Dear Sir,

Announcement for Immediate Release

KDDI, Japan, signs with Beam Communications

Tele-IP announced today that its wholly-owned subsidiary, Beam Communications Pty Ltd, has appointed KDDI Network & Solutions Inc of Japan, as a Reseller of Beam's Satellite products to the global satellite communications market.

KDDI's strategic focus is on the sale of consulting services, providing network solutions including the design, development, manufacture, sale, operation and maintenance of telecommunications systems and equipment.

KDDI Network & Solutions Inc. received authorization from the Japanese Ministry of Internal Affairs and Communications to offer mobile phone and data products and services in Japan through Iridium's global satellite network, in June of 2005. Since that time, Beam has been working closely with KDDI to support their Iridium business with tailored product solutions.

"We expect a strong response from local governments and companies involved in developing reaction plans in the event of an earthquake or other natural disaster," said Yuzuru Takayama, General Manager, Marketing and Sales department, Satellite Business Division, KDDI Network & Solutions. "In addition, the equipment we have been trialing from Beam Communications over the last few months will provide a cost-effective product solution for many of our customer applications", he said.

Mr Michael Capocchi, General Manager of Beam Communications, said "The appointment of KDDI as a strategic Reseller in Beam's distribution network is extremely positive. With KDDI being the license holder for Iridium services in Japan, KDDI is a key platform in enabling Beam to address the Japanese market opportunities."

"Beam has worked very closely with KDDI since their license was issued in 2005 and now that a number of customer applications are reaching commercialisation, this agreement will enable KDDI to commence actively selling Beam product to it's customers", said Mr Capocchi.

About KDDI Network & Solutions Inc.

KDDI Network & Solutions Inc., a subsidiary of KDDI Corporation, based in Tokyo, provides communication services, consulting, design, development, manufacture, sale, operation and maintenance of telecommunications systems, as well as information and communications networks.

About Beam Communications Pty Ltd

The Beam subsidiary was established in late 2002, making a substantial investment in the development and manufacturing of Remote Satellite Communications solutions for the global telecommunications market. Beam became the first company to design and manufacture a fully compliant POTS (Plain Old Telephone Service) emulation system for the Iridium Satellite network.

Now one of the leading global manufacturers of Iridium-based satellite communications equipment, Beam offers the widest range of Iridium solutions across all market segments. Beam prides itself on its ability to develop broad market applications as well as specific dedicated products and solutions.
