21st Copper Concentrate Shipment Dispatched

Perth, Australia: Alara Resources Limited (ASX: AUQ) (**Alara** or the **Company**), a base and precious metals producer and explorer with projects in Oman, is pleased to announce the dispatch of the 21st shipment of copper concentrate from its Al Wash-hi – Majaza copper-gold mine in Oman. The Al Wash-hi – Majaza mine is operated by Alara's joint venture company Al Hadeetha Resources LLC (**AHRL**). Alara holds a 51% interest in AHRL.

Summary

- **21st shipment of 1563.9 WMT copper-concentrate shipped on 31st July, comprising 263 MT copper and 2.7 Kg gold**

The Al Wash-hi Majaza copper-concentrate plant has achieved production of 1563.9 WMT of copper-gold concentrate with approximately 263 MT of contained copper and approximately 2.7 kg of gold in its latest shipping cycle. This comprises the 21st parcel of copper-concentrate exported from the plant, and departed Sohar Port on 31 July.

The Al Wash-hi – Majaza processing plant recently underwent a 10-day shutdown to change the metallic liners in the SAG mill. This was a routine, planned shutdown which is scheduled to occur every six months. SAG mill liners protect the steel mill shell from damage and require replacing every six months due to wear. The shutdown caused an interruption to concentrate production and dispatch. Following the maintenance interruption the shipping schedule will return to normal.
