

Investor Webinar

Sipa Resources Managing Director, Andrew Muir, to host a live investor webinar on Thursday, 13th June 2024

Sipa Resources Limited (ASX: SRI) ("Sipa" or "the Company") is pleased to advise that its Managing Director, Andrew Muir, will host a live investor webinar to provide an update on the Company's activities.

Following the appointment of a new management team late last year, Sipa has embarked on an active exploration program for 2024 focused on a suite of high-impact targets in some of Western Australia's best known mineral provinces.

The webinar will be held on **Thursday, 13th June 2024** commencing at **9.00am WST / 11.00am AEST**.

Investors can register to join the webinar via the following link:

About Sipa

Sipa Resources Limited (ASX: SRI) is an Australian-based exploration company focused on the discovery of gold and base metal deposits primarily in Western Australia.

- The Skeleton Rocks Project covers outcropping and buried greenstone units, prospective for gold, lithium and nickel-copper-platinum group element (Ni-Cu-PGE) deposits, with limited previous drilling completed.
- The Paterson North Copper-Gold Project is targeting intrusion related copper-gold mineralization concealed by more recent cover sediments and is located to the north-east of Rio Tinto's Winu discovery.
- The Barbwire Terrace base metals project involves an innovative joint venture with energy company, Buru Energy Limited.
- The Warralong Project is prospective for intrusion-hosted gold and lithium-tin-tantalum in the north Pilbara region, in an analogous, parallel structural setting to recent discoveries such as Hemi.
- At Wolfe Basin, extensive base metal anomalism and gossans provide targets for drill testing along a >40km long prospective horizon.
