Announcement for Immediate Release

**France Telecom Mobile Satellite Communications signs with
Beam Communications**

Tele-IP announced today that its wholly-owned subsidiary, Beam Communications, has appointed France Telecom Mobile Satellite Communications, as a Reseller of Beam's Satellite products to the global satellite communications market. France Telecom Mobile Satellite Communications SA is a 100% -owned subsidiary of France Telecom.

France Telecom Mobile Satellite Communications provides global voice and data telecommunication services via satellite, offering a complete coverage of the earth and oceans and markets three ranges of mobile satellite services, namely, Inmarsat, Thuraya and Iridium.

France Telecom Mobile Satellite Communications has a highly active distribution network abroad of over 200 distributors, and has subsidiaries in 9 countries, including The Netherlands, France, Germany, Middle East, Dubai, Algeria, USA, Singapore, Hong Kong and China.

The company's services are mainly used by professionals, especially by those who are far from their "base," operating in areas not serviced by terrestrial networks. Its business clientele has a strong proportion of customers in the maritime industry (navy, merchant shipping, cruises, fishing, sailing, off-shore platforms etc.), and among professionals on land, including media, NGOs, security, construction, oil & gas and transportation sectors.

In 2004, France Telecom Mobile Satellite Communications activities generated a turnover of €160 million. FTMSC has a 20% share of the overall market for Inmarsat, Iridium and Thuraya mobile satellite services.

Mr Floris Birkman, Iridium Product Manager, France Telecom Mobile Satellite Communication Services, said "Beam has developed a range of products that have now become integral to France Telecom's overall product offering for Iridium solutions. Beam continues to develop products for specific market applications and it is important for us to offer our customers Beam's products"

Mr Michael Capocchi, General Manager of Beam Communications, said "The appointment of France Telecom Mobile Satellite Communications as another major Reseller in Beam's distribution network is very positive for Beams continuing expansion into the global satellite markets. The global office of France Telecom Mobile Satellite Communications will be integral in providing added distribution into the Asia and Middle East markets especially."

Beam continues to grow its global reseller network to support the increasing demand for Beam's satellite solutions into the rapidly growing asset tracking and the fixed and mobile.

About France Telecom Mobile Satellite Communications SA

About Beam Communications Pty Ltd

The Beam subsidiary was established in late 2002, making a substantial investment in the development and manufacturing of Remote Satellite Communications solutions for the global telecommunications market. Beam became the first company to design and manufacture a fully compliant POTS [Plain Old Telephone Service] emulation system for the Iridium Satellite network.

Now one of the leading manufacturers of Iridium-based satellite communications equipment, Beam offers the widest range of Iridium solutions across all market segments. Beam prides itself on its ability to develop broad market applications as well as specific dedicated products and solutions for all market applications.
