity investments and related prudential buffer, and the maximum amount that could be demanded from ADB under its guarantee portfolio, to the total amount of ADB's unimpaired subscribed capital, reserves and surplus exclusive of the special reserve. At 31 December 2016, the total of such loans (including other debt securities), equity investments and related prudential buffers, and guarantees aggregated approximately 44.4% (39.6% – 2015) of the total subscribed capital, reserves, and surplus exclusive of the special reserve.

Article 12, paragraph 3 of the Charter provides that equity investments shall not exceed 10% of the unimpaired paid-in capital actually paid up at any given time together with reserves and surplus, exclusive of the special reserve. At 31 December 2016, such equity investments represented approximately 6.3% (6.7% – 2015) of the paid-in capital, reserves, and surplus, as defined.

continued

NOTE B—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Presentation of the Financial Statements

The financial statements of OCR are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Certain reclassifications were made in 2015 to conform to current year's presentation.

Functional Currencies and Reporting Currency

The currencies of members are all functional currencies of ADB as these are the currencies of the primary economic environment in which OCR generates and expends cash. The reporting currency is the US dollar.

Translation of Currencies

ADB adopts the use of daily exchange rates for accounting and financial reporting purposes. This allows transactions in currencies other than the US dollar to be translated to the reporting currency using exchange rates applicable at the time of transactions. At the end of each accounting month, translations of assets, liabilities, capital, and reserves denominated in non-US dollar currencies are adjusted using the applicable rates of exchange at the end of the reporting period. These translation adjustments, other than those relating to the non-functional currencies (Note O) and to the maintenance of special drawing right (SDR) capital values (Notes M and N), are charged or credited to Accumulated translation adjustments and reported in EQUITY as part of Accumulated other comprehensive loss.

Valuation of Capital Stock

The authorized capital stock of ADB is defined in Article 4, paragraph 1 of the Charter "in terms of US dollars of the weight and fineness in effect on 31 January 1966" (1966 dollar) and the value of each share is defined as 10,000 1966 dollars. The capital stock had historically been translated into the current US dollar (ADB's unit of account) on the basis of its par value in terms of gold. From 1973 until 31 March 1978, the rate arrived at on this basis was \$1.20635 per 1966 dollar. Since 1 April 1978, at which time the Second Amendment to the Articles of Agreement of the International Monetary Fund (IMF) came into effect, currencies no longer have par values in terms of gold. Pending ADB's selection of the appropriate successor to the 1966 dollar, the capital stock has been valued for purposes of these financial statements in terms of the SDR at the value in US dollars as determined by the IMF, with each share valued at SDR10,000.

As of 31 December 2016, the value of the SDR in terms of the US dollar was \$1.34433 (\$1.38686 – 2015) giving a value for each share of ADB's capital equivalent to \$13,443.30 (\$13,868.60 – 2015).

Derivative Financial Instruments

ADB reports all derivative transactions in accordance with Accounting Standards Codification (ASC) 815, "Derivatives and Hedging." ADB has elected not to define any qualifying hedging relationships, not because economic hedges do not exist, but rather because the application of ASC 815 hedging criteria does not make fully evident ADB's risk management strategies. All derivative instruments, as defined by ASC 815, have been marked to fair value (FV), and all changes in FV have been recognized in net income. ADB records derivatives in the Balance Sheet as either assets or liabilities measured at FV, consistent with the legal rights and way the instruments are settled. Individual interest rate swaps under the Master Agreement of the International Swaps and Derivatives Association (ISDA), absent of local market constraints, are recorded on a net basis, while all other swaps, including cross currency and foreign exchange swaps, are recorded on a gross basis.

continued

Investments for Liquidity Purpose

All investment securities and negotiable certificates of deposit held by ADB are considered by Management to be "Available for Sale" (AFS) and are reported at FV. Unrealized gains and losses are reported in EQUITY as part of Accumulated other comprehensive loss. Realized gains and losses are reported in the Statement of Income and Expenses under NET REALIZED GAINS From investments and are measured by the difference between amortized cost and the net proceeds of sales using the specific identification method for internally managed investment portfolio and the weighted average cost method for externally managed investment portfolio.

Interest income on investment securities and time deposits is recognized as earned and reported, net of amortization of premiums and discounts.

Unrealized losses on investment securities are assessed to determine whether the impairment is deemed to be other than temporary. If the impairment is deemed to be other than temporary, the investment is written down to the impaired value, which becomes the new cost basis of the investment. Impairment losses are not reversed for subsequent recoveries in the value of the investment, until it is sold.

Securities Transferred Under Repurchase Agreements and Securities Purchased Under Resale Arrangements

ADB accounts for transfers of financial assets in accordance with ASC 860, "Transfers and Servicing." Transfers are accounted for as sales when control over the transferred assets has been relinquished. Otherwise the transfers are accounted for as repurchase/resale agreements and collateralized financing arrangements. Under repurchase agreements, securities transferred are recorded as assets and reported at estimated FV and cash received is recorded as a liability. ADB monitors the FV of the securities transferred under repurchase agreements and the collateral. Under resale arrangements, securities purchased are recorded as assets and are not re-pledged.

Loans — Operations

ADB's loans are made to or guaranteed by members, with the exception of nonsovereign loans. Loan interest income and loan commitment fees are recognized on accrual basis. In line with ADB's principle of cost pass-through pricing, the funding cost margin is passed on to LIBOR-based loan borrowers as a surcharge or rebate.

It is the policy of ADB to place loans in non-accrual status for which principal, interest, or other charges are overdue by six months or in the case of loans that are not yet overdue, when there is expectation that interest and other charges will not be collected when they become due, at the point when such information is known. Interest and other charges on non-accruing loans are included in income only to the extent that payments have been received by ADB. Accordingly, loans are reinstated to accrual status when all the principal, interest and other charges due on the loan have been collected. ADB maintains a position of not taking part in debt rescheduling agreements with respect to sovereign loans. In the case of nonsovereign loans, ADB may agree to debt rescheduling only after alternative courses of action have been exhausted.

ADB's periodic evaluation of the adequacy of the allowance for loan losses is based on its past loan loss experience, known and inherent risks in existing loans, and adverse situations that may affect a borrower's ability to repay.

For sovereign loans, ADB determines that a loan is impaired and therefore subject to provisioning when principal or interest is in arrears for more than one year. Specific provision for sovereign loan losses is written-back when the borrower's arrears have been fully settled and the borrower has re-established regular loan service payments. The nonsovereign loans are individually reviewed and subject to provisioning when the loan is considered impaired. The impairment is determined based on the difference between the

continued

loan carrying value and the present value of expected future cash flows discounted at the loan's effective interest rate. In addition, ADB provides collective provisions for nonsovereign loans based on the credit risk ratings and probability of default and assumed loss given default.

ADB establishes loan loss reserves for both sovereign and nonsovereign credit exposures to be used as a basis for capital adequacy against expected losses in loans and guarantees. The amount of expected loss pertaining to credit exposures that is not impaired or subject to collective provision is recorded as loan loss reserve in the EQUITY section of the balance sheet. Any adjustment to loan loss reserve following this methodology is subject to the approval of the Board of Governors.

From 2000 to 2003, ADB levied front-end fees on all new sovereign loans. These fees are deferred and amortized over the life of the loans after offsetting deferred direct loan origination costs. Front-end fees were waived on sovereign loans approved from 2004 and were eliminated for sovereign loans negotiated on or after 1 October 2007. Since 1988, ADB has charged front-end fees for nonsovereign loans.

ADB levies a commitment charge on the undisbursed balance of effective loans. Unless otherwise provided by the loan agreement, the charges take effect commencing on the 60th day after the loan signing date and are credited to loan income.

Guarantees

ADB provides guarantees under its sovereign and nonsovereign operations. Guarantees are regarded as outstanding when the underlying financial obligation of the borrower is incurred. ADB would be required to perform under its guarantees if the payments guaranteed were not made by the debtor, and the guaranteed party called the guarantee by demanding payments from ADB in accordance with the term of the guarantee.

For guarantees issued and modified on or after 1 January 2003, ADB recognizes at the inception of a guarantee, a liability for the stand-by obligation to perform on guarantees. A front-end fee on guarantees received is deferred and amortized over the term of the guarantee contract. ADB records a contingent liability for the probable losses related to guarantees outstanding. This provision, as well as the unamortized balance of the deferred guarantee fee income, and the unamortized balance of the obligation to stand ready, are included in ACCOUNTS PAYABLE AND OTHER LIABILITIES - Miscellaneous on the Balance Sheet.

Collateral

ADB requires collateral from individual swap counterparties in the form of approved liquid securities or cash to mitigate its credit exposure to these counterparties. ADB records the restricted cash in OTHER ASSETS with a corresponding obligation to return the cash in ACCOUNTS PAYABLE AND OTHER LIABILITIES. Collateral received in the form of liquid securities is disclosed in Note J and not recorded on OCR's Balance Sheet.

Equity Investments — Operations

Investments in equity securities with readily determinable market price are considered AFS and are reported at FV, with unrealized gains and losses reported in EQUITY as part of Accumulated other comprehensive loss. ADB reports equity investments with associated derivatives at FV, with changes in FV reported in the Statement of Income and Expenses under NET UNREALIZED (LOSSES) GAINS.

ADB applies the equity method of accounting to investments where it has the ability to exercise significant influence such as in limited liability partnerships (LLPs) and certain limited liability companies (LLCs) that maintain a specific ownership account for each investor in accordance with ASC 323-30, "Partnerships,

continued

Joint Ventures, and Limited Liability Entities” and direct equity investment that fall under the purview of ASC 323, “Investments—Equity Method and Joint Ventures.”

Investments in equity securities without readily determinable FVs are reported at cost or at written down value. ADB has determined that it is not practicable to estimate the FV of equity investments reported at cost or written down. These investments are assessed each quarter to reflect the amount that can be realized using valuation techniques appropriate to the market and industry of each investment. When impairment is identified and is deemed to be other than temporary, the equity investment is written down to the impaired value, which becomes the new cost basis of the equity investments. Impairment losses are not reversed for subsequent recoveries in the value of the equity investments.

Variable Interest Entities

ADB complies with ASC 810, “Consolidated Financial Statements.” ASC 810 requires an entity to consolidate and provide disclosures for any Variable Interest Entity (VIE) for which it is the primary beneficiary. An entity is subject to the ASC 810 VIE Subsections and is considered a VIE if it (i) lacks equity that is sufficient to permit the entity to finance its activities without additional subordinated financial support from other parties; or (ii) if holders of the equity investment at risk lack decision-making rights about the entity’s activities that most significantly impact the entity’s economic performance; or (iii) do not have the obligation to absorb the expected losses or the right to receive the residual returns of the entity proportionally to their voting rights. ASC 810 defines the primary beneficiary as the entity that both has the (i) power to direct the activities that most significantly impact the economic performance of the VIE and the (ii) obligation to absorb losses or the right to receive residual returns of the entity. As of 31 December 2016 and 2015, ADB did not identify any VIE in which ADB is the primary beneficiary, requiring consolidation in OCR financial statements.

ADB’s variable interests can arise from equity investments, loans, guarantees, and other contractual agreements that change with the changes in the FV of the VIE’s net assets exclusive of variable interests. ADB is required to disclose information about its involvement in VIEs where ADB holds significant variable interest (see Note T).

Other Debt Securities — Operations

Investments in other debt securities may be classified as held-to-maturity (HTM) or AFS based on the intent and ability of ADB to hold these securities to maturity. HTM securities are reported at amortized cost while AFS are reported at fair value.

Interest income on other debt securities is recognized as earned and reported, net of amortization of premiums and discounts, if any. In cases where front-end fees are collected, the fees are deferred and amortized over the life of the security after offsetting deferred direct origination costs.

Unrealized losses on other debt securities are assessed to determine whether the impairment is deemed to be other than temporary. If deemed to be other than temporary, the impairment is treated based on the classification. For HTM, the impairment related to credit loss is charged against income while the impairment related to other factors is recognized in other comprehensive income, which is accreted over the remaining life of the debt security. The accretion increases the carrying value of the security until it matures or is sold. For AFS, the impairment is charged against income and not reversed for subsequent recoveries in the value of the investment, until it is sold.

Property, Furniture, and Equipment

Property, furniture, and equipment are stated at cost and, except for land, depreciated over estimated useful lives on a straight-line basis. Maintenance, repairs, and minor betterments are charged to expense. Land is stated at cost and is not amortized.

continued

Borrowings

Borrowings provide funds for ADB's operations. ADB diversifies its funding sources across markets, instruments, and maturities. In conjunction, ADB uses currency and interest rate swaps for asset and liability management.

ADB reports selected borrowings that are swapped or have floating interest rates at FV. Changes in FV are reported in the Statement of Income and Expenses under NET UNREALIZED (LOSSES) GAINS. Fixed rate borrowings, including legacy borrowings that do not have associated swaps continue to be reported at amortized cost. Amortization of discounts and premiums and issuance costs associated with new borrowings are deferred and amortized over the period during which the borrowing is outstanding.

Fair Value of Financial Instruments

ASC 820, "Fair Value Measurement" defines FV as the price that would be received to sell an asset or paid to transfer a liability at measurement date in an orderly transaction among willing participants with an assumption that the transaction takes place in the entity's principal market, or in the absence of principal market, in the most advantageous market for the asset or liability. The most advantageous market is the market where the sale of the asset or transfer of liability would maximize the amount received for the asset or minimize the amount paid to transfer the liability. The FV measurement is not adjusted for transaction cost.

The Fair Value Option

ADB has adopted the Fair Value Option subsections of ASC 825, "Financial Instruments" (ASC 825 or the Fair Value Option). ASC 825 permits the measurement of eligible financial assets, financial liabilities and firm commitments at FV on an instrument-by-instrument basis, that are not otherwise permitted to be accounted for at FV under other accounting standards. The election to use the FV Option is available when an entity first recognizes a financial asset or liability or upon entering into a firm commitment.

In adopting ASC 825, ADB elected to record and report at FV all borrowings that are swapped or have floating interest rates. This election allows ADB to apply a consistent accounting treatment between borrowings and their related swaps. ADB continues to report its loans and fixed rate borrowings, including legacy borrowings that do not have associated swaps at amortized cost and reports most of its investments (except time deposits that are recorded at cost) at FV.

Fair Value Hierarchy

ASC 820 establishes a FV hierarchy that gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1), next priority to observable market inputs or market corroborated data (Level 2), and the lowest priority to unobservable inputs without market corroborated data (Level 3).

The FVs of ADB's financial assets and liabilities are categorized as follows:

Level 1: FVs are based on unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2: FVs are based on quoted prices for similar assets or liabilities in active markets or markets that are not active; or valuation models for which significant inputs are obtained from market-based data that are observable.

Level 3: FVs are based on prices or valuation models for which significant inputs to the model are unobservable.

Inter-level transfers from one year to another may occur due to changes in market activities affecting the availability of quoted market prices or observable market data.

continued

ADB's policy is to recognize transfers in and transfers out of levels as of the end of the reporting period in which they occur.

Accounting Estimates

The preparation of the financial statements requires Management to make reasonable estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the end of the year and the reported amounts of revenues and expenses during the year. The actual results could differ from those estimates. Judgments have been used in the valuation of certain financial instruments, the determination of the adequacy of the accumulated provisions for losses on loans and other exposures (irrevocable commitments and guarantees), the determination of net periodic cost from pension and other postretirement benefits plans, and the present value of benefit obligations.

Accounting and Reporting Developments

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2014-09 *"Revenue from Contracts with Customers (Topic 606)"* to improve financial reporting by creating common revenue recognition guidance for US GAAP and the International Financial Reporting Standards. In 2016, ASUs 2016-08, 2016-10, 2016-12 and 2016-20 were issued to clarify the implementation guidance on principal versus agent considerations, on identifying performance obligations and licensing, on assessing collectability, noncash consideration, and completed contracts and contract modifications at transition, and to clarify the Codification and correct unintended application of the guidance, respectively. A public business entity is required to apply the amendments retrospectively for annual reporting periods beginning after 15 December 2017. These ASUs are not expected to have material impact on OCR's financial statements on effectiveness.

In November 2014, the FASB issued ASU 2014-16 *"Derivatives and Hedging (Topic 815) – Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity, a Consensus of the FASB Emerging Issues Task Force."* This update eliminated diversity in practice by requiring to consider all of a hybrid instrument's stated and implied substantive terms and features, including any embedded derivative features evaluated for bifurcation, in evaluating the nature of a host contract in a hybrid financial instrument. This update became effective on 1 January 2016 but had no impact to ADB's current practice, which has been consistent with the method prescribed in this update.

In February 2015, the FASB issued ASU 2015-02 *"Consolidation (Topic 810) – Amendments to the Consolidation Analysis,"* which amended the consolidation requirements and significantly changed the consolidation analysis required. The amendments reduced the number of consolidation models and placed more emphasis on risk of loss when determining a controlling financial interest. This update became effective on 1 January 2016 but did not have a material impact on OCR's financial statements.

In April 2015, the FASB issued ASU 2015-03 *"Interest – Imputation of Interest (Subtopic 835-30) – Simplifying the Presentation of Debt Issuance Costs,"* and ASU 2015-05 *"Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40) – Customer's Accounting for Fees Paid in a Cloud Computing Arrangement,"* which became effective for OCR financial statements from 1 January 2016, with no material impact on OCR's financial position, results of operations or cash flows. ASU 2015-03 required that debt issuance costs related to a recognized debt liability, currently reported as deferred charges, be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. It did not change the recognition and measurement guidance for debt issuance costs. ASU 2015-05 provided guidance to customers on accounting for cloud computing arrangement, giving consideration on whether the arrangement includes software license or not.

In January 2016, the FASB issued ASU 2016-01, *"Financial Instruments—Overall (Subtopic 825-10) – Recognition and Measurement of Financial Assets and Financial Liabilities."* This update enhances the

continued

reporting requirements for financial instruments. Specifically, this update (i) requires that investments in equity securities measured at FV recognize FV changes through net income, (ii) simplifies the impairment assessment of equity investments without readily determinable FV by requiring entities to perform a qualitative assessment to identify impairment, (iii) amends certain disclosure requirements associated with the FV of financial instruments, and (iv) requires to present separately in other comprehensive income the portion of the total change in the FV resulting from a change in the instrument-specific credit risk of liabilities that an entity has elected to measure at FV in accordance with the FV option. This update is effective for fiscal years beginning after 15 December 2017 and interim periods thereafter. Early adoption is permitted. ADB is currently assessing the impact of this ASU on OCR's financial statements.

In February 2016, the FASB issued ASU 2016-02, "*Leases (Topic 842)*." This amendment requires the recognition by lessees of lease assets and lease liabilities for the rights and obligations arising from operating leases with terms of more than 12 months. It also requires qualitative disclosures along with specific quantitative disclosures. This update is effective for fiscal years beginning after 15 December 2018 and interim periods thereafter. This ASU is not expected to have material impact on OCR's financial statements on effectivity.

In March 2016, the FASB issued the following ASUs which are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after 15 December 2016. ASU 2016-06, "*Derivatives and Hedging (Topic 815) – Contingent Put and Call Options in Debt Instruments*," requires the sole use of the four-step decision sequence in assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. ADB is currently assessing the impact of this ASU on OCR's financial statements. ASU 2016-07, "*Investments - Equity Method and Joint Ventures (Topic 323) – Simplifying the Transition to the Equity Method of Accounting*," eliminates the requirement to retroactively adopt the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence. This update will become effective for OCR financial statements from 1 January 2017.

In June 2016, the FASB issued ASU 2016-13, "*Financial Instruments – Credit Losses (Topic 326) – Measurement of Credit Losses on Financial Instruments*," replacing the incurred loss impairment methodology with a methodology that reflects expected credit losses on financial instruments and other commitments to extend credit. This update is effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after 15 December 2019. Amendments in this update will be applied through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective. ADB is currently assessing the impact of this ASU on OCR's financial statements and anticipates that the initial application will result in changes to the accounting policies and additional disclosures relating to loans, guarantees, AFS and HTM securities. It is currently impracticable to disclose any further information on the known or reasonably estimable impact to OCR's financial statements in the period of initial application as its detailed assessment has not been completed yet. ADB does not plan to early adopt this update.

In August and November 2016, FASB issued two ASUs related to statement of cash flows. ASU 2016-15, "*Statement of Cash Flows (Topic 230) – Classification of Certain Cash Receipts and Cash Payments*," provides guidance for eight specific cash flow issues, where current standards are either unclear or deficient. ASU 2016-18, "*Statement of Cash Flows (Topic 230) – Restricted Cash*," requires that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash and restricted cash equivalents. Amendments in these updates should be applied retrospectively for annual financial statements issued for fiscal years beginning after 15 December 2017, and for interim periods within those fiscal years. Early adoption is permitted. ADB is currently assessing the impact of this ASU on OCR's financial statements.

In January 2017, FASB issued ASU 2017-01, "*Business Combinations (Topic 805) – Clarifying the Definition of a Business*," which clarifies the definition of a business to assist entities in evaluating whether transactions should be accounted for as acquisitions (or disposal) of assets or business. Amendments in

continued

this update should be applied prospectively for annual financial statements issued for fiscal years beginning after 15 December 2017, and for interim periods within those fiscal years. No disclosures are required at transition. Early adoption is permitted. ADB is currently assessing the impact of this ASU on OCR's financial statements.

Also in January 2017, FASB issued ASU 2017-03, *"Accounting Changes and Error Corrections (Topic 250) and Investments – Equity Method and Joint Ventures (Topic 323) – Amendments to SEC Paragraphs Pursuant to Staff Announcements at the 22 September 2016 and 17 November 2016 EITF Meetings,"* which adds the Securities and Exchange Commission (SEC) Staff Announcement regarding disclosure of the impact that recently issued accounting standards, particularly ASU 2014-09, ASU 2016-02 and ASU 2016-13 will have on the entity's financial statements when adopted in future period. Such disclosure should include (i) a description of the effect of the accounting policies that the entity expects to apply, if determined; (ii) a comparison with current accounting policies; and (iii) the entity's progress in implementing the new standards and any significant implementation matters yet to be addressed. Appropriate disclosures were provided in the affected ASUs.

In February 2017, the FASB issued ASU 2017-05 *"Other Income – Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20) – Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets,"* which clarifies the scope of recognizing gains and losses from the transfer of nonfinancial assets and adds guidance for partial sales of nonfinancial assets. A public business entity is required to apply the amendments retrospectively for annual reporting periods beginning after 15 December 2017. ADB is currently assessing the impact of this ASU on OCR's financial statements.

Statement of Cash Flows

For the purposes of the Statement of Cash Flows, ADB considers that its cash and cash equivalents are limited to DUE FROM BANKS, which consist of current accounts in banks used for (i) operational disbursements, (ii) receipt of funds from encashment of members' promissory notes, and (iii) clearing accounts.

NOTE C—RESTRICTIONS ON USE OF CURRENCIES OF MEMBERS

In accordance with Article 24, paragraph 2(i) of the Charter, the use by ADB or by any recipient from ADB of certain currencies may be restricted by members to payments for goods or services produced and intended for use in their territories. With respect to the currencies of 40 DMCs for 2016 and 2015, cash in banks (due from banks) totaling \$76 million (\$88 million – 2015) may be, but are not currently so restricted.

In accordance with Article 24, paragraphs 2(i) and (ii) of the Charter, no member has restricted the use by ADB or by any recipient from ADB of its currency to payments for goods or services produced in its territory.

NOTE D—INVESTMENTS FOR LIQUIDITY PURPOSE

The main investment management objective is to maintain security and liquidity. Subject to these parameters, ADB seeks the highest possible return on its investments. Investments are governed by the Investment Authority approved by the Board of Directors.

ADB enters into currency and interest rate swaps, and forward rate agreements. Exposure to interest rate risk may be adjusted within defined bands to reflect changing market conditions. These adjustments are made through the purchase and sale of securities.

ADB may engage in securities lending of government or government-guaranteed obligations and corporate obligations, for which ADB receives a guarantee from the securities custodian and a fee. Transfers of securities by ADB to counterparties are not accounted for as sales as the accounting criteria

OCR-9

continued

for the treatment of a sale have not been met. These securities must be available to meet ADB's obligation to counterparties. Included in investments as of 31 December 2016 were securities transferred under securities lending arrangements of government or government-guaranteed obligations totaling \$42 million (\$24 million – 2015).

The currency composition of the investment portfolio as of 31 December 2016 and 2015 expressed in US dollars was as follows:

(\$ million)

Currency	2016		2015	
US dollar	\$	13,651	\$	12,677
Yen		7,096		5,779
Won		1,987		2,005
Euro		624		614
Australian dollar		622		598
Indian Rupee		450		180
Yuan		418		283
Canadian dollar		390		377
New Zealand dollar		286		274
Others		501		522
Total	\$	26,025	\$	23,309

The estimated FV and amortized cost of the investments by contractual maturity at 31 December 2016 and 2015 were as follows:

(\$ million)

	2016		2015	
	Estimated Fair Value	Amortized Cost	Estimated Fair Value	Amortized Cost
Due in one year or less	\$ 8,481	\$ 8,473	\$ 7,279	\$ 7,274
Due after one year through five years	15,735	15,870	15,735	15,758
Due after five years through ten years	1,809	1,831	282	265
Due after ten years through fifteen years	–	–	13	7
Total	\$ 26,025	\$ 26,174	\$ 23,309	\$ 23,304

continued

Additional information relating to investments in government or government-guaranteed obligations and other securities classified as available for sale are as follows:

(\$ million)

	2016	2015
As of 31 December		
Amortized cost	\$ 25,311	\$ 21,997
Estimated fair value	25,162	22,001
Gross unrealized gains	67	85
Gross unrealized losses	(216)	(81)
For the year ended 31 December		
Change in net unrealized gains		
from prior year	(153)	(100)
Proceeds from sales	13,549	12,377
Gross gain on sales	56	43
Gross loss on sales	(3)	(1)

The table below provides a listing of investments that sustained unrealized losses as of 31 December 2016. Five government or government-guaranteed obligations (five – 2015), and two corporate obligations (31 – 2015) sustained unrealized losses for over one year, representing 1.86% (2.93% – 2015) of the total investments. Comparative details for 2016 and 2015 are as follows:

(\$ million)

	One year or less		Over one year		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
2016						
Government or government-guaranteed obligations	\$ 14,639	\$ 208	\$ 205	\$ 3	\$ 14,844	\$ 211
Other securities						
Corporate obligations	383	5	280	0	663	5

Fair Value Disclosure

The fair value of INVESTMENTS FOR LIQUIDITY PURPOSE and related financial assets as of 31 December 2016 and 2015 was as follows:

(\$ million)

	Total	Fair Value Measurements		
		Level 1	Level 2	Level 3
2016				
Investments for liquidity purpose				
Government or government-guaranteed obligations	\$ 23,730	\$ 22,251	\$ 1,479	\$ –
Time deposits	863	–	863	–
Other securities	1,432	1,179	253	–
Securities purchased under resale arrangements	102	–	102	–
Total at fair value	\$ 26,127	\$ 23,430	\$ 2,697	\$ –
2015				
Investments for liquidity purpose				
Government or government-guaranteed obligations	\$ 20,635	\$ 19,303	\$ 1,332	\$ –
Time deposits	1,308	–	1,308	–
Other securities	1,366	1,353	13	–
Securities purchased under resale arrangements	126	–	126	–
Total at fair value	\$ 23,435	\$ 20,656	\$ 2,779	\$ –

If available, active market quotes are used to assign fair values to investment securities and related financial assets. These include most government or government-guaranteed obligations and corporate obligations. Investments and related financial assets where active market quotes are not available are categorized as Level 2 or Level 3, and valuation is provided by independent valuation services, custodians, and asset managers, or based on discounted cash flow model using market observable inputs, such as interest rates, foreign exchange rates, basis spreads, cross currency rates, and volatilities, and unobservable inputs, such as option adjusted spreads, and other techniques. Time deposits are reported at cost, which approximates FV.

OCR's INVESTMENTS FOR LIQUIDITY PURPOSE are governed by the Investment Authority approved by the Board of Directors. The asset and liability management committee and risk committee are involved in overseeing the activities and performance of the investment portfolio. ADB maintains documented processes and internal controls to value the investment securities and financial assets. The data management unit in the treasury department is responsible for providing the valuation in accordance with the business process. In instances where ADB relies primarily on prices from third party pricing information, there are procedures in place to validate the appropriateness of those values in determining the hierarchy levels. This involves evaluating the nature of prices provided by third party pricing sources to determine if they are indicative or binding prices.

continued

The table below provides the details of transfers between Levels 1 and 2, which are attributed to the availability or absence of market quotes for the years ended 31 December 2016 and 2015:

(\$ million)

	2016		2015

	<u>\$ (24)</u>	<u>\$ 24</u>	<u>\$ 223</u>	<u>\$ (223)</u>

NOTE E—SECURITIES TRANSFERRED UNDER REPURCHASE AGREEMENTS

ADB has entered into Global Master Repurchase Agreements with counterparties in which ADB agrees to transfer securities under repurchase agreements. The agreements provide for the right of a party to terminate if any of the specified default and termination events occur and includes provisions to offset the sum due from one party against the sum due from the other. ADB monitors daily the FV of margin securities for compliance with the repurchase agreement.

There are no repurchase agreements accounted for as secured borrowings as of 31 December 2016 and 2015.

NOTE F—LOANS — OPERATIONS

Loans

The carrying amount and estimated FV of loans outstanding by lending window at 31 December 2016 and 2015 were as follows:

(\$ million)

	2016		2015	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
LIBOR-based loans ^a	\$ 64,461	\$ 64,800	\$ 58,181	\$ 58,385
Local currency loans	963	995	979	1,019
Pool-based single currency loans (US\$)	2,134	2,443	2,600	3,019
Pool-based single currency loans (yen)	41	41	181	181
Total	<u>\$ 67,599</u>	<u>\$ 68,279</u>	<u>\$ 61,941</u>	<u>\$ 62,604</u>

^a This includes market-based loans.

In July 1992, ADB introduced a US dollar pool-based variable lending rate system, and in November 1994, a market-based lending rate system was made available to sovereign and nonsovereign borrowers.

ADB introduced LIBOR-based loans (LBLs) in the following currencies – US dollar, euro, and yen on 1 July 2001. The LBL lending facility offers borrowers (i) choice of currency and interest rate basis; (ii) flexibility to change the original loan terms (currency and interest rate basis) at any time during the life of the loan; and (iii) options to cap or collar the floating lending rate at any time during the life of the loan. With the introduction of LBLs, prior loan windows are no longer offered to borrowers. ADB enhanced the LBL lending facility to sovereign LBLs negotiated after 1 January 2007, offering additional major currencies that ADB can

continued

efficiently intermediate, and additional repayment options including (i) annuity method with various discount factors, (ii) straight-line repayment, (iii) bullet repayment, and (iv) custom-tailored repayment.

In November 2002, ADB started to offer local currency loans (LCL) to nonsovereign borrowers and extended the LCL to sovereign borrowers in 2005.

In June 2009, ADB established a Countercyclical Support Facility (CSF) in response to the global economic crisis that spread to Asia and the Pacific. Loans approved under the CSF carry a lending spread of 2.0% above ADB's average funding cost, and have a maturity of 5 years, including a 3-year grace period. As of 31 December 2016, outstanding CSF loans amounted to \$2,000 million (\$1,500 million – 2015).

In April 2011, ADB established the project design facility on a pilot basis to support project preparation, particularly detailed engineering designs, through project design advances (PDA). The facility is designed to be refinanced from the proceeds of the ADB loan for the ensuing project. PDAs approved carry standard lending rates. Payment of interest is deferred until the PDA is refinanced out of the loans proceeds, or other repayment terms take effect.

During 2016, ADB received prepayments for 13 loans (eight loans – 2015) amounting to \$311 million (\$154 million – 2015), of which \$157 million (\$39 million – 2015) was for sovereign loans and \$154 million was for nonsovereign loans (\$115 million – 2015).

Loans in Non-accrual Status

ADB places loans in non-accrual status when they are past due by six months or in the case of loans that are not yet overdue, when there is expectation that interest and other charges will not be collected when they become due, at the point when such information is known. As of 31 December 2016, one (nil – 2015) nonsovereign loan was in non-accrual status with principal outstanding of \$20 million, but without overdue principal.

An analysis of the age of the recorded loans outstanding that are past due as of 31 December 2016 and 2015 is as follows:

(\$ million)

	Overdue Loan Service Payments			Current	Total Loans
	1–90 Days	> 90 Days	Total		
2016					
Sovereign Loans	\$ –	\$ –	\$ –	\$ 62,278	\$ 62,278

Allowance for Loan Losses

ADB has not suffered any losses of principal on sovereign loans to date. During 2016 and 2015, no loan loss provision has been made against outstanding sovereign loans. There was no accumulated loan loss provision for sovereign loans as of 31 December 2016 and 2015.

A net provision of \$11 million was made for nonsovereign loans (\$1 million net write-back – 2015) consisting of \$21 million provision (\$2 million – 2015), and \$10 million write-back (\$3 million write-back – 2015).

The changes in the allowance for loan losses during 2016 and 2015 as well as information pertaining to loans which were subject to specific allowance for loan losses were as follows:

(\$ million)

	2016			2015		
	Sovereign Loans	Nonsovereign Loans	Total	Sovereign Loans	Nonsovereign Loans	Total
Allowance for Credit Losses:						
Beginning balance	\$ –	\$ 34	\$ 34	\$ –	\$ 35	\$ 35
Provision during the year	–	21	21	–	2	2
Written back/off	–	(10)	(10)	–	(3)	(3)
Ending Balance	<u>\$ –</u>	<u>\$ 45</u>	<u>\$ 45</u>	<u>\$ –</u>	<u>\$ 34</u>	<u>\$ 34</u>
Outstanding Allowance on:						
Individually evaluated for loan losses	\$ –	\$ 14	\$ 14	\$ –	\$ 6	\$ 6
Collectively evaluated for loan losses	\$ –	\$ 31	\$ 31	\$ –	\$ 28	\$ 28
Outstanding Loans	<u>\$ 62,278</u>	<u>\$ 5,269</u>	<u>\$ 67,547</u>	<u>\$ 57,432</u>	<u>\$ 4,457</u>	<u>\$ 61,889</u>
Individually evaluated for loan losses	\$ –	\$ 20	\$ 20	\$ –	\$ 18	\$ 18
Collectively evaluated for loan losses	\$ –	\$ 5,249	\$ 5,249	\$ –	\$ 4,439	\$ 4,439

Loans subject to provisioning with related allowance for loan losses during 2016 and 2015 were as follows:

(\$ million)

	2016			2015		
	Recorded Loan Receivable	Unpaid Principal balance	Related allowance	Recorded Loan Receivable	Unpaid Principal balance	Related allowance
Sovereign Loans	\$ –	\$ –	\$ –	\$ –	\$ –	\$ –
Nonsovereign Loans	20	–	14	18	3	6

No loans were modified or restructured for the years ended 31 December 2016 and 2015.

Credit Risks and Quality of Loans

ADB is exposed to credit risks in the loan portfolio if a borrower defaults or its creditworthiness deteriorates. Credit risks represent the potential loss due to possible nonperformance by obligors and counterparties under the terms of the contract. ADB manages credit risk for lending operations through continuous monitoring of creditworthiness of the borrowers and the capital adequacy framework.

ADB monitors credit quality of the loans by assigning a risk rating to each loan on an internal scale from 1 to 14 with 1 denoting the lowest expectation of credit risk and 14 denoting that the borrower has defaulted. The rating scale corresponds to the rating scales used by international rating agencies. For sovereign loans, ADB has a process of assigning internal ratings to provide more accurate inputs for risk measurements. For nonsovereign loans, each transaction is reviewed and assigned a rating based on a methodology that is

continued

broadly aligned with the rating approach of international rating agencies. The risk ratings are used to monitor the credit risks in the portfolio.

The following table summarizes the credit quality of sovereign and nonsovereign loans after the effect of risk transfers. High credit risk includes \$20 million in nonsovereign loans that were considered impaired (\$18 million in nonsovereign loans – 2015).

Risk Class	Risk Rating	Sovereign Loans		Nonsovereign Loans	
		2016	2015	2016	2015
Low credit risk	1–5 (AAA to BBB–)	\$ 46,121	\$ 44,447	\$ 2,040	\$ 2,001
Medium credit risk	6–11 (BB+ to B–)	16,121	12,955	3,194	2,368
High credit risk	12–14 (CCC+ to D)	36	30	35	88
Total		\$ 62,278	\$ 57,432	\$ 5,269	\$ 4,457

As of 31 December 2016, ADB's loan and guarantee portfolios had a significant concentration of credit risk to Asia and the Pacific region. The credit exposure determined based on FV amounted to \$70,383 million (\$64,011 million – 2015).

Fair Value Disclosure

ADB does not sell its sovereign loans, nor does it believe there is a market for its sovereign loans. As of 31 December 2016 and 2015, all loans are carried at amortized cost.

Fair valuation is based on internal discounted cash flow models in which expected cash flows are discounted at applicable market yield curves, plus ADB's lending spread, reduced by the specific and collective provisions. Inputs for the models are based on available market data such as yield curves, interest rates, volatilities, credit curves, and foreign exchange rates. Parameters and models used for valuation are subject to internal review and periodic external validation. The accounting division is responsible for determining and reporting the FV of the loan portfolio. The office of risk management is primarily responsible for determining the specific and collective provisions for the nonsovereign loans and the accounting division, in coordination with regional departments, is responsible for determining the specific provisions for sovereign loans. The provisioning levels are discussed at the risk committee and reported to the Board of Directors quarterly.

The significant observable inputs used in valuing the various classes of loans classified as Level 2 include foreign exchange rates and yield curves specified to index fixed rates, deposit and swap interest rates, and yield curves specified to LIBOR. The significant unobservable inputs used in valuing the various classes of loans classified as Level 3 include probability of default, weighted average cost of fixed and floating rate borrowings attached to pool-based single currency loans and swaps spreads for selected currencies.

Significant increase (decrease) in these unobservable inputs, independently, will generally decrease (increase) the FV of the loan.

The hierarchy of estimated FV of ADB loans as of 31 December 2016 and 2015 was as follows:

(\$ million)		
	2016	2015
Level 1	\$ –	\$ –
Level 2	62,166	56,815
Level 3	6,113	5,789
Total at fair value	\$ 68,279	\$ 62,604

continued

Cofinancing

ADB functions as lead lender in cofinancing arrangements with other participating financial institutions who also provide funds to ADB's sovereign and nonsovereign borrowers. In such capacity, ADB provides loan administration services, which include loan disbursements and/or loan collections. The participating financial institutions have no recourse to ADB for their outstanding loan balances. These loans are not recorded as part of OCR's Balance Sheet.

Loans administered by ADB on behalf of participating institutions during the year ended 31 December 2016 and 2015 were as follows:

(\$ million)

	2016		2015	
	Amount	No.of Loans	Amount	No.of Loans
Sovereign loans	\$ 2,177	69	\$ 1,755	59
Nonsovereign loans	1,378	19	1,200	16
Total	\$ 3,555	88	\$ 2,955	75

NOTE G—GUARANTEES — OPERATIONS

ADB provides guarantees under its sovereign and nonsovereign operations. Such guarantees include (i) credit guarantees where certain principal and/or interest payments are covered; (ii) political risk guarantees, which provide coverage against well-defined country risk events; and (iii) guarantees for certain trade-related obligations. While counter-guarantees from the host government are required for all sovereign guarantees, guarantees for nonsovereign projects may be provided with or without a host government counter-guarantee. ADB also seeks risk-sharing arrangements that set ADB's net exposure under a guarantee at the lowest level required to mobilize the necessary financing while maintaining a participation that is meaningful to its financing partners. A counter-guarantee takes the form of a counter-guarantor's agreement to indemnify ADB for any payment it makes under the guarantee. In the event that a guarantee is called, ADB has the contractual right to require payment from the counter-guarantor, on demand, or as ADB may otherwise direct.

Tenors of guarantees are subject to risk considerations and market conditions. They should normally not exceed the maximum tenor of ADB's ordinary capital resources lending operations, as may be adjusted from time to time, and there is no minimum tenor. In some cases however, guarantees may be for short tenors if the underlying obligations are short term, such as trade related products.

continued

The committed and outstanding amounts of these guarantee obligations as of 31 December 2016 and 2015 covered:

(\$ million)

	2016		2015	
	Committed Amount	Outstanding Amount	Committed Amount	Outstanding Amount
Credit Guarantees				
Trade Related				
with counterguarantee	\$ 476	\$ 476	\$ 135	\$ 135
without counterguarantee	737	612	666	390
	<u>1,213</u>	<u>1,088</u>	<u>801</u>	<u>525</u>
Non-Trade Related				
with counterguarantee	1,013	872	814	712
without counterguarantee	198	124	174	97
	<u>1,211</u>	<u>996</u>	<u>988</u>	<u>809</u>
Subtotal	<u>2,424</u>	<u>2,084</u>	<u>1,789</u>	<u>1,334</u>
Political Risk Guarantees				
Non-Trade Related				
with counterguarantee	38	21	127	59
without counterguarantee	–	–	59	14
Subtotal	<u>38</u>	<u>21</u>	<u>186</u>	<u>73</u>
Total	<u>\$ 2,462</u>	<u>\$ 2,105</u>	<u>\$ 1,975</u>	<u>\$ 1,407</u>

The committed amount represents the maximum potential amount of undiscounted future payments that ADB could be required to make, inclusive of standby portion for which ADB is committed but not currently at risk. The outstanding amount represents the guaranteed amount utilized under the related loans, which have been disbursed as of the end of the year, exclusive of the standby portion.

As of 31 December 2016, a total liability of \$24 million (\$21 million – 2015) relating to standby ready obligations for nine credit risk guarantees (eight – 2015) and one political risk guarantees (three – 2015) has been included in ACCOUNTS PAYABLE AND OTHER LIABILITIES – Miscellaneous on the Balance Sheet for all guarantees issued after 31 December 2002.

As of 31 December 2016 and 2015, one credit guarantee with nonsovereign counter-guarantee had collateral from a counter-guarantor.

Fair Value Disclosure

As of 31 December 2016 and 2015, all of ADB's future guarantee receivables and guarantee liabilities are classified as Level 3 within the FV hierarchy.

The accounting division is responsible for determining and reporting the FV of guarantees reported in the balance sheet. Future guarantee receivables and guarantee liabilities are stated at discounted present value using significant unobservable inputs such as discount rates applicable to individual guarantee contracts that are internally determined and are classified under Level 3. An increase (decrease) in discount rates generally results in a decrease (increase) in the FV of the guarantees.

continued

The valuation technique and significant unobservable quantitative inputs for guarantee receivables/ guarantee liabilities classified as Level 3 as of 31 December 2016 and 2015 were summarized below:

Portfolio	Valuation Technique	Unobservable Inputs	Range (Average)	
			2016	2015
Guarantee receivable/ Guarantee liability	Discounted cash flows	Discount rates	2.22% to 4.43% (2.99%)	3.04% to 5.37% (3.5%)

The following table presents the changes in the carrying amounts of ADB's Level 3 future guarantee receivable/liability for the years ended 31 December 2016 and 2015:

(\$ million)

	Guarantee Receivable/Liability	
	2016	2015
Balance, 1 January	\$ 21	\$ 25
Issuances	21	13
Amortization	(18)	(17)
Balance, 31 December	<u>\$ 24</u>	<u>\$ 21</u>

Note: There were no realized/unrealized gains and losses included in earnings and other comprehensive loss.

NOTE H—EQUITY INVESTMENTS — OPERATIONS

ADB's equity investments may be in the form of direct equity investments (e.g. common, preferred, or other capital stock) or through investment funds (e.g. private equity funds). They are reported: (i) at fair value; (ii) under the equity method; and (iii) at cost or written down value as follows:

(\$ million)

	2016	2015
Equity method	\$ 614	\$ 578
Cost method	122	250
Fair value method	78	34
Total	<u>\$ 814</u>	<u>\$ 862</u>

Equity investments with readily determinable FVs that are not accounted for under the equity method are reported at FV. As of 31 December 2016, these included an equity investment which was classified as AFS amounting to \$71 million (\$23 million – 2015) and equity investments with associated derivative amounting to \$7 million (\$11 million – 2015).

There were no equity investments classified as AFS that sustained unrealized losses in 2016 and 2015.

continued

Additional information relating to equity investments classified as available for sale is as follows:

(\$ million)

	2016	2015
As of 31 December		
Amortized cost	\$ 41	\$ 11
Estimated fair value	71	23
Gross unrealized gains	30	12
For the years ended 31 December:		
Change in unrealized gains from prior year	18	(27)
Proceeds from sales	25	29
Gross gain on sales	14	17

Approved equity investments that have not been disbursed totaled \$422 million at 31 December 2016 (\$432 million – 2015).

Fair Value Disclosure

ADB's equity investments reported at FV as of 31 December 2016 were \$78 million (\$34 million – 2015). Equity investments with readily determinable market prices are valued using quoted prices in active markets and are classified as Level 1. Equity investments valued with financial models using unobservable inputs are classified as Level 3.

The FV hierarchy of ADB's equity investments at FV as of 31 December 2016 and 2015 was as follows:

(\$ million)

	2016	2015
Level 1	\$ 71	\$ 23
Level 2	–	–
Level 3	7	11
Total equity investments at fair value	\$ 78	\$ 34

The office of risk management is primarily responsible for determining the FV of equity investments with associated derivatives. An increase (decrease) in these unobservable inputs, independently, will generally decrease (increase) the FV of equity investments. The valuation methodology used for the Level 3 securities was changed in 2016. The new methodology considers the proposed amendments to the put option agreement. The valuation technique and significant unobservable inputs for equity investment classified as Level 3 as of 31 December 2016 and 2015 were as presented below.

Year	Valuation Technique	Unobservable Inputs	Range (Average)
2016	Expected book value method	Discount rate Internal rate of return	23.35% 21%
2015	Discounted cash flow	Discount rate Asset growth rates	23.35% 20.00% to 30.00% (23.33%)

OCR-9

continued

The following table presents the changes in the carrying amounts of ADB's Level 3 equity investments for the years ended 31 December 2016 and 2015:

(\$ million)		
	2016	2015
Balance, beginning of year	\$ 11	\$ 9

Included in earnings ^a	(2)	2
Included in other comprehensive loss ^b	(2)	(2)
Purchases	—	2
Balance, end of year	<u>\$ 7</u>	<u>\$ 11</u>
The amount of total (losses) gains for the year included		
in earnings attributable to the change in unrealized		
gains relating to assets still held at reporting date		
	<u>\$ (2)^a</u>	<u>\$ 2</u>

^a Included in net unrealized (losses) gains (OCR-2).

^b Included in accumulated translation adjustments (Note N).

NOTE I—OTHER DEBT SECURITIES — OPERATIONS

ADB's financial assistance to DMCs may be made by way of subscription to an entity's debt instruments such as bonds and debentures issued for the purpose of financing development projects and programs. The amortized cost and estimated FV of the outstanding other debt securities by contractual maturity as of 31 December 2016 and 2015 are presented below:

(\$ million)		
	2016	2015
	Amortized Cost	Estimated Fair Value
Due after one year through five years	\$ 147	\$ 150
Due after five years through ten years	—	—
Due after ten years through fifteen	3	6
Total	<u>\$ 150</u>	<u>\$ 153</u>

Fair Value Disclosure

Fair valuation is based on internal discounted cash flow models in which expected cash flows are discounted at applicable market yield curves. Inputs for the models are based on available market data such as foreign exchange rates and yield curves specified to index fixed rates, deposit and swap interest rates. Parameters and models used for valuation are subject to internal review and periodic external validation. The accounting division is responsible for determining and reporting the FV of the other debt securities portfolio.

Significant increase (decrease) in the inputs, independently, will generally decrease (increase) the FV of the debt securities.

continued

The hierarchy of estimated FV of ADB's other debt securities as of 31 December 2016 and 2015 was as follows:

(\$ million)

	2016	2015
Level 1	\$ —	\$ —
Level 2	150	—
Level 3	3	6
Total at fair value	\$ 153	\$ 6

Historically, the value of the Level 3 securities was based on return on the put option. However, due to unfavorable developments with the issuer during the year, ADB deemed it more appropriate to use the enterprise value of the issuer to estimate the fair value of the underlying business. The valuation techniques and significant unobservable inputs used in valuing the other securities classified as Level 3 as of 31 December 2016 and 2015 are presented below:

Valuation Date	Valuation Technique	Unobservable Inputs
31 December 2016	Enterprise Value Method	Median EV / EBITDA multiples of peer companies Median EV / Sales multiples of peer companies
31 December 2015	Return on Put Option	INR/USD foreign exchange rate Internal rate of return (10% – 15%)

EBITDA = Earnings before interest, tax, depreciation and amortization; EV = Enterprise value; INR = Indian rupee; USD = United States dollar.

The following table presents the changes in the carrying amounts of ADB's Level 3 other debt securities for the years ended 31 December 2016 and 2015:

(\$ million)

	2016	2015
Balance, beginning of year	\$ 6	\$ 6
Total gains (losses) - (realized/unrealized)		
Included in other comprehensive loss (Note N)		
Accumulated translation adjustments	(0)	(0)
Unrealized investment holding (loss) gains	(1)	0
Write-down ^a	(2)	—
Balance, end of year	<u>\$ 3</u>	<u>\$ 6</u>
The amount of total (loss) gains for the year		
recognized in other comprehensive loss		
attributable to the change in net unrealized gains		
or losses relating to assets still held		
at the reporting date	<u>\$ (1)</u>	<u>\$ 0^b</u>

0 = less than \$0.5 million

Note: There were no transfers in and out of Level 3.

^aIncluded in net realized gains (OCR-2).

^bIncluded in unrealized investment holding gains for the period (Note N).

continued

NOTE J—DERIVATIVE INSTRUMENTS

ADB uses derivative instruments such as interest rate swaps, currency swaps, and foreign exchange swaps and forwards for asset and liability management of individual positions and portfolios. The FV of outstanding currency and interest rate swap agreements is determined at the estimated amount that ADB would receive or pay to terminate the agreements using market-based valuation models. The basis of valuation is the present value of expected cash flows based on market data.

Included in DERIVATIVE ASSETS/DERIVATIVE LIABILITIES – Borrowings are interest rate and currency swaps that ADB has entered into for the purpose of hedging specific borrowings. The terms of ADB's interest rate swap and currency swap agreements usually match the terms of particular borrowings. Included in DERIVATIVE ASSETS/DERIVATIVE LIABILITIES – Investments for liquidity purpose are interest rate, currency and foreign exchange swaps and forwards that ADB has entered into for the purpose of hedging specific investments. Included in DERIVATIVE ASSETS/DERIVATIVE LIABILITIES – Loans – Operations are interest rate and currency swaps that ADB has entered into for the purpose of hedging specific loans. The loan related swaps were executed to better align the composition of certain outstanding loans with funding sources. Future dated derivatives as of 31 December 2016 amounted to \$1 million for derivative assets (\$9 million – 2015) and nil for derivative liabilities (\$0.04 million – 2015).

Fair Value Disclosure

The FV hierarchy of ADB's derivatives and the balance sheet location as of 31 December 2016 and 2015 were as follows:

(\$ million)						
2016	Balance Sheet Location	Fair Value Measurements				
		Total	Level 1	Level 2	Level 3

Interest rate swaps		15	—	14	1
Total liabilities at fair value		\$ 32,272	\$ —	\$ 31,787	\$ 485

0 = less than \$0.5 million.

The office of risk management is primarily responsible for determining the FV of derivatives using discounted cash flow models. Market inputs, such as yield curves, foreign exchange rates, basis spreads, cross currency rates, and volatilities are obtained from pricing services and brokers and applied to the models. ADB has a process to validate the appropriateness of the models and inputs in determining the hierarchy levels. This involves evaluating the nature of rates and spreads to determine if they are indicative and binding. For derivatives classified under Level 3, basis swaps spreads for selected currencies are considered to be significant unobservable inputs to derive the discount rates based on benchmark yield curves adjusted with a basis swap spread.

A significant increase (decrease) in the basis swap spread will generally decrease (increase) the FV of derivatives.

There were no transfers between Levels 1 and 2 in the derivatives portfolio during 2016 and 2015.

The valuation techniques and quantitative information on significant unobservable inputs used in valuing ADB's derivative instruments classified as Level 3 as of 31 December 2016 and 2015 are presented in the next table:

Portfolio	Valuation Technique	Unobservable Inputs	Range (Weighted Average)	
			2016	2015
Borrowings related swaps/	Discounted cash flows	Basis	-0.87% to 8.05% (-1.85%)	-1.06% to 10% (-1.53%)
Loans related swaps		swap spreads

Effect of Derivative Instruments on the Statement of Income and Expenses

ADB reports changes in the FV of its derivative instruments as part of net unrealized gains and losses in its Statement of Income and Expenses while all interest income, expenses, and related amortization of discounts, premiums, and fees are reported as part of revenue and expenses. These are summarized below:

(\$ million)

	Location of Gain (Loss) recognized in Income (Expenses) on Derivatives	Amount of Gain (Loss) recognized in Income (Expenses) on Derivatives	
		2016	2015
Borrowings related derivatives			
Currency swaps	Borrowing and related expenses	\$ 530	\$ 734
	Net Realized Gains	0	—
	Net Unrealized (Losses) Gains	(218)	(16)
Interest rate swaps	Borrowing and related expenses	323	534
	Net Realized Gains	—	9
	Net Unrealized (Losses) Gains	(605)	231
		<u>\$ 30</u>	<u>\$ 1,492</u>
Investments related derivatives			
Currency swaps	Revenue from investments for liquidity purpose	\$ 44	\$ 8
	Net Unrealized (Losses) Gains	(11)	4

		<u>\$ (19)</u>	<u>\$ (48)</u>

0 = less than \$0.5 million.

Counterparty Credit Risks

ADB undertakes derivative transactions with its eligible counterparties and transacts in various financial instruments as part of liquidity and asset/liability management purposes that may involve credit risks. For all investment securities and their derivatives, ADB manages credit risks by following the policies set forth in the Investment Authority and other risk management guidelines. ADB has a potential risk of loss if the derivative counterparty fails to perform its obligations. In order to reduce credit risk, ADB transacts with counterparties eligible under ADB's swap guidelines which include a requirement that the counterparties have at least a credit rating of A– or higher and generally requires entering into master swap agreements which contain legally enforceable close-out netting provisions for all counterparties with outstanding swap transactions. The reduction in exposure as a result of these netting provisions can vary as additional

continued

transactions are entered into under these agreements. The extent of the reduction in exposure may therefore change substantially within a short period of time following the balance sheet date.

Counterparty credit risk is also mitigated by requiring counterparties to post collateral based on specified credit rating driven thresholds. As of 31 December 2016, ADB had received collateral of \$943 million (\$912 million – 2015) in connection with the swap agreements. Of this amount, \$605 million (\$494 million – 2015) was recorded as swap related collateral in the balance sheet.

ADB has entered into several agreements with its derivative counterparties under the ISDA Master Agreement and the Master Agreement of the National Association of Financial Market Institutional Investors (NAFMII). The agreements provide for the right of a party to terminate the derivative transaction if any of the various events of default and termination events specified occur. Events of default include failure to pay and cross default. Termination events include the situation where the long term unsecured and unsubordinated indebtedness of ADB or the counterparty ceases to be rated at least Baa3 by Moody's Investor Service, Inc. or BBB– by Standard and Poor's Ratings Group, or such indebtedness ceases to be rated by Moody's or S&P. If ADB's counterparties are entitled under the agreements to terminate their derivative transactions with ADB, ADB will be required to pay an amount equal to its net liability position with each counterparty (in the case of counterparties who have entered into the ISDA Master Agreement absent of local market constraints) and an amount equal to its gross liability position with each counterparty (in the case of counterparties without enforceable netting agreement). The aggregate FV of all derivative instruments that ADB has under the enforceable ISDA Master Agreement that are in a net liability (negative marked-to-market) position as of 31 December 2016 was \$3,810 million (\$3,559 million – 2015). The gross liability position in the aggregate FV of all derivative instruments that ADB has no enforceable netting agreement amounted to \$12 million as of 31 December 2016 (\$12 million – 2015).

ADB has elected not to offset any derivative instruments by counterparty in the balance sheet. Gross amounts of DERIVATIVE ASSETS and DERIVATIVE LIABILITIES not offset in the balance sheet that are subject to enforceable master netting arrangements as of 31 December 2016 and 2015 were as follows: (See Note E for PAYABLE UNDER SECURITIES REPURCHASE ARRANGEMENTS.)

(\$ million)

	2016		2015	
	Derivative assets	Derivative liabilities	Derivative assets	Derivative liabilities
Gross amount presented in the balance sheet	\$ 29,129 ^a	\$ (32,067) ^b	\$ 29,518 ^a	\$ (32,260) ^b
Gross amounts not offset in the balance sheet				
Financial instruments	(28,257)	28,257	(28,701)	28,701
Collateral received ^c	(772)	–	(761)	–
Net amount	<u>\$ 100</u>	<u>\$ (3,810)</u>	<u>\$ 56</u>	<u>\$ (3,559)</u>

^a This excludes gross amount of DERIVATIVE ASSETS presented in the balance sheet not subject to enforceable master netting agreements amounting to \$14 million (\$20 million – 2015).

^b This excludes gross amount of DERIVATIVE LIABILITIES presented in the balance sheet not subject to enforceable master netting agreements amounting to \$12 million (\$12 million – 2015).

^c Collateral received includes both cash and securities collateral.

continued

NOTE K—PROPERTY, FURNITURE, AND EQUIPMENT

In 1991, under the terms of an agreement with the Philippines (Government), ADB returned the former headquarters (HQ) premises, which had been provided by the Government. In accordance with the agreement as supplemented by a memorandum of understanding, ADB was compensated \$22,657,000 for the return of these premises. The compensation is in lieu of being provided premises under the agreement and accordingly, is deferred and amortized over the estimated life of the current HQ building as a reduction of occupancy expense. HQ depreciation for the years ended 31 December 2016 and 2015 amounted to \$4 million, net of amortization of the compensation for the former HQ building. At 31 December 2016, the unamortized deferred compensation balance (included in ACCOUNTS PAYABLE AND OTHER LIABILITIES – Miscellaneous) was \$5 million (\$6 million – 2015).

The changes in the property, furniture, and equipment during 2016 and 2015, as well as information pertaining to accumulated depreciation, were as follows:

(\$ million)

	Property, Furniture and Equipment			
	Land	Buildings and Improvements	Office Furniture and Equipment	Total
Cost:				
Balance, 1 January 2016	\$ 10	\$ 257	\$ 179	\$ 446

NOTE L—BORROWINGS

The key objective of ADB's borrowing strategy is to raise funds at the most stable and lowest possible cost for the benefit of its borrowers. ADB uses financial derivative instruments in connection with its borrowing activities to increase cost efficiency, while achieving risk management objectives. Currency and interest rate swaps enable ADB to raise operationally needed currencies in a cost-efficient way and to maintain its borrowing presence in the major capital markets. Interest rate swaps are used to reduce interest rate mismatches arising from lending and liquidity operations.

Fair Value Disclosure

The office of risk management is primarily responsible for determining the FV of the borrowings. Parameters and models used for determining the FV of borrowings are subject to internal review and periodic external validation. Plain vanilla borrowings are valued using discounted cash flow methods with market-based observable inputs such as yield curves, foreign exchange rates, and credit spreads. On some borrowings, significant unobservable input is also used such as derived credit spread. Structured borrowings issued by ADB are valued using financial models that discount future cash flows and simulated expected cash flows. These involve the use of pay-off profiles within the realm of accepted market valuation models such as Hull-White and Black-Scholes. The model incorporates market observable inputs, such as yield curves, foreign exchange rates, basis spreads, funding spreads and interest rate volatilities.

continued

The FV hierarchy of ADB's outstanding borrowing as of 31 December 2016 and 2015 were as follows:

(\$ million)

	2016	2015
at Amortized cost		
Level 1	\$ —	\$ —
Level 2	5,530	4,685
Level 3	200	202
Sub-total	\$ 5,730	\$ 4,887
at Fair value		
Level 1	\$ —	\$ —
Level 2	66,598	59,341
Level 3	2,701	2,454
Sub-total	\$ 69,299	\$ 61,795
Total borrowings at fair value	\$ 75,029	\$ 66,682

ADB uses the discounted cash flow method using derived credit spreads in determining the FVs of borrowings classified as Level 3. The derived credit spread adjusts the discount rate in valuing the borrowings. A significant increase (decrease) in credit spreads generally decreases (increases) the FV of the borrowings.

There were no transfers between Levels 1 and 2 in the borrowings portfolio during 2016 and 2015.

For borrowings carried at FV, the quantitative information on significant unobservable inputs used for valuation as of 31 December 2016 and 2015 are presented below:

Portfolio	Valuation Technique	Unobservable Inputs	Range (Weighted Average)	
			2016	2015
Borrowings	Discounted cash flows	Derived credit spreads	-1.52% to 0.4% (-0.65%)	-0.96% to 0.93% (-0.15%)

The following table presents the changes in the carrying amounts of ADB's Level 3 borrowings reported at FV for the years ended 31 December 2016 and 2015:

(\$ million)

	2016	2015
Balance, beginning of year	\$ 2,454	\$ 6,488
Total losses (gains) - (realized/unrealized)		
Included in earnings ^a	70	(203)

NOTE M—CAPITAL STOCK, CAPITAL TRANSFERRED TO ASIAN DEVELOPMENT FUND, MAINTENANCE OF VALUE OF CURRENCY HOLDINGS, AND MEMBERSHIP

Capital Stock

The authorized capital stock of ADB as of 31 December 2016 and 2015 consists of 10,638,933 shares, of which 10,614,853 shares (10,603,211 – 2015) have been subscribed by members. Of the subscribed shares, 10,082,688 (10,071,512 – 2015) are “callable” and 532,165 (531,699 – 2015) are “paid-in”. The “callable” share capital is subject to call by ADB only as and when required to meet ADB’s obligations incurred on borrowings of funds for inclusion in its OCR or on guarantees chargeable to such resources. The “paid-in” share capital has been received, partly in convertible currencies and partly in the currency of the subscribing member which may be convertible. In accordance with Article 6, paragraph 3 of the Charter, ADB accepts nonnegotiable, noninterest-bearing demand obligations in satisfaction of the portion payable in the currency of the member, provided such currency is not required by ADB for the conduct of its operations. Nonnegotiable, noninterest-bearing demand obligations received on demand amounted to \$210 million (\$257 million – 2015), while those notes received with fixed encashment schedules totaled \$466 million (\$603 million – 2015).

In January 2011, the Board of Directors approved the temporary reduction of shares and voting power of members in proportion to the delayed amount of paid-in shares if ADB does not receive confirmation of subscription payments within 45 days of the respective due dates thereof. The affected shares and voting power will be automatically restored upon receipt of the installment to the extent that the installment payments are made by 1 April 2015. In March 2015, the Board of Directors deferred this deadline to 18 May 2015. Payments received beyond this date will be referred to the Board of Directors for approval of the restoration of affected shares and voting power. As of 31 December 2016, there was no (11,642 shares – 2015) temporary reduction in subscribed shares.

As of 31 December 2016, all matured installments amounting to \$7,154 million (\$7,374 million – 2015) had been received.

Capital Transferred to Asian Development Fund

Pursuant to the provisions of Article 19, paragraph 1(i) of the Charter, the Board of Governors has authorized the setting aside of 10% of the unimpaired “paid-in” capital paid by members pursuant to Article 6, paragraph 2(a) of the Charter and of the convertible currency portion paid by members pursuant to Article 6, paragraph 2(b) of the Charter as of 28 April 1973 to be used as a part of the Special Funds of ADB. The resources so set aside amounting to \$64 million as of 31 December 2016 (\$66 million – 2015) expressed in terms of the SDR on the basis of \$1.34433 (\$1.38686 – 2015) per SDR (\$57 million in terms of \$1.20635 per 1966 dollar—*Note B*), were allocated and transferred to the ADF.

As stated in Note A, these set-aside resources were returned to OCR effective 1 January 2017.

Maintenance of Value of Currency Holdings

Prior to 1 April 1978, the effective date of the Second Amendment to the IMF Articles, ADB implemented maintenance of value (MOV) in respect of holdings of member currencies in terms of 1966 dollars, in accordance with the provisions of Article 25 of the Charter and relevant resolutions of the Board of Directors. Since then, settlement of MOV has been put in abeyance.

In as much as the valuation of ADB’s capital stock and the basis of determining possible MOV obligations are still under consideration, notional amounts have been calculated provisionally in terms of the SDR as receivable from or payable to members in order to maintain the value of members’ currency holdings. The notional MOV amounts of receivables and payables are offset against one another and shown as net notional

continued

amounts required to maintain value of currency holdings in the EQUITY portion of the Balance Sheet. The carrying book value for such receivables and payables approximates its FV.

The net notional amounts as of 31 December 2016 consisted of (i) the net increase of \$754 million (\$954 million – 2015) in amounts required to maintain the value of currency holdings to the extent of matured and paid-in capital subscriptions due to the increase in the value of the SDR in relation to the US dollar during the period from 1 April 1978 to 31 December 2016 and (ii) the net increase of \$720 million (\$662 million – 2015) in the value of such currency holdings in relation to the US dollar during the same period. In terms of receivable from and payable to members, they are as follows:

(\$ million)		
	2016	2015
Notional MOV Receivables	\$ 1,524	\$ 1,621
Notional MOV Payables	(50)	(5)
Total	\$ 1,474	\$ 1,616

Membership

As of 31 December 2016 and 2015, ADB's shareholders consist of 67 members, 48 from the region and 19 from outside the region (*OCR-8*).

NOTE N—RESERVES

Ordinary Reserve and Net Income

Under the provisions of Article 40 of the Charter, the Board of Governors shall determine annually what part of the net income shall be allocated, after making provision for reserves, to surplus and what part, if any, shall be distributed to the members.

In May 2016, the Board of Governors approved the following with respect to ADB's 2015 net income of \$537 million, after appropriation of guarantee fees to special reserve: (i) \$43 million representing the adjustment to the Loan Loss Reserve as of 31 December 2015, be added from the loan loss reserve to the net income; (ii) \$213 million representing the ASC 815/825 adjustments and the unrealized portion of net income from equity investments accounted for under the equity method for the year ended 31 December 2015, be added to the Cumulative Revaluation Adjustments (CRA) account; (iii) \$208 million be allocated to the Ordinary Reserve; (iv) \$120 million be allocated to ADF; and (v) \$40 million be allocated to Technical Assistance Special Fund (TASF).

In May 2015, the Board of Governors approved the following with respect to ADB's 2014 net income of \$366 million, after appropriation of guarantee fees to special reserve: (i) \$183 million representing the ASC 815/825 adjustments and the unrealized portion of net income from equity investments accounted for under the equity method for the year ended 31 December 2014, be added from the CRA account; (ii) \$15 million representing the adjustment to the Loan Loss Reserve as of 31 December 2014, be added from the loan loss reserve to the net income; (iii) \$384 million be allocated to the Ordinary Reserve; (iv) \$120 million be allocated to ADF; (v) \$40 million be allocated to TASF; and (vi) \$20 million be allocated to Asia Pacific Disaster Response Fund (APDRF).

The revaluation of the capital stock for purposes of these financial statements on the basis of the SDR instead of the 1966 dollar (*Note B*) resulted in a net credit of \$23 million to the Ordinary Reserve during the year ended 31 December 2016 (net credit of \$38 million – 2015). That credit is the decrease in the value of the matured and paid-in capital subscriptions caused by the change during the year in the value

continued

of the SDR in relation to the US dollar not allocated to members as notional maintenance of value adjustments in accordance with resolutions of the Board of Directors.

Cumulative Revaluation Adjustments Account

In May 2002, the Board of Governors approved the allocation of net income representing the cumulative net unrealized gains (losses) on derivatives, as required by ASC 815 to a separate category of Reserves – Cumulative Revaluation Adjustments Account. Beginning 2008, the unrealized portion of net income from equity investments accounted under equity method is also transferred to this account. During 2016, the 2015 net unrealized gains on derivatives of \$239 million (net unrealized losses of \$193 million – 2015) and net unrealized losses from equity investments accounted for under the equity method of \$26 million (net unrealized gains of \$9 million – 2015) resulted in a credit balance in the CRA account at 31 December 2016 of \$88 million (debit balance of \$125 million – 2015).

Special Reserve

The Special Reserve includes commissions on loans and guarantee fees received which are required to be set aside pursuant to Article 17 of the Charter to meet liabilities on guarantees. For the year ended 31 December 2016, guarantee fees amounting to \$18 million (\$19 million – 2015) were appropriated to Special Reserve.

Loan Loss Reserve

ADB sets aside Loan Loss Reserve as part of EQUITY to be used as a basis for capital adequacy against the estimated expected loss in ADB's sovereign and nonsovereign loans and guarantees portfolio. The loan loss reserve is estimated based on expected loss using ADB's credit risk model net of allowance for loan losses recorded in the balance sheet.

As of 31 December 2016, the loan loss reserve was \$172 million (\$215 million – 2015).

Surplus

Surplus represents funds for future use to be determined by the Board of Governors.

Accumulated Other Comprehensive Loss

Comprehensive income (loss) has two major components: net income (loss) and other comprehensive income (loss) comprising gains and losses affecting equity that, under US GAAP, are excluded from net income (loss). Other comprehensive income (loss) includes items such as unrealized gains and losses on financial instruments classified as AFS, translation adjustments, and pension and post-retirement liability adjustment.

continued

The changes in Accumulated Other Comprehensive Loss balances for the years ended 31 December 2016 and 2015 were as follows:

(\$ million)

	Accumulated Translation Adjustments	Unrealized Holding (losses) Gains			Pension/ Postretirement Liability Adjustments	Accumulated Other Comprehensive Loss
		Investments for liquidity purpose	Equity Investments — Operations	Other debt securities — Operations		
Balance, 1 January 2015	\$ (156)	\$ 104	\$ 36	\$ 0	\$ (1,222)	\$ (1,238)

0 = less than \$0.5 million.

The reclassifications of Accumulated Other Comprehensive Loss to Net Income for the year ended 31 December 2016 and 2015 are presented below:

(\$ million)

Accumulated Other Comprehensive Loss Components	Amounts Reclassified from Accumulated Other Comprehensive Loss ^a		Affected Line Item in the Statement of Income and Expenses
	2016	2015	
Unrealized Holding Gains			
Investments for liquidity purpose	\$ 28	\$ 23	NET REALIZED GAINS From investments for liquidity purpose
Equity investments — operations	12	14	NET REALIZED GAINS From EI — operations
Other debt securities — operations	1	—	NET REALIZED GAINS From Other debt securities — operations
	<u>\$ 41</u>	<u>\$ 37</u>	
Pension/Postretirement Liability Adjustments			
Actuarial losses	\$ (51)	\$ (82)	Administrative expenses
Total reclassifications for the period	<u>\$ (10)</u>	<u>\$ (45)</u>	

EI = equity investments.

^a Amounts in parentheses indicate debits to net income.

NOTE O—INCOME AND EXPENSES

Revenue from loan operations for the year ended 31 December 2016 totaled \$1,054 million (\$678 million – 2015). The average yield on the loan portfolio during the year was 1.65% (1.16% – 2015), including risk transfer costs.

Total income from investment for liquidity purpose including net realized gains on sales, interest earned for securities transferred under repurchase agreements and resale arrangements for the year ended 31 December 2016 was \$452 million (\$365 million – 2015). The annualized rate of return on the average investments held during the year, based on the portfolio held at the beginning and end of each month, was 1.58% (1.33% – 2015) excluding unrealized gains and losses on investments and 1.04% (0.98% – 2015) including unrealized gains and losses on investments.

OCR-9

continued

Net income from equity investment operations resulted in net income of \$125 million (net loss of \$7 million – 2015) for the year ended 31 December 2016. This included divestment gains of \$142 million (\$19 million – 2015), net equity income of \$15 million (net equity losses of \$28 million – 2015), and dividend income of \$3 million (\$8 million – 2015). These were offset by \$35 million (\$7 million – 2015) other than temporary impairment losses.

Net loss from other debt securities amounted to \$2 million (nil – 2015), representing other than temporary impairment losses.

Income from other sources primarily included income received as executing agency amounting to \$17 million (\$16 million – 2015), transaction advisory service fees of \$15 million (\$3 million – 2015) and other miscellaneous income amounting to \$11 million (\$10 million – 2015).

Total borrowing expense of \$751 million (\$374 million – 2015) consisted of interest expense and other related expenses such as amortization of issuance costs and derivatives, while the average cost of borrowings outstanding after swaps was 1.68% (0.19% – 2015).

Total depreciation expense incurred for the year ended 31 December 2016 amounted to \$20 million (\$23 million – 2015).

ADB leases office spaces and other assets. Annual rental expenses under operating leases for the years ended 31 December 2016 and 2015 were about \$11 million. The minimum rental payments required under operating leases that have initial or noncancelable lease terms in excess of one year as of 31 December 2016 are as follows:

Year ending 31 December	Minimum amount of future rentals (\$ million)
2017	5
2018	5
2019	5
2020	4
Later years	4

Administrative expenses (other than those pertaining directly to ordinary operations and special operations) for the year ended 31 December 2016 were apportioned between OCR and ADF in proportion to the relative volume of operational activities. Of the total administrative expenses of \$682 million (\$682 million – 2015), \$268 million (\$278 million – 2015) was charged to ADF. The balance of administrative expenses represents the amount allocated to OCR which was reduced by the deferral of direct loan origination costs of \$24 million (\$21 million – 2015) related to new loans made effective during the year (*Note B*).

For the year ended 31 December 2016, net provision for loan losses of \$11 million (\$1 million net write-back – 2015) consisted of \$21 million additional loan loss provision (\$2 million – 2015) and \$10 million write-backs (\$3 million – 2015).

continued

The following table provides information on the unrealized gains or losses included in income for the years ended 31 December 2016 and 2015:

(\$ million)

	2016	2015
Unrealized (losses) gains on:		
Borrowings and related swaps	\$ (523)	\$ 244
Investments related swaps	2	10
Loans related swaps	7	(13)
Equity investments – Operations	(2)	2
Translation adjustments of non-functional currencies	(4)	(4)
Total	\$ (520)	\$ 239

NOTE P—RELATED PARTY TRANSACTIONS

At 31 December 2016 and 2015, ADB had the following net receivables from and payable to Special Funds and externally funded trust funds under ADB administration (Agency Trust Funds) resulting from administrative arrangements and operating activities which are included in Miscellaneous under OTHER ASSETS and ACCOUNTS PAYABLE AND OTHER LIABILITIES:

(\$ million)

	2016	2015
Amounts receivable from:		
Asian Development Fund	\$ 5	\$ 51
Employee Benefit Plans	—	2
Total	\$ 5	\$ 53
Amounts payable to:		
Agency Trust Funds—net	\$ 1	\$ 1
Employee Benefit Plans	7	—
Total	\$ 8	\$ 1

As of 31 December 2016 and 2015, the related parties include employee benefit plans consisting of the Staff Retirement Plan (SRP) and the Retiree Medical Plan Fund (RMPF).

NOTE Q—STAFF PENSION AND POSTRETIREMENT MEDICAL BENEFITS

Staff Retirement Plan

ADB has a contributory defined pension benefit plan called the SRP. Every employee, as defined under the SRP, shall, as a condition of service, become a participant from the first day of service, provided the employee has not reached the normal retirement age of 60 at that time. The plan applies also to members of the Board of Directors who elect to join. Retirement benefits are based on an annual accrual rate, length of service and the highest average two years remuneration during eligible service. The plan assets are segregated in a separate fund. The costs of administering the plan are absorbed by ADB, except for fees paid to the investment managers and related charges, including custodian fees, which are borne by the Plan.

Participants hired prior to 1 October 2006 are required to contribute 9 1/3% of their salary to the plan while those hired on or after 1 October 2006 are not required to contribute. The annual accrual rate is 2.95% for

continued

staff hired prior to 1 October 2006 and 1.5% for those hired on or after 1 October 2006. Participants may also make discretionary contributions. ADB's contribution is determined at a rate sufficient to cover that part of the costs of the SRP not covered by the participants' contributions.

Expected Contributions

ADB's contribution to the SRP varies from year to year, as determined by the Pension Committee, which bases its judgment on the results of annual actuarial valuations of the assets and liabilities of the plan. ADB is expected to contribute \$53 million for 2017 based on a budgeted contribution of 23% of salary.

ADB's staff members are expected to contribute \$32 million representing participants' mandatory contribution of \$9 million and discretionary contributions of \$23 million.

Investment Strategy

Contributions in excess of current benefits payments are invested in international financial markets and in a variety of investment vehicles. The SRP employs 13 external asset managers and one global custodian who are required to operate within the guidelines established by the SRP's Investment Committee. The investment of these assets, over the long term, is expected to produce returns higher than short-term investments. The investment policy incorporates the plan's package of desired investment return and tolerance for risk, taking into account the nature and duration of its liabilities. The SRP's assets are diversified among different markets and different asset classes. The use of derivatives for speculation, leverage or taking risks is prohibited. Selected derivatives are used for hedging and transactional efficiency purposes.

The SRP's investment policy is periodically reviewed and revised to reflect the best interest of the SRP's participants and beneficiaries. As approved by the Pension Committee on 27 October 2015, the SRP's new long-term target asset-mix, which was implemented in 2016, is 35% US equity, 30% non-US equity, 15% global fixed income, 10% globally high yield, and 10% diversified asset.

For the year ended 31 December 2016, the net return on the SRP assets was 6.36% (-0.47% – 2015). ADB expects the long-term rate of return on the assets to be 7.0% (7.0% – 2015).

Assumptions

The assumed overall rate of return takes into account long-term return expectations of the underlying asset classes within the investment portfolio mix, and the expected duration of the SRP's liabilities. Return expectations are forward looking and, in general, not much weight is given to short-term experience. Unless there is a drastic change in investment policy or market environment, as well as in the liability/benefit policy side, the assumed average long-term investment return of 7.0% on the SRP's assets is expected to remain on average broadly the same, year to year.

Effective for the 2015 actuarial valuation, as part of the regular assumptions review, some revisions were made to the previous actuarial assumptions based on the 2010-2014 experience. The assumptions that were revised include changes to the investment return, salary progression, pension increases, rates of withdrawal, early and incapacity retirement rates, retirement and post-incapacity retirement mortality rates, percent of international staff who commute, and other commutation factors.

Post-Retirement Group Medical Insurance Plan

In 1993, ADB adopted a cost-sharing arrangement for the Post-Retirement Group Medical Insurance Plan (PRGMIP). Under this plan, ADB is obligated to pay 75% of the PRGMIP premiums for retirees, which includes retired members of the Board of Directors, and their eligible dependents who elected to participate.

continued

The Retiree Medical Plan Fund (RMPF) was established in 2014 to hold the assets in trust that will fund the accumulated obligations of the PRGMIP. The income of RMPF consists of ADB's contributions and investment earnings; it does not have any component attributable to participants' share of PRGMIP costs. In 2016 and 2015, insurance premium paid by ADB for the PRGMIP is considered ADB's contribution to the fund. The costs of administering the RMPF are absorbed by ADB, while investment management and custodian fees are paid from the RMPF.

The SRP Pension Committee is responsible for the overall financial management of the RMPF and is assisted by the SRP Investment Committee.

Expected Contribution

ADB's expected contribution to the RMPF is based on the recommendation of the SRP Pension Committee. For 2017, ADB is expected to contribute \$6 million, which is equivalent to 2% of salary.

Investment Strategy

The RMPF employs three external asset managers and one global custodian who are required to operate within the guidelines established by the SRP's Investment Committee. The investment of these assets, over the long term, is expected to produce returns higher than short-term investments. Similar to SRP, the investment policy incorporates the RMPF's package of desired investment return and tolerance for risk, taking into account the nature and duration of its liabilities. The RMPF's assets are diversified among different markets and asset classes. The use of derivatives for speculation, leverage or taking risks is prohibited. Selected derivatives are used for hedging and transactional efficiency purposes.

In October 2015, the Pension Committee approved the RMPF's investment policy. Based on the approved policy, the RMPF's long-term target asset-mix is 40% US equity, 30% non-US equity, and 30% global fixed income. For the year ended 31 December 2016, the net return on the RMPF assets was 5.89% (-2.06% — 2015).

Assumptions

The overall long-term rate of return is 7% per annum, similar to the SRP.

Effective for the 2015 actuarial valuation, as part of the regular assumptions review, some revisions were made to the previous actuarial assumptions based on the 2010-2014 experience. The assumptions that were revised include retirement mortality rates and PRGMIP election rates, and average per capita medical costs among others.

continued

The following table sets forth the funded status of pension and postretirement medical benefits at 31 December 2016 and 2015:

(\$ million)

	Pension Benefits		Postretirement Medical Benefits	
	2016	2015	2016	2015
Change in plan assets:				
Fair value of plan assets at beginning of year	\$ 2,409	\$ 2,305	\$ 308	\$ 315
Actual return on plan assets	159	(9)	18	(7)
Employer's contribution	168	145	5	4
Plan participants' contributions	143	84	—	—
Benefits paid	(127)	(116)	(5)	(4)
Fair value of plan assets at end of year	<u>\$ 2,752</u>	<u>\$ 2,409</u>	<u>\$ 326</u>	<u>\$ 308</u>
Change in projected benefit obligation:				
Projected benefit obligation at beginning of year	\$ 3,557	\$ 3,542	\$ 418	\$ 430
Service cost	89	95	23	24
Interest cost	164	149	20	19
Plan participants' contributions	143	84	—	—
Actuarial loss (gains)	152	(197)	(59)	(50)
Benefits paid	(127)	(116)	(5)	(5)
Projected benefit obligation at end of year	<u>\$ 3,978</u>	<u>\$ 3,557</u>	<u>\$ 397</u>	<u>\$ 418</u>
Funded status	<u>\$ (1,226)</u>	<u>\$ (1,148)</u>	<u>\$ (71)</u>	<u>\$ (110)</u>
Amounts recognized in the Balance sheet as Accrued pension and postretirement medical benefit costs	<u>\$ (1,226)</u>	<u>\$ (1,148)</u>	<u>\$ (71)</u>	<u>\$ (110)</u>
Amounts recognized in the Accumulated other comprehensive loss as Pension/Postretirement liability adjustments (Note N)	<u>\$ 1,146</u>	<u>\$ 1,034</u>	<u>\$ 0</u>	<u>\$ 55</u>
Weighted-average assumptions as of 31 December (%)				
Discount rate	4.40	4.55	4.70	4.55
Expected return on plan assets	7.00	7.00	7.00	7.00
Rate of compensation increase varies with age and averages	4.00	4.00	N/A	N/A

0 = less than \$0.5 million

For measurement purposes, a 7.0% annual rate of increase in the per capita cost of covered postretirement medical benefits was assumed for the valuation as of 31 December 2016 and 2015. The rate was assumed to decrease gradually to 5.0% by 2022 and remain at the level thereafter.

continued

The following table summarizes the benefit costs associated with pension and postretirement medical benefits for the year ended 31 December 2016 and 2015:

(\$ million)

	Pension Benefits		Postretirement Medical Benefits	
	2016	2015	2016	2015
Components of net periodic benefit cost:				
Service cost	\$ 89	\$ 95	\$ 23	\$ 24
Interest cost	164	149	20	19
Expected return on plan assets	(170)	(162)	(23)	(19)
Recognized actuarial loss (Note N)	51	79	0	3
Net periodic benefit cost	\$ 134	\$ 161	\$ 20	\$ 27

0 = less than \$0.5 million

The accumulated benefit obligation of the pension plan as of 31 December 2016 was \$3,760 million (\$3,346 million – 2015).

The estimated net loss for the defined benefit pension plans and postretirement medical benefits plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year amounted to \$57 million and \$0 million, respectively.

Assumed postretirement medical benefits cost trend rates have a significant effect on the amounts reported for the postretirement medical benefits plan. A one-percentage-point change in the assumed trend rates would have the following effects:

(\$ million)

	<u>1-Percentage- Point Increase</u>	<u>1-Percentage- Point Decrease</u>
Effect on total service and interest cost components	13	(9)
Effect on postretirement medical benefit obligation	90	(69)

Estimated Future Benefits Payments

The following table shows the benefit payments expected to be paid in each of the next five years and subsequent five years. The expected benefit payments are based on the same assumptions used to measure the benefit obligation at 31 December 2016:

(\$ million)

Year	Pension Benefits	Postretirement Medical Benefits
2017	\$ 144	\$ 7
2018	153	8
2019	164	9
2020	172	10
2021	183	11
2022–2026	1,089	72

The SRP's Investment Committee and SRP investment unit meet periodically and are involved in overseeing the activities and performance of the investment portfolios. The FV of the SRP investments is provided by the SRP's global custodian from various independent pricing providers. The accounting division in coordination with data management unit of treasury services division evaluates the FV in determining the hierarchy level. All investments including equity securities, fixed income securities and derivatives are provided by independent pricing providers. Equity securities include common and preferred stocks and mutual funds. Fixed income securities include government or government-guaranteed securities, corporate obligations, asset and mortgage-backed securities, and short-term investments. Derivatives include futures, swaps and currency forward contracts.

continued

NOTE S—SPECIAL AND OTHER FUNDS

ADB's operations include special operations, which are financed from Special Funds resources. The OCR and Special Funds resources are at all times used, committed, and invested entirely separately from each other. The Board of Governors may approve allocation of the net income of OCR to Special Funds, based on the funding and operational requirements for the funds. The administrative and operational expenses pertaining to the OCR and Special Funds are charged to the respective Special Funds. The administrative expenses of ADB are allocated amongst OCR and Special Funds and are settled regularly.

In addition, ADB, alone or jointly with donors, administers on behalf of the donors, including members of ADB, their agencies and other development institutions, projects/programs supplementing ADB's operations. Such projects/programs are funded with external funds administered by ADB and with external funds not under ADB's administration (referred as trust funds). ADB charges administrative fees for external funds administered by ADB. The trust funds are restricted for specific uses including technical assistance to borrowers and for regional programs, grants for projects, and loans. The responsibilities of ADB under these arrangements range from project processing to project implementation including the facilitation of procurement of goods and services. These funds are held in trust with ADB, and are held in a separate investment portfolio. The assets of trust funds are not commingled with ADB's resources, nor are they included in the assets of ADB.

Special Funds and trust funds are not included in the assets of OCR. The net assets as of 31 December 2016 and 2015 are summarized below:

(\$ million)

	2016		2015	
	Total Net Assets	No.	Total Net Assets	No.
Special Funds				
Asian Development Fund	\$ 30,948	1	\$ 30,784	1
Technical Assistance Special Fund	41	1	147	1
Japan Special Fund	106	1	105	1
Asian Development Bank Institute	10	1	9	1
Regional Cooperation and Integration Fund	6	1	8	1
Climate Change Fund	8	1	11	1
Asia Pacific Disaster Response Fund	8	1	17	1

Subtotal	31,134	8	31,088	8
Trust Funds (including project specific cofinancing)	2,253	123	2,258	117
Total	\$ 33,387	131	\$ 33,346	125

During the year ended 31 December 2016, a total of \$15 million (\$12 million – 2015) was recorded as compensation for administering projects/programs. The amount has been included in REVENUE From other sources—net.

continued

NOTE T—VARIABLE INTEREST ENTITIES

In 2016, ASU 2015-02 became effective for ADB. It modified the evaluation of whether limited partnerships and similar entities are VIEs, eliminated the presumption that a general partner should consolidate a limited partnership, modified the consolidation assessment of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships, and provided a scope exception for reporting entities with interest in money market funds. Based on the result of the re-evaluation, ADB has identified investments in 34 (33 – 2015) VIEs which are not consolidated by ADB but in which it is deemed to hold significant variable interests at 31 December 2016. These non-consolidated VIEs are mainly (i) operating entities where the total equity invested is considered insufficient to finance its activities without additional subordinated financial support and (ii) investment funds, where the general partner or fund manager does not have substantive equity at risk and the equity holders lack decision making rights. These VIEs are in the finance and energy sectors.

ADB's involvement in these non-consolidated VIEs includes loans, guarantees, and investments in debt securities and equity interests. Based on the most recent available data from these VIEs at 31 December 2016, the assets of these non-consolidated VIEs totaled \$11,941 million (\$13,765 million – 2015).

The table below shows the carrying value of ADB interests in the non-consolidated VIEs and the maximum exposure to loss of these interests. For guarantees, the maximum exposure is the notional amount of such guarantee, less any counter-guarantee.

(\$ million)

	Carrying value of ADB's Variable Interests	Committed but Undisbursed	Maximum Exposure to Loss
2016			
Loans — Operations	\$ 161	\$ —	\$ 161
Equity Investments — Operations	327	182	509
Guarantees	52	—	52
Total	\$ 540	\$ 182	\$ 722
2015			
Loans — Operations	\$ 918	\$ 74	\$ 992
Equity Investments — Operations	127	71	198
Guarantees	60	—	60
Total	\$ 1,105	\$ 145	\$ 1,250

NOTE U—SEGMENT REPORTING

Based on an evaluation of OCR's operations, Management has determined that OCR has only one reportable segment since OCR does not manage its operations by allocating resources based on a determination of the contribution to net income from individual borrowers.

The following table presents the outstanding issuances and associated revenue of OCR's loan, guarantees, other debt securities, and equity investments by geographic region, as of and for the years ended 31 December 2016 and 2015:

(\$ million)

Country	2016		2015	
	Outstanding Balance	Revenue	Outstanding Balance	Revenue
People's Republic of China	\$ 16,796	\$ 294	\$ 15,795	\$ 231
India	15,592	211	14,557	124

Revenue comprises income from loans, guarantees, other debt securities, and equity investments, and excludes net realized gains and unrealized gains and losses.

For the years ended 31 December 2016 and 2015, sovereign loans to three members individually generated more than 10 percent of loan revenue which amounted to \$252 million, \$171 million, and \$143 million (\$186 million, \$103 million, and \$97 million – 2015).

NOTE V—SUBSEQUENT EVENTS

ADB has evaluated subsequent events after 31 December 2016 through 17 March 2017, the date these Financial Statements are available for issuance. During this period, ADB has raised additional borrowings of approximately \$12,567 million in various currencies.

Transfer of ADF loans and other assets to OCR

In 2014, ADB introduced a proposal to enhance ADB's financial capacity in a sustainable manner through more efficient and effective management of its capital resources. The proposal entailed combining ADF lending operations with the OCR and retaining the ADF as a grant-only operation. ADB would continue concessional lending on the same terms and conditions as currently provided to ADF countries through the OCR window, while the ADF would continue to provide grant assistance.

In April 2015, the Board of Governors adopted a resolution authorizing the termination of ADF's loan operations and the transfer of ADF's loans and other assets to OCR effective 1 January 2017 (the 2015 Resolution). This resolution was further amended in June 2016. Accordingly, on 1 January 2017, ADB transferred ADF loans and other assets totaling \$30,812 million from ADF to OCR. The transferred ADF assets composed of loans including accrued interest totaling \$27,088 million and liquid assets totaling \$3,724 million. The source of funding for ADF came from donor contributions, OCR net income transfer, and set-aside resources.

OCR-9

continued

The transfer of these assets was treated as a contribution from ADF to OCR and a return of the set-aside resources from ADF to OCR. This resulted in the recognition of one-time income of \$30,748 million in OCR and a return of the set-aside resources of \$64 million. The corresponding income recognized in OCR has been allocated to ordinary reserves as from 1 January 2017 following the adoption of Board of Governors Resolution No. 387.

The proportionate interest of ADF donors in the transferred assets as of 1 January 2017, taking into account the value of paid-in donor contributions that have been made available for operational commitments which are deemed by ADB to be applied for the transferred assets, was determined in accordance with Article V of the Regulations of the Asian Development Fund. The value of each donor's paid-in contributions was fixed in US dollars based on the SDR value of each donor contribution as of 1 January 2017. This was then used to determine the sources of funds in the transferred assets on 1 January 2017, the date of the termination of the ADF loan operations and transfer of assets to OCR. Under the 2015 Resolution, the proportionate interest of an ADF donor will be taken into account in the event of the withdrawal of that donor from ADB and ADB's repurchase of its shares, and in the theoretical termination of ADB operations and liquidation of its assets. The following table shows the funding sources of the transferred assets:

Source of Funds in ADF	\$ million	%	Source of Funds in ADF	\$ million	%
Donor Contributions					
Australia	\$ 2,213	7.18	Malaysia	24	0.08
