Dear Sirs

BLAIR MINE UPDATE

Australian Mines Limited (ASX:AUZ) advises that the stoping of Area 57 ore at Blair mine has been temporarily suspended to allow necessary repairs to ladderways in the upper part of the emergency egress, following a routine audit by the Department of Industry and Resources.

Ore stoping will be resumed at the earliest opportunity. The timing of the resumption of stoping will be known once the current review of repair work has been completed and assessed and will be reported in a later release. Other activities, including underground development, drilling and dewatering of stage 2, are unaffected.

Every effort will be made to minimise the impact on cash flow while not compromising the safe conduct of operations.

Yours faithfully

DD Boyer
Managing Director
