

Graphite Mine Development Project Corporate Video

8 September 2016

Black Rock Mining Limited (ASX:BKT) ("Black Rock Mining" or "the Company") is pleased to launch its September 2016 Mahenge Graphite Development Corporate Video. The video is available on the Company's website and has been launched, as the company moves towards the following key strategic milestones:

- Upgrade and increase to the Company's JORC resource
- Results from our Cascades drilling programme
- Further metallurgical analysis to optimise the TGC purities and yields
- Delivery of a Pre-Feasibility Study
- Securing offtake supply agreements
- Delivery of a Definitive Feasibility Study

The video is available for viewing on the Company's website at the following link:

About Black Rock Mining

Black Rock Mining Limited is an Australian based company listed on the Australian Securities Exchange. The Company has graphite tenure in the Mahenge region, Tanzania, a country which hosts world-class graphite mineralisation. Drilling of the Epanko north prospect was completed in August 2015 and infill drilling of two new graphite discoveries, the Ulanzi and Cascade prospects, is nearing completion. The Company has announced a Mahenge JORC compliant resource of 131mt @ 7.9% TGC for 10.4m tonnes of contained Graphite and then plans to commercialise the project.

The company is building a skill and knowledge base to become an explorer, developer and diversified holder of resources. Shareholder value will be added by:

- identifying and securing projects with economic potential
- focussing on tenure that can be commercialised by converting into JORC compliant resources; and
- taking these resources into production

Our focus is on establishing a JORC resource from three advanced prospects at Mahenge, Ulanzi, Epanko north and Cascade, whilst further adding resource upside through exploration at Kituti.
