It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the

Company, the Directors and the Company's management.

The distribution of this Prospectus in jurisdictions outside Australia may be restricted by law and persons who come into possession of this Prospectus should seek advice on and observe any of these restrictions. Any failure to comply with such restrictions may constitute a violation of applicable securities laws. This Prospectus does not constitute an offer of Shares in any jurisdiction where, or to any person to whom, it would be unlawful to issue in this Prospectus.

Refer to Section 3.8 for further information with respect to overseas investors.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Shares.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 7.2 for further details.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Shares issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

2. BACKGROUND TO THE OFFER

2.1 The Offer

The Company is not currently able to issue a cleansing notice under section 708A(5) of the Corporations Act due to its Shares having been suspended from trading on ASX for more than 5 trading days within the last 12 months. The primary purpose of the Offer is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus). In particular, the Offer is intended to remove any on-sale restrictions that may affect the Shares issued prior to or during the Offer period.

2.2 Placement

As announced on 3 October 2025, the Company received firm commitments from existing and new institutional, professional and sophisticated investors of the Company to raise a total of \$13,000,000 (before costs) through the issue of up to 130,000,000 Shares at an issue price of \$0.10 per Share (**Placement**).

All participants in the Placement (**Placement Participants**) will also receive one (1) option to acquire a Share for every two (2) Shares subscribed for and issued under the Placement (**Placement Options**). Each New Option will have an exercise price of \$0.075 and an expiry date that is two years from its issue date.

The Securities under the Placement are proposed to be issued to the Placement Participants (or their nominees) in two tranches as follows:

- (a) **Tranche 1:** 34,779,261 Shares to be issued under Listing Rule 7.1 and 29,863,740 Shares to be issued under Listing Rule 7.1A; and
- (b) **Tranche 2:** 65,356,999 Shares and 65,000,000 Placement Options to be issued subject to Shareholder approval at an extraordinary general meeting to be held on or about 1 December 2025 (**General Meeting**).

It is proposed that the Shares under Tranche 1 of the Placement will be issued on 13 October 2025, and the remaining Shares and Placement Options will be issued following Shareholder approval at the General Meeting.

3. DETAILS OF THE OFFER

3.1 The Offer

Pursuant to the Offer, the Company invites investors identified by the Directors to apply for up to 1,000 Shares at an issue price of \$0.10 per Share, to raise up to \$100 (before expenses).

The Offer will only be extended, and Application Forms will only be provided to, specific parties on invitation from the Directors.

All of the Shares offered under the Offer will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 5.1 for further information regarding the rights and liabilities attaching to the Shares.

3.2 Objective of Offer

The primary purpose of the Offer is to remove any trading restrictions that may have attached to Shares issued by the Company without disclosure under Chapter 6D of the Corporations Act prior to the Closing Date (including prior to the date of this Prospectus). In particular, the Offer is intended to remove any on-sale restrictions that may affect the Shares issued prior to or during the Offer period. Accordingly, the Company is seeking to raise only a nominal amount of \$100 under the Offer as the purpose of the Offer is not to raise capital.

Relevantly, section 708A(11) of the Corporations Act provides that a sale offer does not need disclosure to investors if:

- (a) the relevant securities are in a class of securities that are quoted securities of the body; and
- (b) either:
 - (i) a prospectus is lodged with the ASIC on or after the day on which the relevant securities were issued but before the day on which the sale offer is made; or
 - (ii) a prospectus is lodged with ASIC before the day on which the relevant securities are issued and offers of securities that have been made under the prospectus are still open for acceptance on the day on which the relevant securities were issued; and
- (c) the prospectus is for an offer of securities issued by the body that are in the same class of securities as the relevant securities.

3.3 Application under Offer

Applications for Shares under the Offer must be made by investors at the direction of the Company. Application Forms for the Offer will only be provided to specific parties on invitation from the Directors.

Payment for the Shares must be made in full at the issue price of \$0.10 per Share.

Completed Application Forms must be mailed or delivered to the address set out on the Application Form by no later than **5:00 pm (WST) on the Closing Date**.

3.4 Minimum subscription

There is no minimum subscription to the Offer.

3.5 Oversubscriptions

No oversubscriptions will be accepted by the Company.

3.6 Underwriting

The Offer is not underwritten.

3.7 Issue of Shares under Offer

The issue of Shares under the Offer will be issued in accordance with the ASX Listing Rules and will take place as soon as practicable after the Closing Date.

Pending the issue of the Shares or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Shares issued under the Offer will be mailed as soon as practicable after the issue of Shares occur.

3.8 ASX listing

Application for Official Quotation of the Shares offered pursuant to this Prospectus will be made within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the Shares offered pursuant to this Prospectus before the expiration of three months after the date of issue of the Prospectus, (or such period as varied by the ASIC), the Company will not issue any Shares and will repay all Application monies for the Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant Official Quotation to the Shares is not to be taken in any way as an indication of the merits of the Company or the Shares now offered for subscription.

3.9 Applicants outside Australia

The Offer does not, and is not intended to, constitute an offer in any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

The distribution of this Prospectus outside Australia may be restricted by law and therefore persons into whose possession this document comes should seek advice on and observe any such restrictions. In particular, this Prospectus may not be distributed in the United States or elsewhere outside Australia, except to institutional and professional investors in transactions exempt from local prospectus or registration requirements or investors who can participate in compliance with applicable securities laws. Any failure to comply with these restrictions constitutes a violation of those laws.

Residents of countries outside Australia should consult their professional advisers as to whether any government or other consents are required, or whether any formalities need to be observed should they wish to make an application to take up Shares on the basis of this Prospectus. The return of a duly completed Application Form will be taken to constitute a representation and warranty that there has been no breach of such laws and that all approvals and consents have been obtained.

5. RIGHTS AND LIABILITIES ATTACHING TO SHARES

The following is a summary of the more significant rights and liabilities attaching to Shares being offered pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

5.1 Rights and liabilities attaching to Shares

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) General meetings

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company. The Company's constitution permits the use of technology at general meetings of shareholders (including wholly virtual meetings) to the extent permitted under the Corporations Act, Listing Rules and applicable law.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) Dividend rights

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Shares contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of Constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

6. RISK FACTORS

6.1 Introduction

The Shares offered under this Prospectus should be considered as highly speculative and an investment in the Company is not risk free.

The Directors strongly recommend that prospective investors to consider the risk factors set out in this Section 6, together with information contained in this Prospectus.

The future performance of the Company and the value of the Shares may be influenced by a range of factors, many of which are largely beyond the control of the Company and the Directors. The key risks associated with the Company's business, the industry in which it operates and general risks applicable to all investments in listed securities and financial markets generally are described below.

The risks factors set out in this Section 6, or other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Shares. This Section 6 is not intended to provide an exhaustive list of the risk factors to which the Company is exposed.

If you do not understand any matters contained in this Prospectus or have any queries about whether to invest in the Company, you should consult your accountant, financial adviser, stockbroker, lawyer or other professional adviser.

6.2 Company specific

RISK CATEGORY	RISK
Additional requirements for capital	The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing to develop its business. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.
Going Concern	The Company's financial half year 30 June 2025 report (Financial Report) includes a note on the financial condition of the Company and the possible existence of a material uncertainty about the Company's ability to continue as a going concern. Notwithstanding the 'going concern' emphasis of matter included in the Financial Report, the Directors believe that the Company will have sufficient funds to adequately meet the Company's current exploration commitments and short-term working capital requirements. However, it is highly likely that further funding will be required to meet the medium to long-term working capital costs of the Company. There is significant uncertainty as to whether the Company can continue as a going concern which is likely to have a material adverse effect on the Company's activities.
Exploration and operation	The Company's projects are at various stages of exploration, and potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that future exploration of any of the projects, will result in the discovery of an economic resource.

RISK CATEGORY	RISK
	Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited. The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company. The success of the Company will also depend upon the Company being able to maintain title to the mineral exploration licences comprising the projects and obtaining all required approvals for their contemplated activities. In the event that exploration programmes at any projects prove to be unsuccessful this could lead to a diminution in the value of that project, a reduction in the cash reserves of the Company and possible relinquishment of one or more of the mineral exploration licences comprising that project.
Foreign Resource Estimate – Yoquivo Project	As announced on 28 October 2024, the Company acquired the Yoquivo Project in Mexico which contains a foreign resource estimate has been prepared in accordance with the Canadian National Instrument 43-101 (NI 43-101). The Company is undertaking fieldwork on the Yoquivo Project in order to classify the Foreign Estimate as a Mineral Resource in accordance with the 2012 JORC Code. It is uncertain that following evaluation and/or further exploration work that the foreign resource estimate will be able to be reported as a Mineral Resource in accordance with the JORC Code 2012.
Grant of future authorisations to explore and mine	If the Company discovers an economically viable mineral deposit that it then intends to develop, it will, among other things, require various approvals, licence and permits before it will be able to mine the deposit. There is no guarantee that the Company will be able to obtain all required approvals, licenses and permits. To the extent that required authorisations are not obtained or are delayed, the Company's operational and financial performance may be materially adversely affected.
Mine development	Possible future development of mining operations at the projects is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services. If the Company commences production on one of the projects, its operations may be disrupted by a variety of risks and hazards which are beyond the control of the Company.

RISK CATEGORY	RISK
	No assurance can be given that the Company will achieve commercial viability through the development of any of the projects. The risks associated with the development of a mine will be considered in full should any of the projects reach that stage and will be managed with ongoing consideration of stakeholder interests.
Renewal and surface access	The Company's claims are subject to periodic renewal. The renewal of the term of the claims is subject to compliance with applicable mining legislation and regulations and the discretion of the relevant mining authority. Renewal conditions may include increased expenditure and work commitments or compulsory relinquishment of areas of the claims. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position and/or performance of the Company. The Company considers the likelihood of tenure forfeiture to be low given the laws and regulations governing exploration in Australia, Mexico and the United States and the ongoing expenditure budgeted for by the Company. However, the consequence of forfeiture or involuntary surrender of a granted mineral claim for reasons beyond the control of the Company could be significant.
Commodity price volatility and exchange rate risk	If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macroeconomic factors. These factors may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities. Furthermore, international prices of various commodities are denominated in United States dollars, whereas expenditures of the Company are and will be taken into account in Australian and Mexican currency, as well as United States dollars, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and other currencies as determined in international markets. As a result, any significant and/or sustained fluctuations in exchange rates could have a materially adverse effect on the Company's operations, financial position (including revenue and profitability) and performance. The Company may undertake measures, where deemed necessary by the Board, to mitigate such risks.
Political and economic conditions	The Company's exploration, development and production activities will be conducted in Mexico. As a result, the Companies operations are exposed to various levels of political, economic and other risks and uncertainties. These risks include but are not limited to, the existence or possibility of political or economic instability, conflict, terrorism, hostage taking and military repression.

RISK CATEGORY	RISK
Government regulation and political risk in the mining industry	The Company's operating activities are subject to the laws and regulations of Mexico governing expropriation of property, health and worker safety, employment standards, waste disposal, protection of the environment, mine development, land and water use, prospecting, mineral production, exports, taxes, labour standards, occupational health standards, toxic wastes, the protection of endangered and protected species and other matters. Where required, obtaining necessary permits and licences can be a complex, time-consuming process and the Company cannot be sure whether any necessary permits will be obtainable on acceptable terms, in a timely manner or at all. The costs and delays associated with obtaining necessary permits and complying with these permits and applicable laws and regulations could stop or materially delay or restrict the Company from proceeding with any future exploration or development of its projects. Any failure to comply with applicable laws and regulations or permits, even if inadvertent, could result in interruption or closure of exploration, development or mining operations or material fines, penalties or other liabilities.
Bribery, corruption and other improper acts	The Company may incur fines or penalties, damage to its reputation or suffer other adverse consequences if its Directors, officers, employees, consultants, agents, service providers or business partners violate, or are alleged to have violated, anti-bribery and corruption laws in Australia, Mexico, the United States or any of the jurisdictions in which it operates. The Company cannot guarantee that its internal policies and controls will be effective in each case to ensure that it is protected from reckless or criminal acts committed by its Directors, officers, employees, consultants, agents, service providers or business partners that would violate Australian or Mexican laws or the laws of the United States of America. Any such improper actions could subject the Company to civil or criminal investigations in these countries or any other country that could lead to substantial civil or criminal monetary and non-monetary penalties against the Company and could damage the Company's reputation. Even the allegation or appearance of improper or illegal actions could damage the Company's reputation and result in significant expenditures in investigating and responding to such actions and may in turn have an adverse effect on the Company's future financial performance and position.
Climate Risk	There are a number of climate-related factors that may affect the operations and proposed activities of the Company. The climate change risks particularly attributable to the Company include: (a) the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market changes related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. These examples sit amongst an array of possible restraints on industry that may further impact the Company and its profitability. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the

RISK CATEGORY	RISK
	Company will not be impacted by these occurrences; and (b) climate change may cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.
Joint venture parties, agents and contractors	There is a risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party, or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.
Litigation risks	The Company is exposed to possible litigation risks including intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance and financial position. The Company is not currently engaged in any litigation.

RISK CATEGORY	RISK
Dividends	Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.
Taxation	The acquisition and disposal of Shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All prospective investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally. To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Prospectus.
Reliance on key personnel	The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.
Economic conditions and other global or national issues	General economic conditions, laws relating to taxation, new legislation, trade barriers, movements in interest and inflation rates, currency exchange controls and rates, national and international political circumstances (including outbreaks in international hostilities, wars, terrorist acts, sabotage, subversive activities, security operations, labour unrest, civil disorder, and states of emergency), natural disasters (including fires, earthquakes and floods), and quarantine restrictions, epidemics and pandemics, may have an adverse effect on the Company's operations and financial performance, including the Company's exploration, development and production activities, as well as on its ability to fund those activities. General economic conditions may also affect the value of the Company and its market valuation regardless of its actual performance.
