December 2024 Quarterly Activities Report

Significant Exploration Progress at Bleiberg Zinc-Lead-Germanium Project and Falcon Lake Lithium Discoveries

Key highlights:

- **Austrian Footprint Expands:** The Company has expanded its Austrian footprint with the expansion of the Bleiberg project area (subsequent event) and the staking of its Hochobir project, approximately 600 exploration claims that cover 290km² of tenure prospective for Lead-Zinc-Germanium mineralisation within the Drauzug-Gurktal nappe system.
- **Bleiberg Project Advances:** The technical team, led by CEO Nigel Broomham and Chief Geological Advisor Dr. Simon Dorling, completed a successful fieldwork program, verifying historical data, assessing target areas, collecting geological data and refining drilling targets. The Company is preparing to submit its maiden drilling permit application for the Bleiberg Zinc-Lead-Germanium Project.
- **High-Grade Results:** Exceptionally high-grade thick lithium intercepts encountered at Falcon Lake Lithium Project, including 54.1m @ 1.74% Li₂O (24FL-107) and 55.95m @ 1.47% Li₂O (24FL-108). These assays represent the Company's best lithium drill results to date, with mineralisation remaining open along strike and at depth at the prospect.
- **Expanding Mineralisation:** The drilling at Falcon Lake shows significant mineralisation, especially at the Falcon Little Lake target and Falcon East Extension. The new drilling has expanded the mineralised zones demonstrating the potential for scale across the 5km prospective corridor.
- The Company continues to evaluate potential value-adding M&A opportunities in multiple commodities in Tier-1 jurisdictions globally.

Battery Age Minerals Ltd (ASX: **BM8**, "**Battery Age**", or "**the Company**") is pleased to provide the following summary of activities undertaken during the quarter ending 31 December 2024 ("**Quarter**").

Project Activities

Bleiberg Project (Bad Bleiberg, Austria)

During the Quarter, the Company progressed with the compilation and integration of historical data over the Bleiberg Project and advanced the prospectivity assessment and targeting strategy. CEO Nigel Broomham and Chief Geological Advisor Dr. Simon Dorling completed a successful fieldwork program at Bleiberg, verifying historical data, assessing target areas, and refining drilling targets. The upcoming exploration will focus on extending known mineralisation and exploring the West Extension.

The team has also furthered relationships with local stakeholders, including municipal offices, the Austrian Forestry Company, and the Mining Authority. Dr. Dorling and Mr. Broomham are in the process of obtaining the company's maiden drilling permit imminently.

Figure 1: BM8 team in Bad Bleiberg in October with Mayor Christian Hecher

Figure 2: Dr Simon Dorling, at the Meisternock target area during recent field program at the Bleiberg project.

Bleiberg Fieldwork Update

Recent fieldwork, led by Mr Broomham and Dr. Dorling, has uncovered a sample of Germanium concentrate from historical mining at Bleiberg. This marks a key milestone as the company focuses on the project to meet the growing demand for critical minerals used in advanced semiconductor technologies. The Company dispatched samples for grade testing and assess Germanium isotope ratios during the Quarter. These tests were designed to help confirm the potential of the mineralisation and its viability as a strategic supplier for the global semiconductor market.

The company is committed to advancing the Bleiberg Germanium Project and will update the market on the results of the testing once available.

Subsequent to the Quarter end, Battery Age has successfully tested and confirmed the presence of Germanium-76 (Ge76) in the abovementioned concentrate from historical mining operations at the Bleiberg mine. The testing, which was conducted as part of the Company's ongoing exploration activities, has successfully identified Ge76 at an atom abundance of 7.41% (*Table 1*), in the sample taken from historical mining and beneficiation operations. This breakthrough represents a pivotal moment for the Company as it works to unlock Bleiberg's full potential as a significant source of critical minerals for advanced technology applications.

	Abundance (Atom%)
Ge70	21.12
Ge72	27.47
Ge73	7.71
Ge74	36.30
Ge76	7.41

Table 2: Results from Ge Isotope separation analysis conducted on concentrate from historic Bleiberg mine. The analysis is carried out by ICP-SFMS (ELEMENT XR, ThermoScientific) using internal standardization and external calibration with bracketing isotope SRMs. (Refer announcement 23 January 2025).

Project Expansion - Carinthia, Austria

The Company staked approximately 600 exploration claims that cover 290km² of tenure prospective for Lead-Zinc-Germanium mineralisation during the Quarter. The new project area is a part of a regional geological domain that contains evidence of lead and zinc mineral occurrences, adits and historical workings which extend over 30km corridor from west to east. The project area covers historic workings and mineral occurrences; Hochobir, Remshenig, Topitza and Petzen as well as the Fladung Germanium showing which has recorded historic grades of up to 900 g/t Ge (Cerny and Schroll, 1995, Schroll 1996, Höll et al., 2007)(refer announcement 23 December 2024).

Subsequent to the Quarters end, Battery Age has additionally now further expanded its Bleiberg Zinc-Lead-Germanium Project in Carinthia, Austria, increasing the projects size from 80km² to 142km². The expanded area, covering a 26km stretch, enhances exploration opportunities, positioning the Company for continued growth in essential minerals. Following this expansion and the recent staking of the Hochobir Project, Battery Age is now one of Austria's largest landholders for germanium-prospective tenure. The company plans to integrate this expanded land into its exploration strategy, including evaluating historical concentrates and tailings for their suitability in advanced technological applications.

Figure 3: The Hochobir Zinc Lead Germanium Project is located approximately 60km east of The Company's historic Bleiberg project in Austria.

Figure 4: Bleiberg Zinc Lead Germanium Project Concessions highlighting recent expansion in blue.

Figure 5: Bleiberg Zinc Lead Germanium Project located in the state of Carinthia, Austria.

Falcon Lake Lithium Project (Ontario, Canada)

During the Quarter, the Company was pleased to announce a strong start to the targeted 2024 winter drilling program at its Falcon Lake Lithium Project in Ontario, Canada. The first 4 holes completed at the Falcon Little Lake pegmatite target since the commencement of winter drilling operations, all intersected significant mineralisation, expanding the mineralised zone both down dip and to the south.

Subsequent to the Quarters end, the Company reported the final assay results from its 2024 winter drilling campaign at the Falcon Lake Lithium Project. The results confirmed significant mineralisation, including 55m-thick spodumene-bearing pegmatite intercepts at the Falcon Little Lake target.

A total of 15 holes were drilled in 2024, with 14 showing significant mineralisation. The winter drill program focused on the southern extension, revealing high grades and thickening mineralisation. A geophysical survey in 2023 identified a magnetic low to the south, correlating with pegmatite bodies, further enhancing this extension's potential.

- **Significant intercepts include:**

- **54.1 metres @ 1.74% Li₂O** from 100.85m down-hole, 24FL-107
- **55.95 metres @ 1.47% Li₂O** from 222.2m down-hole, 24FL-108
- **43.0 metres @ 1.62% Li₂O** from 62.2m down-hole, 24FL-114
- **22.55 metres @ 1.74% Li₂O** from 39.3m down-hole, 24FL-113
- **19.7 metres @ 1.62% Li₂O** from 57.5m down-hole, 24FL-112
- **21.6 metres @ 1.46% Li₂O** from 115.7m down-hole, 24FL-110

The Falcon Little Lake pegmatite remains open at depth and to the south, with future drilling planned. The project shows strong upside potential, with only 5 of 30 high-priority targets drilled so far. Ongoing exploration will focus on these targets to expand and identify additional spodumene-bearing pegmatites.

Figure 6 – Falcon Little Lake discovery plan view. 2024 Winter drilling highlighted. (refer announcement 28 January 2025)

Hole	From_m	To_m	Interval (m)	Li ₂ O %
24FL-107	42.05	49.95	7.9	1.01
24FL-107	100.85	154.95	54.1	1.74
24FL-108	222.2	278.15	55.95	1.47
24FL-109	87.65	91.65	4	1.71
24FL-109	178.05	184.5	6.45	1.19
24FL-109	211.15	218	6.85	1.57
24FL-110	115.7	137.3	21.6	1.46
24FL-111	30.6	37.2	6.6	1.72
24FL-111	41.3	46.85	5.55	1.56
24FL-112	57.5	77.2	19.7	1.62
24FL-113	39.3	61.85	22.55	1.74
24FL-114	62.2	105.2	43.0	1.62

Figure 7 – Cross Section at Falcon Little Lake, displaying holes 24FL-107 & 24FL-108 intercepts

Jesse Lake Lithium Project (Ontario, Canada)

No exploration activities were conducted during the Quarter.

Tidili Project (Tidili, Morocco)

No exploration activities were conducted during the Quarter.

King Tut Project (Argentina)

No exploration activities were conducted during the Quarter.

Bloom Lake Project (Bloom Lake, Canada)

No exploration activities were conducted during the Quarter.

OJEP Program 2024-2025

Battery Age was accepted into the Ontario Junior Explorers Program (OJEP) which is an initiative designed to support and promote the growth of junior mining exploration companies in Ontario. The program provides participating companies with access to various resources, including funding opportunities up to \$200k CAD for eligible exploration activities. Its primary goal is to enhance exploration activities, foster innovation, and facilitate collaboration among companies, stakeholders, and government entities. By nurturing the junior exploration sector, the OJEP aims to stimulate economic development and contribute to the sustainable growth of Ontario's mining industry.

Annual General Meeting

The Annual General Meeting of the Company was held on Friday, 29 November 2024. The Company confirms that all resolutions put forward to shareholders were passed by a poll. A copy of the voting summary is available on the ASX Company's announcement platform and the Company website.

Corporate and Finance

Corporate

Battery Age announced on 7 October 2024 a \$1.0 million (before costs) placement to sophisticated investors via the issue of 10,000,000 ordinary shares at \$0.10 per share to advance explorations activities and support working capital expenditure.

Business Development

The Company continues to actively identify and review potential strategic opportunities that are value accretive and complement existing assets to build a portfolio of highly prospective projects across a suite of commodities in-line with the Company's strategic objectives. There is no certainty that current discussions will result in new project acquisitions.

Appendix 5B and Use of Funds

The Appendix 5B quarterly cashflow report for the Quarter is submitted separately.

The Group closed the Quarter with a cash balance of \$404k. Exploration expenditure during the Quarter totalled \$763k (unaudited).

A comparison of the Company's actual expenditure since readmission to the Official List of ASX to 31 December 2024 against estimated expenditure in the use of funds statement in the Prospectus is set out below in accordance with ASX Listing Rule 5.3.4. The table also shows the Company's expenditure for the December quarter, as required by ASX Listing Rule 5.3.1:

	2023 Prospectus	Use until 31 Dec 2024	Use For Sep 24 Quarter
Tidili Project	1,295,000	1,325,058	6,728
Falcon Lake Project	2,050,000	7,845,531	659,430
Bloom Lake Project	30,000	31,769	-
King Tut Project	100,000	64,151	11,817
Bleiberg Project	1,215,000	458,032	84,820
Administration and corporate costs	1,328,000	3,563,754	199,913
Costs associated of the Public Offer	658,000	603,094	-
Working Capital & M&A budget for complementary assets	343,000	705,702	-
	7,019,000	14,597,091	962,708

The material use of funds variance explanations is outlined below:

Note: A capital raise of \$6.4m was completed in August 2023 and is outside the Use of Funds estimate in the prospectus announced on the 2 February 2023.

December Quarter Spend:

- Falcon Lake Project: Payments relating to exploration drilling, milestone payment for Falcon Extension and tenement compliance
- Tidili Project: Payments relating to the close out of the Tidili project
- Bleiberg Project: Payments relating to recent field trip to Bleiberg, mapping soil sampling
- Administration: Payments relating to the Quarter for employee, directors, plus general overhead.
- OJEP grant of C\$200k was received in the December quarter from the Ontario Government

Use of Funds variance Prospectus to Date

- Operational expenditure on the Falcon Lake project were accelerated due to positive results from the initial drill program and further expanded with the acquisition of the Falcon Lake Extension project area in Q4 CY2023. A capital raise was completed in August 2023 to support further exploration and drilling and this spend is included in the above table.
- Administration and corporate costs increased in support of the accelerated and expanded exploration campaign at Falcon Lake.
- Working capital includes an acquisition of EQN shares in Q1 CY2024.
- Ongoing operational and exploration expenditure will be monitored and adjusted in line with available cash to meet tenement expenditure requirements.

Payments to Related Parties

Pursuant to section 6 of the Company's Appendix 5B, and as required under ASX Listing Rule 5.3.5, during the Quarter the Company paid \$49k to the Directors for remuneration.

Capital Structure

The capital structure at the end of the Quarter is as follows:

- 103,399,140 Ordinary Shares.
- 42,904,923 Options.
- 1,735,000 Performance Rights.
- 7,000,000 Performance Shares.

Attendance at Resources Rising Starts Conference

BM8's Chief Executive Officer, Mr Nigel Broomham, presented the Company's strategy for progressing its critical minerals projects in Canada and Austria at the Resources Rising Stars Conference held in early September 2024.

Interests in Mining Tenements as at 31 December 2024

1. Battery Age's interest in the Hamersley Iron Ore Project is held indirectly by way of its investment held in Equinox Resources Limited.
2. In October 2023, the Company acquired a 2 year option over these tenements, (i) an initial 40% interest by making a cash payment of CAD\$100k and issuing 250k fully paid ordinary shares (completed); (ii) acquisition of an addition 40% interest by making a cash payment of CAD\$75k and issuing 250k fully paid ordinary shares on or before the first anniversary of stage (i) (completed) and (iii) acquisition of an addition 10% interest by making a cash payment of CAD\$15k and issuing 250k fully paid ordinary shares on or before the second anniversary of stage (i) (outstanding). The Company will retain the respective % interest acquired under the respective staged option, in the event that the subsequent option(s) are not exercised.
3. The Company may acquire the final 10% of the above identified Falcon Lake tenements by paying an amount equal to the lower of (i) the price determined by an independent valuation, or (ii) A\$2,000,000.
4. The Company may acquire a further 14% interest (total 65%) in the above Bleiberg tenements within 36 months of acquiring the abovementioned 36% interest by incurring an additional C\$3,500,000 in expenditure on the project. The Company may acquire the final 15% interest (total 80%) in the above Bleiberg tenements within 6.5 years from executing the Bleiberg Addendum Agreement upon completion of a Bankable Feasibility Study that is compliance to JORC and indicates the project will have a production rate of at least 100,000 tonnes per year.
5. The Company is taking steps to relinquish the Company's interest in the Tidili Project to the in-country partners.

- END -

Compliance Statement

This report contains information on the Falcon Lake and Jessie Lake Projects extracted from an ASX market announcement dated 8 December 2022, 2 February 2023, 13 June 2023, 26 July 2023, 2 August 2023, 16 August 2023, 6 September 2023, 14 September 2023, 5 October 2023, 10 October 2023, 16 October 2023, 25 October 2023, 1 November 2023, 30 November 2023, 13 December 2023 18 April 2024, 8 July 2024, 11 July 2024, 12 August 2024, 12 September 2024, 20 November 2024 and 28 January 2025 released by the Company and reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code).

This report contains information on the Bleiberg and Hochobir Projects extracted from an ASX market announcement dated 8 December 2022, 2 February 2023, 13 July 2023, 26 February 2024, 26 March 2024, 16 May 2024, 18 December 2024 and 22 January 2025 released by the Company and reported in accordance with the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The original market announcement is available to view on www.batteryage.au and www.asx.com.au. Battery Age is not aware of any new information or data that materially affects the information included in the original market announcement.

Forward Looking Statements

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs. Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation. Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control. Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
