Dear Madam,

## Turkish Production and Exploration Activity

### Gas Sales

Average daily sales of joint venture gas from the Gocerler Gas Field in Western Turkey, for the last 13 days of February 2003 were 13.2 million standard cubic feet per day (375,474 standard cubic metres per day). The 9% increase over the previous reported period is a return to normal demand after the national holiday.

### Pipeline Construction

Construction of the spur pipeline off the TPAO trunkline has been completed and branch lines into customer properties are being installed. Progress has been delayed about 4 weeks, mainly by severe winter weather, but the first connections are expected within a few days.

### Gocerler-5 Appraisal-Development Well

As reported on 21 February, the Gocerler-5 well tested at a rate of 10.4 million cubic feet per day (1/2 inch choke) and will be tied into the central processing plant as soon as practicable.

The Gocerler Gasfield is operated by Amity and owned jointly by Amity and Turkiye Petrolleri A.O. (TPAO).
